Ph.D. students are required to register for PSC 500 Departmental Seminar I in the Fall semester and PSC 501 Departmental Seminar II in the Spring semester. These courses are professional socialization seminars that are offered on a pass/fail basis for .5 credit each. These courses cover numerous topics such as effective teaching strategies; attending and participating in political science conferences; publishing your work in professional journals; the academic job market; and ethical issues facing instructors and researchers.

These courses will meet approximately once each month, with the Director of Graduate Studies and/or a faculty member coordinating the discussion. In addition to the class meetings, students will also attend research presentations and job talks as part of the professionalization process.

Academic Misconduct Information

Refer to the Graduate School academic misconduct policy (p. 7) for more information.

Withdrawals and Leave of Absence Information

Refer to the Graduate School withdrawals and leave of absence policy (p. 206) for more information.

Academic Grievances Information

Refer to the Graduate School academic grievance procedure (p. 219) for more information.

Scholastic Requirements

Refer to the Graduate School scholastic requirements (p. 204) page for more information.

Graduate School Deadlines Information

Refer to the Graduate School student deadlines page for more information.

Application for Graduate Information

Refer to the Graduate School Doctoral degree requirements (p. 23) page for more information.

Doctoral Degrees

The University offers several types of doctorates, each of which is described below.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

Doctor of Philosophy Degree

The Doctor of Philosophy (PhD) degree is regarded as the researcher's degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of

these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The Doctor of Philosophy (PhD) degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

Field of Specialization - A defined field of specialization as outlined in the student's Plan of Study is required of all candidates for the Doctor of Philosophy degree. A minimum of 36 semester hours of non-dissertation course credit is required. Departments or programs may require more than this minimum. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 18 hours of dissertation research.

Research skill/language requirements - There is no university wide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments.

Interdisciplinary Studies

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 765) at the Graduate School's website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

Doctor of Education Degree

The Doctor of Education (EdD) requires a minimum of two years of graduate study beyond the master's degree for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate coursework research beyond the master's degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 488) section of the Graduate Catalog, there are specific regulations governing the EdD program.

Doctor of Musical Arts Degree

The Doctor of Musical Arts (DMA) degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and

other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 356) section of the Graduate Catalog.

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) (p. 730) is a practice-focused degree that is detailed in the Nursing section of this Catalog.

Doctor of Social Work

A Doctor of Social Work (DSW) degree is a practice doctorate degree in social work. It provides coursework on theory and skills in social work practice that are more advanced than what one would typically experience in an MSW program for social work.

Admission to Doctoral Degree Programs

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master's degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student's doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

Residency Requirements

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student's doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog's Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a "B" grade or better may be transferred. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.
2. PhD Programs Only: A student holding an earned, in-field master's degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. When exercising this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School. The requested transfer credit hours must be listed on the PhD Plan of Study as MSC501 under the transfer credit section. If the in-field master's degree was awarded *more than six years prior to admission to the current doctoral degree program*, the graduate program director or department head/chair must also submit to the Graduate School for evaluation, a Field-Related Employment Since Earning Master's Degree form with the student's CV must be submitted by the department through the UA DocuSign system in myBama. In addition, the department is asked to provide the following, attached to the approved Plan of Study :
 - a. An annotated work history from the student. This history should include job titles and major duties for all positions since earning a master's degree.
 - b. A brief paragraph from the corresponding faculty member, attesting that he/she has reviewed the work history and how that work applies to the current Ph.D. degree program.

The Graduate School will make the final determination about whether up to 24 prior master's hours can be applied to the Ph.D. requirements.

PhD awarding departments that want to participate in offering Option 2 to their doctoral students, need to "opt in" by informing the graduate dean in writing that they wish to be among the approved departments.

Consideration of transfer of credit or the acceptance of an earned master's degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department's

graduate coordinator regarding your department's transfer policy. Dissertation Research (699) may not be transferred in from an outside institution.

Time Limits

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master's, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

The Continuous Dissertation or Document Registration requirement for 699 and 799 enrollment will be waived for the intervening years between the student's cessation of doctoral work and re-admission.

Plan of Study

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School by the time the student has completed 30 coursework hours.

The PhD, DMA, and DSW Plans of Study are submitted by the department through the UA DocuSign system in myBama. The Plan of Study for other doctoral programs (Ed.D., DNP) are available from the student's department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

A copy of the approved Plan of Study must be submitted to the Graduate School when the department submits the Admission to Candidacy for Doctoral Degree form through the UA DocuSign system in myBama.

Preliminary or Comprehensive Examination

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student's supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student's research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy

The designation of candidacy reflects the student's demonstration of foundational knowledge and readiness to conduct independent research, in the discipline. The requirement for advancing to candidacy is determined by the faculty of the degree program and delineated in the program's section of the Graduate School Catalog and the program's Graduate Student Handbook.

Advancement to candidacy should involve either:

- passing the qualifying (major or preliminary) examination
- completing of all required coursework as listed on the approved program of study
- presenting or defending a dissertation prospectus or proposal
- or some combination of these milestones.

Students are not eligible to register for 699 or 799 credit hours until they have been advanced to candidacy. The Department Chair or Department Director of Graduate Studies, or their designee, shall submit the Admission to Candidacy for the Doctoral Degree form to the Graduate School during the semester that the student meets the program's candidacy requirements.

Continuous Doctoral Research Hours Registration

Once a student meets their program's requirement for admission to candidacy and the designated Department administrator submits the Application for Admission to Candidacy form to the Graduate School, the student may enroll in 699 (dissertation/document research) or 799 (document/project research).

Once initiated, the student must pursue completion of the dissertation/document/project without interruption by enrolling in 699/799 each fall and spring semester of the academic year.

The only time summer registration is required for dissertation/document/project research is when a doctoral student is graduating in August or defending the dissertation/document/project during the summer semester.

Ph.D. students must complete a minimum of 18 hours of dissertation research credits (699). Ph.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.

Ed.D. students must complete a minimum of 12 dissertation research credits (699). Ed.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.

DMA students must complete a minimum of 4 hours of document research (MUS 699). DMA students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in MUS 699 until degree completion.

DNP Students must complete project research hours in NUR 795-798. DNP students must maintain continuous enrollment for a minimum of 1 hour in a department-specified course until degree completion.

DSW Students must complete a minimum of 9 hours of project research (SW 799). DSW students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in SW 799 until degree completion.

The amount of dissertation/document/project research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

Dissertation Committee

The dissertation committee may be formed early in the dissertation research process, or shortly before the dissertation proposal is approved. It is expected that the committee will be formed and approved before significant progress is made on the dissertation. The committee must be formally established via a process initiated by the student and requiring the consent of each committee member, followed by Graduate School review for compliance with the regulations outlined below. [Click here for instructions on the process of establishing the committee.](#)

The committee must consist of at least five members. It may have additional (voting or nonvoting) members if deemed appropriate. At least one of the committee members must be from outside the student's major department. These external members may be from another academic department at UA, from other universities, or from industry or the professional field. In all cases, these members external to the department/program must be appointed to UA's Graduate Faculty by the dean of the Graduate School, and must have significant professional qualifications that directly contribute to the depth and rigor of the dissertation.

All members of the dissertation committee must hold Graduate Faculty status at The University of Alabama. The chair of the committee must hold Full Graduate Faculty status; others may be Full, Associate, or Affiliate members of the Graduate Faculty. A majority of the Dissertation Committee members must be full-time regular University of Alabama

faculty (that is, full-time instructor, assistant professor, associate professor, or professor).

Dissertation Proposal

The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction that provides an overview and states the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal's format with respect to specifics such as the length of the introduction and level of detail of the literature review. Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. The dissertation must be based upon research completed while the student is enrolled at The University of Alabama.

The subject of the dissertation must be approved by the student's dissertation committee and by the dean of the Graduate School. The final dissertation may take the form of a traditional, chapter-based document or a series of full-length publication-ready manuscripts which are part of a larger, cohesive body of work. The format (traditional vs. article-style) must be approved by the committee in accordance with the standards for the program and the discipline.

For article-style dissertations, the document must contain a minimum of three articles, in addition to introductory and concluding materials. A single abstract must accompany the document. In addition to an introduction presenting the unifying framework that supports the research, the document must include a concluding section that summarizes the importance of the work, integrates the major findings, and discusses the implications for the overall body of work.

Individual departments may have policies or guidelines related to whether sections of the dissertation may be included if they have been previously published elsewhere. Copyright issues also may arise if sections of the dissertation have been previously published. Therefore, students who are considering the submission of dissertation chapters/articles for publication prior to their dissertation defense should consult with their advisor, and also with potential publication outlets, before submitting any dissertation-related manuscript for publication.

All parts of the dissertation must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline's style manual require deviation. Students should email gradschool@ua.edu before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

The Dean of the Graduate School must approve the dissertation before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Virtual Participation in Committee-Based Exams/ Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.
7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back- up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee

member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Final-Semester Minimum Doctoral Research Hours Registration

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research until reaching their department's minimum requirement, and at least 1 hour for each semester thereafter until degree completion and graduation. If certain conditions are met for the student's final semester, the student may qualify to enroll for fewer hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester#. This exception applies only to students who registered for at least 1-3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

When was the *completed electronic dissertation submitted to ProQuest/the Graduate School?	Minimum hours of 699 registration required in the final semester
By 11:59pm on the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	0
After the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	1

*"Completed" means submitted to ProQuest after being successfully defended and carefully edited following the defense meeting. The dissertation chair or department designee must submit the Committee Acceptance Form (CAF) through the UA DocuSign system. The CAF must be signed by all committee members, department chairperson, and graduate dean. The CAF is submitted by the department through the UA DocuSign system in myBama. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

Footnotes

- 1 International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see "USCIS" section under "Minimum Hours--Other Policies and Regulatory Bodies" on page 3 of this policy.
- 2 The University Calendar is available at the Academics tab of the website of the University Registrar.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University's IRB approval form is available at the IRB website.

Dissertation Defense

The dissertation defense is the culminating experience in the doctoral program. The Dissertation Chair and the student will coordinate with all committee members to choose a time, date, and location for the dissertation defense. All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the defense date. The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

The dissertation defense is comprised of four parts.

- 1. Public Advance Notice.** A minimum of two weeks prior to the scheduled defense date, the candidate must submit the *Public Notice of a Dissertation Defense* form. This form includes the name of the candidate, the department or program, the title of the dissertation, an abstract of 200 words or less, and the date, time, and location of the dissertation defense. The candidate should consult with the Dissertation Chair prior to initiating this form. The form will be initiated by the candidate and signed by the Dissertation Chair, Graduate Program Director, and the Graduate School. Upon receipt of the completed form, the Graduate Program Director will ensure the scheduled defense is disseminated within the department. The Graduate School will post the scheduled defense on the Graduate School website.
- 2. Oral Presentation.** An oral presentation of the dissertation is required and shall be public. The content and duration of the oral presentation are at the discretion of the Dissertation Chair, in consultation with the Committee, based on departmental norms, disciplinary standards, and traditions.
- 3. Oral Defense.** This examination phase of the dissertation defense is required and may be public or private. Each department or program shall establish a policy for whether the oral defense is public, private, or both (i.e., has a public portion and a private portion).
- 4. Committee Deliberation.** Committee deliberation is required and shall be private. Upon completion of the oral defense, everyone other than the committee members shall leave the defense location while the committee discusses, deliberates, and votes. For a defense to be successful, the majority of the committee must approve the dissertation and the defense.

The results of the dissertation defense must be reported to the Office of the Graduate School by submitting the Committee Acceptance Form at least six weeks before the Fall/Spring commencement, or five weeks before the Summer commencement, at which the degree is to be conferred. The Committee Acceptance Form, submitted by the department through the UA DocuSign system and found in myBama, confirms that a majority of the dissertation committee has approved the written dissertation and oral defense.

Any changes made to the manuscript after the defense must be approved by the Dissertation Chair. The student must submit the final dissertation to the Graduate School, and the Dean of the Graduate School must approve the dissertation, before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Final Dissertation Submission and Approval

Following a successful dissertation defense (see "Dissertation Defense" for details), any edits agreed upon during the defense must be incorporated into the manuscript, and the Dissertation Chair must approve the final manuscript. After a careful review to ensure that the manuscript adheres to the Graduate School's formatting guidelines, the candidate must submit the approved manuscript to the Graduate

School for final approval, address any remaining edits, and initiate the upload process for archiving the manuscript in the national dissertation repository, ProQuest.

The dissertation, in its final form, must be received in the Graduate School within 60 days of the dissertation defense. If this deadline is not met, the Dissertation Chair may require the candidate to schedule a second dissertation defense. Note that this 60-day deadline is separate from the deadlines for degree conferral and participation in Commencement ceremonies.

Graduate School deadlines for each semester, including deadlines for submitting the final manuscript to the Graduate School to graduate at the end of the semester, are available on the Graduate School's homepage. Consult the Graduate School's dissertation site for additional details of the electronic submission process, including information on exactly what needs to be submitted to the Graduate School. At the stage of the Graduate School review of the manuscript, additional revisions may be required, to ensure that the final manuscript conforms to all formatting and editing standards. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Application for Graduation

Each candidate for a doctoral degree must submit an Application for Degree via myBama no later than the last day to register or add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Withholding or Withdrawing an Advanced Degree

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

Public Administration, MPA

The mission of the Master of Public Administration (MPA) program at The University of Alabama is to prepare students to lead and manage public service organizations. We strive to develop critical thinking skills enabling our graduates to formulate policies and approaches to management while ensuring the integrity of the public service. Our program emphasizes public service values while facilitating intellectual and professional development through learning experiences that integrates theory with practice. We provide an institutional culture that promotes diversity and advances governance while preparing students to reach standards of excellence in the public service.

The Master of Public Administration (MPA) program is designed to prepare students for leadership and administrative roles in federal, state, and local government. It is directed at pre-career students seeking to enhance their employability and level of entry into public service, as well students already working in public service who desire to upgrade their skills, enhance promotion opportunities, or deepen their appreciation for the science and art of public administration. Through exposure to a rich body of theoretical and applied knowledge, students develop talents for managing employees, formulating budgets, structuring organizations, analyzing policies, and evaluating programs.

Admissions

The Master of Public Administration is an accredited professional degree program designed primarily for those who plan a career in federal, state, or local government.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- 3 letters of recommendation

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Students are required to complete 39 semester hours of coursework.

The 39 hours are subdivided as follows: 21 hours of public policy and administration core courses, 3 hours of quantitative methods, 12 hours of approved electives if a 3 hour internship is completed or 15 hours of approved electives if a 3 hour internship is not completed. An internship is required for all pre-service students. In addition to the 39 hours of coursework, students must successfully complete a Portfolio Project.

Course requirements

Code and Title	Hours
Public Policy and Administration Core	
PSC 565 Foundations of Public Administration	3
PSC 562 Public Personnel Admin	3

Transfer Credit

Refer to the Graduate School Master's degree requirements page for more information.

Accelerated Master's Program

Information on the Accelerated Master's Program can be found on the department website.

Refer to the Graduate School [Accelerated Master's Program](#) page for more information.

Comprehensive Exam/Capstone

Successful completion of the Portfolio Project is required to graduate with an MPA degree.

The purpose of the Portfolio Project is to assess the extent to which MPA students have achieved the core competencies set forth by our accrediting body, the Network of Schools of Public Policy, Affairs, and Administration (NASPAA). The five core competencies are:

1. Lead and manage in public governance;
2. Participate in and contribute to the public policy process;

3. Analyze, synthesize, think creatively, solve problems, and make decisions;
4. Articulate and apply public service perspectives; and
5. Communicate and interact productively with a diverse and changing workforce and citizenry.

For each core competency, the student will complete a structured reflection essay assessing the core competency. Explicit instructions regarding the Portfolio Project are provided to students in their final semester of coursework. Portfolio Projects are evaluated by the MPA faculty.

Fieldwork/Practicum/Internship Requirements

The MPA Program requires students to complete 300 hours of work in their internship for 3 credit hours. Students typically pursue an internship after completing 18 hours in the program, but exceptions to the 18-hour completion rule may be made by the MPA Director. Internships may be completed during the semester or, more commonly, during the summer. They may be paid or unpaid.

Once an internship is approved by the MPA Director, the student may register for 3 credit hours of PSC 679 MPA Internship. The MPA Director will provide an information and evaluation form for the student to complete at least two weeks before the internship begins.

Upon completion of the internship, the immediate work supervisor of the student during the internship will complete the evaluation form and return it to the MPA Director. To receive a final grade for the internship hours, the student must complete an academic exercise that enhances the quality of the internship learning experience. The final grade will be determined based on the evaluation of the immediate work supervisor at the internship site and the quality of the academic exercise.

Time Limits for Degree Completion Requirements

Refer to the Graduate School Master's degree requirements page for more information.

Student Progress Requirement

Refer to the Graduate School scholastic requirements for more information.

Academic Misconduct Information

Refer to the Graduate School academic misconduct policy for more information.

Withdrawals and Leave of Absence Information

Refer to the Graduate School [withdrawal and leave of absence policy](#) for more information.

Academic Grievances Information

Refer to the Graduate School academic grievance procedure for more information.

Scholastic Requirements

Refer to the Graduate School scholastic requirements for more information.

Graduate School Deadlines Information

Refer to the Graduate School student deadlines page for more information.

Application for Graduation Information

Refer to the Graduate School Master's degree requirements page for more information.

Master's Degrees

The primary purpose of master's degree programs is to provide students with subject matter at an advanced level in their fields of study. Master's degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master's programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master's degree:

Plan I. Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or "capstone experience" as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject.

With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student's program at the master's level must provide sufficient association with the resident faculty to permit individual evaluation of the student's capabilities and achievements.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Courses of full graduate-level credit earned in a *regionally* accredited institution where a student was enrolled in the graduate school, may be submitted for review for inclusion in a master's degree program.

Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student's advisory committee and the dean of the Graduate School.

A student initiates the Request for Transfer of Graduate Credit form and must ensure that the Graduate School receives an official transcript from the outside institution. This should be done well in advance of the final semester, otherwise it may delay graduation and awarding of the degree.

With the approval of the student's department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from an outside institution. Some master's degree programs allow fewer hours to be transferred. Be sure to check with your department's graduate program director regarding your department's transfer policy. Eligible coursework will have been earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA master's program. Only courses in which a student earned a "B" grade or better may be transferred. Thesis Research (599) may not be transferred in from an outside institution. If approved, such coursework can be counted toward the minimum hours and coursework requirements for the master's degree.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

400-Level Courses

A maximum of 6 semester hours of 400-level course credit may be accepted for graduate credit and used toward a master's degree. The department needs to submit the Approval of 400-Level Course Work for Master's Credit form through the UA DocuSign system in myBama. This form must be submitted for approval to the Graduate School by the last day to add a course for the semester in which the course will be taken.

Time Limit

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. Previously approved transferred coursework that falls within six years of *admission* to the master's degree program can be counted toward the minimum hours requirement. There is no provision for an extension of the time limit beyond six years for master's students.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

Thesis

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. Students set up their committee through the Graduate Academic Activities portal on the Graduate School website. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. The majority of the thesis committee must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the student's thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. All members must agree that the student is ready for the final oral thesis defense. A final oral thesis defense is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral thesis defense unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In circumstances where virtual participation is necessary, all participants must follow the Virtual Participation guidelines found below.

Virtual Participation in Committee-Based Exams/ Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part

of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.
7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Article Style vs. Journal Format for Master's Theses

Article Style.

At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.

Journal Format.

A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

All theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research.

In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

Final Thesis Defense

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. The thesis must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

"Completed" means submitted to ProQuest after being successfully defended, carefully edited following the defense meeting, and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. A majority of the thesis committee must approve the written thesis and defense before submission to the Graduate School. Following the thesis defense, the Committee Acceptance Form is submitted by the thesis chair through the UA DocuSign system in myBama.

Graduate School deadlines, including each semester's thesis deadline, are available at the Graduate School's homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the thesis before the student can be cleared for graduation.

Comprehensive Examinations

In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all candidates for the master's degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School.

The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. The final report is submitted by the department through the UA DocuSign system in myBama. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation

Each candidate for a master's degree must submit an Application for Degree via myBama no later than the last day to add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Second Master's Degree

Six (6) semester hours of eligible credit from one master's degree at The University of Alabama may be applied to the requirements for a second master's degree, but only if the department of the second master's agrees to the courses in the plan of study. Any hours from the previous master's degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master's degrees, no hours may double count toward any additional master's degrees.

Department of Psychology

Psychology, MA

The department requires that students entering the PhD program without a Master's degree earn their MA while enrolled in the PhD program.

Admission Requirements

Students applying for graduate work in psychology must present at a minimum undergraduate courses in general psychology, statistics, and experimental psychology (or research methods). In addition, it is desirable for students to have prior coursework in a laboratory science (particularly biology), college mathematics, and in the area of their intended concentration.

Applications for admission to graduate study must be accompanied by Graduate Record Examination (GRE) general test scores (the advanced section is recommended for clinical applicants). Admission is competitive and is influenced by the overall quality of the applicant's record, including grades, GRE scores, letters of recommendation, past experience, and match between the students and faculty interests. The application deadline is December 1 for the clinical psychology program and December 15 for the experimental psychology program. Complete applications must be received by these deadlines to ensure full consideration for admission for the following term.

See the Admission Criteria section of this catalog for more information.

Degree Requirements

Students earn the MA degree en route to the PhD (p. 390). The MA degree is awarded after 24 credit hours of coursework, 6 credit hours of thesis, and an approved completed thesis. The 24 hours of coursework may vary by focus area, but must include the following:

Code and Title	Hours
Required Courses	
PY 602 Advanced Statistics I	3
PY 607 Research Methods Psych	3
Required Major Course Options	12
PY 600-699	
Thesis Course	
PY 599 Thesis Research	6
Total Hours	24

Psychology, Ph.D.

Admission Requirements

Students applying for graduate work in psychology must present at a minimum undergraduate courses in general psychology, statistics, and experimental psychology (or research methods). In addition, it is desirable for students to have prior coursework in a laboratory science (particularly biology), college mathematics, and in the area of their intended concentration.

Applications for admission to graduate study must be accompanied by Graduate Record Examination (GRE) general test scores (the

advanced section is recommended for clinical applicants). Admission is competitive and is influenced by the overall quality of the applicant's record, including grades, GRE scores, letters of recommendation, past experience, and match between the students and faculty interests. The application deadline is November 15 for both the clinical psychology program and the experimental psychology program. Complete applications must be received by these deadlines to ensure full consideration for admission for the following term. Deadlines for letters of recommendation are 2 weeks after the application deadlines.

See the Admission Criteria section of this catalog for more information.

Degree Requirements

Students earn the MA degree (p. 390) en route to the PhD, and they are required to follow Plan I.

The student's PhD Plan of Study must be approved by the department and the Graduate School by the time the student completes 30 graduate semester hours of UA and/or transfer course work; otherwise, a "hold" may be placed on future registration. The minimum number of credit hours required for the PhD in psychology varies by concentration. All graduate students complete the General Psychology Core, the Research Skills Core, a master's thesis and a doctoral dissertation. In addition, clinical students complete the Clinical Core and a year-long clinical internship. Students in each of the clinical and experimental focused areas of study also complete advanced coursework in their area of study. More detailed information is available at the Department of Psychology website.

Total Hours		60

Footnotes

- ¹ some focused areas of study require a specific course from this set
- ² see details at the Psychology website

Doctoral Degrees

The University offers several types of doctorates, each of which is described below.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

Doctor of Philosophy Degree

The Doctor of Philosophy (PhD) degree is regarded as the researcher's degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The Doctor of Philosophy (PhD) degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

Field of Specialization - A defined field of specialization as outlined in the student's Plan of Study is required of all candidates for the Doctor of Philosophy degree. A minimum of 36 semester hours of non-dissertation course credit is required. Departments or programs may require more than this minimum. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 18 hours of dissertation research.

Research skill/language requirements - There is no university wide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further

information about PhD foreign language/research skill requirements, students may contact their departments.

Interdisciplinary Studies

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 765) at the Graduate School's website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

Doctor of Education Degree

The Doctor of Education (EdD) requires a minimum of two years of graduate study beyond the master's degree for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate coursework research beyond the master's degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 488) section of the Graduate Catalog, there are specific regulations governing the EdD program.

Doctor of Musical Arts Degree

The Doctor of Musical Arts (DMA) degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 356) section of the Graduate Catalog.

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) (p. 730) is a practice-focused degree that is detailed in the Nursing section of this Catalog.

Doctor of Social Work

A Doctor of Social Work (DSW) degree is a practice doctorate degree in social work. It provides coursework on theory and skills in social work practice that are more advanced than what one would typically experience in an MSW program for social work.

Admission to Doctoral Degree Programs

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master's degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student's doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

Residency Requirements

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student's doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog's Transfer of Credit policies).

Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a "B" grade or better may be transferred. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.
2. PhD Programs Only: A student holding an earned, in-field master's degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. When exercising this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School. The requested transfer credit hours must be listed on the PhD Plan of Study as MSC501 under the transfer credit section. If the in-field master's degree was awarded *more than six years prior to admission to the current doctoral degree program*, the graduate program director or department head/chair must also submit to the Graduate School for evaluation, a Field-Related Employment Since Earning Master's

Degree form with the student's CV must be submitted by the department through the UA DocuSign system in myBama. In addition, the department is asked to provide the following, attached to the approved Plan of Study :

- a. An annotated work history from the student. This history should include job titles and major duties for all positions since earning a master's degree.
- b. A brief paragraph from the corresponding faculty member, attesting that he/she has reviewed the work history and how that work applies to the current Ph.D. degree program.

The Graduate School will make the final determination about whether up to 24 prior master's hours can be applied to the Ph.D. requirements.

PhD awarding departments that want to participate in offering Option 2 to their doctoral students, need to "opt in" by informing the graduate dean in writing that they wish to be among the approved departments.

Consideration of transfer of credit or the acceptance of an earned master's degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy. Dissertation Research (699) may not be transferred in from an outside institution.

Time Limits

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master's, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

The Continuous Dissertation or Document Registration requirement for 699 and 799 enrollment will be waived for the intervening years between the student's cessation of doctoral work and re-admission.

Plan of Study

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School by the time the student has completed 30 coursework hours.

The PhD, DMA, and DSW Plans of Study are submitted by the department through the UA DocuSign system in myBama. The Plan of Study for other doctoral programs (Ed.D., DNP) are available from the student's department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

A copy of the approved Plan of Study must be submitted to the Graduate School when the department submits the Admission to Candidacy for Doctoral Degree form through the UA DocuSign system in myBama.

Preliminary or Comprehensive Examination

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student's supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student's research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy

The designation of candidacy reflects the student's demonstration of foundational knowledge and readiness to conduct independent research, in the discipline. The requirement for advancing to candidacy

is determined by the faculty of the degree program and delineated in the program's section of the Graduate School Catalog and the program's Graduate Student Handbook.

Advancement to candidacy should involve either:

- passing the qualifying (major or preliminary) examination
- completing of all required coursework as listed on the approved program of study
- presenting or defending a dissertation prospectus or proposal
- or some combination of these milestones.

Students are not eligible to register for 699 or 799 credit hours until they have been advanced to candidacy. The Department Chair or Department Director of Graduate Studies, or their designee, shall submit the Admission to Candidacy for the Doctoral Degree form to the Graduate School during the semester that the student meets the program's candidacy requirements.

Continuous Doctoral Research Hours Registration

Once a student meets their program's requirement for admission to candidacy and the designated Department administrator submits the Application for Admission to Candidacy form to the Graduate School, the student may enroll in 699 (dissertation/document research) or 799 (document/project research).

Once initiated, the student must pursue completion of the dissertation/document/project without interruption by enrolling in 699/799 each fall and spring semester of the academic year.

The only time summer registration is required for dissertation/document/project research is when a doctoral student is graduating in August or defending the dissertation/document/project during the summer semester.

Ph.D. students must complete a minimum of 18 hours of dissertation research credits (699). Ph.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.

Ed.D. students must complete a minimum of 12 dissertation research credits (699). Ed.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.

DMA students must complete a minimum of 4 hours of document research (MUS 699). DMA students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in MUS 699 until degree completion.

DNP Students must complete project research hours in NUR 795-798. DNP students must maintain continuous enrollment for a minimum of 1 hour in a department-specified course until degree completion.

DSW Students must complete a minimum of 9 hours of project research (SW 799). DSW students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in SW 799 until degree completion.

The amount of dissertation/document/project research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as

reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

Dissertation Committee

The dissertation committee may be formed early in the dissertation research process, or shortly before the dissertation proposal is approved. It is expected that the committee will be formed and approved before significant progress is made on the dissertation. The committee must be formally established via a process initiated by the student and requiring the consent of each committee member, followed by Graduate School review for compliance with the regulations outlined below. Click here for instructions on the process of establishing the committee.

The committee must consist of at least five members. It may have additional (voting or nonvoting) members if deemed appropriate. At least one of the committee members must be from outside the student's major department. These external members may be from another academic department at UA, from other universities, or from industry or the professional field. In all cases, these members external to the department/program must be appointed to UA's Graduate Faculty by the dean of the Graduate School, and must have significant professional qualifications that directly contribute to the depth and rigor of the dissertation.

All members of the dissertation committee must hold Graduate Faculty status at The University of Alabama. The chair of the committee must hold Full Graduate Faculty status; others may be Full, Associate, or Affiliate members of the Graduate Faculty. A majority of the Dissertation Committee members must be full-time regular University of Alabama faculty (that is, full-time instructor, assistant professor, associate professor, or professor).

Dissertation Proposal

The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction that provides an overview and states the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal's format with respect to specifics such as the length of the introduction and level of detail of the literature review. Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. The dissertation must be based upon research completed while the student is enrolled at The University of Alabama.

The subject of the dissertation must be approved by the student's dissertation committee and by the dean of the Graduate School. The final dissertation may take the form of a traditional, chapter-based document or a series of full-length publication-ready manuscripts which are part of a larger, cohesive body of work. The format (traditional vs. article-style) must be approved by the committee in accordance with the standards for the program and the discipline.

For article-style dissertations, the document must contain a minimum of three articles, in addition to introductory and concluding materials. A single abstract must accompany the document. In addition to an introduction presenting the unifying framework that supports the research, the document must include a concluding section that summarizes the importance of the work, integrates the major findings, and discusses the implications for the overall body of work.

Individual departments may have policies or guidelines related to whether sections of the dissertation may be included if they have been previously published elsewhere. Copyright issues also may arise if sections of the dissertation have been previously published. Therefore, students who are considering the submission of dissertation chapters/articles for publication prior to their dissertation defense should consult with their advisor, and also with potential publication outlets, before submitting any dissertation-related manuscript for publication.

All parts of the dissertation must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline's style manual require deviation. Students should email gradschool@ua.edu before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

The Dean of the Graduate School must approve the dissertation before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Virtual Participation in Committee-Based Exams/ Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the

event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.

7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Final-Semester Minimum Doctoral Research Hours Registration

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research until reaching their department's minimum requirement, and at least 1 hour for each semester thereafter until degree completion and graduation. If certain conditions are met for the student's final semester, the student may qualify to enroll for fewer hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester#. This exception applies only to students who registered for at least 1-3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

When was the *completed electronic dissertation submitted to ProQuest/the Graduate School?	Minimum hours of 699 registration required in the final semester
By 11:59pm on the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	0
After the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	1

*"Completed" means submitted to ProQuest after being successfully defended and carefully edited following the defense meeting. The dissertation chair or department designee must submit the Committee Acceptance Form (CAF) through the UA DocuSign system. The CAF must be signed by all committee members, department chairperson, and graduate dean. The CAF is submitted by the department through the UA DocuSign system in myBama. At the time of ProQuest submission, the

student also must submit the Survey of Earned Doctorates through the NORC website.

Footnotes

- ¹ International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see "USCIS" section under "Minimum Hours—Other Policies and Regulatory Bodies" on page 3 of this policy.
- ² The University Calendar is available at the Academics tab of the website of the University Registrar.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University's IRB approval form is available at the IRB website.

Dissertation Defense

The dissertation defense is the culminating experience in the doctoral program. The Dissertation Chair and the student will coordinate with all committee members to choose a time, date, and location for the dissertation defense. All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the defense date. The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

The dissertation defense is comprised of four parts.

1. **Public Advance Notice.** A minimum of two weeks prior to the scheduled defense date, the candidate must submit the *Public Notice of a Dissertation Defense* form. This form includes the name of the candidate, the department or program, the title of the dissertation, an abstract of 200 words or less, and the date, time, and location of the dissertation defense. The candidate should consult with the Dissertation Chair prior to initiating this form. The form will be initiated by the candidate and signed by the Dissertation Chair, Graduate Program Director, and the Graduate School. Upon receipt of the completed form, the Graduate Program Director will ensure the scheduled defense is disseminated within the department. The Graduate School will post the scheduled defense on the Graduate School website.
2. **Oral Presentation.** An oral presentation of the dissertation is required and shall be public. The content and duration of the oral presentation are at the discretion of the Dissertation Chair, in consultation with the Committee, based on departmental norms, disciplinary standards, and traditions.
3. **Oral Defense.** This examination phase of the dissertation defense is required and may be public or private. Each department or program shall establish a policy for whether the oral defense is public, private, or both (i.e., has a public portion and a private portion).
4. **Committee Deliberation.** Committee deliberation is required and shall be private. Upon completion of the oral defense, everyone other than the committee members shall leave the defense location while the committee discusses, deliberates, and votes. For a defense to be

successful, the majority of the committee must approve the dissertation and the defense.

The results of the dissertation defense must be reported to the Office of the Graduate School by submitting the Committee Acceptance Form at least six weeks before the Fall/Spring commencement, or five weeks before the Summer commencement, at which the degree is to be conferred. The Committee Acceptance Form, submitted by the department through the UA DocuSign system and found in myBama, confirms that a majority of the dissertation committee has approved the written dissertation and oral defense.

Any changes made to the manuscript after the defense must be approved by the Dissertation Chair. The student must submit the final dissertation to the Graduate School, and the Dean of the Graduate School must approve the dissertation, before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Final Dissertation Submission and Approval

Following a successful dissertation defense (see "Dissertation Defense" for details), any edits agreed upon during the defense must be incorporated into the manuscript, and the Dissertation Chair must approve the final manuscript. After a careful review to ensure that the manuscript adheres to the Graduate School's formatting guidelines, the candidate must submit the approved manuscript to the Graduate School for final approval, address any remaining edits, and initiate the upload process for archiving the manuscript in the national dissertation repository, ProQuest.

The dissertation, in its final form, must be received in the Graduate School within 60 days of the dissertation defense. If this deadline is not met, the Dissertation Chair may require the candidate to schedule a second dissertation defense. Note that this 60-day deadline is separate from the deadlines for degree conferral and participation in Commencement ceremonies.

Graduate School deadlines for each semester, including deadlines for submitting the final manuscript to the Graduate School to graduate at the end of the semester, are available on the Graduate School's homepage. Consult the Graduate School's dissertation site for additional details of the electronic submission process, including information on exactly what needs to be submitted to the Graduate School. At the stage of the Graduate School review of the manuscript, additional revisions may be required, to ensure that the final manuscript conforms to all formatting and editing standards. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Application for Graduation

Each candidate for a doctoral degree must submit an Application for Degree via myBama no later than the last day to register or add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Withholding or Withdrawing an Advanced Degree

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

Department of Religious Studies

- Major
 - Religion in Culture, MA (p. 397)

Chair

- Russell T. McCutcheon

Graduate Director

- Steven Ramey

Administrative Secretary

- LeCretia Crumpton

Professors

- Steven L. Jacobs
- Russell T. McCutcheon
- Steven Ramey
- K. Merinda Simmons
- Theodore L. Trost

Associate Professors

- Michael Altman
- Daniel Levine
- Nathan Loewen
- Vaia Touna

Assistant Professors

- Richard Newton
- Edith Szanto
- Jeri Wieringa

General prerequisites: Graduate standing and permission of both the director of graduate studies and the instructor. Graduate students enrolled in 500-level courses that are also offered at the 400 level are expected to perform extra work of an appropriate nature.

REL501 Social Theory and Religious Studies

Hours 3

This three credit hour graduate seminar introduces students to terms and ideas from social theory and their relevance to the academic study of religion. Throughout the course, students will apply theories to analyze examples relevant in Religious Studies, both ancient and modern. Each student will also select an important work in their chosen field of study in consultation with their advisor and analyze that work in depth in relation to the various issues discussed in the course.

Prerequisite(s): None, except admission to degree program

REL502 Public Humanities and Religious Studies

Hours 3

This graduate seminar introduces students to public humanities and digital humanities approaches to the study of religion. Students learn methods and tools for conducting digital research and explore ways to communicate theoretical and religious studies research to public audiences through digital media. Students are introduced to a number of digital tools for research, scholarly communication, and public engagement and will work to apply those tools to their individual research interests and goals.

Prerequisite(s): None, except admission to degree program

Religion in Culture, MA

Description

Taking the Department's motto seriously – studying religion *in* culture – this MA degree explores cross-disciplinary social theory and applies it to the study of religion, seeing each site studied as a test case in identity formation. Unlike other graduate programs in the study of religion, the MA in Religion in Culture at The University of Alabama presses beyond mere description and cross-cultural comparison, instead using social theory to understand the effects that narratives, practices, classification systems, and institutional structures have on social groups and their members. The degree program maintains this approach with a combination of analytic tools and digital skills, training students to use innovative technologies so as to communicate their findings effectively to wide audiences.

Two Key Foundations

The premise of the degree is that the work taking place in our field has wide relevance. **Critical analysis** and **innovative communication skills in the public humanities** are therefore both cornerstones of this MA. While all students will carry out their own independent research and gain co-writing experience with their supervisor, courses will require them to produce original article-length research papers and to create substantive digital presentations. These emphases begin in the first semester of the program, with two Foundations courses: one in social theory and the other in public humanities. In consultation with their supervisor, their culminating thesis project will emphasize one or the other of these two modes of scholarly communication – allowing students to tailor the thesis to suit their own interests and career plans.

Supervision

Supervisors are assigned by the graduate committee when a student is accepted into the program, making the **statement of purpose** a crucial element of the application process, inasmuch as it is the primary means by which the graduate committee determines whether there is sufficient

overlap of faculty expertise with incoming students' interests and needs. (This assignment is open to revision, at the discretion of the graduate director, should student interests change.) Faculty supervisors assist students in navigating the degree program, advising courses based on student interests, and mentoring the completion of a culminating thesis project.

Degree Structure

The **36 credit hour** graduate degree (2 years of course work, including the final thesis) focuses on providing students with two critical foundations: (i) becoming conversant in contemporary social theory and applying it to their area of interest in the study of religion and (ii) developing competencies in the tools of the public, digital humanities. In their first semester students will be not only reading widely in social theory (and applying it to an historical, regional, or ethnographic example of their choice) but also gaining familiarity with a wide variety of digital tools (from video and audio recording and editing, to making web pages and working with "big data") that will assist them in sharing their research. Students are also encouraged in their second semester to take a course examining the history of the study of religion in order to think critically about the application and relevance of those foundational elements in the field of religious studies.

Relevance of the Degree

The program is designed not only for students hoping to pursue doctoral work but also for those aiming to use these skills in any number of other professions – places where the analytic skills gained from working in social theory are enhanced by their communication skills and digital expertise. Rigorous coursework and original research with the mentorship of faculty prepares students for prestigious PhD programs; meanwhile, experience applying digital platforms to those research interests equips students with sought-after skills that can be applied to a number of careers.

Non-credit Colloquium

A required, non-credit **Graduate Colloquium** meets twice each semester and exposes students to a range of professional issues relevant to higher education today. The kinds of topics covered include, but are not limited to: teaching, C.V. preparation, applying for future graduate study, and career opportunities outside academia.

Journal Group

Attended by REL graduate students and faculty, an academic reading group meets twice each semester. Each session is led by a second-year MA student and features discussion of a current peer-reviewed journal article relevant to that student's research interests.

Funding

There are a limited number of **graduate teaching assistantships** (GTA) – full or partial – that are awarded annually on a competitive basis. Full GTA positions (i.e., 0.5 FTE) come with a full stipend and full tuition waiver (whether in- or out-of-state); partial GTA positions (e.g., 0.25 FTE) come with a half stipend and half tuition waiver.

Contact

For more information, contact Prof. Merinda Simmons (merinda.simmons@ua.edu), REL's graduate director.

Admissions

Students seeking an M.A. degree in the study of religion at The University of Alabama must first have earned an undergraduate degree in either the academic study of religion or related field and demonstrate how

their areas of interest intersect with the program and REL faculty expertise.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- CV
- Statement of Purpose including the planned program of study
- Writing sample
- Three letters of recommendation.

Note: students who have graduated from UA's REL program -- if overlapping with current faculty -- do not need to submit letters of recommendation. Only one letter of recommendation is required of those students who have not majored in REL but who have taken courses with current faculty.

For full consideration of possible funding, applications to begin the program in the fall semester must be completed no later than **December 1**. Applications to begin in the spring semester are possible as well and must be submitted no later than **October 15**.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

It is expected that, in their first Fall semester, all graduate students will enroll in both REL 501 and REL 502 along with an additional graduate seminar. The aim of this first semester is to acquire skills (social theory + public humanities skills) while also beginning to explore, in those courses, the specific historical, regional, or ethnographic e.g. on which each student will focus during their culminating research project.

In all subsequent semesters (i.e., Fall and Spring), students will normally enroll in three courses (for 9 credit hours), so as to complete the degree in 2 academic years.

With permission of their supervisor and in consultation with the Graduate Director, some of these hours may be taken outside the Department, so that students can benefit from campus-wide resources (e.g., language training necessary for carrying out their research).

In their final Spring semester, students pursuing the formal thesis option will usually enroll in 6 hours of Thesis and 3 hours of the Capstone Seminar (a collaborative course dedicated to supporting their research by inviting feedback from a faculty member other than their supervisor as well as from all other students in their cohort). Students pursuing the non-thesis option will take the 3-hour Capstone Seminar, as well as six hours of electives relevant to their research.

Thesis Option	Hours
Required Courses	
1. Six hours of Foundation courses will be taken in the Fall semester of the 1st year:	
REL 501 Social Theory Foundations	3
REL 502 Public Humanities Foundations	3
2. Nine hours of required courses will be taken in the Spring of the second year:	
REL 590 Capstone Seminar	3
REL 599 Thesis Hours	6

Non-Thesis Option **Hours**

Required Courses

1. Six hours of Foundation courses will be taken in the Fall semester of the 1st year:

REL 501 Social Theory Foundations	3
REL 502 Public Humanities Foundations	3

2. Nine hours of required courses will be taken in the Spring of the second year:

REL 590 Capstone Seminar	3
--------------------------	---

Elective Courses¹ **27**

REL 503 Methods Digital Study of Rel	
REL 504 Special Topics	
REL 511 History of Religious Studies	
REL 560 Independent Study	
REL 565 Religion in Culture Applied	
REL 525 Identity & Place	
REL 522 Power & Persuasion	
REL 521 Self & Society	
REL 561 Independent Study	
REL 580 Academic Writing in REL	
REL 524 Past & Present	
REL 512 Debates in Method and Theory	
REL 523 Discourse & Practice	

Total Hours **36**

Footnotes

¹ In consultation with your supervisor, students will complete an additional twenty-one hours of graduate course work, including independent study courses and seminars in REL, plus graduate courses from other departments (in consultation with your supervisor and the Grad Director). For e.g., depending on the student's program of study, courses in foreign languages, taught through Modern Languages and Classics, and may be recommended. In addition, a required, non-credit Graduate Colloquium, led by the Graduate Director, meets monthly, to discuss a variety of professional issues in the study of religion in particular, or higher ed in general. REL faculty are invited as well.

Transfer Credit

Graduate-level credit earned at an accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in the REL degree program.

Evaluation of credit for transfer will not be made until the student has enrolled in the graduate school of the University of Alabama. Courses that received a grade of less than a “B” will not be accepted for transfer of credit.

A student initiates at the Office of the Graduate School the request for transfer of graduate credit obtained at another institution. The student must also ensure that the Office of the Graduate School has an official transcript of the credit involved.

With the approval of the student’s advisory committee and the Dean of the Graduate School, up to 12 hours of coursework for a graduate degree may be transferred from another institution. All credit toward the master’s degree must have been earned during the six years immediately preceding the date on which the degree is awarded. Details about the Graduate School’s policy on Transfer Credit is available in the Degree Requirements section (p. 18) of the Graduate Catalog.

Capstone Seminar Requirement

All students in the Spring semester of their final year will enroll in REL 590 Capstone Seminar as their culminating experience in the M.A. Religion in Culture program. This is required for students completing either Plan I or Plan II.

Internships

Students are not required to complete an internship. Any student who wishes to learn through an internship should discuss options for enrolling in REL 565 Religion in Culture Applied with their supervisor and the Graduate Director. The Graduate Director will set up each internship in consultation with the advisor and interested student.

Plan I – Thesis Process Requirements

In consultation with the Grad Director and supervisor (if applicable), a student can opt to complete a defended thesis as the culminating project (defined as a piece of original research that is potentially publishable as an academic article).

If pursuing the formal/official thesis option, certain deadlines must be met. By the end of the first semester, a student should know what kind of thesis they will pursue (see two options below), as well as its broad research topic.

All MA students who choose Plan I will complete 6 thesis hours in their second/culminating year of study. These hours will be completed under the supervision of a faculty advisor and will require a public defense at its completion.

If choosing Plan I, a student will have a choice between two thesis options: a traditional written thesis or a digital project. In both cases, you will form a committee to direct the development of the project and formally defend both the proposal and the work upon completion. The faculty advisor will oversee the process and offer feedback and guidance along the way.

- Traditional Thesis: This will culminate in an article-length (25-35 pages) project of original, substantive research that can be submitted for peer review publication.
- Digital Project: This will culminate in a substantive, research-based digital project that relies upon social theory and digital skills gained across the degree program.

Plan II – Non-Thesis Process Requirements

In consultation with the Grad Director and supervisor, a student can opt to pursue either of the following non-thesis options. 1) the comprehensive exam route, which can entail a set of exams in the last semester or, 2) participation in the already required REL 590 Capstone Seminar – this later route is recommended, as it can still result in an original seminar paper that you present to faculty and students. If choosing the comprehensive exam route, the student should declare that choice by the end of the second semester. Failure to declare by the end of the second semester will default to the culminating experience in the Capstone Graduate Seminar.

Time Limit for Degree Completion Requirements

The Department of Religious Studies normally expects completion of the degree program within two years. However, for multiple reasons, students may take longer to complete their degree. For more details on the general policies of the Graduate School, consult the Degree Requirements section (p. 18) of the Graduate Catalog.

Academic Misconduct Information

The Department of Religious Studies expects its graduate students to interact with each other, their professors and the REL staff, and undergraduate students in a professional and courteous manner. Academic misconduct includes all acts of dishonesty in any academically related matter and any knowing or intentional help or attempt to help, or conspiracy to help, another student commit an act of academic dishonesty. Academic dishonesty includes, but is not limited to, each of the following acts when performed in any type of academic or academically-related matter, exercise, or activity: cheating, plagiarism, fabrication of information, misrepresentation, and abetting any of the above. For more information on academic misconduct, consult the Misconduct section (p. 7) of the Graduate Catalog.

Withdrawals and Leaves of Absence Information

Any student considering a leave of absence or withdrawing from the program is encouraged to consult their supervisor and the Graduate Director. For more information about processes in the Graduate School, consult the Withdrawals and Leaves of Absence section (p. 206) of the Graduate Catalog.

Academic Grievances Information

Students with a concern about a course or a grade (or similar dispute) should consult the appropriate faculty in the following ascending order. First, the instructor of the course, then the student’s supervisor, then the Graduate Director, and finally the Department Chair. Details about the academic grievance process in the Graduate School is available in the Grievance Information section (p. 219) of the Graduate Catalog.

Scholastic Requirements

Scholastic requirements to maintain academic standing are available in the Scholastic Requirements section (p. 204) of the Graduate Catalog.

Graduate School Deadlines Information

Student deadlines as set by the Graduate School are available in the Student Deadlines section of the Graduate Catalog.

Application for Graduation Information

Each candidate for a master's degree must apply for graduation (through myBama) no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed. Consult details in the Degree Requirements section (p. 18) of the Graduate Catalog.

Master's Degrees

The primary purpose of master's degree programs is to provide students with subject matter at an advanced level in their fields of study. Master's degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master's programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master's degree:

Plan I. Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or "capstone experience" as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject.

With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student's program at the master's level must provide sufficient association with the resident faculty to permit individual evaluation of the student's capabilities and achievements.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Courses of full graduate-level credit earned in a *regionally* accredited institution where a student was enrolled in the graduate school, may be submitted for review for inclusion in a master's degree program. Evaluation of credit for transfer will not be made until after the student

has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student's advisory committee and the dean of the Graduate School.

A student initiates the Request for Transfer of Graduate Credit form and must ensure that the Graduate School receives an official transcript from the outside institution. This should be done well in advance of the final semester, otherwise it may delay graduation and awarding of the degree.

With the approval of the student's department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from an outside institution. Some master's degree programs allow fewer hours to be transferred. Be sure to check with your department's graduate program director regarding your department's transfer policy. Eligible coursework will have been earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA master's program. Only courses in which a student earned a "B" grade or better may be transferred. Thesis Research (599) may not be transferred in from an outside institution. If approved, such coursework can be counted toward the minimum hours and coursework requirements for the master's degree.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

400-Level Courses

A maximum of 6 semester hours of 400-level course credit may be accepted for graduate credit and used toward a master's degree. The department needs to submit the Approval of 400-Level Course Work for Master's Credit form through the UA DocuSign system in myBama. This form must be submitted for approval to the Graduate School by the last day to add a course for the semester in which the course will be taken.

Time Limit

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. Previously approved transferred coursework that falls within six years of *admission* to the master's degree program can be counted toward the minimum hours requirement. There is no provision for an extension of the time limit beyond six years for master's students.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each

course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

Thesis

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. Students set up their committee through the Graduate Academic Activities portal on the Graduate School website. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. The majority of the thesis committee must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the student's thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. All members must agree that the student is ready for the final oral thesis defense. A final oral thesis defense is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral thesis defense unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In circumstances where virtual participation is necessary, all participants must follow the Virtual Participation guidelines found below.

Virtual Participation in Committee-Based Exams/Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting

their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.
7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Article Style vs. Journal Format for Master's Theses

Article Style.

At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity,

each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.

Journal Format.

A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

All theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research.

In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

Final Thesis Defense

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. The thesis must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

"Completed" means submitted to ProQuest after being successfully defended, carefully edited following the defense meeting, and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. A majority of the thesis committee must approve the written thesis and defense before submission to the Graduate School. Following the thesis defense, the Committee Acceptance Form is submitted by the thesis chair through the UA DocuSign system in myBama.

Graduate School deadlines, including each semester's thesis deadline, are available at the Graduate School's homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the thesis before the student can be cleared for graduation.

Comprehensive Examinations

In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all candidates for the master's degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School.

The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. The final report is submitted by the department through the UA DocuSign system in myBama. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation

Each candidate for a master's degree must submit an Application for Degree via myBama no later than the last day to add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Second Master's Degree

Six (6) semester hours of eligible credit from one master's degree at The University of Alabama may be applied to the requirements for a second master's degree, but only if the department of the second master's agrees to the courses in the plan of study. Any hours from the previous master's degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master's degrees, no hours may double count toward any additional master's degrees.

Department of Theatre and Dance

- Major
 - Dance, MFA (p. 404)
 - Theatre, MFA (p. 406)

Chair

- Sarah M. Barry

Professors

Prerequisites for 500- and 600-level courses: Graduate standing and permission of the instructor

DN500 Performance Practicum I-A

Hours 1-3

This course will prepare students for practical application of technique and the creative process required for dance performance at the graduate level.

Prerequisite(s): Graduate standing in Dance (MFA) or Instructor consent.

DN501 Performance Practicum I-B

Hours 1-3

This course will continue to prepare students for the practical application of technique and the creative process required for dance performance at the graduate level.

Prerequisite(s): Graduate standing in Dance (MFA) or Instructor consent.

DNCA503 Graduate Teaching Methods

Hours 3

This course is designed for graduate dance students to analyze the principles, methods, philosophy, materials, and practice of teaching in colleges and universities.

Prerequisite(s): Dance MFA student or permission of the instructor

DNCA565 Science of Dance Training

Hours 3

This course explores dance science and somatics. Includes investigation of techniques for training dancers in order to minimize risk of injury and maximize potential.

Prerequisite(s): Graduate Standing in Dance or permission of instructor

TH515 Properties Construction

Hours 3

A studio course which allows exploration into woodworking, metal working/welding, foam sculpting, casting, upholstery, Photoshop and any other process required to create stage props. Lab fee, \$25.00.

TH516 Rigging Fundamentals for Theatre

Hours 3

This course covers the theories and analysis of rigging systems, their design and engineering as well as practical implementation and operation. This course is intended for the student that already has been exposed to standard theatrical production concepts and methodologies. Furthermore, a large portion of the subject matter of the class deals in scientific theory and computations so competency in basic mathematics, algebra, and basic physics are essential.

THMT574 Musical Theatre Voice (Graduate)

Hours 1

Private Instruction. This class is designed to work on vocal technique, including but not limited to, breathing, resonance, coordination of vocal registers, and musical theatre repertoire.

Prerequisite(s): Permission of instructor.

THMT674 Musical Theatre Voice (Graduate)

Hours 1

Private Instruction. This class is designed to work on vocal technique, including but not limited to, breathing, resonance, coordination of vocal registers, and musical theatre repertoire.

Prerequisite(s): Permission of instructor.

Dance, MFA

The Master's of Fine Arts (MFA) degree in Dance at the University of Alabama will develop students' creative, performance, and scholarly work and prepare them for multiple professional destinations as dance artists, scholars, and teachers. The Dance (MFA) degree program will support the development of diverse skills in classical and contemporary dance techniques, dance pedagogy, historical perspectives and critical theory, as well as technical and artistic integration of dance-specific technologies.

Admissions

An audition and interview is required for all MFA applicants. Acceptance into the Department of Theatre and Dance (MFA) program requires admission to the UA Graduate School as well as admission to the department. The audition will include movement classes to demonstrate technical and performance proficiency. Each prospective MFA student

will be scheduled for a 20-30 minute individual interview with members of the faculty during the audition process. Applicants will open the interview with a brief presentation that highlights their interests in graduate work at UA and outlines possible areas of emphasis.

Statement of Purpose: Compose a narrative, relating research and movement practice interests to pursuing a degree within the UA program. The essay should situate candidates within the field at the present time, gathering significant details of candidates' previous experience, clarifying their current involvement and interest in dance, and speculating about their future intentions within the field. Reviewers are interested in getting to know something about candidates as dance professionals through this writing: what have you done that has led you here, how do you articulate your aesthetic sensibility, what do you hope to accomplish in your studies?

Curriculum Vitae: This document should accurately reflect candidates' completed educational background and all of their professional and related experiences to date. The document should be thorough and comprehensive.

Work Sample(s): List Vimeo, YouTube or similar resources as hyperlinks in a Word or PDF attachment. These samples should demonstrate candidates' expertise and interests, such as excerpts of choreography, documentation of performances, samples of lighting plots, dance notation, or dance media projects. All materials must be accompanied by a clearly written legend identifying the contents, including title, order of materials, date and explicit identification of your contribution. Film clips may be edited or unedited and there is no time limit.

Writing Sample: The Dance Faculty will review writing samples to determine applicants' potential research and creative interests and to assess their competency as writers. Candidates will submit a substantive piece of writing, one that demonstrates their thoughtfulness and capacity to handle language with fluency. This writing submission must be at least 4 pages double-spaced but no more than 20 pages; this might take the form of a critical review, process paper, or scholarly essay.

At least three letters of recommendation must be submitted. Letters should speak to candidates' artistic and academic strengths. At least two letters should be from someone at an academic institution (past or present) who can speak to these strengths, even if previous academic work was not in Dance.

GRE scores are not required.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Over the course of three years, students will complete a minimum of 60 credit hours in a range of dance studies courses. Students are expected to complete their coursework on the Tuscaloosa campus where faculty may nurture and support their progress through the curriculum. Students will also complete and present a substantial MFA Capstone Project demonstrating a synthesis of craft, artistic vision, and conceptual rigor, as well as professional competence in their selected research area. The Capstone Project is based on creative work, a choreographic/creative project usually presented in a concert, followed by a scholarly paper and an oral defense of the project and paper.

Code and Title	Hours
STUDIO/CREATIVE/PERFORMANCE (39 credits) Students will choose from the following options, up to 39 credit hours, 6 of which will include DN 540 and DN 541 during the first year, and 3 of which will include DN 595 toward the Capstone project.	39

	Credit Hours Subtotal:	39
DN 511	Contemporary Tech I-A	
DN 512	Contemporary Tech I-B	
DN 521	Graduate Ballet Technique I-A	
DN 522	Graduate Ballet Technique I-B

DNCA 660	Body Politics in Dance	
DNCA 595	Capstone Scholarly Research	
ELECTIVES (6 credits) Students will choose 6 credits of electives based on their research focus. Courses may be within the dance degree or without.		6
	Credit Hours Subtotal:	6
Total Hours		60

Transfer Credit

Subject to approval by the department chairperson and the dean of the Graduate School, a maximum of 15 semester hours of graduate work may be transferred from another institution. These hours must be in dance

or in a closely allied subject, and they must contribute to the student's educational objective.

Graduate School information on Transfer Credit (p. 18).

Comprehensive Exam/Capstone

Students will follow the Plan II Program Requirements, as described by the Graduate School, to complete the degree. A final "culminating" or "capstone" experience for a degree is required of all University of Alabama candidates for the master's degree. In the culminating experience, students are expected to integrate prior learning and demonstrate mastery in their field of study. This will take form through the following three required components:

- A choreographic/creative project, presented at a public performance or exhibition
- A contextualizing process and research paper
- An oral defense of the project and paper

At the end of the second semester of the degree program, a written proposal for the Capstone project must be presented to the graduate dance faculty as part of the semester review. The faculty will evaluate the feasibility and innovation of the proposal as well as how the project will further the field of dance. Faculty can either approve the project as proposed or suggest revisions. Students will receive considered advice from faculty, however, the responsibility of articulating an idea and completing the proposed work in a fashion acceptable to the faculty rests with the student.

All students are required to take 3 credit hours of DN 595 Capstone Creative Research which focuses on the creative elements of the project. The course is centered around movement, rehearsal, and creative work building up to regular showings and faculty feedback toward the final creative product showing. Students are also required to take 3 credit hours of DNCA 595 Capstone Scholarly Research in which they will implement the research plan for their MFA Capstone Project focusing more on the scholarly research. The process may include research, reading, writing, interviews, viewings, and working with digital media. This course is designed for the implementation of the MFA Capstone Project research plan leading up to the final written document and oral defense. Students will typically take 1 credit of DN 595 in their 4th semester, 2 credits of DN 595 and 1 credit of DNCA 595 in their 5th semester and 2 credits of DNCA 595 in their 6th and final semester. Students in their 2nd year of the program are required to present work as part of the MFA Dance Concert, typically the first concert of the Spring semester. Students in their final year may present creative work as part of the MFA Dance Concert, or if approved by their committee, at an alternate venue, by the end of February of their final semester. This process may shift dependent upon recommendations from the Capstone Committee.

The written project must be submitted to the committee at least two weeks before the oral defense date which should be scheduled no later than the first week of April. Students' projects and papers must be submitted to their committee Chair in appropriate digital formats. The most preferred format for the final paper is a Portable Document File (PDF). The most preferred format for the creative project is .mov file or a weblink to the work on Vimeo or in UABox. The contents of the files should be appropriately organized as if for publication. The Capstone committee will review student materials and progress throughout the process to ensure that the final product submitted is acceptable. The Capstone committee will determine the grade assignment for DN 595 and DNCA 595, as well as whether the student passes the oral defense of their project and paper. The graduate advisor will store the work in

a digital repository for Dance MFA Capstone Projects for Department archival purposes.

Timelines for Degree Completion Requirements

Graduate School Information on Time Limits (p. 18).

Student Progress Requirement

The Dance Program will hold reviews at the end of the 1st-4th semesters for each MFA candidate. Students in their final year are reviewed through the Capstone Project process. The review is designed to give graduate students an idea of their progress towards the successful completion of their degree program, identify strengths and weaknesses, document areas of professional and personal development, and evaluate assistantship duties (as applicable).

Faculty will provide numerical scores from 1 (unacceptable) to 4 (exceeds expectations) on academic progress, work ethic, professional development, and assistantship duties (as applicable), as well as provide narrative commentary to support the scores. For scores of 2 or 1 in any given area, a student may be placed on probation and a specific plan for improvements will be included to implement in the following semester. Should students not be able to implement the necessary improvements by their next review, continuing to earn a score of 2 or 1, they may be dismissed from the program.

Two weeks before their review, students must complete a self-assessment of their skills and progress in response to the Department Self-Reflection instructions to submit to the Graduate Director. Before the review meeting, the faculty will submit the completed assessment to the student with the scores and written comments, so the conversation can be more focused during the meeting. In addition to the verbal conversation, students may add additional comments to the written review before signing. Signed and completed reviews will be stored digitally by the Department for archival purposes.

Theatre, MFA

The Master of Fine Arts degree in theatre has six areas of study:

- Acting
 - The Acting Concentration is a rigorously structured sequence of study that provides the actor a solid base of technique and proficiency in an array of acting styles and methods.
- Arts Management
 - The Arts Management Concentration offers a well-rounded education through coursework from the Department of Theatre and Dance, the Manderson Graduate School of Business, and the College of Communications and Information Sciences
- Costume Design and Production
 - The Costume Design and Production Concentration includes general and advanced courses in costume design, history, construction, and crafts.
- Design and Technical Production
 - The Design and Technical Production Concentration includes study in Lighting Design, Scenic Design, Sound Design, Technical Direction, and associated areas. Students are exposed to all areas within coursework throughout their time in the program. Students' realized production work can be centered around a particular area or they can have opportunities in multiple areas.
- Directing
 - The Directing Concentration is an intense three-year program with a dual focus on production and preparation for academia. It is geared towards nascent directors who have already mastered the basics of theatre directing and helmed a few productions (of any size or budget, including very small).
- Stage Management
 - The Stage Management Concentration is a production-oriented, three-year intensive that focuses on providing a diversity of management experience to candidates as well as ongoing mentorship and teaching opportunities in an academic environment.

Admissions

The Theatre MFA degree requires specialization and admission to one of the following areas of study: acting, arts management, costume design and production, design and technical production, directing, or stage management. Admission to the MFA degree program in theatre requires satisfaction of all admission requirements as described in the Admission Criteria section of this catalog. Admission is awarded based upon a portfolio review, interview, and acceptance into The University of Alabama Graduate School for specialization in arts management, costume design and production, design and technical production, directing, and stage management. Admission is awarded based upon audition, interview, and acceptance into The University of Alabama Graduate School for the acting specialization.

The MFA program is normally a three-year program. Students who hold the MA degree in theatre upon admission to the program may expect a shortened course of study, dependent upon faculty evaluation of the previous work. Students seeking such a shortened program must apply to have previous work evaluated. Normally, a two-year minimum residency is required for students with shortened programs. Courses related to Theatre in other Departments may be considered within the 45 required credit hours upon approval of the Area Head within a specialization and the involved Department.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Should deficiencies in the student's undergraduate program be perceived, appropriate undergraduate courses will be required. While these undergraduate courses may not be counted toward the graduate degree, they may be taken in addition to the maximum allowable number of graduate hours.

All students must follow Plan II (non-thesis) and complete 60 semester hours of graduate coursework for the degree. Continuation in the MFA degree program is contingent upon recommendation by the theatre faculty, following an annual review of the student's academic and production work. Students may be placed on probation following the review; students placed on probation have one semester in which to reestablish good academic standing. Under no circumstances will a student be permitted to continue in the program on probation for more than one semester.

Program Core	Hours
TH 551 Hist Of The Theatre I	3
TH 552 Hist Of The Theatre II	3
TH 600 Advanced Practicum I (1st Semester)	1

TH 643	Teaching Practicum	1-3

TH 672	Venue and Event Management	3
TH 690	Independent Study	3
TH 698	Research Not Related to Thesis	3

The program typically accepts one new MFA candidate in stage management a year.

Transfer Credit

Subject to approval by the department chairperson and the dean of the Graduate School, in specified programs, a maximum of 15 credit hours of graduate work may be transferred from another institution. These hours must be in theatre or in a closely allied subject, and they must contribute to the student's educational objective.

Graduate School information on Transfer Credit (p. 18).

Comprehensive Exam/Capstone

MFA Theatre students follow the Plan II program requirements, as described by the Graduate School, to complete their degree. For the Department of Theatre and Dance, a requirement for this degree plan is that a student must complete a culminating or capstone experience. The Capstone Experience is one in which students are expected to integrate prior learning and demonstrate mastery of their field of study. At a minimum, this will typically take the form of one or more of the following:

- A research paper, a policy and practice paper, or equivalent experience
- A public performance or exhibition along with a contextualizing paper
- A practicum or internship

Every Capstone submittal must include a significant writing component. The specific topic of a student's individual Capstone will be chosen by the beginning of their final year in the program. Each student's Capstone work must be an individual project rather than a group project. While it is understood that students often work together on particular productions, the nature and choice of an individual student's Capstone must be such that their work can be individualized and reviewed as a distinct piece of work so that their grade is reflective of the work they have done, rather than the work of a group. In some cases, the actual development of the project or documentation of the Capstone may occur over multiple semesters, depending on the concentration and the direction of the Area Head.

Work on a student's capstone will be performed under the TH 695 Capstone Experience in Theatre course. Each student will receive an individual grade within that course that not only reflects what they have submitted but also reflects their demonstration of their overall mastery of their field of study. Each student's submission must be complete and submitted to their Area Head by the last day of Final Exams in their last semester. Any submittal past that date will be penalized according to the discretion of their Area head.

Each student's submittal must be in the form of a single digital file of an appropriate digital format. The most preferred format would be a Portable Document File (PDF). Files from particular software products such as Microsoft Word will not be accepted. The contents of the file should be appropriately organized as if for publication. This file will be submitted as directed by the student's individual Area Head. It is advised that the student have their Area Head review their materials and progress throughout the process to ensure that the final product the student will be submitting is acceptable.

The Area Head will thoroughly review what the student has submitted before making any determination of a grade assignment. With the grade

assignment, the Area Head will provide the student with a digital copy of the formal review of their submittal. The Area Head will then take the student's submittal and their formal review to save within the digital repository for MFA Theatre Capstone Projects so that they can be held for archival purposes.

Capstone Projects are evaluated with scores of 1 (unacceptable) to 4 (exemplary) on the following competencies:

- Competency 1: Mastery of fundamental technical skills and methods
- Competency 2: Mastery of specialized skills appropriate to area/ Capstone Project
- Competency 3: Well-articulated conceptual framework for the project
- Competency 4: Demonstrated fulfillment of project in alignment with the project proposal or planning
- Competency 5: Demonstrated problem-solving abilities and creative, critical thought processes
- Competency 6: Clarity of supporting materials that provide explanation of the project
- Competency 7: Critical assessment of the work and the creative process
- Competency 8: Clear description of the development of skills or acquisition of new skills related to the production of the project
- Competency 9: Professionalism throughout the process

Students must receive a score of 3 or higher on competencies 1 and 2, on at least 2 competencies within 3-6, and on at least 2 competencies within 7-9 to successfully pass their Capstone Experience.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 18).

Student Progress Requirement

The Concentration areas will hold reviews at the end of the 1st-4th semesters for each MFA candidate. Students in their final year are reviewed through the Capstone Project process. The review is designed to give graduate students an idea of their progress towards the successful completion of their degree program, identify strengths and weaknesses, document areas of professional and personal development, and evaluate assistantship duties (as applicable). Faculty will provide numerical scores from 1 (unacceptable) to 4 (exceeds expectations) on academic progress, work ethic, professional development, and assistantship duties (as applicable), as well as provide narrative commentary to support the scores. For scores of 2 or 1 in any given area, a student may be placed on probation and a specific plan for improvements will be included to implement in the following semester. Should students not be able to implement the necessary improvements by their next review, continuing to earn a score of 2 or 1, they may be dismissed from the program. Two weeks before their review students must complete a self-assessment of their skills and progress in response to the Department Self-Reflection instructions to submit to their Area advisor. Before the review meeting, the faculty will submit the completed assessment to the student with the scores and written comments, so the conversation can be more focused during the meeting. In addition to the verbal conversation, students may add additional comments to the written review before signing. Signed and completed reviews will be stored digitally by the Department for archival purposes.

Manderson Graduate School of Business

The Manderson Graduate School of Business is the graduate division of the Culverhouse College of Business. The mission of the College is to foster an inclusive community, committed to personal engagement and dedicated to shaping the future of business through excellence in teaching, research, and service. Manderson offers several Master's and Ph.D. degree programs. Master's degrees may serve as terminal professional degrees; that is, they are designed primarily for people who plan for professional careers in business, government, or nonprofit organizations. They may also function as preparatory programs for the pursuit of doctoral level education. The Ph.D. programs prepare graduates for careers as university level professors or as professional researchers. The Ph.D. requires an extensive, in-depth investigation of a subject area in their major field of study, culminating in the completion of a doctoral dissertation.

The Manderson Graduate School of Business features MBA and EMBA degree programs, along with ten (10) Specialized Master's and seven (7) Ph.D. degree programs (see navigation below). All programs are accredited by AACSB International—The Association to Advance Collegiate Schools of Business.

Specialized Master's Programs

- Master of Accountancy
- Master of Science in Applied Statistics
- Master of Science in Business Analytics
- Master of the Arts in Economics
- Master of Science in Finance
- Master of Arts in Management
- Master of Science in Marketing
- Master of Science in Operations Management
- Master of Science in Management Information Systems
- Master of Tax Accounting

Doctor of Philosophy (Ph.D.) Programs

- Accounting
- Applied Statistics
- Economics
- Finance
- Management
- Marketing
- Operations Management

Business Administration, MBA

Program Overview

The objective of the Manderson MBA program at The University of Alabama is to prepare high-achieving, high-potential students for successful business careers in a globally competitive environment. The MBA program has a commitment to providing a high value-added experience within a diverse and collaborative learning environment. The curriculum emphasizes fundamental business concepts, knowledge, and skills through an interdisciplinary perspective. Case studies, projects, teamwork, and technology contribute to a dynamic applied learning environment.

MBA Program Formats

The Manderson MBA Program is offered in a variety of formats. The Traditional MBA is a full-time, two-year program that requires a focused area of study and is entered after the completion of an undergraduate degree. The STEM and CREATE Paths to the MBA are five-year programs integrated with quantitative and creative undergraduate disciplines, respectively, at The University of Alabama. The STEM and CREATE MBA programs also require a focused area of study.

Traditional MBA

The Traditional MBA program begins in the fall semester. Students must be enrolled for four consecutive Fall and Spring semesters that span over the two-year program. During the intervening summer, students are expected to be involved in meaningful internships to further enhance their professional experiences. Students take a prescribed program of courses and cross-discipline work that blends the analytical tools of management and the functional areas of business into a general management perspective. Topics include accounting, economics, finance, management, marketing, operations, strategy, communications, information systems, and statistics. In addition, each student pursues elective courses leading to a mandatory focused area of study. Course selections for the focused area of study are made with the advice of faculty and staff advisors. Teaching methods combine cases, lecture-

discussion, and projects. Small class sizes allow faculty members to use a variety of techniques for enhanced learning.

STEM Path to the MBA

The STEM Path to the MBA is a five-year program designed for entering University of Alabama freshmen majoring in a STEM area (science, technology, engineering, or mathematics). This program integrates business honors courses with the STEM undergraduate degree and culminates in the MBA program. Students in the STEM MBA program begin the MBA in the summer semester after the completion of their junior year of their undergraduate major. Students will complete another summer semester of MBA courses after finishing their STEM undergraduate degree. Students will then enter a full year of MBA program study to complete their MBA degree. During the two summertime periods, students are expected to be involved in meaningful internships to further enhance their professional experiences.

During each semester of their four years of undergraduate study, students enroll in a 1.5 credit-hour Business Honors course. These honors courses focus on communication and leadership skills. Students work in teams on community projects to develop both an appreciation for and a basic understanding of the importance of management skills in science and technology careers and to create an opportunity to interact with other STEM/CREATE students, as well as with executives from technology companies and MBA faculty members.

The Business Honors courses are taught by a faculty member who is assigned to the cohort in the freshman year and works with them through their senior year. This provides continuity of contact and allows the faculty mentor to track the students through the program.

During the sophomore, junior, and senior years, STEM discipline students can expect to be off campus and involved in internships, cooperative-learning experiences, and other online learning activities. The Business Honors courses include extensive use of digital technology: streaming video of presentations from guest speakers, teleconferencing for student presentations and class meetings, and the use of course management software that allows off-campus students to remain engaged and participate in coursework.

CREATE Path to the MBA

The CREATE Path to the MBA is a five-year program that targets students majoring in one of the various creative disciplines, including, but not limited to: art, music, fine arts, literature, fashion retailing, advertising, apparel and textiles, interior design, modern languages and classics, theater, and dance. This program integrates business honors courses with the CREATE undergraduate degree and culminates in the MBA program. Students in the CREATE MBA program begin the MBA in the summer semester after the completion of their junior year of their undergraduate major. Students will complete another summer semester of MBA courses after finishing their CREATE undergraduate degree. Students will then enter a full year of MBA program study to complete their MBA degree. During the two summertime periods, students are expected to be involved in meaningful internships to further enhance their professional experiences.

During each semester of their four years of undergraduate study, students enroll in a 1.5 credit-hour Business Honors course. These honors courses focus on communication and leadership skills. Students work in teams on community projects to develop both an appreciation for and a basic understanding of the importance of management skills in science and technology careers and to create an opportunity to interact

with other STEM/CREATE students, as well as with executives from technology companies and MBA faculty members.

The Business Honors courses are taught by a faculty member who is assigned to the cohort in the freshman year and works with them through their senior year. This provides continuity of contact and allows the faculty mentor to track the students through the program.

The program is centered around innovative solutions to real-world problems and runs parallel to its sister program, the STEM Path to the MBA. Using nontraditional classroom methods and experiential learning opportunities, students on the CREATE Path to the MBA have the opportunity to grow both academically deep into their chosen major and functionally broad across different areas like communication, leadership, and professionalism. An added benefit from running parallel to the STEM Path to the MBA is that CREATE MBA students will gain exposure to the technical backgrounds of their peers, further diversifying their frame of reference for problem-solving.

Dual Degrees

JD/MBA Joint Degree Program in Law and Business

The University of Alabama School of Law and the Manderson Graduate School of Business offer students who are interested in combined business and legal career opportunities a law and MBA curriculum culminating in the awarding of the juris doctor (JD) and MBA degrees within four years. Admission is required into both programs. Further information about the joint JD/MBA Program may be obtained by contacting the director of the MBA Program and/or the Law School admissions office as well as by visiting the respective websites.

MBA Dual Degrees in Engineering

The Manderson Graduate School of Business and the College of Engineering offer students from an engineering background an opportunity to receive both their MBA and Master of Science in engineering (Civil or Mechanical) within two calendar years. Prospective students must be admitted to both programs before being allowed to pursue the dual curriculum. Further information about the dual MBA/ENG programs may be obtained by contacting the director of the MBA Program and/or the Engineering admissions office as well as by visiting the respective websites.

MBA/MFA Dual Degree

The Manderson Graduate School of Business and the College of Arts and Sciences offer students an opportunity to receive both their MBA and their Master of Fine Arts (Theater Management) within four years. Prospective students must be admitted to both programs before being allowed to pursue the dual curriculum. Further information about the dual MBA/MFA program may be obtained by contacting the director of the MBA Program and/or the Theater Management office as well as by visiting the respective websites.

Admissions

Application Requirements

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Applicant interview
- A resume
- 3 letters of recommendation
- Test Scores
 - Traditional MBA: Minimum GMAT of 500 or a minimum GRE of 300 (verbal + quantitative)

- STEM/CREATE MBA - Minimum GMAT of 600 or a minimum GRE of 305 (verbal + quantitative)
- A TOEFL score of at least 100 or an IELTS score of at least 7.0 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below)

See the Admission Criteria section of this catalog for more information.

Application Deadlines

Traditional Full-Time MBA

- October 15: 1st round deadline
- January 5: 2nd round deadline
- February 15: 3rd round deadline
- April 15: 4th round deadline
- May 30: 5th round deadline. (Only offered if space remains in the class)

STEM/CREATE Path to MBA

- Deadline: November 15th for all applications
- Term Start: Applicants in the Path program only: Please select the term "Summer" for the year you plan to start (summer after Junior year).
- To qualify for the Path MBA option, students must have a minimum 3.0 cumulative GPA and be on track to complete 91 credits by the end of spring for their planned Junior year and enrolled in the STEM/CREATE Path Undergraduate program from your Freshman year at the University of Alabama. In addition, participation in the Path program as a Freshman through Junior year does not guarantee acceptance to the MBA portion of the STEM/CREATE path program.

Curricular Requirements

The Traditional MBA program requires the completion of 57 credit hours and offers seven (7) focused areas of study: Business Analytics, Cybersecurity, Finance, Financial Risk, Real Estate, Supply Chain & Operations Management, and Strategic Management & Marketing. The Traditional MBA program has 36 credit hours of Core Requirements. The remaining 21 credit hours are related to a focused area of study.

The STEM/CREATE MBA program requires the completion of 51 credit hours and offers four (4) focused areas of study: Business Analytics, Financial Engineering, Real Estate, and Supply Chain & Operations Management. The STEM/CREATE MBA program has 39 credit hours of Core Requirements. The remaining 12 credit hours are related to a focused area of study.

The Core Requirements are listed below followed by the Focused Areas of Study (FAS) for the Traditional and STEM/CREATE MBA programs.

Traditional & STEM/CREATE - Core Requirements		Hours

Executive Masters of Business Administration, EMBA

Executive MBA (EMBA) Weekend Program

The University of Alabama's Culverhouse College of Business Executive MBA program brings together successful managers, professionals, and executives across a broad spectrum of industries and job positions to earn the MBA degree. Weekend EMBA class sessions allow students to pursue their MBA degree without sacrificing current employment. This program requires a total of 48 credit hours of coursework in a lock-step, cohort-based experience. The 17-month program is delivered through a hybrid-instruction model. Students meet in person one weekend each month on Friday and Saturday. In between the monthly in-person sessions, technology is used to support content and instruction for each course. The program is offered in two locations: the Huntsville-based EMBA program generally enrolls in the fall and the Tuscaloosa-based EMBA program generally enrolls in the spring. The program includes an optional international trip/experience

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- Personal Interview
- A completed admissions questionnaire response document (this replaces the Statement of Purpose requirement)
- The GMAT or GRE exam is typically no longer required for EMBA applicants who meet specific criteria established. To qualify for this exemption, an applicant must have strong work experience (at least five years) and an undergraduate GPA of 3.0 or better OR have already earned another master's degree. *Please contact the EMBA office for additional information on this policy.*

- Test scores requirements for applicants with a GPA below a 3.0 are a GMAT of at least 500 or a GRE of at least 300, or a score in the 50th percentile on the Executive Assessment.
- A minimum of five years of professional work experience
- Active support by your current employer
- An undergraduate degree from an accredited institution with a solid grade point average (prefer 3.0 GPA or better)
- 2 letters of recommendation. One letter must be from your supervisor; the second letter may be from another person within your company or a client.
 - Please ask your recommenders to address these five point in their letters:
 - a. How long have you known the applicant and in what capacity?
 - b. What do you consider the applicant's primary talents or strengths?
 - c. In what area does the applicant need improvement or growth?
 - d. Please discuss your perception of the applicant's potential in a professional environment following the completion of the EMBA Program.
 - e. Please provide further comments that you feel would aid in the evaluation of the applicant.

A student who does not meet all requirements but excels in other areas may be admitted with Permission to Continue on a case-by-case basis

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Our team-intensive EMBA curriculum provides a thorough education in business skills, theories, and practices with focused areas of study in financials, strategy, global initiatives and leadership. Our boardroom approach to learning uses case studies, simulations and encourages open debate, discussion, and in-depth projects and presentations. This teaches our professional students to make decisions in the face of conflicting data, complex policies, and intense time and fiscal pressures. The curriculum is 16 courses at 3 credit hours for a total 48 credit hour program.

Students work in study teams while in the program, and coursework is a mixture of individual and team assignments. Cases, projects, simulations, presentations, and written assignments are typical class assignments. Teams generally choose to meet each week face-to-face or via conference call or online. Blackboard, an online tool integrated into the curriculum, allows students to interact with classmates and instructors and serves as an online data repository for class materials.

Accounting, MMA

The Master of Accountancy degree program is a fifth-year professional program designed for students whose primary career interests are

accounting and assurance services. The program prepares students for professional careers in the fields by focusing on the development of research, cognitive thinking, interpersonal and communication skills.

In conjunction with the prerequisite undergraduate accounting coursework, the Master of Accountancy program provides graduates with the accounting courses required to sit for the CPA exam. The program provides graduates with the necessary development of key skills and attributes to facilitate their growth as accounting professionals.

Admissions

Regular admission and "Permission to Continue" admission decisions are made based upon all application materials: academic transcripts, statement of purpose, resume, letters of recommendation, GMAT score, work experience, etc.

Before admission to the program, students should have completed the following accounting courses or their equivalents:

Code and Title	Hours
AC 310 Fin Rptg & Anyls of Bus Actv I	3
AC 311 Fin Rptg & Anyls Bus Actvts II	3
AC 361 Cost Analysis Planning/Control	3
AC 371 Introduction To Taxation	3
AC 389 Accounting Information Systems	3
AC 432 Intro to Corporate Governance	3
AC 456 Government & Nonprofit Accounting	3
AC 471 Taxation of Business Transactions & Organizations	3

Applicants should contact the program director if they have any questions about equivalent course requirements.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- 3 letters of recommendation (at least one of which should be from an accounting professor)
- GMAT score*

*GMAT Waiver Policy: Applicants who meet any of the following criteria qualify to have the GMAT requirement waived (applicants that do not meet any of the criteria may apply for a waiver which will be considered on a case-by-case basis):

- Applicants with an Accounting GPA of 3.25 or above in a minimum of 15 upper-division credit hours.
- Applicants with a graduate degree.
- Applicants who have passed the Certified Public Accountant (CPA) exam.
- Applicants with five years of management experience that includes significant budgetary and leadership responsibility and a 3.0 (or better) upper-division undergraduate GPA from an accredited university.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Students must take a minimum of 30 hours of graduate courses, including a minimum of 21 hours of accounting courses. With approval by the coordinator of the program, students can take 9 hours of electives from 500-level courses that will help prepare them for their desired career path.

Accounting, Ph.D.

The PhD Program in Accounting is a research-intensive program that provides excellent preparation for a career in academics. The four-year program is designed to provide the tools needed for long-term success as an accounting scholar in all areas, including research, teaching, and service.

The Culverhouse School of Accountancy's faculty supports students interested in archival/empirical and behavioral/experimental research in auditing, financial accounting, and tax. We seek to admit, train, and graduate students who have initiative, enthusiasm, and a desire to become scholars at major academic institutions.

Admissions

Admission recommendations are made by the PhD program committee after considering the applicant background, admission test scores, grade point averages (GPAs), statement of purpose, letters of reference, fulfillment of prerequisites, and an on-campus interview. The GMAT is preferred, but students may choose to take either the GMAT or the GRE.

- Application Fee
- Resume
- 3 Letters of Recommendation
- A GRE score with a quantitative score ≥ 162 , a verbal score ≥ 160 , and an analytical writing score ≥ 4.5 , or a GMAT score ≥ 650 .

- A TOEFL score of at least 100, an IELTS score of at least 7.0, or a PTE score of at least 68 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below)

An applicant who is accepted for admission to the Culverhouse School of Accountancy PhD Program will be admitted as a regular full-time in-residence PhD student. The Culverhouse School of Accountancy PhD Program has no other category of admissions.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Ph.D. Program in Accounting involves two years of rigorous coursework. In addition to Accounting seminars, students take courses in Statistics and Economics. Depending on their research focus, students often will take additional electives in other departments such as Psychology or Finance.

Dissertation Research Hours (AC 699 - with advisor approval, distributed appropriately throughout the program)		24
Total Hours		72

Transfer Credit Policy

Graduate School information on Transfer Credit.

Doctoral Plan of Study Requirement

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School by the time the student has completed 30 coursework hours.

Graduate School information on the Doctoral Plan of Study. (p. 23)

Comprehensive/Qualifying Examination

- The Second Year Project (Research Practicum II (AC 692, 3 hr.)) is conducted in lieu of a comprehensive field exam. The project should commence *no later* than upon completion of the First Year Project. As with the First Year Project, the second summer paper will be supervised by a faculty member who has agreed to the assignment.

Admission to Candidacy Requirements

Students are certified by the dean of the Graduate School for Admission to Candidacy for the PhD degree after they have met the following requirements

Successful passing of the second-year paper.

Dissertation Requirements

A Dissertation Committee contains at least five individuals. At least 20% (no more than 40%) of the committee is to be an external member whose home department is outside of accounting.

The doctoral proposal must be presented to at least 50% of the tenure track accounting faculty. A successful proposal occurs when at least 50% of those in attendance vote "pass". A student has two attempts to successfully pass the proposal. It is recommended that the proposal be presented no later than August 1 at the start of the student's fourth year.

The dissertation is to be presented to the student's entire dissertation committee. The School of Accountancy will follow University procedures regarding IRB, formatting, and submission of the dissertation. A three-paper dissertation will include three working papers. A traditional dissertation is required to be more than one working paper.

Continuous Enrollment

Graduate School information on Continuous Enrollment (p. 23).

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 18).

Student Progress Requirement

The program has two significant research milestones that students must meet before progressing to the dissertation phase. The first year paper, typically a scholarly review of existing accounting literature that addresses a specific research area, is completed by students in their first year and presented by June 30 following their first year of coursework. The second year paper is a complete, original, empirical study undertaken under the direction of the student's faculty advisor. Students must present the second year paper by June 30 following their second year of

coursework. Students must successfully present and defend the second year paper before progressing to the dissertation phase.

Writing a dissertation is the final test of research skill. Students must demonstrate an understanding of relevant literature and methodology, and the ability to think independently. Ph.D. candidates must identify an original topic, plan a test of hypotheses, gather data, complete a written version of the dissertation, and defend it at a final oral examination, after which they finalize a document acceptable to the dissertation committee and to the Graduate School.

This policy applies to all prospective and current students enrolled in the Culverhouse School of

Accountancy PhD program. This policy is not a contract between PhD students and the

Culverhouse School of Accountancy. With the PhD student's advisor, the Culverhouse School of

Accountancy PhD Committee evaluates each student throughout the year. The Committee and

advisor will perform a written annual evaluation each summer. At this time, the Committee and

advisor will evaluate whether the student has demonstrated to the Committee that they have met

the academic requirements of the Culverhouse School of Accountancy. The annual evaluation

letter will contain a discussion as to whether the student is meeting or not meeting the

Committee's expectations. This letter will provide suggestions as to how the student can improve their performance.

This evaluation will include, as appropriate, the student's coursework performance, first and

second-year paper performance, performance in workshops and colloquiums, and the

performance during the dissertation idea generation and dissertation proposal. The Committee

reserves the right to dismiss a student at any point in the program.

Dismissal occurs once the

majority of the Committee believes that the student has not met the program's academic

standards. Students may be terminated from the PhD program even if they have completed the

first or second-year paper presentation or have passed their dissertation proposal.

If the Culverhouse School of Accountancy PhD program deems it necessary to dismiss a PhD

student, the following procedure will generally be followed:

1. The dismissal will be discussed and documented by the PhD Committee and the student's advisor.
2. The PhD program director will advise the student they are being dismissed from the program and the reason for the dismissal.
3. The Director of the PhD program will provide the student with information regarding the university's counseling services.
4. The student will turn in all University property to the Accounting Assistant.

Tax Accounting, MTA

The Master's of Tax Accounting (MTA) degree program is a multidimensional approach to the education of the modern tax specialist. The program develops an understanding of the taxation system and the interrelationships that exist between that system and accounting theory; a basic knowledge of the legal system as it relates to taxation; and the basic tools necessary for research and communication in taxation. Graduates are prepared to research tax, legal and accounting databases related to tax problems and to make tax-related decisions.

Admissions

Admission and Conditional Admission decisions are made based upon all application materials: academic transcripts, statement of purpose, resume, letters of recommendation, GMAT score, work experience, etc.

Before admission to the program, students should have completed the following accounting courses or their equivalents:

Code and Title	Hours	
AC 310	Fin Rptg & Anyls of Bus Actv I	3
AC 311	Fin Rptg & Anyls Bus Actvts II	3
AC 361	Cost Analysis Planning/Control	3
AC 371	Introduction To Taxation	3
AC 389	Accounting Information Systems	3
AC 432	Intro to Corporate Governance	3
AC 471	Taxation of Business Transactions & Organizations	3

Students who have not taken AC 456 Government & Nonprofit Accounting or its equivalent must take AC 556 Governmental Nonprofit Account in addition to other required coursework.

Applicants should contact the program director if they have any questions about equivalent course requirements.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- 3 Letters of Recommendation (at least one of which should be from an accounting professor)
- A GMAT score of 500*

Admission with Permission to Continue: Students who do not meet the GMAT score requirement, but who excel in other areas may be considered for "Admission with Permission to Continue".

*GMAT Waiver Policy: Applicants who meet any of the following criteria qualify to have the GMAT requirement waived (applicants that do not meet any of the criteria may apply for a waiver which will be considered on a case-by-case basis):

- Applicants with an Accounting GPA of 3.25 or above in a minimum of 15 upper-division credit hours.
- Applicants with a graduate degree.
- Applicants who have passed the Certified Public Accountant (CPA) exam.
- Applicants with five years of management experience that includes significant budgetary and leadership responsibility and a 3.0 (or better) upper-division undergraduate GPA from an accredited university.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Students are required to complete a minimum of 30 hours of approved coursework beyond the undergraduate degree. At least 18 of these hours must be in coursework in the major field. A minimum of 24 hours must be taken in courses open only to graduate students, and 15 of these must be in courses in accounting and taxation at The University of Alabama. To receive the master of tax accounting degree, the student must complete the required core courses with an average grade of "B" or better, and must maintain an average grade of "B" or better in all required accounting courses. The following core courses are required for the MTA degree:

Code and Title	Hours
Required courses	
AC 512 Adv Financial Reporting/Analys	3
AC 534 Fraud & Ethics Risk Management	3
AC 575 Taxn Corp Shareholders	3
AC 576 Adv Corporate Taxation	3
AC 578 Partnership Taxation	3
AC 582 State And Local Taxation	3
AC 593 Res & Communicatn Taxation	3
Approved Electives	
AC 568 Accounting for Income Taxes	3
LAW 641 Tax Procedures	3
LAW 647 Federal Estate And Gift Tax	2
LAW 761 International Taxation	3

Students are not required to take AC 512 or AC 534 as part of the program if the advisor deems that they have completed an equivalent course. Discuss elective options with Program Director.

Total Hours 32

Note: Two undergraduate tax courses (which may be a part of the undergraduate degree requirements) are required as prerequisites to each of the graduate tax courses. LAW & C&BA courses have additional fees.

Economics

Intermediate macro- and microeconomic theory (EC 309 Intermediate Macroeconomics and EC 308 Intermediate Microeconomics or their equivalents) are considered prerequisites for all graduate coursework in economics, except for MBA-designated courses.

EC500 Managerial Economics

Hours 3

An introduction to the foundations of both micro- and macroeconomic analysis, including consumer demand, production and cost analysis, price determination, and macroeconomic theory and policy. Emphasis is on the theory of the firm.

EC508 Microeconomic Theory

Hours 3

An examination of the theory of resource allocation. Topics include demand theory, production and cost functions, theory of markets, general equilibrium analysis, and welfare theory.

Finance

EC 110 Principles of Microeconomics and EC 111 Principles of Macroeconomics or their equivalents are prerequisites for all graduate coursework in finance, except for MBA-designated courses.

FI504 Financial Management

Hours 1-4

Corporate financial planning and decision making; working capital management, capital budgeting, financing, risk-return analysis, valuation, and dividend policy.

FI505 Corporate Valuation

Hours 3

A case study course that focuses on the valuation of publicly held firms.

Finance, MS

The Master's of Science in Finance offers a specialized curriculum with focused training in finance. The degree is designed to offer advanced, applied and theoretical experience in investment banking, corporate finance, actuarial science and/or financial derivatives.

The course of study is designed to provide insight into the following topics:

- The important role of financial intermediaries
- The management of financial intermediaries and an understanding of the markets in which they participate
- The valuation of financial assets such as stocks, bonds, derivatives, and other specialized assets and how they are managed in a portfolio
- The determination and behavior of interest rates and rates of return on assets
- The incentives and determinants of corporate behavior.

The program offers focused areas of study:

1. Corporate Finance Focus
2. Financial Engineering Focus
3. Actuarial Focus
4. Real Estate Focus

Admissions

The Master's of Science in Finance admission standards are significantly higher than other Business School programs. All application materials are carefully considered. Students are not required to have obtained an undergraduate degree in business.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- 3 letters of recommendation
- A GPA of 3.5 or greater for regular admission
- A GRE score of at least 320 (verbal + quantitative) or a GMAT score of at least 640

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue."

Accelerated Master's Program (AMP) students must meet the minimum admission requirements as listed in the AMP section of this catalog (p. 13).

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The choice of undergraduate major does not preclude successful completion of the MSF program. It is important to realize, however, that most graduate finance courses assume that students are familiar with a common core of fundamental concepts in accounting, statistics, calculus, linear algebra, economics, and finance. Students with deficient backgrounds in these core courses, especially calculus and microeconomics, should prepare for the graduate courses, prior to commencing the program.

Undergraduate Courses (not required)

Fundamental Common Core Classes		Hours
AC 210	Intro To Accounting	
MATH 121	Calculus & Applications	
Or		
MATH 125	Calculus I	
MATH 126	Calculus II (Prefer)	
MATH 227	Calculus III	
MATH 237	Introduction to Linear Algebra	
ST 260	Statistical Data Analysis	
EC 308	Intermediate Microeconomics	
EC 309	Intermediate Macroeconomics	
FI 302	Business Finance	

Master's Course List with Focused Areas of Study

The MSF requires 30 hours of coursework.

Required Core Courses		Hours
FI 510	Financial Management	3
FI 512	Money And Capital Mkts	3
FI 515	Quantitative Investment Analys	3
FI 522	Bank Administration	3

FI 596	Capstone Project	3
EC 571	Econometrics	3
AC 544	Financial Statement Analysis	3

Choose one of the following Focused Areas of Study.**Corporate Finance Focus:**

FI 505	Corporate Valuation	3
FI 506	Mergers & Acquisitions	3
One Finance elective course from list below, or other course with approval.		

Finance Engineering Focus:

FI 519	Financial Engineering	3
FI 520	Financial Risk Management	3
One Finance elective course from the list below, or other course with approval.		

Real Estate Focus:

FI 535	Real Estate Invest & Developmnt	3
FI 534	Seminar In Real Estate	3
One Finance elective course from the list below, or other course with approval.		

Actuarial Science:

FI 450	Loss Models I	3
FI 451	Loss Models II	3
One Finance elective course from the list below, or other course with approval.		

Approved Electives List:

FI 450	Loss Models I	3
FI 451	Loss Models II	3
FI 505	Corporate Valuation	3
FI 506	Mergers & Acquisitions	3
FI 519	Financial Engineering	3
FI 520	Financial Risk Management	3
FI 534	Seminar In Real Estate	3
FI 535	Real Estate Invest & Developmnt	3
FI 572	Financial Econometrics	3
FI 597	Special Topics: Finance	3

Or other elective courses with faculty approval.

Finance, Ph.D.

The Ph.D. program in Finance is designed to provide students with the advanced training and substantive knowledge necessary to pursue positions in finance at research and teaching institutions of higher learning.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include: Application Fee

- Resume
- 3 Letters of Recommendation
- A GRE score of at least 320 (verbal + quantitative) or a GMAT score of at least 650

Students who do not meet these requirements, but who excel in other areas, maybe considered for Admission with Permission to Continue.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The courses listed below represent the minimum course requirements for the Ph.D. in finance. The required credit hours should be partitioned as follows:

Required Courses		Hours
Major Field courses- 24 hours		
FI 601	Finance Theory I	3
FI 602	Finance Theory II	3
FI 610	Seminar In Finan Mgt	3
FI 614	Seminar In Investments	3
FI 624	Financial Markets	3
FI 698	Research In Finance	3
FI Elective 1		
FI Elective 2		
Choose from the approved electives list below:		
FI 512	Money And Capital Mkts	3

FI 515	Quantitative Investment Analy	3
FI 519	Financial Engineering	3
FI 520	Financial Risk Management	3

Economics Courses- 9 hours

EC 600	Advanced Mathematical Economic	3
EC 610	Seminar In Microeconomic Theor	3
EC 660	Game Theory	3

Tool Courses- 9 hours

EC 670	Econometrics	3
EC 671	Seminar : Econometrics	3
EC 597	Special Topics In Economics (Causal Inference)	3

Choose 2 electives that complement the intended finance concentration area, with faculty/advisor approval. (see footnote 1.) 6

Total Hours 54

Footnotes

- The department strongly encourages students take additional Tool classes when choosing their 6 elective course hours.

Research Development Courses **Hours**

FI 698	Research In Finance	3
FI 699	Dissertation Research	18

Footnotes

- Once a student has entered candidacy, he or she should fill the remaining 9 credit hours taken each semester with FI 699. For example, a student in his/her fourth year who has completed all coursework should register for FI 698 and 6 credit hours of FI 699. A student in his/her third year who is still taking courses should also register for FI 698 and 3 credit hours of FI 699.

Transfer Credit

In rare circumstances, Finance PhD students are allowed to transfer a credit for a course already taken and to substitute a required course by taking another graduate course. Approval must be granted prior to starting the class that is serving as a substitute.

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study Requirement

Upon completion of the relevant course work, a student must complete the "Plan of Study" form PhD Plan of Study to show the minimum 48 semester hours of course credit and 18 hours of dissertation research credit taken during his/her time at UA.

Comprehensive Exams

Students are required to pass a Microeconomics Qualifying Examination, which is administered at end of the first year. The exam is generally administered on Monday of the first full week in June. To be eligible to continue in the Ph.D. program, a student must pass the exam.

Students who do not pass the exam when it is first administered will be given one chance to retake the failed exam. The retake exam is usually administered on Monday of the last full week in August prior to classes starting. If a student is absent from an exam without prior approval, it will be counted as a failed attempt. A student who has not passed the exam after two attempts will not be allowed to continue in the Finance Ph.D. program. The student may elect to complete 30 hours of graduate coursework and receive a MSF degree. Course substitutions for

specific MSF program requirements may be approved in advance by the coordinator of the MSF program in order to facilitate completion of the degree in a timely manner.

If the committee determines, by majority vote, that the student has failed the Comprehensive Exam, it will provide its concerns in writing to the student, who will have one additional opportunity to successfully defend the research paper. A revised version of the research paper, with a separate response indicating how the committee's concerns were addressed, must be submitted to the primary advisor and the academic coordinator of the Finance Ph.D. program, no later than September 1 of the student's fourth year in the program. The student must then present the revised research paper to a committee of the faculty, constituted in the manner described above, no later than October 1 of the student's fourth year in the program. The committee determines the outcome of the second presentation in a manner similar to that described above.

A student who has failed the Comprehensive Exam by failing to defend by May 1 of the student's third year in the program must also successfully orally defend their research by October 1 of the student's fourth year in the program. Procedures for the oral defense in this case are identical to those for a timely first attempt with the exception that no further attempts are permitted.

In any event, failure to successfully defend by October 1 of the student's fourth year in the program constitutes a second failed attempt. A second failure will result in dismissal from the program. Students dismissed for a second failure may apply for a MSF degree and are exempted from the MSF Comprehensive Exam requirement.

A student passing the Comprehensive Exam is eligible to defend a dissertation proposal. All dates specified herein are the latest dates at which the requirements can be met and students are encouraged to complete the research paper and orally defend it at the earliest possible date.

Admission to Candidacy Requirements

After passing the written comprehensive exam at the end of the second year and completing the second year's course work, a student begins working on the dissertation. A student must ask a faculty member to serve as Chairperson of his/her Dissertation Committee. The Chairperson must be identified prior to the start of the third year. The Dissertation Chairperson must be approved by the Finance Ph.D. Coordinator and Department Head.

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

A Dissertation Committee consists of at least 5 members, including the Dissertation Chairperson. The remaining faculty members of the Dissertation Committee are selected by mutual agreement between the student and the Dissertation Chairperson and do not have to be formally selected until a student is ready to propose a dissertation. One member of the Dissertation Committee must be from outside the student's major department.

The student and Committee Chairperson arrange a formal "Proposal Defense." The Proposal Defense is a preliminary oral examination during which the student orally presents and defends the dissertation proposal. The Dissertation Committee may question the student's knowledge of the dissertation topic and offer suggestions for improvement. In unusual circumstances, the Dissertation Committee may direct the student to

prepare further for the Proposal Defense and another meeting may be scheduled.

A student must propose his or her dissertation prior to April 30th of the fourth year to guarantee a fifth year of funding. A student who has not successfully proposed a dissertation by this time is viewed as not making sufficient progress towards a dissertation and may lose departmental funding.

Quantitative Economics, MA

The MA program in Economics is designed to provide students with a rigorous training in econometrics and quantitative economics, as well as in economic theory and policy. The Economics MA, is well suited for students who wish to pursue high-level professional careers in industry and government, or further study for a Ph.D. degree in economics. The Economics MA, is classified as a STEM degree, which allows for a 24 month extension of the F1 Optional Practical Training (OPT).

The Program offers two focused areas of study: Econometrics and Quantitative Economics, and Economic Policy.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- GRE score of 310 (verbal + quantitative; GMAT not accepted) or greater for regular admission. The quantitative score must be greater than or equal to 160 and verbal score must be greater than or equal to 155.

Students who do not meet these requirements, but who excel in other areas, maybe considered for "Admission with Permission to Continue."

Accelerated Master's Program (AMP) students must meet the minimum admission requirements as listed in the AMP section of this catalog (p. 13).

The Economics MA program is extremely quantitative. Entering graduate students are expected to have completed undergraduate coursework in economics, statistics, and mathematics. Students must have completed the following undergraduate courses or their equivalents. Any deficiencies should be made up by taking courses during the summer before entering the master's program.

Undergraduate Required Courses		Hours
EC 308	Intermediate Microeconomics	3
EC 309	Intermediate Macroeconomics	3
ST 260	Statistical Data Analysis	3
MATH 121 or MATH 125	Calculus & Applications Calculus I	3

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Economics MA requires 30 hours of coursework: 18 hours of required courses and 12 hours in a chosen focused area of study. Students must choose one of the Focused Areas of Study to complete the MA degree in Economics: Applied Economic Analysis or Public Policy Economics

Master's Required Core Courses:		Hours
EC 508	Microeconomic Theory	3
EC 509	Macroeconomic Theory/Policy	3

Quantitative Economics, Ph.D.

The Ph.D. program in Economics is designed to provide students with the advanced training and substantive knowledge necessary to pursue positions in economics at research and teaching institutions of higher learning, or in the private sector and in public offices within local, state, or federal government.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- Three letters of recommendation
- GRE score with a quantitative score of at least 160 and a verbal score of at least 155
- At least a B (3.0 out of 4.0) for the last two years of coursework

Students who do not meet the minimum standards may be offered "Admission with Permission to Continue" on a case-by-case basis.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The following courses are required for the Economics Ph.D. They are listed in the order that they should be taken. Students receiving an assistantship or fellowship through the University of Alabama are obligated to take these classes in the sequence detailed below. The economics faculty strongly urges students who do not receive financial

support from the university to take the courses in the designated sequence.

The First Year

Required Courses:		Hours
Summer/Fall		
EC 600	Advanced Mathematical Economic	3
Fall		
EC 610	Seminar In Microeconomic Theor	3
EC 611	Sem in Macroeconomic Theory	3
EC 670	Econometrics	3
Spring		
EC 660	Game Theory	3
EC 597	Special Topics In Economics	3
EC 661	Macroeconomic Theory II	3
Total Hours		21

Footnotes

1. After the first year (and passing the Qualifying exams), students must take six (6) field and tool courses and at least two (2) supplementary courses.

Field Courses

Required Courses, Group A and Group B (18 hours - 6 courses)		Hours
Group A - Tool Courses for Economic Research (at least 6 hours)		
EC 672	Financial Econometric Modeling	3
EC 673	Nonparametric Econometrics	3
EC 674	Experimental Economics	3
EC 597	Special Topics In Economics (Bayesian Economics)	3
EC 597	Special Topics In Economics (Causal Inference)	3
Group B - Topic Courses (at least 6 hours)		
EC 612	Sem Industrial Organizat	3
EC 624	Political Economy	3
EC 597	Special Topics In Economics (Environmental Economics)	3
EC 597	Special Topics In Economics (Urban Econ)	1-6
EC 597	Special Topics In Economics (Behavioral Decision Theory)	1-6
EC 616	Sem Monetary Economics	3
EC 631	Sem Internationl Finance	3
EC 676	Advanced Monetary Policy	3
EC 597	Special Topics In Economics (Dynamic Stochastic General Equilibrium)	3
EC 597	Special Topics In Economics (Other Special Topics (Ph.D. level))	3

Supplementary Courses (at least 6 hours) see footnote 2. Consult your Ph.D. coordinator and dissertation chairperson for course approval.

Footnotes

1. Note that these are the courses that have been offered previously or currently in the department. As faculty changes, so will the tool and topic courses available. For any questions regarding which courses are considered tool or topic courses, contact the Economics Ph.D. Coordinator.

Footnotes

- ^{2.} Students must choose at least two (2) additional courses. If a student chooses a supplementary course from Group B, they are allowed to take the course pass/fail. Note that core courses, topic and tool courses (Group A and B), and supplementary courses from Group A must be taken for a letter grade. Only supplementary courses from Group B can be taken as pass/fail. Students may also take courses outside of the department as a supplemental course, with faculty advisor permission. For example, students can take a computer programming course as one of the supplemental courses.

Research Development Courses

Research Development Courses	Hours
EC 698 Research In Economics (Prof Development Workshop, at most 18 hours.)	
EC 699 Dissertation Research (at least 18 hours after candidacy)	

Footnotes

- ^{1.} Once a student has entered candidacy, he or she should fill the remaining 9 credit hours taken each semester with EC 699. For example, a student in his/her fourth year has completed all coursework should register for EC 698 and 6 credit hours of EC 699. A student in his/her third year is taking one supplementary course should also register for EC 698 and 3 credit hours of EC 699.

Transfer Credit

In rare circumstance, Economics Ph.D. students are allowed to transfer a credit for a course already taken and to substitute a required course by taking another graduate economics course. Approval must be granted prior to starting the class that is serving as a substitute.

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study Requirement

Upon completion of the relevant course, a student must complete the "Plan of Study" form. The Ph.D. Plan of Study must show the minimum 48 semester hours of course credit and 18 hours of dissertation research credit taken during their time at UA.

Comprehensive/Qualifying Exam

Students are required to pass a Qualifying Examination, which is administered at the end of the first year. The exam consists of two separate qualifying exams: microeconomics and macroeconomics, both exams are general administered during the first full week in June. *To be eligible to continue in the Ph.D. program, students must pass both exams.*

- Upon successfully passing both exams, the Doctoral Qualifying Exam Form must be completed and signed by the committee members and the Ph.D. Coordinator and the Department Head. The form is then forwarded to the Culverhouse College of Business Dean for signature, and finally to the Graduate School.
- Students who do not pass one or both exams will be given one chance to retake the failed exam(s). Student are only required to retake the exam they failed. *The retake exam(s) are usually administered the last full week in August prior to classes starting.*
- If a student is absent from an exam without prior approval, it will be counted as a failed attempt.
- A student who has not passed both exams after two attempts will not be allowed to continue in the Economics, Ph.D. program, but is eligible to obtain a Master's degree.

Admission to Candidacy Requirement

After passing the qualifying exams and completing the second years course work, a student begins working at a dissertation.

- The student must ask a faculty member to serve as Chairperson of their Dissertation Committee.
- The Chairperson must be identified prior to the start of the third year.
- The Chairperson must be approved by the Economics Ph.D. Coordinator and Department Head.

Continuous Enrollment Policy

Graduate School Information on Continuous Enrollment (p.).

Dissertation Requirements

During the third year, students are expected to commence work on the dissertation. Students are expected to have identified a primary advisor by the start of the fall semester of their third year and formally begin work on their dissertation.

- Writing a dissertation is the final test of research skills. It requires an understanding of relevant literature and methodology, as well as the ability to think independently. Ph.D. candidates must find an original topic, plan a test of hypotheses, propose this topic to their committee, and write and defend at a final oral examination a document acceptable to the dissertation committee and to the Graduate School.
- The dissertation committee consists of at least 5 members, including the Chairperson.
- The student must propose their dissertation prior to April 30th of the fourth year to guarantee fifth year funding. If a student has not successfully proposed a dissertation by this time, the student may lose departmental funding and will be viewed as not making sufficient progress.

Management Information Systems

MIS501 Application Development for the Data-Driven Organization

Hours 3

This course will highlight one or more core programming languages (e.g., Java, Python) used within modern, data-driven organizations for the purpose of data collection, manipulation, and analysis. The first portion of the course will focus on essential programming knowledge and practices. The second portion of the course will emphasize the development of programmatic solutions, which will acquire data (e.g., web content, social media data, geospatial data, sensor-based data) through the integration of APIs and/or web services as well as ethical scraping techniques and then store the data in a modern backend database.

Prerequisite(s): MIS 502 co-requisite

MIS502 Database Design and Management in the Data-Driven Organization

Hours 3

This course will cover the essentials of database design and management in modern, data-driven organizations. The first portion of the course will focus on relational database design as well as SQL for the storage and access of structured data. The focus of the second portion of the course will highlight modern database structures/systems (e.g., Apache Hadoop, graph databases) as well as their query languages for storing, accessing, and analyzing more unstructured data or data having relationships not easily queried by traditional databases. Additional topics may include data cleansing, query optimization, and extract-transform-load (ETL) processes.

Prerequisite(s): MIS 501 co-requisite

Operations Management Courses

OM500 MGT Science & Spreadsheet Mod

Hours 3

This course provides Operations Management concepts and applications in data-driven decision making. Emphasis is on data clean-up, data analysis, problem formulation, and interpretation of results using spreadsheet-based modeling and solution procedures including optimization and simulation approaches.

Prerequisite(s) with concurrency: ST 509 or ST 560

OM501 Advanced Applied Modeling and Analysis

Hours 3

Building on the foundations of spreadsheet modeling analysis, this course provides a deeper understanding of optimization and simulation. Course topics include discrete optimization, duality and sensitivity, large scale optimization, multi-objective optimization, dynamic programming, and Monte Carlo and process simulations with an emphasis on practical applications. In addition to spreadsheets, the students will learn specialty optimization and simulation software, including heuristic methods and algorithms. Extensive use of software.

Prerequisite(s): OM 500

Statistics Courses

ST509 Stat For Business Appl

Hours 3

A broad introduction to statistical and probabilistic methods useful for managerial decision making. Topics include graphical displays, numerical summaries, basic probability models, confidence intervals, hypothesis testing, and regression analysis.

ST521 Statistical Data Management

Hours 3

Introduction to the management of data using SAS. The collection and management of data from business or scientific research projects are emphasized.

Applied Statistics, MS

Begun over 25 years ago, the Master's of Science in Applied Statistics is a highly respected program at the Manderson Graduate School of Business.

Students in the Master's of Science in Applied Statistics program can utilize the Marilyn A. Hewson Data Analytics Lab, taking advantage of cutting-edge technology in a collaborative environment. Students do not need a business degree to earn an MS in Applied Statistics. The Master of Science degree in Applied Statistics is a flexible program, allowing students to structure courses in a manner that complements their career objectives.

Admissions

Candidates for admission to applied statistics are normally expected to have completed courses in mathematics equivalent to three semesters of undergraduate calculus and to have a working knowledge of computer programming and linear or matrix algebra.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- A GRE score of at least 305 or a GMAT score of at least 500

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue"

Accelerated Master's Program (AMP) students must meet the minimum admission requirements as listed in the AMP section of this catalog.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The M.S. degree in Applied Statistics requires 30 hours to complete. Students can choose a Non-Specific course of study or one of two Specialized Tracks (Statistics or Analytics).

Required Core Courses:		Hours
ST 552	Applied Regression Analy	3
ST 553	Appld Multivariate Analy	3
ST 554	Math Statistics I	3
ST 555	Math Statistics II	3
ST 560	Statistical Methods	3
Choose the Non-specific Track or the Statistics or Analytics Track		
Total Hours		30

Approved Non-Track Specific Electives

Students who choose the Non-Specific Track, choose 15 hours of electives from the list below.

Non-Track Specific Electives		Hours
ST 521	Statistical Data Management	3
ST 522	Adv Statistical Data Mgt	3
ST 531	Data Mining I	3
ST 532	Advanced Data Mining	3
ST 540	Stat Prog & Comp with R	3
ST 545	Intro Stat Learn & Data Mining	3
ST 561	Applied Design Expermnts	3
ST 547	Data Vis and Analytics in R	3
ST 597	Special Topics ((Statistical Consulting))	3
ST 597	Special Topics ((Stochastic Processes))	3
OM 500	MGT Science & Spreadsheet Mod	3
Or any other graduate level course with faculty approval.		

Statistics Specific Track

Statistics Track		Hours
Required Course:		
ST 561	Applied Design Expermnts	3
Approved Electives: choose 4 classes from the list below.		12
ST 521	Statistical Data Management	3
ST 522	Adv Statistical Data Mgt	3
ST 531	Data Mining I	3
ST 532	Advanced Data Mining	3
ST 540	Stat Prog & Comp with R	3
ST 545	Intro Stat Learn & Data Mining	3
ST 561	Applied Design Expermnts	3
ST 547	Data Vis and Analytics in R	3
ST 597	Special Topics ((Statistical Consulting))	3
ST 597	Special Topics ((Stochastic Processes))	3
Required Core Classes		15
Total Hours		30
Or other elective courses with faculty approval.		

Analytics Specific Track

Analytics Track		Hours
Required Courses:		
ST 521	Statistical Data Management	3
ST 522	Adv Statistical Data Mgt	3
ST 531	Data Mining I	3
ST 532	Advanced Data Mining	3
Approved Electives: choose 1 class from the list below.		3
ST 540	Stat Prog & Comp with R	
ST 545	Intro Stat Learn & Data Mining	
ST 561	Applied Design Expermnts	
ST 597	Special Topics (Statistical Consulting or Stochastic Processes)	
OM 500	MGT Science & Spreadsheet Mod	
Or other elective courses with faculty approval.		

Required Core Classes.	15
Total Hours	30

Transfer Credit

Graduate School information on Transfer Credit. (p. 18)

Accelerated Master's Program

Information on the Accelerated Master's Program (p. 13).

Comprehensive Exam/Capstone

When most coursework is completed, students must pass a written comprehensive examination. The exam can be waived if the student passes a professional exam from; the Actual P Exam, SAS Predictive Exam, or the ASQ Certified Quality Engineer Exam.

Applied Statistics, Ph.D.

The PhD program in Applied Statistics is a research intensive program designed for students who demand the depth in understanding of statistical methods to solve applied problems with innovation. The techniques and skills that students learn prepare them to become professionals in a broad range of statistics-driven fields, from academia to research-based industrial settings.

The Applied Statistics professors support students interested in a diverse range of statistical topics including linear models, data mining and analytics, statistical process control, spatial statistics, longitudinal analysis, statistical computing, nonparametric and robust methods, change and anomaly detection, Bayesian inference, and statistical network analysis.

Admission Requirements

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- 3 letters of recommendation.
- A GRE score of at least 310 (verbal + quantitative, with a quantitative score of at least 160) or a GMAT score of at least 650
- A TOEFL score of at least 90, an IELTS score of at least 7.0, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below)

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Required Courses:		Hours
ST 552	Applied Regression Analy	3
ST 553	Appld Multivariate Analy	3
ST 554	Math Statistics I	3
ST 555	Math Statistics II	3
ST 560	Statistical Methods	3
ST 603	Advanced Inference	3
ST 610	Linear Models	3
ST 640	Statistical Computing	3
ST 645	Advanced Statistical Learning	3
Elective Courses		21
Dissertation Research Hours (ST 699 - with advisor approval, distributed appropriately throughout the program)		24
Total Hours		72

Approved Electives List

Approved MS & PhD Electives		Hours
MS Level Electives:		
ST 521	Statistical Data Management	3
ST 522	Adv Statistical Data Mgt	3
ST 531	Data Mining I	3
ST 532	Advanced Data Mining	3
ST 540	Stat Prog & Comp with R	3
ST 545	Intro Stat Learn & Data Mining	3
ST 561	Applied Design Expermnts	3
PhD Level Electives: must choose two classes from list below.		
ST 615	Theory Of Regression	3
ST 635	Nonparametric Statistics	3
ST 697	Special Topics (Bayesian Inference)	1-6
ST 697	Special Topics (Advanced Design of Experiments)	1-6
ST 697	Special Topics (Advanced Multivariate Analysis)	1-6
ST 697	Special Topics (Current Research Topics)	1-6
Or any other graduate level course with faculty approval		

Transfer Credit

Subject to evaluation by the PhD program committee, some coursework (but no more than 24 credit hours) may be transferred from previous graduate programs.

Graduate School Information on Transfer Credit (p. 23).

Doctoral Plan of Study Requirement

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses,

discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School by the time the student has completed 30 coursework hours.

Graduate School information on the Doctoral Plan of Study. (p. 23)

Comprehensive Exam

Entrance and Qualifying Exam:

At the end of the first academic year, PhD students are required to take a written qualifying examination. The exam is usually administered in the end of the spring semester and is based on the required MS level courses including ST 552 Applied Regression Analy, ST 553 Appld Multivariate Analy, ST 554 Math Statistics I, ST 555 Math Statistics II and ST 560 Statistical Methods. The qualifying exam requirement may be waived for students holding an MS degree in statistics. Students interest in waiving the exam must take an entrance exam in August before the start of the fall semester. The entrance exam represents a light version of the entrance and qualifying exam that is based on major and fundamental concepts covered in the required MS level courses. Students failing the entrance exam are expected to register for MS level courses in which knowledge and skill deficiencies have been identified.

Comprehensive Exam:

At the end of the second year or upon the completion of at least four (12 credit hours) PhD level statistics classes, student must take a comprehensive exam. The goal of the exam is to assess the potential of a student to conduct independent research. Individual research projects are assigned to students for independent work over a two-week period in April. By the end of the two-week term, student must submit a written report and present their findings at an Applied Statistics PhD seminar. The graduate faculty assess the quality of completed projects based on the following rubrics:

- comprehensive literature review
- soundness of the proposed research approach and adequacy of future research plans
- strength of experimental support
- quality of oral presentation and ability to address questions and concerns
- quality of written report

By the time the comprehensive exam at the latest, students are expected to find a dissertation advisor.

Admission to Candidacy Requirements

The requirements for advancing to candidacy include:

- Passing the qualifying and comprehensive examination
- Completing all coursework as listed on the approved program of study
- Receiving approval of the dissertation proposal from the dissertation committee.

Continuous Enrollment Policy

Graduate School Policy on Continuous Enrollment.

Dissertation Requirements

- **Proposal Defense** - within a year after passing the comprehensive exam, student must form a dissertation committee and present and defend their dissertation proposal. The proposal usually focuses on

the already obtained findings and plans regarding research yet to be accomplished.

- **Dissertation Defense** - Dissertation defense is the final test that usually occurs at the end of the fourth year. A dissertation must present some original contribution to the statistics literature. A PhD candidate must present a written document acceptable to the dissertation committee and Graduate School and pass the oral dissertation defense.

Business Analytics, MSBA

The Master of Science Business Analytics (M.S.B.A.) program is an on-campus, full-time program that will prepare students for analytics positions in industry and government to manage data, apply cutting-edge methodologies, use current software, interpret and effectively communicate results, make recommendations, and manage implementations. The M.S.B.A. program will also equip students to continue learning about analytics throughout their careers. It will advance the university by creating an emphasis on the dissemination of knowledge in concentrations in the growing technological world of analytics.

Admissions

This program is designed for recent college graduates with limited or no full-time, post-graduate work experience; however, relevant work experience may also be considered in the application process. The program follows a cohort model with one cohort being admitted each year and starting courses during the summer 1 term. Admission in the fall or spring is not permitted.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Evidence of strong quantitative skills including the completion of an undergraduate introductory statistics course with a letter grade of B or higher

- A resume
- 3 letters of recommendation
- A GPA of 3.3 or better for regular admission
- GMAT or GRE scores at the 60th percentile or greater
- A TOEFL score of at least 94, an IELTS score of at least 7.0, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below)

For students who do not meet the minimum GPA or GMAT/GRE standards, the M.S.B.A. admissions committee may grant "permission to continue" admission.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Master of Science in Business Analytics program requires 36 credit hours taken over three semesters, beginning in summer and includes the following courses:

Required Courses:		Hours
MIS 501	App Dev Data-Driven Org (Application Development for the Data-Driven Organization)	3
MIS 502	DB Des & Mgt Data-Driven Org (Database Design and Management in the Data-Driven Organization)	3
ST 521	Statistical Data Management	3
ST 522	Adv Statistical Data Mgt	3
ST 531	Data Mining I	3
ST 532	Advanced Data Mining (Applied Statistical Modeling for Analytics)	3
ST 541	App Stat Mod Analytics I (Applied Statistical Modeling for Analytics II)	3
ST 542	App Stst Mod Analytics II	3
ST 580	Analytics Capstone I	3
ST 581	Analytics Capstone II	3
OM 500	MGT Science & Spreadsheet Mod	3
OM 501	Adv App Model & Analysis (Advanced Applied Modeling and Analysis)	3
Total Hours		36

Transfer Credit

Graduate School information on Transfer Credit (p. 18).

Comprehensive Exam/Capstone Requirements

The M.S.B.A program includes a mandatory capstone experiential learning component that spans the last two semesters of the program. This capstone project will require students to work in teams to:

- Design an analytical study and data collection tools.
- Use various software to manipulate and analyze data.
- Interpret and present the result of their analysis.
- Recommend strategies based on the results of their analysis for a case or a project provided by an industry partner.

The assignment will require the student teams to use the analytic concepts and software they have learned in the program to generate solutions for the assigned case or industry project. The student teams will be evaluated on the basis of:

1. A comprehensive written report.
2. A formal presentation of their methodology, results, and recommendation(s).

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 18).

Student Progress Requirement

The M.S.B.A. program follows a cohort model with courses in a single Summer, Fall, and Spring. Courses taken in the Summer serve as prerequisites for courses taken in the Fall and courses taken in the Fall serve as prerequisites for courses taken in the Spring. The Capstone project spans two semesters to provide an experience that is closer to the experience analytics professional will encounter in practice. As a result of these program characteristics:

1. Transfer credits are not considered for M.S.B.A. courses.
2. Students that are unable to complete the Summer courses will not be permitted to continue in the Fall and Spring and must defer until the following year.
3. Students that have to withdraw during the Fall semester can join the next cohort and will not need to retake the Summer courses.
4. If a student has to withdraw during the Spring semester, they would need to retake the seminar class the next Fall to join a current team for the Capstone project.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

The M.S.B.A program follows a cohort model with courses in a single Summer, Fall, and Spring. Courses taken in the Summer serve as prerequisites for courses taken in the Fall and courses taken in the Fall serve as prerequisites for courses taken in the Spring. The Capstone project spans two semesters to provide an experience that is closer to the experience analytics professional will encounter in practice. As a result of these program characteristics:

1. Transfer credits are not considered for M.S.B.A. courses.
2. Students that are unable to complete the Summer courses will not be permitted to continue in the Fall and Spring and must defer until the following year.
3. Students that have to withdraw during the Fall semester can join the next cohort and will not need to retake the Summer courses.
4. If a student has to withdraw during the Spring semester, they would need to retake the seminar class the next Fall to join a current team for the Capstone project.

Management Information Systems, MS

The Master of Science in Management Information Systems (MS-MIS) program emphasizes the development of students' information technology (IT) leadership skills. Students admitted to the MS-MIS build on the foundation of a four-year undergraduate major in Management Information Systems (MIS), Computer Information Systems (CIS), Computer Science (CS), or a closely related field, enabling MS-MIS students to focus on advanced courses in solutions delivery, cyber security, and IT strategy. Further, students develop their problem identification, critical solution creation, and communications abilities via the execution of experiential projects and a research paper focused on practical, relevant industry topics.

The MS-MIS is an on-campus program requiring 30 hours of coursework. It is offered in both traditional and Accelerated Master's Program (AMP) versions.

The MS-MIS is not a STEM-designated program for purposes of Optional Practical Training (OPT). Therefore, students completing this degree qualify for a maximum 12-month Optional Practical Training (OPT) F-1 visa.

Admissions

Applicants are expected to hold a four-year undergraduate major in Management Information Systems (MIS), Computer Information Systems (CIS), Computer Science (CS), or a closely related field, at the time of enrollment. If a student's major is not through a business school, there should be evidence of the completion of business school core education courses or equivalent work experience.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- 3 letters of recommendation
- A GPA of 3.3 or higher on 4.0 scale for regular admission
- A GRE score of at least 307 (verbal + quantitative) or a GMAT score of at least 580
- A TOEFL score of at least 90 or an IELTS score of at least 7.0 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below)

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue" if they have a GPA greater than 3.0 in last 60 credit hours.

Accelerated Master's Program (AMP) students must meet the minimum requirements.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Completion of 30 hours of graduate-level credit via a course plan approved by the MS-MIS Program Director.

Requirement Core Courses		Hours
MIS 505	Enterprise Network & Security	3
MIS 520	Systems Analysis And Design	3
MIS 530	Sys Development/Implementation	3
MIS 535	Information Systems Consulting	3
MIS 598	Res In Management Info Systems	3
Electives		15
At the sole discretion of the Program Director of MS-MIS, and on a case-by-case basis, a student may eliminate or replace these required courses.		
Total Hours		30

Approved MIS Electives

Elective courses complete the 30 hours of graduate-level credit and may be selected from either Electives list below:

MIS Elective Courses	Hours
At least 9 credit hours selected from any MIS 500-level or MIS 600-level course, unless specifically approved by the MS-MIS Program Director.	

Approved Non-MIS Electives

Non-MIS Electives	Hours	
MGT 488	Cyber Security Strategy	3
MGT 512	Management Presentations	3
MGT 517	Leadership & Ethics	3
MGT 520	Change Management	3
MGT 522	Leadership Communication	3
MGT 552	Project Mgmt & Consulting	3
MGT 556	Data Visualization	3
MGT 582	New Venture Development	3
MGT 586	Small Business Consulting	3
ST 540	Stat Prog & Comp with R	3
ST 545	Intro Stat Learn & Data Mining	3
ST 547	Data Vis and Analytics in R	3
ST 560	Statistical Methods	3
OM 525	Effective Quality Management	3
MKT 489	Managing Customer Data	3
MKT 510	Prod Design Marketing Strategy	3
MKT 537	Personal Selling	3
MKT 542	Digital/Social Media Analytics	3
MKT 543	Adv Digital and Social Media	3
Or any other graduate level course with MS-MIS Program Director approval.		

Transfer Credit

Transfer credit must meet UA's transfer credit policy and be approved by the MS-MIS Program Director.

Graduate School information on Transfer Credit (p. 13).

Accelerated Master's Program

The MS-MIS AMP program allows qualified undergraduate students to begin taking graduate courses during their senior year of undergraduate study. Students who have not graduated with their undergraduate

degree are not eligible for graduate assistantships or graduate student scholarships.

Further information on the Accelerated Master's Program (p. 13).

Comprehensive Exam/Capstone

The MS-MIS Capstone Project consists of two requirements.

Research Paper - This requirement is completed in MIS 598 Res In Management Info Systems. The research paper requirement is satisfied by the successful completion of an industry-relevant "policy and practice" paper which focuses on developing and demonstrating the student's ability to:

- Recognize and interpret information systems/ information technology trends to examine their potential value and impacts in order to evaluate opportunities to formulate novel uses of those technologies.
- Explain and support findings and recommendations in writing.

Capstone Project - This requirement is complete via the integrated course offerings of MIS 530 Sys Development/Implementation and MIS 535 Information Systems Consulting. The capstone project requirement focuses on developing and demonstrating the student's ability to:

- Identify business problems to sketch and analyze opportunities for digital transformation, including valuing them to formulate effective systems solutions.
- Via an understanding of requirements principles, apply those principles to analyze business requirements to evaluate alternatives in order to design effective solutions.
- Explain and support findings and recommendations orally.

Fieldwork/Practicum/Internship Requirements

This is required as an aspect of the Capstone Project.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 18).

Student Progress Requirement

Student's progress is reviewed at the end of each semester against the following standards:

- Cumulative GPA 3.5 or better in all coursework for second and subsequent semesters after admission to the MS-MIS program.
- Most recently completed semester GPA 3.3 or better in all coursework.
- No grades of C or lower in graduate-level coursework.

At the end of each semester, for any student not meeting all the criteria above, the following actions may be implemented at the sole discretion of the MS-MIS Program Director:

- First semester in which any criteria not met: Student placed on Academic Probation.
- Subsequent semester after Academic Probation, if any criteria not met: Student dismissed from the MS-MIS program.

Operations Management, MS

Operations management focuses on the analysis, design, and management of the operations that produce and deliver goods and services. It applies structured, quantitative techniques to analyze and design business operations and to support effective business decision making. Operations management helps evaluate and select actions based on information, process analysis, and quantitative modeling. There are tremendous opportunities for the effective application of these tools, techniques, and methods in a wide range of business operations including service operations, manufacturing, distribution, transportation, logistics, supply chain management, revenue management, quality management, finance, human resources, information systems, marketing, and strategic planning. Operations management can be effectively applied to virtually every component of an organization. The OM master's degree program features two curriculum options, operations management and operations management with the decision analytics track.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- 3 letters of recommendation. One letter must be written by an individual holding a graduate degree
- A GRE score of at least 307 or a GMAT score of at least 580
- A grade of B- or higher in Calculus I (The University of Alabama equivalent is MATH 121)
- A TOEFL score of at least 90 or an IELTS score of at least 7.0 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below)

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue."

Accelerated Master's Program (AMP) students must meet the minimum admission requirements as listed in the AMP section of this catalog.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Operations Management

The program consists of 30 hours of coursework which students can complete in 12 to 24 months starting in the summer semester. All students are expected to complete the program within 24 months. Students may choose between the OM (Traditional) or the OM (with Decision Analytics Track) curriculum options. The program has a common 9-credit hour core. Students then fulfill the remaining 21 credit hours according to their chosen curriculum option. Regardless of the chosen curriculum option, elective courses allow students to obtain additional instruction in other subjects such as project management, supply chain strategy, quality management, amongst others.

Required Core Courses		Hours
ST 560	Statistical Methods	3
OM 500	MGT Science & Spreadsheet Mod	3
OM 540	Systems Simulation	3
Choose either OM (Traditional) or OM (with Decision Analytics Track)		21

Operations Management (Traditional)

OM (Traditional) Required Courses		Hours
OM 517	Supply Chain Modeling & Analys	3
OM 522	Production Scheduling Problems	3
OM 523	Inventory Management	3
OM 527	Purchasing and Sourcing	3
OM 525	Effective Quality Management	3
Approved Electives, choose two		6
AC 506	Concepts Financial Managrl Acc	
EC 500	Managerial Economics	
FI 504	Financial Management	
IBA 550	Global Business	
IBA 555	Global Market Management	
MGT 517	Leadership & Ethics	
GBA 525	Business Policy	
IBA 560	Adv. Import/Export Strategy	
OM 596	Capstone Project	
OM 524	Mfg Sched & Control Systems	

Or other electives with program coordinator approval.

Required Core Classes	9
Total Hours	30

Operations Management (with Decision Analytics Track)

The Operations Management (with Decision Analytics Track) master's degree combines the prescriptive modeling and analytical skills obtained from the Operations Management program with the data management and data mining skills gained from the SAS-UA Data Mining certification program offered in the Statistics program.

This option consists of 10 courses overall: five from Operations Management and five from Statistics. These 10 courses are organized as follows:

Decision Analytics Track Required Courses		Hours
ST 521	Statistical Data Management	3
ST 522	Adv Statistical Data Mgt	3
ST 531	Data Mining I	3

ST 532	Advanced Data Mining	3
Approved Electives, (choose 3)		9
OM 517	Supply Chain Modeling & Analy	
OM 522	Production Scheduling Problems	
OM 523	Inventory Management	
OM 524	Mfg Sched & Control Systems	
OM 525	Effective Quality Management	
OM 527	Purchasing and Sourcing	
Required Core Classes		9
Total Hours		30

Transfer Credit

Graduate School information on Transfer Credit (p. 18).

Accelerated Master's Program

Information on the Accelerated Master's Program (p. 13).

Comprehensive Exam/Capstone

- The MSOM WCE consists of two parts: Course exams and case studies, and is administered through Blackboard Learn during a 7-day period approximately 5-6 weeks prior to Commencement:

(1) For course exams, each student must choose three courses among OM 517, OM 522, OM 523, OM 524, OM 527, and OM 540, and must take those three course exams. The WCE course exams will only include topics that have been covered during the first 10 weeks of these courses, so courses in which students are currently enrolled are eligible choices. Each course exam must be completed within a 1-hour period (of the student's choice) during this 7-day period. All exams are open-book, open-note exams.

(2) The case study part of the exam is not timed, and the students can work on it at any time during this 7-day period.

The MSOM program has four Student Learning Outcomes (SLOs):

- Recognition, identification, and definition of an operational problem or process improvement.
- Selection of appropriate tools and techniques to achieve desired improvement.
- Correct and complete application of tools and techniques to achieve desired improvement.
- Satisfactory communication of technical subject matter.

The course exams assess SLOs 2 and 3; the case studies assess SLOs 1 and 4.

An overall score of 70% or higher (**averaged** over the three course exams and the case study exam) is considered passing. Any other score is considered failing. Note that per the University of Alabama policy, "Failing the exam twice will result in dismissal from the degree program and the Graduate School." If you fail your first attempt, you have the option of taking the WCE for a second (and last) time during the same semester. The second WCE will be given only for those courses for which your original score was below 70%. An overall score of 70% or higher (**averaged** over the three course exams and the case study exam, with the revised score(s) used if the exam is retaken) is still needed for passing.

Once the student applies for graduation (typically during the first two weeks of the academic semester they are expected to graduate), WCE dates and detailed course-specific information will be provided.

Operations Management, Ph.D.

Operations management focuses on the analysis, design, and management of the operations that produce and deliver goods and services. It applies structured, quantitative techniques to analyze and design business operations and to support effective business decision making. Operations management helps evaluate and select actions based on information, process analysis, and quantitative modeling. There are tremendous opportunities for the effective application of these tools, techniques, and methods in a wide range of business operations including service operations, manufacturing, distribution, transportation, logistics, supply chain management, revenue management, quality management, finance, human resources, information systems, marketing, and strategic planning. Operations management can be effectively applied to virtually every component of an organization.

Admissions

The program generally admits two to four applicants each year, depending on the availability of financial support and the overall current enrollment. This policy ensures that each doctoral student will have adequate support from the faculty.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- 3 letters of recommendation
- A GRE score of at least 312 (verbal + quantitative) or a GMAT score of at least 600
- A TOEFL score of at least 94, an IELTS score of at least 7.0, or a PTE score of at least 59 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below)

Students who do not meet these requirements, but who excel in other areas, may be considered for Admission with Permission to Continue.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Students admitted to the program must complete 48 course hours and 24 dissertation hours to fulfill graduation requirements. In addition to curriculum hours, students must pass a two-stage qualifying exam.

Required Core Courses:		Hours
OM 517	Supply Chain Modeling & Analy	3
OM 522	Production Scheduling Problems	3
OM 523	Inventory Management	3
OM 524	Mfg Sched & Control Systems	3
OM 540	Systems Simulation	3
OM 600	Linear Program: Theory & Appli	3
OM 601	Stochastic Decision Models	3
OM 602	Nonlinear Modeling and Optimization	3
OM 603	Integer Modeling and Optimization	3
OM 620	Production Management Models	3
ST 554	Math Statistics I	3
Credit Hours Subtotal:		33
Approved Electives		15
OM 527	Purchasing and Sourcing	3
OM 623	Inventory Theory	3
OM 697	Special Topics	1-6
MIS 541	Business Analytic Support Sys	3
ST 552	Applied Regression Analy	3
ST 555	Math Statistics II	3
ST 561	Applied Design Expermnts	3
CS 503	Programming Languages	3
CS 565	Artificial Intelligence	3
CS 570	Computer Algorithms	3
EC 573	Games and Decisions	3
EC 660	Game Theory	3
CE 554	Urban Transportation Planning	3
CE 655	Sustainable Transportation	3
Or other electives with advisor approval.		
Dissertation Research Hours (OM 699 - with advisor approval, distributed appropriately throughout the program)		24
Total Hours		72

Footnotes

- ^{1.} OM 695 Operations Management Seminar (1 hr.); required every semester of Ph.D. program.

Transfer Credit

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study Requirement

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School by the time the student has completed 30 coursework hours.

Comprehensive Exams

Students must pass a two-stage qualifying exam. The first stage exam, known as the written qualification exam (WQE), occurs at the end of the first year in the program. The WQE measures the student's competency to review, analyze and propose solutions to questions drawn from the coursework in the first year. The second stage exam, known as the research qualification exam (RQE), typically occurs during the second year in the program. The RQE measures the student's ability to review, analyze and conduct doctoral-level research, the exam consists of a research paper and presentation by the student.

Students will be given no more than two attempts to pass these qualification exams depending on their program admission conditions and/or performance on the WQE. In one case, students may have initial admission conditions that require passing these exams on their first attempt. In another case, students using two attempts to pass the WQE may be given only a single opportunity to pass the RQE. In all other cases, students will be given at most two attempts for each one of the exams. Second exam attempts must be scheduled within six months of the initial attempt. Failure to pass the WQE or RQE will result in the student's dismissal from the program.

Admission to Candidacy Requirements

Students may apply for candidacy upon completion of coursework and successful proposal defense.

Continuous Enrollment Policy

See Graduate School Policy for more information. (p. 23)

Dissertation Requirements

Dissertation Committee: Together with the advisor, the candidate must select a dissertation committee (on, or before, the end of the student's third year) consisting of the dissertation chairperson (usually the advisor) and at least four other graduate faculty, at least one of whom must be outside the Operations Management program and the ISM Department. The dissertation committee is responsible for admission of the student to candidacy, supervision of the dissertation, and administration of the final oral examination. Failure to form a dissertation committee by the beginning of the fourth year in the doctoral program may result in the student's dismissal from the program.

Proposal Defense: Students should defend their dissertation proposal by the end of the third year/beginning of the fourth year. The proposal usually focuses on the already obtained findings and plans regarding research yet to be accomplished. The proposal defense is a public presentation and the student is expected to be able to address the questions and concerns of the dissertation committee and other attendees. If a student fails to defend their proposal defense, they may be given a second chance. Failure to successfully defend in the second attempt may result in dismissal.

Management

MGT512 Management Presentations

Hours 3

Instruction and practice of information presentation in a business environment. Topics include conference room presentations, media briefings, team presentations, television interviews and audiovisual development.

MGT517 Leadership & Ethics

Hours 3

This course is an overview of leadership theory and models including discussions of ethical issues that corporate decision makers face.

General Business Admin

GBA515 Effective Negotiations

Hours 3

This course will employ negotiations exercises, expert guest speakers and additional readings to help students master negotiation skills.

GBA525 Business Policy

Hours 3

An integrative study of the manager's role as chief strategy maker and chief strategy implementer, using case analysis and management simulation techniques.

Management, MA

The Master of Arts in Management is offered in three formats: online, hybrid, and accelerated.

The online format features a concentration in Global Business Management where all classes are offered online. The hybrid format features concentrations in Global Business Management, Human Resources Analytics, and Strategic Innovation, Entrepreneurship, and Growth with classes offered either on campus or online with some courses offered in both formats.

This flexible, online program is designed for supervisors, administrators, coordinators, managers, military personnel, and others who seek to advance their awareness of the impact of evolving opportunities in the workplace or who have developed the need for more advanced management skills in their current positions. This program is limited to the Global Business Concentration.

The hybrid program is meant to combine on-campus as well as online coursework for residential students. This program features all three concentrations and is meant to prepare students for a variety of positions as managers, as entrepreneurs, or as human resource professionals.

The accelerated format is for talented undergraduate management majors allowing them to combine both undergraduate and graduate studies through double counting up to 12 hours of graduate course to both the graduate and undergraduate degrees.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- 3 letters of recommendation
- A GRE score of at least 300 (verbal + quantitative) or a GMAT score of at least 500. Test score waivers may be granted if the applicant, 1) already has a graduate degree from an accredited university, or 2) has at least 10 years of management experience.

Students who do not meet these requirements, but who excel in other areas, may be considered for Admission with Permission to Continue.

Accelerated Master's Program (AMP) students must meet the minimum admission requirements as listed in the AMP section of this catalog.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The MA degree features a core of 15 hours which is common across all three concentrations and a 15 hours concentration including one or two elective courses.

Core Courses:		Hours
MGT 517	Leadership & Ethics	3
MGT 537	Strategic Human Resources Management	3
AC 506	Concepts Financial Managrl Acc	3
IBA 550	Global Business	3
GBA 525	Business Policy (Global Capstone Course)	3
Concentrations (choose Global Business Management, Human Resources Analytics, or Strategic Innovation, Entrepreneurship and Growth)		15
Total Hours		30

Global Business Management Concentration

The Global Business Concentration is offered entirely online, in the hybrid format, or as part of the Accelerated Master's Program (AMP).

Required Concentration Classes		Hours

Management, Ph.D.

The Ph.D. in Management is a rigorous four-to-five year program preparing students for careers in management and higher education. Students enter into a research-oriented program centered on the development of top-level business professionals and educators. The mission of the doctoral program in Management is to advance the careers of students with research and teaching skills who can continue the creation, verification, application, and dissemination of knowledge to academic colleagues, future generations of students and business professionals.

The Ph.D. Program in Management faculty supports students interested in:

- Human Resources
- Entrepreneurship
- Organizational Behavior
- Person-Organizational Fit
- Employee Well-Being
- Leadership
- Training
- Group and Team Processes
- Work-life Balance
- Strategic Human Capital
- Strategic Management
- Workplace Stress
- Business and Managerial Communication
- Healthcare Analytics
- Cybersecurity
- International Business

Admissions

Applicants are admitted into the Ph.D. program in Management annually for the fall semester. All completed applications received by January 1 of that year, meeting the minimum qualifications, will be included in the applicant pool for review. In exceptional circumstances, applicants may be considered for admission in other semesters.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- A Statement of Purpose that identifies faculty research interests that appeal to them.
- 3 letters of recommendation. These must speak specifically to the ability of the applicant to successfully complete the Ph.D. program and their potential for teaching and research.
- A writing sample is encouraged (solely authored by the applicant; an example of scholarly research, if available)
- A test score from either the GMAT or GRE exam taken in the past 5 years

Students admitted "with permission to continue" will not necessarily be offered assistantships

While there are no absolute minimum cutoff test scores or grades, students with less than the following scores are rarely admitted: (1) a 3.0 undergraduate and a 3.5 graduate grade-point average (or equivalent for students with degrees from other countries), (2) a 600 GMAT or 310 GRE score with a reasonable balance between verbal and quantitative scores, and (3) a 79 TOEFL score. The above grades and test scores do not guarantee admission.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Each student is required to complete at least three quantitative courses, specifically MKT 688 Quant Modeling in Marketing and MKT 674 Meas Struct Equatn Model, and MGT 690 Research Methods I and MGT 691 Research Methods II (or equivalent). Students must get written approval

from the Ph.D. program coordinator to take an equivalent or to replace the three courses described here.

Students are encouraged to take additional quantitative courses that are not required to strengthen their methodological training (AC 650 Directed Research, ST 550 Stat Methods In Res I/ST 560 Statistical Methods, ST 552 Applied Regression Analy, ST 553 Appld Multivariate Analy)

Required Courses:		Hours
MGT 610	Professional Development I	1
MGT 611	Professional Development II	1
MGT 612	Professional Development III	1
MGT 613	Professional Development IV	1
MGT 620	Organizational Behavior	3
MGT 621	Organ Behav Group Perf	3
MGT 622	Current Topics in HR Mgmt	3
MGT 623	Contemp. Issues in Org Theory	3
MGT 625	Foundations of Strategic Mgmt	3
MGT 633	Entrepreneurship Research	3
MGT 690	Research Methods I	3
MGT 691	Research Methods II	3
MKT 674	Meas Struct Equatn Model	3
MKT 688	Quant Modeling in Marketing	3
Elective Courses (with advisor approval)		14
Dissertation Research Hours (MGT 699 - with advisor approval, distributed appropriately throughout the program)		24
Total Hours		72

Transfer Credit

Students may submit appropriate courses they have taken at their previous university for consideration of approval for transfer credit, the faculty discourages the transfer of topical seminar courses and key methods courses. To apply for transfer credit student must meet with the PhD Coordinator during their first semester of residency at The University of Alabama to identify which classes they wish to be considered for transfer. At this meeting students should bring to appropriate transcripts, syllabi from the classes, and a detailed listing of the classes they wish to have considered for transfer credit and The University of Alabama classes they believe the potential transfer classes should replace.

Graduate School information on Transfer Credit (p. 23).

Comprehensive Exam

Each student is required to pass a written comprehensive examination at the end of his/her second year. The examination is designed to determine students' ability to show relationships among the various segments of knowledge they have gained during their coursework. Students must demonstrate knowledge of research methods, mastery of knowledge of management research, familiarity with major concepts in the extant literature, and the ability to identify and understand connections between topics.

The comprehensive exam will consist of four sections, one each in research methods, management theory or history, entrepreneurship or strategy, and OB or HR.

If a student fails on his or her first attempt, (s)he is usually given a second opportunity to retake either all or part of the exam, depending upon the faculty's recommendations. A retake may include an oral exam

if deemed necessary by the faculty. If a student fails the second attempt of an exam, (s)he will be terminated from the program.

If a student does not receive a passing grade on their first attempt on the comprehensive exam and he or she is required to retake the exam, the second administration of the exam will be set by the Doctoral Coordinator, or his/her assigned representative, in consultation with the faculty.

Typically, the exam will be administered over two weekends in May or June, on dates discussed between students and the PhD program coordinator. Students taking the exam will be provided with one set of questions covering two of the test subjects at 3 PM on Friday of that week and will have until 9 AM the following Monday to complete it. The second set of questions covering the remainder of the topics will be distributed the following Friday and will once again be expected to be turned in the following Monday at 9 AM.

Admission to Candidacy Requirements

Students are certified by the dean of the Graduate School for admission to candidacy for the Ph.D. degree after they have met the following requirements:

1. Complete required coursework
2. Pass comprehensive exams
3. Successfully defend a dissertation proposal

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

A dissertation showing power of independent research and literary skill must be prepared on a topic in the major field.

The dissertation must comply with the regulations in A Manual for Students Preparing Theses and Dissertations. Copies may be obtained from the Graduate School office or on the graduate school web page. Deadlines and other information useful to doctoral students are also listed in both these sources.

The subject of the dissertation must be approved by the student's dissertation committee.

A student who completes the coursework but fails to complete the dissertation within five years after being admitted to candidacy will be required to retake the written examination and the preliminary oral examination.

All candidates are expected to register for dissertation supervision each semester and summer session until the dissertation is completed.

Time Limits for Degree Completion Requirements

A student entering the Ph.D. program must complete all requirements for the Ph.D. degree within nine years of the date of admission in the graduate program. If a student is suspended from the program for exceeding the time limits for completion, the individual may petition the department chair and the Culverhouse College of Business Ph.D. Programs Committee.

Extension of time and/or additional requirements for readmission to the program must be recommended to the Graduate School of The University

of Alabama by the student's departmental graduate faculty and the dean of the college.

A maximum one-semester extension may be granted in those rare instances in which the student presents documentation of compelling circumstances beyond the student's control that made it impossible to complete the degree within the required time frame.

Graduate School information on Time Limits (p. 18).

Student Progress Requirement

Each student's progress will be reviewed by the Department Head, and the Ph.D. Coordinator at the end of each semester. A graduate student with regular status in a graduate program who drops below a 'B' average (at any time after earning 6 semester hours), or if the student earns a "D" or "F" in a graduate course, will be placed on probation and may be dismissed from the program.

While on probation, the student will not be permitted to apply for admission to candidacy. Probationary status must be removed by raising the overall average to a "B" or better during the 12 hours of graduate work immediately following the period in which the probation was incurred. Failure to do so will result in the student being dropped from the program. The departmental policy frowns upon the grade of "I". It will only be given under extenuating circumstances.

A grade of 'I' (Incomplete) is evaluated as an 'F' and must be removed within two weeks during the next term of enrollment if the student's overall grade point average drops below a 'B' as a result of the incomplete grade. The evaluations of academic progress of students who register with 'I' grades still on their records can result in academic probation or dismissal.

Courses may not be repeated for graduate credit; this includes courses initially taken on an audit basis. However, a course that is required in a student's curriculum in which a 'D' or 'F' is earned may be repeated for credit, upon the recommendation of the major department or program area and the dean of the Graduate School. Both grades will be considered in the computation of the grade point average.

The dean of the Graduate School may allow a graduate student to be reinstated or readmitted only at the special request of the graduate faculty in the student's department.

Marketing Courses

MKT 300 Marketing or its equivalent is a prerequisite for all 400-level courses; MKT 518 Marketing Management & Decision Making or its equivalent is a prerequisite for all 500- and 600-level courses.

MKT510 Product Design Marketing Strategy

Hours 3

An intensive investigation of the process of new product development, including its role in the organization, analysis of market opportunities, creative idea generation, concept screening, design, forecasting, manufacturing, and launch. Teaching emphasis is on processes, tools, and techniques. A group project provides real-world product development experience.

MKT511 Supply Chain Management

Hours 3

MKT 511 is a graduate (master's) level counterpart to MKT 411 Supply Chain Management. Its focus is on providing a managerial perspective of best practice supply chain management. The course encompasses the collaborative strategies and planning processes needed to build and manage supply chains for systemic effectiveness and efficiency. It will be offered coterminously with MKT 411 during each spring semester. The target students for MKT 511 are MBA's with marketing concentrations and master of arts (MA) and master of science (MSC) students in marketing. Graduate students in other degree programs may also enroll as an elective for graduate credit.

Prerequisite(s): MKT 518

International Business Administration Courses

IBA550 Global Business

Hours 1-3

A seminar emphasizing the environmental factors affecting international business operations, and studying different economic, social, cultural, legal, and other environmental conditions and their influence on both the formulation and execution of business policy of firms engaged in multinational business.

IBA555 Global Market Management

Hours 3

The object of this course is to investigate the effects of cultural similarities and differences on marketing practices worldwide. Also examined are the effects of market idiosyncrasies on globally oriented products, promotion, pricing, and distribution strategies.

Marketing, MS

The Master of Science in Marketing is an intensive, non-thesis program designed to give students advanced analytical marketing skills and hands-on experience to launch a career in one of marketing's many fast-growing fields: Digital and Social Media Marketing; Marketing Analytics and Decision Making; Marketing Research and Insight Development; Management Consulting and Project Management; Professional Selling and Sales Management.

The MS program requires 30 hours of coursework (33 hours for the marketing analytics specialization), with the expectation that the degree will be completed in two semesters (plus a summer for marketing analytics).

An Accelerated Master's Program (AMP) is offered which allows academically gifted undergraduate majors in Marketing or with a double major which includes Marketing to begin taking graduate courses after 90 hours of undergraduate study. This will in many cases allow them to complete both the BA and the MS degree in four years.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- 2 letters of recommendation
- A GRE score of at least 309 (verbal + quantitative) or a GMAT score of at least 550
- To be considered for admission to the Marketing MS program with a concentration in Marketing Analytics, the requirements are:

- An overall GPA of 3.3
- A GRE score of at least 313 (verbal + quantitative) or a GMAT score of at least 580
- A grade of "B" or higher in undergraduate calculus

It is critical to note that meeting minimums admission requirements simply qualifies applicants for consideration and is not a guarantee of acceptance. If a student meets the minimum admission requirements, then their applications are considered for competitive entry. The average GPA of recently accepted students has been approximately 3.8 with GMAT: 620.

Accelerated Master's Program (AMP) students must meet the minimum admission requirements as listed in the AMP section of this catalog.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Required Core Courses:		Hours
MKT 530	Advanced Marketing Analysis	3
MKT 587	Advanced Market Strategies	3
MKT 595	Client-Based Mkt Consult Proj	3
MKT 596	Capstone Project	3

Approved Non-Concentration Electives: choose 6 courses from the list below.

MKT 510	Prod Design Marketing Strategy	3
MKT 531	Consumer Insights	3
MKT 537	Personal Selling	3
MKT 540	Intro to Digital/Social Media	3
MKT 542	Digital/Social Media Analytics (requires MKT 540 prior)	3
MKT 543	Adv Digital and Social Media (requires MKT 540 prior)	3
Electives		18
Total Hours		30

Digital and Social Media Concentration

The digital and social media marketing specialization involves a deep dive into the ever evolving world of digital marketing, with an overview course in digital marketing and social media strategy followed by courses in digital marketing analytics and advanced digital marketing. The world of digital and social media marketing is growing rapidly, with firms around the world adding digital components to their marketing strategies.

Digital and Social Media Concentration		Hours
Required Specialization Classes:		
MKT 540	Intro to Digital/Social Media	3
MKT 542	Digital/Social Media Analytics	3
MKT 543	Adv Digital and Social Media	3
Approved Electives: choose 3 classes from the list below.		
MKT 510	Prod Design Marketing Strategy	
MKT 531	Consumer Insights	
MKT 537	Personal Selling	
MKT 538	Sales Management (requires MKT 537 prior)	
MKT 539	Customer Relationship Mgt	

Required Core Classes 12

Or any other 500 level 3 credit hour course with faculty approval.

Total Hours 30

Marketing Analytics Concentration

The Marketing Analytics Specialization involves a heavy curriculum in statistics, including SAS and other programming languages, emphasizing data analysis and data mining. Graduates with this specialization earn a SAS/Data Mining Certification and are prepared to sit for the SAS programming certificate. Marketing Analytics graduates are highly sought after by a wide variety of organizations because of their ability to work with "Big Data." Students specializing in Marketing Analytics are required to apply for summer entry and complete an introductory graduate course in statistics in the summer term prior to the start of the program.

Marketing Analytics Concentration		Hours
Required Specialization Courses:		
ST 521	Statistical Data Management	3
ST 531	Data Mining I	3
ST 522	Adv Statistical Data Mgt	3
ST 532	Advanced Data Mining	3
ST 560	Statistical Methods	3
Electives: choose any two 500-level MKT/IBA courses.		6
Required Core Courses		12
Total Hours		33

Professional Sales Concentration

The Professional Sales Specialization trains students in the personal selling strategies needed to excel at the sales process and manage sales teams as well as how to better work with existing accounts via customer success strategies. This specialization is well suited for both marketing and non-marketing students who wish to blend sales skills with topics from marketing or other disciplines (e.g., communication, management, finance, and engineering) to directly impact firm performance through the establishment and maintenance of customer relationships.

Professional Sales Concentration		Hours
Required Specialization Courses:		
MKT 537	Personal Selling	3
MKT 538	Sales Management	3
MKT 539	Customer Relationship Mgt	3
Approved Electives: choose 3 courses from the list below.		9
MKT 510	Prod Design Marketing Strategy	3
MKT 531	Consumer Insights	3
MKT 540	Intro to Digital/Social Media	3
MKT 542	Digital/Social Media Analytics ((requires MKT 540 prior))	3
MKT 543	Adv Digital and Social Media ((requires MKT 540 prior))	3
Required Core Courses		12
Total Hours		30

Transfer Credit

Graduate School information on Transfer Credit (p. 13).

Comprehensive Exam/Capstone Project

The Marketing Capstone project takes place in the second half of a two-semester client-centered experiential learning sequence designed to give

students practical experience in consulting to help accelerate their career launch and development.

Marketing, Ph.D.

The Doctor of Philosophy degree is awarded for scholarly attainment and represents the highest degree in business administration that the University may bestow upon a student. The PhD in marketing program will enable students to be competent in the advancement and dissemination of marketing theory, research, and practice. The doctoral program in marketing is designed principally to prepare students for a career in academic research and higher education.

Admissions

The application deadline for fall admission is February 1.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume
- 3 letters of recommendation
- A GRE score of at least 300 (verbal + quantitative) or a GMAT score of at least 550. The test score requirement may be waived for those holding a graduate degree at the time of enrollment or those with 5+ years of related work experience

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue."

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Required Courses:		Hours
MKT 518 or IBA 555	Mktng Mgmt & Decision Making Global Market Management	3
MKT 613	Consumer Behavior	3

Total Hours		72

Footnotes

¹. One minor field of study must be selected from within the Manderson Graduate School of Business or in a discipline outside the School that is closely related to the student's major field of study. To satisfy the minor-field requirement, the student must meet the standards set by the program area granting the minor. In general, this means that the student must demonstrate a thorough grasp of the philosophy, methodology, and literature dealing with the minor field. The student must take a minimum of four graduate courses to satisfy the minor-field requirement. Some minor fields require a written comprehensive examination. For applied statistics, the minor-field requirement is replaced by the interdisciplinary field courses.

Transfer Credit

Graduate School information on Transfer Credit (p. 23)

Doctoral Plan of Study Requirement

Graduate School Information on Plan of Study.

Comprehensive/Qualifying Exam

Our qualifying exam process consists of three parts, a first and second-year paper exam, and a methods based comprehensive exam. The first-year paper is completed during the summer between the first and second year. The primary goal of the first-year paper is for students to exhibit the ability to identify a unique research idea, provide a strong theoretical underpinning for the idea, draw on that theoretical perspective to develop and support testable hypotheses, and suggest a research methodology to allow the testing of the hypotheses. Evaluation of the first-year paper includes both written and oral components. The second-year paper occurs during the late spring of the second year. The focus of the second-year paper is to provide evidence of the ability to carry out a research project including data collection, analyses, and interpretation. After the second-year paper, a comprehensive exam focusing on methods learned through coursework will be given. A final oral presentation and evaluation following the second-year paper and methods comps will conclude the qualifying examination process. All examinations may include oral and written components.

The examinations are conducted by the student's supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student's research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. In accordance with University policy, a student may attempt each examination no more than two times. However, each student should consult his or her program's policies for the written comprehensive examination because programs may vary in approach and requirements.

Having to take multiple exams twice may result in dismissal from the program. Failing any examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy Requirements

Students are admitted to Candidacy for the Ph.D. degree after they have met the following requirements:

- Complete all required coursework
- Complete a 3-part qualifying exam:
 - Pass their first-year paper (during the summer after their first year)
 - Pass their second-year paper (during the summer after their second year)
 - Pass their methods comps (during the summer after their second year)
- Successfully pass the dissertation proposal

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment Policy (p. 23)

Dissertation Requirements

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal's format with respect to such things as the length of the introduction and detail of the review of the literature.

Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The dissertation committee shall have not fewer than five members, all of whom are appointed by the dean of the Graduate School. Students may set up their committee through the Graduate Academic Activities portal on the Graduate School website.

All members of a dissertation committee must hold Graduate Faculty status at The University of Alabama and must represent at least two academic departments. The chair of the committee must be a full member of the Graduate Faculty, as described in the Catalog's section on Qualifications of the Graduate Faculty. A majority of the Dissertation Committee members must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., if s/he is a highly qualified person from another university, a business or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the student's dissertation committee.

The graduate dean's approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the Appointment/Change of a Doctoral Dissertation Committee through the Graduate Academic Activities portal on the Graduate School website.

The final oral dissertation defense is the culminating experience in the doctoral program. Once the dissertation committee has agreed that the student is prepared for the final oral dissertation defense, the student and committee members will set the defense date. As such, all members of the dissertation committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In circumstances where virtual participation is necessary, all participants must follow the Virtual Participation guidelines.

This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. It is an option available only to students in certain fields in which the faculty have received Graduate Council approval from the Graduate Council

Program Administration

The graduate programs in the College of Communication and Information Sciences are administered by the associate dean for graduate studies, by various administrative divisions within the College, and by the Graduate School. The college has one PhD degree program (p. 473). It is a multidisciplinary program that draws on all subdivisions of the College and is administered by the associate dean for graduate studies and by the graduate studies council. The College offers three Master of Arts degree programs, one Master of Library & Information Studies degree program, and one Master of Fine Arts degree program. These master's programs are administered by the associate dean and by academic unit heads.

Admission Criteria

The Graduate School of The University of Alabama administers admissions for the entire University. The Graduate School's website has detailed admission policies, an electronic application, and other useful information for those considering graduate studies at the University. Graduate students in the College of Communication and Information Sciences must meet the admission criteria of the Graduate School. Specific graduate programs in the college may have additional admission criteria -- be sure to check the specific program sections of this catalog for more information.

See the Admission Criteria section of this catalog for more information.

CIS601 Proseminar In Pedagogy

Hours 1

This proseminar helps doctoral students explore methods and effective practices of teaching at the university level. Students examine how to employ different teaching modalities in an effort to engage students. Students discuss the varying teaching demands associated with class design (small classes, large lectures, and online courses). Students learn how to clearly communicate course expectations, deal with potential conflict, and construct and maintain a high level of professionalism. This one-hour proseminar builds on and extends the coverage of pedagogy provided in CIS 610 Foundations of Doctoral Study. It is recommended only for students who have completed CIS 610.

CIS602 Colloquium Comm Info Science

Hours 1

The course is part of orientation for all students in the PhD program. It must be taken during the third semester of study. The course is designed to allow doctoral students to learn about research being conducted within the College and to make formal presentations of their own research.

CIS603 Quantitative Research Methods

Hours 3

The course provides detailed study of quantitative research methods appropriate to the various areas of study in communication and information sciences.

CIS604 Mass Communication Theory

Hours 3

This course is a survey of the foundational theories of mass communication and media processes and effects.

CIS605 Cultural and Critical Theory in Communication

Hours 3

Survey of foundational cultural and critical theories in communication.

CIS606 Knowledge & Information Theory

Hours 3

This course offers a survey of theoretical developments in the study of knowledge and information.

CIS607 Theory Constructn Epistemolgy

Hours 3

This course provides detailed study of the philosophical foundations of theory construction and current issues in theories of the nature of knowledge.

CIS608 Qualitative Research Methods

Hours 3

This course is an introduction to qualitative research methods in communication, yet with a doctoral level of sophistication and expectations. The aim is to introduce students to all primary forms of qualitative methodologies from a social science perspective; however, each method or approach described could easily be the subject of a course itself.

CIS609 Humanistic Research Methods

Hours 3

Founded on a logical conceptualization of knowledge creation, this course surveys eight modes of knowing in the humanities: philological interpretation, phenomenological interpretation, explanatory history, narrative history, aesthetic/technical criticism, cultural criticism, theoretical analysis, and theoretical synthesis. Treatment of modes includes investigation of theories and examination of applications. The course is designed to support disciplinary research and publication by participants.

CIS610 Foundations of Doctoral Study in Communication & Information Sciences

Hours 3

Students develop familiarity with college graduate faculty members, their professional lives, teaching specialties, research interests, and service involvements. Students become familiar with the norms of doctoral life. Students develop their own unique approach to research, teaching, and service in the context of their area of expertise.

CIS650 Seminar: Communication & Information Sciences

Hours 3

Topics vary. Course supports research in areas appropriate for advanced study and original research in communication and information sciences. Depending on the interests of participants and on the topic of the seminar, students may conduct research individually or may work together on research projects. May be repeated.

CIS651 Interpersonal Approaches to Health Communication

Hours 3

This graduate seminar explores the major interpersonal issues related to health communication, focusing on both classical and contemporary perspectives.

CIS652 Sem Culture Criti Rhetor Stdy

Hours 3

The examination of a wide range of mediated texts through the intersecting perspectives of cultural, critical and rhetorical analysis.

CIS656 Electronic and Contemporary Publishing

Hours 3

Focuses on both scholarly and commercial networked digital publishing within the context of the information cycle and information chain from the vantages of contemporary publishing and communication. The course is concerned with the numerous and varied problems/opportunities of electronic publishing and the accompanying paradigm shifts.

CIS657 Communication and Culture

Hours 3

This course provides an overview of foundational theoretical and research perspectives focusing on communication and culture from functionalist (post-positivist), interpretive, and critical perspectives. Students study intercultural communication theories addressing the relationship between culture and communication, including theories related to identity (including race, gender, nationality, etc.), face negotiation, transitions and adjustment, pedagogy, and intercultural alliances.

CIS659 Health Information Seeking

Hours 3

Explores the major theories and issues related to health information seeking, focusing on the roles of mediated and interpersonal communication in seeking, understanding, and sharing health information.

CIS660 Interpersonal Communication Theory

Hours 3

This graduate course presents a focused investigation of communication in close personal relationships, with primary emphasis on foundational theories and concepts of relational communication.

CIS662 Mediated Interpersonal Communication

Hours 3

This graduate seminar provides an overview of research in foundational and contemporary mediated interpersonal communication relations, reviewing modern conceptions of interpersonal relationships, communication, and mediated communication from a wide breadth of disciplines.

CIS663 Deception

Hours 3

This course is designed to introduce students to research in interpersonal deception and to acquaint students with deceptive verbal and nonverbal behaviors and their motives and consequences, as well as with the research that has explored deception detection strategies.

CIS664 Health Communication Campaigns

Hours 3

This course covers the process of promoting health by disseminating messages through mass media, emergent media, and interpersonal communication. It covers the role of campaign designers in assessing consumer health needs and communication behaviors and in planning, implementing, and assessing campaigns.

CIS665 Seminar in Communication Message Analysis

Hours 3

Topics may vary. Study and analysis of the development and management of communication institutions and their place in society. May be repeated.

CIS666 Information Policy

Hours 3

Theoretical and research perspectives on information policy, the set of interrelated principles, laws, and regulations guiding the oversight and management of the information lifecycle through its production, collection, distribution, use, and preservation.

CIS667 Persuasive Communication

Hours 3

Study and analysis of the persuasive function of communication through theoretical and/or strategic approaches. May be repeated.

CIS668 Social Justice and Inclusion Advocacy

Hours 3

Theoretical and research perspectives in social justice and advocacy in information studies and related information disciplines. This course explores information structures, contexts, technologies, institutions, and policies as structures and sites of power that shape inequalities. Students investigate what socially-just outcomes and interventions might look like for communities, institutions, and individuals in the information studies context.

CIS669 Seminar in Visual Communication

Hours 3

Study and analysis of visual communication in its various forms, intended uses, and potential effects. May be repeated.

CIS670 Health and Mass Media

Hours 3

This course covers basic concepts of health communication within a mass communication and communications context. It covers methods and theories used to study health communication, the effects of health messages in the media, the content of health messages in the media, influences on conceptions of health and illness, and crisis communication in a health context.

CIS671 Public Opinion

Hours 3

Study and analysis of the formation and expression of public opinion and its relation to communication. May be repeated.

CIS672 Media History

Hours 3

Historical investigations of communication through descriptive, evaluative, critical, and/or archival approaches.

CIS673 Political Communication

Hours 3

This course examines the content, processes, and effects of communication within the American political system with a focus on the roles of human communication and media production and use. Students will learn about foundational theories and research central to political communication and consider normative theories of deliberative systems, the political economy of media and politics, and the complex relationship between media content and individual attitudes and behaviors. Students will critically examine the role of communication technologies in shaping political communication and civic life within today's hybrid media system.

CIS674 Sports Media

Hours 3

Surveys the history and present landscape of sports media research. Students will read and critique existing published research while also learning how to conduct and advance original research in the topic area.

CIS677 Media Sociology

Hours 3

Theoretical and research approaches to the sociological study of media production. Students explore and analyze the many contexts that shape media practices and media content, including: political and economic systems and institutions; media organizations, professions and technologies; and human cultures and communities.

CIS679 Computational Research Methods

Hours 3

This course introduces basic computational approaches for social scientific research, emphasizing the use of R and Python to collect, organize, and analyze data. Students will learn how to create and manipulate variables, use conditional statements and functions, obtain descriptive statistics, develop a variety of visualizations, and perform both quantitative and qualitative analyses.

CIS680 Seminar in Media Processes and Effects

Hours 3

Covers widely used and emerging theories employed to understand media processes and effects. Considers the implications of theory in designing and conducting research in media processes and effects.

CIS681 Advanced Quantitative Research Methods

Hours 3

Provides students an opportunity to understand and use advanced quantitative research methods widely used in the communication and information science disciplines.

CIS682 Seminar in Applied Communication

Hours 3

Covers widely used and emerging theories employed in the study of applied communication. Considers the implication of theory in designing and conducting research in applied communication.

CIS683 Advanced Topics in Media Processes and Effects

Hours 3

Covers topics especially relevant in the current academic study of media processes and effects, typically focusing on a single theoretical or contextual issue.

CIS684 Advanced Topics in Applied Communication

Hours 3

This seminar covers specific topics relevant to the current academic study of Applied Communication, typically focusing in-depth on one theoretical or contextual aspect. Topics will vary by semester.

CIS697 Directed Research

Hours 1-3

This independent study course is designed to allow doctoral students to pursue independent exploration of a particular field or topical area, under the guidance of an advisor. Material covered will be of an advanced nature aimed at providing students with an understanding of current developments within the field. Discussion and advisor guidance will be focused on readings and methodologies that allow students to develop their research capacity, independent thought, and the ability to interpret professional and/or research materials in their field.

CIS698 Independent Research

Hours 1-3

Study of a topic in librarianship under faculty direction. Not part of dissertation research.

CIS699 Dissertation Research

Hours 1-12

This independent research course partially fulfills required doctoral-level research dissertation hours toward the Ph.D. degree in Communication and Information Sciences. The course is conducted under the guidance of the dissertation advisor. Material covered will be of an advanced nature aimed at providing doctoral students with an understanding of the latest research and current developments within the field. Discussion and advisor guidance will be directed towards readings of research articles and development of research methodology, with the aim of producing an original research contribution that represents a novel development in the field, or a novel perspective on a preexisting topic in the field.

MC501 Mass Media Law Regulatn

Hours 3

A study of the laws affecting the media, decisions, and case histories that act as guides for the media. Independent readings and papers are required.

MC513 Communication/Diversity

Hours 3

Study and analysis of issues of diversity as they relate to groups in society and in communication fields. Emphasis is on the media's treatment of various groups in society.

MC517 Mass Communication and Public Opinion

Hours 3

Nature, development, formation, and distribution of politically relevant attitudes and opinions; role of leadership, persuasion, and communication in opinion-policy process. Emphasis on the role of the media in the formation of public opinion and on how the media are influenced in turn by public opinion.

Prerequisite(s): There are no specific course prerequisites, but graduate status or consent of instructor is required.

Prerequisite(s) with concurrency: None

MC526 Race and Gender in Media

Hours 3

This discussion-oriented class examines the mass media through the lenses of race, ethnicity and gender. The course helps future media practitioners be aware of their roles in creating content that reflects increasingly multicultural audiences. Using current, contemporary and classic media texts, students critically analyze media messages and understand the importance of a diverse workforce.

MC530 Video Games and Media

Hours 3

This is an overview course that addresses game user research, theory and the ability to analyze for understanding usability, research, and play in the field, giving students an underpinning of the design and research approaches taken with video games. The course assists students who might employ the study of video games in health, advertainment, and journalism in their professional careers, and who may be expected to complete research relating to games.

MC531 Sports & Social Media

Hours 3

This course will focus on the connections and engagement of social media within sports communication. This will include topics such as personal/professional branding, audience analytics, media campaigns and messaging.

MC546 Issues in Sports Media

Hours 3

This course is designed to synthesize work in mass communication to enable students to construct and critique arguments about modern sports media issues and controversies.

MC550 Research Methods

Hours 3

A survey of qualitative and quantitative methods in communication research.

MC551 Sem Communication Theory

Hours 3

A study of the development of selected theories of communication as they pertain to interpersonal, public, and mass communication.

MC564 Sports Media Research

Hours 3

This course focuses on the descriptive and empirical ways to develop and evaluate research related to the sports industry, individual accomplishments, fan participation, and social media. Emphasis will be placed on the way that sports media has influenced contemporary culture and values.

MC595 Special Topics

Hours 3

Special topics in mass communication theory and research. May be repeated.

Department of Advertising and Public Relations

The Master of Arts in Advertising and Public Relations is designed for aspiring students who wish to gain advanced knowledge and expertise in creating and managing persuasive communication. The program is designed to help students transition from a tactical to a more strategic, managerial approach to the industry. Through an understanding of theory and industry trends, research-driven critical thinking and connections with top scholars and professionals, students who complete the program

should be well-prepared for doctoral studies or to step into roles that will help them advance easily into mid-level management positions within their desired fields.

APR522 Media Strategy and Analytics

Hours 3

This course is designed to provide students with the knowledge and skills to use research to select appropriate media channels to communicate to stakeholders. Students will learn to create media briefings and plans for persuasive communication campaigns that include data-driven recommendations. Students will also learn how to retrieve, assess and visualize social media and web analytics.

APR523 Media Relations

Hours 3

This course is designed to provide students with the knowledge and skills to manage relationships with media gatekeepers in order to facilitate communication through their channels, including media selection, build relationships with gatekeepers, and interacting with the media through interviews and press conferences. Students will also learn how to track and analyze media coverage and sentiment using online tools.

Advertising and Public Relations, MA

The Master of Arts in Advertising and Public Relations is designed for aspiring students who wish to gain advanced knowledge and expertise in creating and managing persuasive communication. We help motivated students transition from a tactical to a more strategic, managerial approach to advertising and public relations, while becoming ethical and globally competent thought leaders in their future careers.

The Advertising and Public Relations Master of Arts program offers three concentrations that enable students to develop expertise in three growing areas of advertising and public relations.

The **Advertising Creative** concentration helps students build portfolios while learning to solve a client's problems by beautifully wrapping smart strategies in provocative, layered, and memorable ideas.

The **Media Strategy** concentration equips students with analytic skills necessary to analyze traditional, digital, and social media data, uncover actionable insights, and develop brand strategies leveraging those insights.

The online-only **Marketing Communication Management** concentration is designed for emerging leaders who wish to gain advanced knowledge and expertise in creating and managing persuasive communication in an integrated industry landscape in order to pursue managerial careers.

Admission Requirements

Please see the following link for Graduate School admission requirements.

See the Admission Criteria section of this catalog for more information.

Degree Requirements

The M.A. in Advertising and Public Relations is a 30-33 (based on concentration) credit-hour program designed to provide students with knowledge of industry trends, proficiency in research-driven critical thinking and problem solving, and exposure to scholars and professionals who are well-connected to an evolving communication landscape in order to build a unique expertise in managing persuasive communication.

Students will work with a faculty advisor to create their own career emphasis from a wide range of electives within A+PR and other departments that will help them gain in-depth knowledge for their future career. These electives, along with a core specifically designed to provide students with a true blend of academic and industry knowledge, will help guide their capstone project. Students will choose from two options: a strategic plan for aspiring industry professionals or a thesis for aspiring scholars. In addition to coursework, students will be required to receive professional experience during the summer after their first year in order to enhance the training they receive in the classroom.

Each student's progress will be guided by their faculty advisor. Students in each program must maintain a minimum GPA of 3.0 during their tenure in the program. Students who receive more than two "C" grades will undergo a faculty review to determine if they should proceed in the program.

Concentrations

A+PR's M.A. program offers two application-only concentrations that provide expertise in two growing areas of advertising and public relations to prepare students for more specialized jobs, and an online-only concentration designed to train future leaders in global integrated marketing communication.

The Advertising Creative concentration helps students build portfolios while learning to solve a client's problems by beautifully wrapping smart strategies in provocative, layered, and memorable ideas. At the completion of the program, students will have a portfolio that highlights their natural talents and emphasizes their newly developed strengths to help students find a job in their area of expertise, either art direction or copywriting. Admission into this concentration is by application only. Applications are available the spring semester before students begin the program.

The Media Strategy concentration equips students with analytic skills necessary to analyze traditional, digital, and social media data, uncover actionable insights, and develop brand strategies leveraging those insights. Through hands-on course work and industry collaboration, students will be prepared to pursue careers in media strategy and planning, brand planning, and advertising and public relations analytics.

The Marketing Communication Management concentration is an online-only, professionally-driven focus that equips leaders with the knowledge and expertise that drives the current interrelated landscape of marketing, advertising and public relations. Through a focus on data-driven strategic planning and emphasis on building ethical leadership skills, the program will help create ethically-grounded, globally aware and business-savvy thought leaders.

Master of Arts in Advertising and Public Relations		Hours
Core Courses (12 hours)		
APR 551	Foundations of Integrated Comm	3
APR 550	Analysis and Insights	3
APR 570	Ethics and Prof Leadership	3
APR 593	Global Comm Management	3
Elective Courses (15 hours) - students that declared a concentration will have a defined set of courses to complete. If a concentration isn't declared, students complete the following:		
Research Course (3 hours - students must choose one of the following or an approved substitution)		3
APR 552	Quantitative Research Methods	
COM 550	Qualitative Research Methods in Communication	
Media Course (3 hours - students must choose one of the following or an approved substitution)		3
APR 522	Media Strategy and Analytics	
APR 523	Media Relations	
Strategy Course (3 hours - students must choose one of the following or an approved substitution)		3
APR 524	Reputation Comm Strategy	
APR 525	Brand Communication Strategy	
Electives (6 hours - based on area of speciality)		6
Capstone Project (3-6 hours)		
Students will complete one of the following options:		3-6
Thesis Option (main campus students only; students will complete six hours of the following course)		
APR 599	Thesis Research	
White Paper Option (students will complete either 3 hours (DL students only) or 6 hours (main campus students only) of the following course)		
APR 598	Industry Project	
Integrated Campaign Option (main campus students only; students will complete 3 hours of each of the following courses)		

APR 597	Campaign Research and Planning
APR 598	Industry Project
Comprehensive Exam Option (main campus students only; students will complete 3 hours of each of the following courses)	
APR 594	Comprehensive Exam Preparation
Elective Course	
Total Hours	30-33

Professional Experience Requirement

Students enrolled in the M.A. program will be required to complete an internship or some type of professional experience during the summer of their first year. This requirement is designed to encourage students to use the skills learned in the classroom in a professional setting. Students will be required to submit a job description to the graduate coordinator for approval prior to completing the internship. Internships will be approved on a case-by-case basis, but typical internships that are approved would require at least 10 hours a week and/or 80 hours during the summer semester in an advertising, public relations or a related role in a professional setting. After completing the internship, students will submit a short (1-2 page) description of what they experienced and learned during the internship, as well as a form signed by their immediate supervisor, in order to satisfy the requirement. International students that must receive course credit for the internship requirement will enroll for one hour in APR 596 Independent Study Research.

Capstone Project

The capstone project will be an individual demonstration of your knowledge of the skills, theories and concepts that you learned in your coursework during the program. Students will work with an advisor to determine the best course of action from the following options:

Thesis (individual only)

Students will work with their advisor to identify a gap in the scholarly research devoted to a topic in advertising and/or public relations. The student will conduct a review of related literature and propose and execute original research that will answer the student's overarching research inquiry. Completing a thesis will be suggested to students that are looking to pursue a doctorate. The thesis can only be completed in the spring semester of a student's second year, or later if needed.

White Paper (individual only)

Students will work with their advisor to identify a problem or opportunity facing the advertising and public relations industry. The student will conduct secondary and primary research in order to assess the problem/opportunity and form insights and recommendations that will address the problem/opportunity. Completing a white paper will be suggested to students that are looking to pursue a career in the advertising and public relations industry. **All distance learning students will complete a white paper.**

Integrated Communication Plan (team-based only)

Students will work in a small team (3-4 students) along with their advisor to create an integrated communication campaign for an organization. The student will conduct secondary and primary research in order to assess the problem/opportunity, create a planning report and develop a campaign book that will address the problem/opportunity faced by the organization. Completing an integrated campaign will be suggested to students that are looking to pursue a career in the advertising and public relations industry that do not have an undergraduate background in the

area. The campaign can only be completed by the team during the spring semester of their second year.

Comprehensive Exam

Students will complete a case-focused examination on topics covered in the core theory (APR 551), research (APR 550) and professionalism (APR 570) courses. Students will take a course during the fall semester focused on reviewing those concepts covered in the three courses and will submit a comprehensive case study centered around a topic in advertising and public relations. The comprehensive exam option is available to all main campus students, but the exam option is required for students completing the program the fall semester of their second year (17-month option).

Digital Communication Certificate

This certificate is designed to cultivate a deeper understanding of how to strategically manage communication across digital platforms. It is geared towards working professionals in advertising, public relations, marketing and related fields, as well as students in graduate programs outside A+PR and marketing.

Admission Requirements

Consistent with the Graduate School and Department of Advertising and Public Relations criteria.

See the Admission Criteria section of this catalog for more information.

Regular Admission: An Applicant whose credentials meet the following minimum requirements may be

considered for regular admission:

- **GPA:** The applicant must have a grade point average of 3.0 overall, 3.0 in the last 60 semester hours in a degree program, or 3.0 for a completed graduate degree program.
- **Admission Test Score:** Not required by this certificate program
- **Other Requirements:** Students must also submit a statement of purpose, resume with two references, and three samples of academic and professional work, in accordance with the MA degree guidelines

Conditional Language Admission:

An international graduate applicant may be considered on an individual basis for conditional language admission if he or she does not meet the minimum TOEFL score requirement of 550 on the paper-based TOEFL or 79 on the iBT, 6.5 on the IELTS of 59 on the PTE.

General Requirements:

- Completed Bachelor's degree with a 3.0 minimum GPA
- Acceptance into the certificate program

- **15 hours of coursework must be completed to receive the graduate certificate. Hours can be used later towards an MA in Advertising and Public Relations, if desired. Students can also enroll in another MA program concurrently with the certificate program. Transfer credit is not allowed for use towards the certificate program.**

- **The certificate program is designed to be completed in one year. Students must complete the program within six years of enrollment.**

COM500 Intro Graduate Studies

Hours 1

The primary goal is to orient new graduate students to the expectations and procedures of graduate study in the department. Topics covered include developing the plan of study, thesis prospectus, comprehensive examination, and choosing advisors and committees.

COM501 Introduction to Teaching Public Speaking

Hours 1

The primary goal of this course is to facilitate the instruction of COM 123 Public Speaking. Graduate students enrolled in this course will provide lesson plans for their classes and discuss options for improving classroom learning.

Communication Studies, MA Master of Arts in Communication Studies

The master of arts degree program in communication studies is designed to promote understanding of the functions of human communication in its various forms and venues and emphasizes four substantive research areas: rhetoric and political discourse, interpersonal communication, organizational leadership, and communication and culture.

On-campus, students have the opportunity to customize a plan of study to support different interests and career goals, including advanced graduate degree work, teaching, communication consulting, and corporate or nonprofit professional leadership positions. Students have three different options for pursuing their degree:

Academic – for students who wish to fulfill teaching requirements in communication studies or who want to pursue advanced degree work, requiring a comprehensive written examination to demonstrate proficient knowledge in communication studies.

Research – for students who plan to continue their careers in academia and pursue advanced research opportunities, requiring an original thesis project in a specific research area of interest.

Professional – for students who plan to pursue professional careers, requiring the completion of an internship or a professional project and the submission of a final Capstone Portfolio which provides a self-reflective overview of the entire body of course work completed for the degree

The 30-hour degree program has four components:

- 12 hours of core theory courses, a theory course from each of the four areas of scholarly research, to provide a broad basis for understanding human communication
- 12-15 hours of electives in a focused area of study chosen by the student with the approval of a faculty advisor
- 3-6 hours of methods and/or applied research courses
- Completion of a capstone experience - a comprehensive exam, a thesis, or a capstone portfolio

For distance learning students, this degree program can be completed entirely online, choosing either the academic or the professional option and electing the 12-hour emphasis in Organizational Leadership.

Admissions

Applications for main campus admission are reviewed for both fall and spring term entry, though fall entry is encouraged. Applications for distance learning admission are reviewed year-round for fall, spring, and summer term entry. Decisions for distance learning admission are made on a rolling basis, based on available space.

Recommended Dates for Submitting Applications for Admission

The following deadlines are strongly recommended for priority consideration:

- **December 1:** for fall applicants requesting departmental nomination for Graduate School fellowship opportunities
- **February 1:** for fall applicants requesting consideration for departmental assistantships
- **April 1:** for distance learners seeking summer entry
- **May 1:** for main campus applicants seeking fall term entry
- **July 1:** for distance learners seeking fall term entry
- **November 1:** for all applicants seeking spring term entry

Applications received after the recommended dates listed above may still be considered, depending on the availability of space and resources, but are not assured.

See the Admission Criteria section of this catalog for more information.

Admission for Accelerated Master's Program (AMP) in Communication Studies

Available for undergraduates only, the **Accelerated Masters Program** offers majors in Communication Studies the opportunity to earn both a BACIS and an MA, at the University of Alabama, within five years. For the highly motivated and high achieving student, this program offers several distinct advantages:

- Faster, more economical plan of study than earning the two degrees separately
- Richer undergraduate degree experience, fewer unrelated core courses and more courses in the major
- Stronger mentoring relationship with the faculty
- Greater opportunity to develop understanding of the field in preparation for doctoral work

Admission into the program begins, after the completion of 90 semester hours with a 3.3 GPA or better, when the student applies for admission to the Graduate School. Upon admission to the Graduate School, the student will be allowed to take graduate-level courses and begin a program of study leading to the Master of Arts degree in Communication Studies. AMP students in Communication Studies are allowed to count up to 10 hours of coursework dually, toward both the BACIS and the MA. For more information, consult the Graduate School policies.

Curricular Requirements

The Department of Communication Studies uses a *plan of study* for student advising. Graduate students plan their programs of study with their academic advisor, assigned or chosen, during the first semester of coursework. The plan of study must be approved by the academic advisor and filed with the graduate program coordinator by the end of the first semester of coursework. Each plan of study must meet the minimum program requirements established by the Department of Communication Studies and the Graduate School.

A master of arts degree in communication studies requires a minimum of 30 hours. Students may choose one of the following two plan options for completing their degree program:

Plan I: Thesis option

Plan II: Non-Thesis option

- **Academic (Comprehensive Exam) or**
- **Professional (Capstone Portfolio)**

Graduate students in the master of arts degree program in communication studies may choose elective courses to complete their plans of study, with the approval of their academic advisors. A minimum of 24 graduate hours must be completed in the communication studies discipline. All candidates are required to give a public graduate presentation prior to completing the master of arts degree in communication studies.

Plan I: Thesis Requirements

In addition to completing the courses specified below and electives stipulated by their plans of study, students who choose the Plan I option must successfully complete a master's thesis, orally defend that thesis, and have the thesis accepted by the Graduate School.

Code and Title	Hours
Core Theory Requirements	12
Students must successfully undertake one course from each theory area - A, B, C - plus an additional theory course from any one of the three	
A. Rhetoric and Political Discourse	
B. Interpersonal and Organizational Communication	
C. Communication and Culture	
Elective Theory Course (from A, B, or C)	
Methods Requirement	3
COM 548 Sem Rhetorical Criticism or COM 55C Qualitative Research Methods in Communication	
Or approved equivalent methods course	
Elective or Emphasis Coursework	9
To be determined with the approval of one's academic advisor. At least 6 hours must be in COM.	
Research Hours	6
COM 599 Thesis Research	
Total Hours	30

Plan II: Non-Thesis Requirements - Academic (Comprehensive Exam)

All students who choose to complete this option must complete a minimum of 30 hours of graduate coursework, including the courses specified below and others stipulated by their approved plans of study, and pass a comprehensive examination. Taken during the semester in which course requirements for the master's degree are to be completed, the examination is designed to reveal the knowledge gained by the candidate through both required theory and methods courses and elective emphasis courses taken to complete the program, as well as the candidate's ability to express that knowledge in acceptable form. Students must take COM 510 to prepare for the exam and for the exam to be administered. The answers are evaluated by designated departmental

comprehensive examination readers. See current guidelines for the comprehensive examination.

Code and Title	Hours
Core Theory Requirements	12
Students must successfully undertake one course from each theory area - A, B, C - plus one additional theory course from any one of the three	
A. Rhetoric and Political Discourse	
B. Interpersonal and Organizational Communication	
C. Communication and Culture	
Elective Theory Course (from A, B, or C)	
Methods Requirement	3
COM 548 Sem Rhetorical Criticism or COM 550 Qualitative Research Methods in Communication Or approved equivalent methods course	
Elective or Emphasis Coursework	12
To be determined with the approval of one's academic advisor. A minimum of 6 hours must be in COM.	
Required Course	3
COM 510 Comprehensive Exam Prep	
Total Hours	30

Plan II: Non-Thesis Requirements - Professional (Capstone Portfolio)

All students who choose to complete this option must complete a minimum of 30 hours of graduate coursework, including the courses specified below and others stipulated by their approved plans of study. Students who are primarily pursuing professional interests may elect this alternative plan because it requires them to include in their plans of study either COM 598 or COM 590 as professional or practical application of their academic work. Students who choose to pursue this plan must secure permission to do so by submitting a formal proposal to their academic advisor, no later than upon completion of 12 hours of graduate coursework. To complete this plan of study, students are required to submit, at the end of their coursework, a Capstone Portfolio for their advisor's approval.

Code and Title	Hours
Core Theory Requirements	12
Students must successfully undertake one course from each theory area - A, B, C - plus one additional theory course from any one of the three	
A. Rhetoric and Political Discourse	
B. Interpersonal and Organizational Communication	
C. Communication and Culture	
Elective Theory Course (from A, B, or C)	
Methods Requirement	3
COM 548 Sem Rhetorical Criticism or COM 550 Qualitative Research Methods in Communication Or advisor approved equivalent methods course	
Elective or Emphasis Coursework	12
To be determined with the approval of one's academic advisor. At least 6 hours must be in COM.	

Applied Coursework	3
COM 598 Professional Project or COM 590 Internship	
Students must submit an approved Capstone Portfolio during their final semester of the program.	
Total Hours	30

Transfer Credit

Although the Graduate School permits up to 12 hours of transfer credit, the department rarely approves more than 3-6 hours of graduate course work completed in another program. No transfer requests will be considered prior to a student's entry into the MA program. After having successfully completed at least one semester in the program and with their advisor's approval, MA students may petition the department to consider transfer credit toward completing their plans of study. For approval, graduate coursework completed in another program should either correspond with a required course in the program or be approved as a relevant elective course.

JCM501 Media Production Tools

Hours 3

Instruction in and critical analysis of communication technologies used in the production of community journalism.

JCM502 Producing Community Journalism

Hours 3

This course focuses on gathering, writing, editing, and presenting of news and information across media platforms.

MC501 Mass Media Law Regulatn

Hours 3

A study of the laws affecting the media, decisions, and case histories that act as guides for the media. Independent readings and papers are required.

MC513 Communication/Diversity

Hours 3

Study and analysis of issues of diversity as they relate to groups in society and in communication fields. Emphasis is on the media's treatment of various groups in society.

Journalism & Media Studies, M.A.

The Department of Journalism and Creative Media offers the Master of Arts degree with a major in Journalism & Media Studies. Students work closely with a faculty dedicated to the principles and practices of sound journalism, mass communication and scholarly inquiry. The program offers three options for study:

- Individuals who seek in-depth knowledge and mastery of one or more of the subfields and methodologies of journalism or media studies – for example, mass communication history, mass communication law, critical and cultural communication, mass communication theory and methods. These individuals typically follow Plan I (see below) and go on to pursue doctorates. Those with significant experience in the journalism field may teach without the PhD degree.
- Individuals who seek to work professionally in writing, editing, visual journalism, electronic news and/or digital journalism, and who wish to develop conceptual knowledge of the field, as well as critical-thinking and problem-solving skills. These students typically follow Plan II (see below).
- Individuals who wish to earn graduate credit through distance education can enroll in our online journalism and media studies program. This program is ideal for people eager to expand their knowledge base, individuals looking to start a career in news, and those interested in teaching in the field of journalism and media.

The program serves both recent BA recipients, whether in journalism/mass communication or other fields, and professionals seeking to deepen their knowledge.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three letters of recommendation, resume
- Examples of journalistic work if available – e.g., stories, photos or multimedia – via hard copy, disk, or website link
- The Statement of Purpose must address how the degree will advance the applicant's professional and educational goals
- A TOEFL score of at least 90 (with a score at least 24 on each of the speaking and writing sections) for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below). International applicants who prefer to submit IELTS test scores must score at least 7.0 and also score at least 7.5 on the speaking section and 6.5 on the writing section. International applicants who meet these criteria may also be invited to participate in a videoconference with the college application review committee

The program faculty may require up to nine hours of additional coursework for applicants lacking undergraduate classes related to the professional values and competencies that are central to the master's program.

Deadlines (note that earlier applications are given priority for funding)

Thesis & Project-Oriented Tracks on UA Campus

- Applications accepted year-round
- Fall semester admission prioritized, but spring admission may be considered.

- Priority deadline for applicants interested in funding: January 31
- Priority deadline for completed applications: March 31

One-Year Community Journalism Program on UA Campus

- Applications ONLY accepted for fall semester
- Priority deadline for applications: February 1
- The one-year focus in Community Journalism admits a limited number of students each fall. Applicants not accepted for Community Journalism may be considered for other master's path in the Department of Journalism & Creative Media.

Bama by Distance Online Journalism & Media Studies MA

- Applications accepted year-round for fall, spring and summer admissions

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Each student entering the graduate program in Journalism & Media Studies must complete 31 semester hours of credit, under either programs of study. Requirements for each plan are as follows:

Plan I - Thesis track (On-campus, everyone follows). The research track allows you to study and think critically about journalism from a variety of scholarly approaches. You will explore news and its role in society and its effects on audiences, factors that shape decisions, the history of journalism and the legal and ethical implications of journalism. This two-year option is highly customizable and allows for 12 hours of elective credit that can be taken across disciplines.

Plan I, Master's Thesis		Hours
Required Courses		
JCM 500	Grad Studies Orientation ¹	1
MC 551 or CIS 605	Sem Communication Theory Cultural and Critical Theory	3
MC 550 or CIS 609	Research Methods Humanistic Research Methods	3

Total Hours	31

Footnotes

- ¹ All students must enroll in JCM 500 Grad Studies Orientation their first year of study
- ² With their thesis advisor's approval, research-focused master's students may take elective courses in other UA departments and colleges. For example, a graduate student interested in media effects may take 500-level coursework in psychology if approved by their advisor and the course instructor. Students who are pursuing their research master's degree may also take 600-level courses in the College of Communication & Information Sciences, with permission of the instructor.
- ³ An independent study with a faculty member. Students must sign up for three credit hours of JCM 590 with the supervising professor. A proposal must be submitted to the graduate coordinator detailing the purpose of the independent study.

Plan II: Project track

On-campus option A (COM-J): Our award-winning, one-year professional offering is designed to support community journalism by establishing trained professionals in the field. In this program, you will explore new ways to serve communities through evolving journalism practices and digital innovation. The hands-on curriculum relies heavily on experiential learning, rather than a thesis. It includes a May-through-July internship at the University's Digital Media Center, which includes Alabama Public Radio and WVUA-23, a commercial television station in Tuscaloosa. Students interested in the Community Journalism option should indicate interest in their Graduate School application and statement of purpose.

On-campus option B: Under this option, students can complete the on-campus degree and have their studies culminate in an in-depth project or comprehensive exams. This path requires completion of 31 total hours, with 28 hours of graduate courses as outlined in Plan I, and a 3-hour project or comprehensive exams in JCM 597.

Online option: A professional option is also available entirely online for students who wish to have flexibility to complete coursework around their everyday lives. Students can complete the program in as little as 18 months, taking both skills and conceptual courses that help students master knowledge about journalism and media.

Plan II, Master's Project		Hours

MC 531	Sports & Social Media	3
MC 564	Sports Media Research	3
JCM 535	Sports Documentary	3
Total Hours		12

Transfer Credit

Students transferring from another graduate program can have up to 12 hours accepted from their prior program for the M.A. degree, pending a curriculum review by the graduate coordinator. In addition, non-degree seeking students can enroll in M.A. classes, pending review by the graduate coordinator. Non-degree students must seek degree status in order to continue after taking 12 credit hours. For more information see the Graduate School Transfer Policies. (p. 18)

Accelerated Master's Program

Through the Accelerated Program (AMP), rising UA seniors who have demonstrated high performance can take courses that count simultaneously toward their undergraduate and graduate degrees. Once admitted, an AMP student can take up to 12 hours of courses that count toward both the degrees, which reduces the time it takes to earn a degree

by one year. Interested students apply for the AMP program during their junior year and work with the graduate coordinator to create a plan of study to complete their undergraduate degree during their first year as a graduate student. Applicants must have earned 90 or more credit hours by the Fall semester they start the AMP program and have a minimum GPA of 3.3. See the Accelerated Master's Program section of this catalog for more information. (p. 13)

Expedited Admission Track into the CIS Doctoral Program

The Expedited Admission Track into the CIS doctoral program allows highly qualified students who completed an undergraduate degree to join the doctoral program. Such students begin graduate coursework in the JCM program and complete their graduate degree as College-wide doctoral candidates, with a streamlined application process for admission or to transfer credit hours into the doctoral program. In short, if admitted on the expedited track, candidates will be able to count 24 hours of coursework, rather than the usual maximum of 12 hours, toward their doctoral degree. Students cannot simultaneously enroll in the AMP program and Expedited Admission Track. See the C&IS Statement of Purpose Guidelines for complete requirements. Otherwise the process requires admission into the JCM program and the CIS doctoral program. Applicants must submit a statement of purpose indicating interest and commitment to graduate work through the doctoral level. Upon completing 24 hours of graduate coursework at the level (18 hours of core classes, and two journalism classes), students must pass a comprehensive qualifying exam to continue toward the doctoral degree.

Plan I - Thesis Process Requirements

The following applies to students pursuing a master's degree under Plan I (Thesis):

The student is required to complete a thesis, which must be orally defended. Students will work with their adviser to identify a gap in the scholarly research devoted to a topic in journalism and creative media. The student will conduct a review of related literature, and propose and execute original research that will answer the overarching research inquiry. The thesis can be completed no earlier than the second year of a program. Students will enroll for six hours in JCM 599, as part of that process.

Committee: Students must form a committee of two JCM faculty members and one faculty member outside of JCM. Students are encouraged to have their faculty adviser serve as thesis chair. The thesis chair must be a tenured or tenure-track professor with associate or full graduate faculty status. An Appointment or Change of Master's Thesis Committee form must be submitted to the Graduate School for the dean's approval of the committee members.

Proposal: Students must submit a proposal detailing (1) a specification of the topic and its significance, (2) a review of relevant literature, along with proposed research questions and/or hypotheses, (3) a proposed methodology and (4) a calendar for projected completion. The committee must approve the proposal before the student can proceed with the project.

Final Report: The final thesis must include (1) a specification of the topic and its significance, a review of relevant literature, along with proposed research questions and/or hypotheses, (3) a detailed methodology, (4) an analysis of the results, and (5) a discussion of the theoretical and practical implications of the results. The final report must be submitted to the committee at least two weeks before the oral defense.

Oral Defense: Students will defend their final thesis to their committee for approval. It is the student's responsibility to notify the Graduate School of their defense by submitting the final thesis and the relevant paperwork

before the deadlines set by the Graduate School. Defenses are open to all faculty members in the department. Students must be enrolled in JCM 599 during the semester they defend their thesis. During the oral defense, students are questioned on their thesis. Questions often concern the methodological design, theoretical foundation, results, and theoretical/professional implications of the thesis project. For the student to pass the oral defense, committee members must be satisfied the student has gained sufficient knowledge in core areas study and demonstrated this knowledge in the design, execution, and completion of the thesis project. A successful thesis will demonstrate research capacity, independent thought, and the ability to interpret materials.

Plan II - Non-Thesis Process Requirements

Plan II students take a comprehensive exam or produce a Capstone project. Similarly, a Capstone project or a comprehensive exam is required for distance learning students.

Capstone Project: The project option is competitive. Students wishing to pursue a project option must formally submit a brief proposal for the project to the student's MA committee before the end of the first week of the student's final semester. Students will be notified about acceptance during the second week.

The students' master's committees, each of which consists of the JCM 597 instructor and one other faculty member (see committee details below), will collectively review proposals and approve no more than five MA projects each semester –i.e., the five projects that are judged to be the best will be selected each semester. Judgment criteria include relevance, importance, coherence, thoroughness, creativity, practicability and writing quality.

About the project: The MA project may focus on a media work (e.g., an in-depth journalistic report, a documentary, etc.); a media innovation (e.g., an online entrepreneurial media product or app); or a scholarly research study (in the social sciences or the humanities). The project is not a fully completed work, but instead consists of the following three components: (1) a detailed plan for carrying out a completed work; (2) a "prototype" or "pilot" of the work; and (3) a conceptual paper in which the student reflects on the project.

Here are details about each component:

1. A detailed plan (due week 6): In this component, students provide a rationale for the project that includes evidence that demonstrates a need, and a description of how the full project will be completed. For journalistic works, students provide background on the issue, statistics and other evidence that show it is a socially important issue, information about previous journalistic reporting on the issue, and details about how the piece will be reported. For research studies, students produce a literature review, theoretical explanation, and a methodology section. For media innovations or entrepreneurial works, students provide a brief explanation of the innovation, and a business plan, including mission and goals, audience/market analysis, and revenue plans. Students receive feedback that may inform their project moving forward.
2. Prototype/pilot of the finished product (due week 10). In this component, students produce an example of the completed work. For a journalistic work, this is a substantial reported and sourced overview that introduces what would be a more involved journalistic work. For a research project, this would be a pilot study.
3. Reflection paper (due week 12). Students write a six-page conceptual paper that draws implications about the project from the perspective of two of the four core knowledge areas of the program (theory,

methods, history, issues/ethics). This paper includes citations and demonstrates understanding of, and an ability to think critically about, these perspectives.

To graduate the same semester, each student must orally defend their projects to their two person committee no later than week 12 of the semester (no later than two full weeks before the last day to submit examination results to the Graduate School). The defense should be in person. A phone conference is acceptable only if there are technological barriers.

Each student pursuing a project will have a committee of two graduate faculty: (1) the JCM 597 class instructor and (2) a second faculty member. The JCM 597 instructor serves as the committee chair and must be a full or associate member of the graduate faculty. The second committee member may be a temporary, associate or full member of the graduate faculty. The second member may come from outside the University, but in this case, must be appointed as temporary graduate faculty. The area of expertise of the second committee member should complement the project's focus.

Committee responsibilities: In the case of project students, committee members provide feedback on the project proposal, feedback on student questions during the JCM 597 class, and feedback on the completed project. Committee members determine if the project proposal is accepted. Both attend the defense of the project and determine if the project and defense demonstrate competency.

Comprehensive Exam

Students who choose the comprehensive exam option, or are not approved for the project option must complete the comprehensive exam. They will take comprehensive exams by enrolling in JCM 597 (three hours) during their final semester, and a three-hour approved elective, to reach the required 31 hours for a degree. Students must have completed their five core courses (JCM 500 Grad Studies Orientation, JCM 562 Cont. Issues in Journalism, JCM 563 History of Jour. and Media, MC 550 Research Methods, MC 551 Sem Communication Theory) before taking JCM 597.

Each student will complete four essay questions in an open-book format over the course of 48 hours to be identified by the department in the JCM 597 syllabus at the beginning of the semester. The questions cover the core classes - contemporary issues and ethics, history, methods, and theory. Four professors ask the questions and evaluate students' responses, determining whether the responses warranted evaluations of (a) passed, (b) revisions, or (c) fail. Students who do not pass the initial question will first be asked to revise the response. Students who decline to complete revisions will fail the course. Students who revise and resubmit their answer will have the response re-evaluated by the relevant faculty member, who will determine whether the student passed or failed.

The examination committee will determine whether the student has passed, must perform additional work to demonstrate competency in one or more areas of the examination, or has failed the examination. This determination will be made within one week (seven days) of completion of the exam. When additional work is required, the examining committee may choose to administer another oral examination within the same semester. In the case of a clear failure, re-examination must take place after six months and before twelve months have elapsed. Each of the four portions of the preliminary examination may be taken only twice. The examining committee will rule either pass or fail on the second examination.

Fieldwork/Practicum/Internship Requirements (COM-J)

Our award-winning, one-year professional offering is designed to support community journalism by establishing trained professionals in the field. In this program, you will explore new ways to serve communities through evolving journalism practices and digital innovation. The hands-on curriculum relies heavily on experiential learning, rather than a thesis. It includes a May-through-July internship at the University's Digital Media Center, which includes Alabama Public Radio and WVUA-23, a commercial television station in Tuscaloosa. Community Journalism students must complete an internship and coursework during the interim and summer months culminating with a Capstone project. For the Capstone project, students will work together to produce a digital reporting project focused on a community issue or problem and report on that topic in depth. Students are required to pay tuition during this period, regardless of whether they served as research/teaching assistants during the previous fall/spring. Admission criteria and core curriculum requirements are identical to the traditional Plan II option.

Time Limits for Degree Completion

See the Degree Requirements section of this catalog for more information. (p. 18)

Student Progress Requirements

Students can be removed if their GPA scores do not meet minimum standards. Students generally must earn a 3.0 GPA in their first 12 hours in the program to maintain admission.

Academic Misconduct Information

See the Academic Misconduct section of this catalog for more information. (p. 7)

Withdrawals and Leave of Absence Information

See the Academic Policies section of this catalog for more information. (p. 206)

Academic Grievances Information

See the General Information section of this catalog for more information. (p. 219)

See the Academic Policies section of this catalog for more information. (p. 204)

Graduate School Deadlines Information

See the Student Deadlines section of this catalog for more information.

Application for Graduation Information

Students must register for graduation before the deadline of the semester in which they expect to complete their degree. See the Graduation section of this catalog for more information. (p. 18)

School of Library and Information Studies

- Majors
 - Book Arts, MFA (p. 465)
 - Library and Information Studies, MLIS (p. 469)
- Certificates
 - Archival Studies (p. 464)
 - Book Arts (p. 465)

Vision

Through excellence in teaching, research, and service, SLIS is committed to educate socially responsible information professionals prepared to empower diverse populations in a multitude of contexts, communities, and cultures.

Mission

To advance the theory, art, and practice of professions specializing in the use and creation of information in traditional and emergent forms.

Values

Since its beginnings more than 40 years ago, SLIS has developed a unique interdisciplinary personality that blends the arts, humanities, and social sciences. We support a mutual belief in and respect for those we serve. This is evident in our strong support of intellectual freedom, access to all, and the tenets of social justice.

Educational Objectives

The educational objectives of these graduate programs are as follows:

Teaching

Provide students with the knowledge, skills, understanding, and diverse technologies to meet the changing informational and cultural needs of diverse populations and organizations. Foster leadership skills and abilities in all students, provide opportunities within the program for students with leadership potential to exercise their abilities, and encourage students as graduates to seek out and assume leadership roles. Improve and develop students' critical and conceptual thinking skills.

Research and creative activity

Augment and advance knowledge through basic research and improve professional practice through systematic inquiry into its nature, standards, and principles.

Service

Apply the insights and knowledge gained through research and instruction in service to public- and private-sector organizations.

Facilities

SLIS classrooms, faculty offices, and shared spaces are housed on the fifth floor of the Gorgas Library in the heart of the campus. Student spaces provide desktop computing, printing, laptop workstations, individual and group work spaces, professional resources, and a collection of children and youth literature. A student lounge is conveniently located for relaxation and refreshment.

Academic Common Market (ACM)

The School of Library and Information Studies participates in the ACM, an agreement among selected Southern states to share academic programs at in-state tuition rates. Residents of the states of Arkansas, Delaware, Virginia, and West Virginia may make an ACM application to attend the MLIS program. If accepted, The University of Alabama will pay the out-of-state portion of the student's tuition. Residents of Georgia, Kentucky, Louisiana, Mississippi, South Carolina, and Tennessee may apply to the ACM to attend the MFA in book arts program, also with UA's paying the out-of-state portion of tuition. Background information on the ACM, a list with the contact information for each state's ACM coordinator, and an online application to the UA Academic Common Market.

Financial Assistance

A limited number of departmental assistantships, which pay a stipend and also cover some out-of-state fees, as well as a limited number of scholarships are available each academic year. For information, contact the director of the School of Library and Information Studies.

BA520 Elements of Letterpress Printing

Hours 3

This course is devoted to the fundamentals of letterpress. Students will develop fine craft skills in a studio environment. Through hands on assignments, students will be introduced to hand setting type, press operation, and image making techniques. They will learn fundamental terminology, gain an understanding of the interaction of type, ink, and paper, and develop familiarity with the equipment. The emphasis is on fine printing and relief image making.

BA521 Letterpress and the Printed Book

Hours 3

Students in this course will build on their skills on the press through the production of two assignments, culminating in the design and production of a book project. This course is focused on typographic design, the intersection of text and image, and press work. Readings and discussions in this course will focus on typography and the hierarchy of information in the book format.

Prerequisite(s): BA 520

LS500 Information Science and Technology

Hours 3

This introductory course examines information science through conceptual foundations and historical underpinnings of the field as they relate to the nature and roles of information and information institutions. Students will learn fundamental approaches to understand the relationships between Information and individuals, organizations, and society.

LS501 Information in Communities

Hours 3

This required course introduces students to values and ethics and power structures that impact information and information services to diverse communities. It serves as a foundation for broadly thinking about information, communities, power, and social responsibility of LIS professionals.

Archival Studies Certificate

The College of Communication & Information Sciences at The University of Alabama provides a program of study that leads to an ACHE-recognized Certificate in Archival Studies. This certificate offers a comprehensive grounding in the academic discipline of archival studies, and an understanding of the theory, art, and practice that informs archival

work. Students have the opportunity to develop competencies for work with rare books, manuscripts, traditional records, and digital media.

Graduates of the certificate leave prepared for employment in academic, cultural, public, governmental, and corporate environments. Recent graduates are currently employed at leading institutions, including the Alabama Department of Archives and History (ADAH), the New York State Archives, the University of Washington, Birmingham-Southern College, and Samford University.

Admissions Information:

Applications are accepted from students pursuing in graduate work in allied disciplines, or already possessing graduate degrees in related disciplines. At the current time the certificate may only be completed on-campus. Students pursuing the MLIS should apply for admission to the archival studies concentration.

Contact Information:

Please contact Dr. Robert B. Riter for additional information.

Book Arts Certificate

The Graduate Certificate in Book Arts is to prepare students to integrate history, materials and technologies of the book arts into their research and/or professional programmatic objectives. Students completing the certificate will have obtained a historical, conceptual, and functional understanding of professional best practices, art processes of the three major studio areas that make up the book arts (papermaking, letterpress printing, and bookbinding), and an understanding of the historic relevance of book arts within the broader context of art and craft.

The Book Arts Certificate will be a general 15 credit hour program designed for scholars and professionals in other disciplines. It will provide an overview of the book arts as a basis for the integration of

material book studies into outside research or creative specializations. As a compliment to a primary field of study or professional practice, the certificate provides the expertise necessary to produce and critically examine creative book-work within a historical context and contemporary framework.

Admission Criteria

Applicants seeking admission into the Graduate Book Arts Certificate (15 credit hours) will apply directly to the School of Library and Information Studies. A Bachelor's degree, 3.0 GPA, and a statement of purpose will be required. Students may apply to enroll directly or concurrently with another degree program. Applications will be reviewed on a rolling basis and students may begin their study in the Fall or Spring terms. Use the special non-degree certification application.

Applications to the M.F.A. Book Arts program will receive priority over applications to the certificate program and the numbers of students admitted to each program will be closely monitored to ensure that courses are not filled beyond the capacity of the facilities and faculty.

See the Admission Criteria section of this catalog for more information.

Total Hours	15

All graduate coursework required for the proposed certificate is already offered through the existing ACHE approved M.F.A. Book Arts Program. Students who complete the certificate will be provided formal recognition of specialized knowledge in Book Studies. This recognition will communicate that these graduates have skills and academic preparation in the arts and technologies of the book.

Students may transfer in up to 3 credit hours with advisor approval. The certificate must be completed in 6 academic years.

Book Arts, MFA

The MFA Book Arts Program is a 60-credit hour course of study in the fine art and traditional practices of making books by hand. Individual artistic expression is emphasized through development of craft skills based in historical principles, practice, and technique. Courses in letterpress printing and publishing, typography, hand bookbinding, hand

papermaking, and the history of the book provide training and context for the role of the book as a medium for expression in art and society.

Our emphasis is on the book as an integrated unit, although there are opportunities for students who wish to pursue specific interests in one or more of these areas after the initial year of general study.

Admission Requirements

Applicants may submit a letter of purpose, resume, portfolio (in their area of experience), and three letters of reference.

See the Admission Criteria section of this catalog for more information.

Degree Requirements

Candidates for the MFA Book Arts degree must earn a minimum of 60 semester hours of credit, including at least 6 hours in the history of the book and 3 hours in a historical/theoretical course appropriate to the goals of the individual student; at least 36 hours in the book arts studio; and a minimum of 12 hours of electives within or outside the book arts program. All coursework must be completed with a grade average of "B" or better. All students must spend at least four semesters in residence.

All MFA students must complete, as part of the 60 hours, the following required courses:

One course must be historical/theoretical non-studio

Students may also take elective courses at the 500 or 600 level from any department in the university if approved by their advisor

Total Hours **60**

NOTE: Students who are not enrolled in the MFA program and who wish to take book arts classes must obtain permission from the instructor before enrolling.

Master's Degrees

The primary purpose of master's degree programs is to provide students with subject matter at an advanced level in their fields of study. Master's degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master's programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master's degree:

Plan I. Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or "capstone experience" as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject.

With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student's program at the master's level must provide sufficient association with the resident faculty to permit individual evaluation of the student's capabilities and achievements.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Courses of full graduate-level credit earned in a *regionally* accredited institution where a student was enrolled in the graduate school, may be submitted for review for inclusion in a master's degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student's advisory committee and the dean of the Graduate School.

A student initiates the Request for Transfer of Graduate Credit form and must ensure that the Graduate School receives an official transcript from the outside institution. This should be done well in advance of the final semester, otherwise it may delay graduation and awarding of the degree.

With the approval of the student's department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from an outside institution. Some master's degree programs allow fewer hours to be transferred. Be sure to check with your department's graduate program director regarding your department's transfer policy. Eligible coursework will have been earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA master's program. Only courses in which a student earned a "B" grade or better may be transferred. Thesis Research (599) may not be transferred in from an outside institution. If approved, such coursework can be counted toward the minimum hours and coursework requirements for the master's degree.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

400-Level Courses

A maximum of 6 semester hours of 400-level course credit may be accepted for graduate credit and used toward a master's degree. The department needs to submit the Approval of 400-Level Course Work for Master's Credit form through the UA DocuSign system in myBama. This form must be submitted for approval to the Graduate School by the last day to add a course for the semester in which the course will be taken.

Time Limit

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. Previously approved transferred coursework that falls within six years of *admission* to the master's degree program can be counted toward the minimum hours requirement. There is no provision for an extension of the time limit beyond six years for master's students.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

Thesis

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. Students set up their committee through the Graduate Academic Activities portal on the Graduate School website. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. The majority of the thesis committee must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the student's thesis

committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. All members must agree that the student is ready for the final oral thesis defense. A final oral thesis defense is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral thesis defense unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In circumstances where virtual participation is necessary, all participants must follow the Virtual Participation guidelines found below.

Virtual Participation in Committee-Based Exams/Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must

also ensure that appropriate security precautions are taken to prevent the interruption of the event.

7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Article Style vs. Journal Format for Master's Theses

Article Style.

At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.

Journal Format.

A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

All theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research.

In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the

college Human Research Review Committee to obtain approval for the planned research.

Final Thesis Defense

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. The thesis must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

"Completed" means submitted to ProQuest after being successfully defended, carefully edited following the defense meeting, and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. A majority of the thesis committee must approve the written thesis and defense before submission to the Graduate School. Following the thesis defense, the Committee Acceptance Form is submitted by the thesis chair through the UA DocuSign system in myBama.

Graduate School deadlines, including each semester's thesis deadline, are available at the Graduate School's homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the thesis before the student can be cleared for graduation.

Comprehensive Examinations

In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all candidates for the master's degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School.

The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. The final report is submitted by the department through the UA DocuSign system in myBama. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only

twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation

Each candidate for a master's degree must submit an Application for Degree via myBama no later than the last day to add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Second Master's Degree

Six (6) semester hours of eligible credit from one master's degree at The University of Alabama may be applied to the requirements for a second master's degree, but only if the department of the second master's agrees to the courses in the plan of study. Any hours from the previous master's degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master's degrees, no hours may double count toward any additional master's degrees.

Library and Information Studies, MLIS

The Master of Library and Information Studies (MLIS) degree is a 36-credit-hour program, one of approximately 63 programs in the United States and Canada accredited by the American Library Association and the only ALA-accredited program in the state of Alabama. The degree prepares graduates to work in any type of library – public, school (PK-12), academic, or special. The degree also equips students for work in archives, information centers, and in entrepreneurial and research environments, especially those using information technologies.

Admissions

Applications are considered holistically, so no single factor determines acceptance to the program. The MLIS program is selective, and does not admit every applicant.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three (3) letters of recommendation; for applicants who have been in school in the last 5 years, at least two (2) letters must be academic references.

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue."

Non-degree Admission Requirements

An applicant may be admitted as a non-degree student if the applicant has either a 3.0 undergraduate GPA or a 3.0 graduate GPA. No more than 12 hours may be taken as a nondegree-seeking student and applied to a degree.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Candidates for the MLIS degree must earn a minimum of 36 semester hours of credit from courses the School of Library and Information Studies (SLIS). Courses offered by the College of Communication and Information Sciences, as well as those in other University of Alabama academic units outside SLIS, can be taken on approval by a student's

academic advisor. No more than six hours of courses can be taken outside of SLIS. All work must be completed with a grade average of "B" or better. A comprehensive portfolio comprised of course assignments reflecting program learning outcomes is required of all students. All MLIS students must complete, as part of the minimum 36 hours, the following 9 hours of required courses:

Core Requirements		Hours
LS 500	Info Sci & Tech	3
LS 501	Information in Communities	3
LS 513	Professional Paths	3
Total Hours		9

Students may take many pathways to the completion of the MLIS program and should work in conjunction with their assigned academic advisors in the construction of their program. A Class A School Library-Media Certification and an Archival Studies Concentration may be pursued. In addition, there are informal areas of emphasis offered in Academic Libraries, Digital Stewardship, Public Libraries, Special Libraries, Social Justice & Inclusivity, and Youth Services.

Class A School Library Media Certification

For admission to the Class A School Library Media program, a candidate must have a valid bachelor's level or valid master's level professional educator certificate in a teaching field or a valid master's level professional educator certificate in another area of instructional support. Effective June 1, 2017, two full years of full-time professional educational work experience in P-12 school system(s) are also required for admission.

Applicants with out-of-state licensure who are employed or seeking employment in another state are responsible for knowledge about professional licensure requirements in the prospective states. An applicant with out-of-state licensure who intends to apply for Alabama certification must first apply for the prerequisite certification in Alabama before applying for Class A School Library Media certification in Alabama.

All applicants must have a criminal history background check as required by the Alabama Department of Education.

Students pursuing Library Media certification should refer to the State-approved program checklist to ensure that requirements are met. In addition to completing an approved program of study, the candidate is required to pass a comprehensive assessment administered by the School of Library and Information Studies (SLIS) and earn a passing score on the Praxis for Library Media Specialist.

The approved program of studies for certification is as follows:

Code and Title	Hours
Instructional support area	
LS 500	Info Sci & Tech
LS 501	Information in Communities
LS 504	Media Prod & Utilization
LS 507	User Ctr Info Services
LS 513	Professional Paths
LS 532	School Media Centers
LS 542	Instruct Design & Dev
LS 572	Intern Sch Media Cntrs (requires a minimum of 300 clock hours)
Foundations of professional studies: Choose ONE of the following SDE-approved diversity courses.	3

Archival Studies Concentration

The School of Library & Information Studies at The University of Alabama offers a program of study within the MLIS degree that leads to an ACHE-recognized concentration in Archival Studies. This concentration provides a comprehensive grounding in the academic discipline of archival studies,

and an understanding of the theory, art, and practice that informs archival work. Students have the opportunity to develop competencies for work with rare books, manuscripts, traditional records, and digital media.

Graduates of the concentration leave prepared for employment in academic, cultural, public, governmental, and corporate environments. Recent graduates are currently employed at leading institutions, including the Alabama Department of Archives and History (ADAH), the New York State Archives, the University of Washington, Birmingham-Southern College, and Samford University.

In addition to the MLIS requirements, the Archival Studies Concentration requires completion of the following curriculum:

Archival Studies Concentration Requirements (in addition to MLIS Requirements):		Hours
LS 555	Intro Archival Studies	3
LS 556	Archival Theory & Practice	3
LS 557	Archival Appraisal	3
LS 558	Archival Repres., Access & Use	3
Approved archival studies electives		6

Transfer Requirements and Credit for Non-Letter Graded Courses

Graduate credit may be transferred from another accredited university or may be elected from the offerings of other departments. Thesis credit cannot be transferred from another university. **SLIS Nine-hour Rule:** No more than nine hours of credit can be applied toward the MLIS for any combination of graduate courses taken outside SLIS, directed research courses, internships, and thesis credit. These hours may be combined as follows:

Coursework

Six hours of approved credit for graduate work taken outside SLIS and three hours of credit for a directed research course or internship; or:

Six hours of credit for any combination of directed research courses and internships and three hours of approved credit for graduate work taken outside SLIS.

Thesis

Six hours of thesis credit and three hours of credit for directed research course or internship; or:

Six hours of thesis credit and three hours of approved credit for graduate work taken outside SLIS.

More information about transfer requirements can be found from the Graduate School (p. 18).

Comprehensive Examination/Capstone Requirements

All MLIS students are required to complete a comprehensive portfolio reflecting their learning in relation to the MLIS program learning outcomes. This portfolio is a representation of student growth during their coursework.

Final portfolios include work samples from courses taken throughout the program, and are due during the final semester of coursework. Specific submission deadlines are communicated to students each semester.

Programmatic Learning Outcomes (PLOs) for the MLIS Degree

The programmatic learning outcomes (PLOs) for students enrolled in the MLIS degree are aligned with the American Library Association's Standards for Accreditation. The PLOs are:

(1) Students will have the skills and knowledge to understand the role of technology in library and information services; (2) Students will be able to use evidence to inform library and information practices; (3) Students will be able to critically articulate the philosophy, principles, and ethics of library and information science; and (4) Students will be able to practice principles of social and cultural justice in their preparation for careers in library and information environments.

Thesis Option

Candidates for the master's degree under the thesis plan must earn a minimum of 36 credit hours, including nine hours of required courses, a three-hour management and administration course, and six hours of thesis credit (LS 599); no more than six hours of thesis credit may be counted toward the degree.

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I: Thesis. The subject chosen must be related to library and information studies and must be approved by the student's thesis director, the student's thesis committee, and the SLIS Director.

The thesis committee must include three individuals, including at least two full-time SLIS faculty members, at least one of whom must be a full member of the graduate faculty; a third committee member may be a faculty member from another department of the University, a faculty member from another institution, or a well-qualified practitioner. All committee members must hold appropriate Graduate Faculty status.

The student must obtain committee approval for a prospectus for the thesis project prior to enrolling in thesis credit; a formal defense of the prospectus will constitute the final examination for the MLIS degree.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting. The thesis defense shall be made orally before the student's thesis committee and will be open to the public.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has posed troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects

is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects, the principal investigator – normally the student – is responsible for contacting the college's Human Research Review Committee to obtain approval for the planned research. Both the student and the thesis chair are responsible for completing IRB training; guidelines for training can be found at <http://ovpred.ua.edu/research-compliance/institutional-review-board-irb/>.

The request forms for IRB approval can be accessed from <http://ovpred.ua.edu/research-compliance/institutional-review-board-irb/>.

Time Limits for Degree Completion Requirements

All requirements for the master's degree must be completed during the six years (18 consecutive semesters) immediately preceding the date on which the degree is to be awarded. Additional information about time limits for degree completion for Masters programs is available at the Graduate School (p. 18).

Student Progress Requirement

All graduate students must earn and maintain an overall graduate grade point average (GPA) of 3.0 or better for all graduate courses undertaken at The University of Alabama. Grades below "C" count in computing the GPA but do not carry credit toward a degree. A graduate student with good academic standing whose GPA drops below 3.0 at any time after earning 12 semester hours will have earned Academic Warning.

Students who have earned academic warning or are in non-degree status may not hold graduate assistantships.

A student placed on Academic Warning has the next 12 hours of graduate work to raise the overall graduate GPA to 3.0 or better. The overall graduate GPA after the next 12 hours following academic warning must be at least 3.0 to avoid Academic Suspension (dismissal) from the Graduate School.

Note that academic dismissal from the department or Graduate School differs from dismissal for academic misconduct. Academic misconduct results in dismissal from the University. The Academic Misconduct policy may be found at the Provost's website.

Additional information about student progress and scholastic requirements is available on the Graduate School website (p. 204).

Permission to Continue Admission

Under exceptional circumstances, a student may be admitted to the MLIS program if they do not meet the GPA requirement for regular admission (GPA of 3.0). If such an applicant is admitted, they will need to obtain permission to continue in the program after the first 12 semester hours of graduate-level work have been completed. Permission to continue is earned by achieving a GPA of "B" or better (3.0) in the first 12 semester hours. If the 12 hours are completed in a term in which the total credits exceed 12, the evaluation is made on the basis of all graduate-level work completed at the end of that term of enrollment. Once a student has been given the permission to continue they will be evaluated by the same student progress guidelines as regular admission students.

Students admitted under permission to continue designation who do not meet the 3.0 requirement after their first 12 hours of graduate-level work will not receive permission to continue in their graduate program and will be dropped from the program.

Academic Misconduct Information

Student academic misconduct is not permitted. In the event of perceived academic misconduct, the University Academic Misconduct Policy will be followed. More information is available here.

Withdrawal or Leave of Absence Information

Students who need to withdraw from a course, the university or take a leave of absence should contact their academic advisor and the SLIS director. Additional information is available on the Graduate School website (p. 206) related to withdrawals and leaves of absence.

Academic Grievances Information

Academic grievances are addressed according to the "University-Wide Academic Grievance Procedures" outlined in the University of Alabama Faculty Handbook.

Scholastic Requirements

See here for Graduate School Policy information. (p. 204)

Graduate School Deadlines Information

The University of Alabama Graduate School keeps a calendar of specific student deadlines available on the Graduate School website.

Application for Graduation Information

Once requirements for the degree are completed, each candidate for a master's degree must apply for graduation through the Office of the Graduate School prior to the deadline posted each semester on the University of Alabama's Registrar Academic Calendar. The form "Application for Degree" is required for this purpose, and must be completed online via mybama.

Communication & Information Sciences (CIS), PhD

The collegewide doctor of philosophy degree in the College of Communication and Information Sciences is designed to:

- prepare communication scholars for positions of leadership in education, public service, the media, libraries, information-management positions, and other communication-related fields
- add to a student's usable body of knowledge in a chosen area of specialization within the field of communication and information sciences
- develop each student's research, teaching, and professional capabilities
- promote scholarly achievement and advancement of knowledge in the communication and information science disciplines, through basic and applied research

Representing four academic units of Advertising and Public Relations, Communication Studies, Journalism and Creative Media, and Library and Information Studies, C&IS offers a multidisciplinary doctoral program in communication and information sciences that enables students to either build an interdisciplinary plan of study or specialize in one of seven concentrations, in Advertising and Public Relations, Book and Publishing Studies, Health Communication, Interpersonal Communication, Media Processes and Effects, Rhetoric and Political Discourse, or Social Justice

and Inclusion Advocacy. The interdisciplinary plan of study allows students to craft a curricular plan unique to their skills and interests while the concentrations provide students an opportunity to earn distinction through a prescribed suite of courses preparing them to contribute to the academe as distinguished scholars and teachers at a variety of institutions across the globe.

Alongside the concentrations, the program emphasizes three signature areas of interdisciplinary research: emergent media, health communication, and sports communication. A core group of world-class graduate faculty across various disciplines focus their research agendas around these three areas.

Students who take the interdisciplinary approach or select a concentration are encouraged to pursue their own research agendas in tandem with their coursework.

Admissions

Applicants to the doctoral program in communication and information sciences must meet the admission criteria of the Graduate School of The University of Alabama and those stated below.

An applicant whose credentials meet the following minimum criteria may be considered for regular admission to the doctoral program in communication and information sciences:

- An undergraduate grade point average (GPA) of 3.0 overall, 3.0 for the last 60 semester hours in a degree program, or 3.0 for a completed graduate degree program.

International applicants must score at least 90 on the TOEFL iBT language proficiency exam and also score at least 24 on the speaking and writing sections of the iBT exam. International applicants who prefer to submit IELTS test scores must score at least 7.0 and also score at least 7.5 on the speaking section and 6.5 on the writing section. International applicants who meet these criteria may also be invited to participate in a videoconference with the college application review committee.

Applicants may be considered for conditional language admission if they meet the GPA criterion for regular admission but have not met the minimum language proficiency requirements.

Admission without a Master's Degree: The Expedited Admission Track

The Expedited Admission Track into the C&IS doctoral program allows highly qualified students to be admitted into the doctoral program after they complete an undergraduate degree. Such students must:

- Submit a statement of purpose (for the master's and doctoral program) indicating interest and commitment to graduate work through the doctoral level
- Hold regular admission status for a specific College of Communication and Information Sciences master's program.

Students admitted on the expedited track are encouraged to apply to be awarded the master's degree when they have completed the requirements for the master's degree. Students admitted on the expedited track must complete the requirements for master's degree to be awarded the Ph.D. degree. Students supported in graduate assistant positions must complete the requirements for the master's degree in four contiguous regular semesters of enrollment to be eligible to hold a graduate assistant position in the fifth and subsequent semesters in the program.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The student's program advisory committee determines, in consultation with the student, the specific courses the student must take to satisfy program requirements. Students must complete 48 coursework hours and 18 hours of dissertation research.

C&IS PhD Curriculum		Hours
Core Foundation Requirement		3
CIS 610	Foundations Doctoral Study CIS	
Core Theory Requirement		6
CIS 604	Mass Communication Theory	
CIS 605	Cultural and Critical Theory	
CIS 606	Knowledge & Information Theory	
CIS 607	Theory Constructn Epistemolgy	
Advisor Approved Alternative Elective (up to 6 hours)		
Core Resesarch Methods Requirement		6
CIS 603	Quantitative Research Methods	
CIS 608	Qualitative Research Methods	
CIS 609	Humanistic Research Methods	
Advisor Approved Alternative Elective (up to 6 hours)		
Concentration or Focused Area of Study ¹		12-18
Advertising and Public Relations Concentration		
Book and Publishing Studies Concentration		
Health Communication Concentration		
Interpersonal Communication Concentration		
Media Processes and Effects Concentration		
Rhetoric and Political Discourse Concentration		
Social Justice and Inclusion Advocacy Concentration		
Focused Area of Study - Advisor Approved		
Cognate		9-15
Advisor Approved Courses		
Electives ²		0-12
Dissertation		18
CIS 699	Dissertation Research	

Footnotes

¹ Students must select either a formal concentration or a focused area of study.

² Students must reach a minimum of 48 course hours independent of dissertation research.

Other Requirements. In addition to the credit hour and coursework requirements specified above, the following policies apply:

- A minimum of 36 hours of coursework must be completed after enrollment in the CIS doctoral program.
- Up to 12 of these 36 hours may be transferred from a student's masters program if approved by the student's program advisory committee. Credits so approved must have been earned within a period of no more than six years prior to the semester of admission to the doctoral program. Please see the Transfer Credit section below for additional information.
- A minimum of 24 hours of coursework must be at the 600 level. The remainder of hours of approved graduate course credit must be at the 500 or 600 level. A maximum of six hours of 400- or 400/500-level credit may be transferred if completed as part of a master's degree program.

- Each student must complete a minimum of nine hours in CIS doctoral seminar courses, which include all courses numbered CIS 650 through CIS 696. No doctoral seminar class that may be deemed by the student's program advisory committee to count toward fulfilling core theory requirements or core research methods requirements may be counted toward this minimum of nine hours in doctoral seminar courses. In other words, if a program advisory committee approves a doctoral seminar course (again, CIS 650 through CIS 696) as an alternate theory or alternate research methods course, this course cannot also be counted toward meeting the requirements for nine hours in doctoral seminar courses.
- Students in one of the seven approved concentrations in the program cannot count a course required in their concentration as an alternate theory or alternate research methods course in satisfying their core theory or research methods requirements. In other words, a course that is to serve as an alternate theory or alternate research methods course cannot also be counted toward satisfying the requirements for the concentration.
- It is not permissible to complete more than one doctoral concentration. That is, the degree awarded to students who complete a concentration will list one and only one concentration. However, students are permitted and encouraged to consider electing additional courses for their programs of study from across all seven concentrations in the program.

Advertising and Public Relations Concentration

Students in this concentration must select CIS 604 Mass Communication Theory in their program and then complete the following 15 hours of coursework:

Code and Title	Hours
APR 551 Foundations of Integrated Comm	3
APR 524 or Reputation Comm Strategy	3
APR 525 Brand Communication Strategy	3
CIS 682 Seminar Applied Comm	3
CIS 684 Advanced Topics Applied Comm	3
CIS 650 or Seminar in C&IS (advisor-approved topic)	3
CIS 664 or Health Communication Campaigns	
CIS 671 or Public Opinion	
CIS 673 or Political Communication	
CIS 674 Sports Media	

Book and Publishing Studies Concentration

Students in the concentration must select CIS 605 Cultural and Critical Theory and CIS 609 Humanistic Research Methods in their program core and then select **15 hours** of coursework from the following courses, with **at least one course from each category** (Physical Book, Theoretical Book, and Future Directions), and with at least 9 hours at the 600 level:

The Physical Book	Hours
BA 520 Elements of Letterpress	3
BA 530 Elements of Bookbinding	3
BA 541 Techniques of Hand Papermaking	3

The Theoretical Book	Hours
LS 555 Intro Archival Studies	3
LS 557 Archival Appraisal	3
LS 653 Descriptive Bibliography	3
LS 654 Print Culture and Society	3
LS 655 Book Artifact Materiality Text	3

Future Directions of the Book	Hours
CIS 656 Electronic/Contemporary Pub.	3
CIS 672 Media History	3

Health Communication Concentration

Students in this concentration must select five courses from the following list to complete 15 hours of coursework, with no more than 6 hours of electives approved by their advisors:

Code and Title	Hours
CIS 650 Seminar in C&IS (Health Communication)	3
CIS 651 Interpersonal Health Comm	3
CIS 659 Health Information Seeking	3
CIS 664 Health Communication Campaigns	3
CIS 670 Health and Mass Media	3
Approved elective(s) at the 500-level or above in health communication and/or statistics	3

Interpersonal Communication Concentration

Students in this concentration must select CIS 603 Quantitative Research Methods in their program core and then complete the following **15 hours** of coursework:

Required Foundation Course	Hours
CIS 660 Interpersonal Comm Theory	3
Three hours from one of the following two courses:	Hours
COM 513 Communication & Diversity	3
COM 565 Intercultural Communication	3
Six hours from the following five courses:	Hours
CIS 651 Interpersonal Health Comm	3
CIS 662 Mediated Interpersonal Comm	3
CIS 663 Deception	3
CIS 667 Persuasive Communication	3
COM 563 Relational Communication	3

Three hours of approved College elective, 500 or above, in interpersonal communication studies.	Hours
500 or 600 level elective	3

Media Processes and Effects Concentration

Students in this concentration must select CIS 603 Quantitative Research Methods and CIS 604 Mass Communication Theory in their program core and then complete the following **12 hours** of coursework:

Code and Title	Hours
CIS 680 Sem. Media Processes/Effects	3
CIS 681 Advanced Quantitative Methods	3
CIS 650 or Seminar in C&IS (approved topic in emergent media, health communication, political communication, or sports media)	3
CIS 670 or Health and Mass Media	
CIS 673 or Political Communication	
CIS 674 Sports Media	
CIS 683 Advanced Topics - Media P&E	3

Rhetoric and Political Discourse Concentration

Students in this concentration must select CIS 605 Cultural and Critical Theory and CIS 609 Humanistic Research Methods in their program core and then complete the following **15 hours** of coursework:

Code and Title	Hours
CIS 650 or Seminar in C&IS (approved topic in political communication)	3
CIS 673 Political Communication	
CIS 652 Sem Culture Criti Rhetor Stdy	3
COM 541 Contemp Rhetoric Theory	3
COM 548 Sem Rhetorical Criticism	3
Approved 500 or 600 level elective in rhetoric or political discourse	3

Social Justice and Inclusion Advocacy Concentration

Students in the concentration must select CIS 605 Cultural and Critical Theory and CIS 609 Humanistic Research Methods in their program core and then complete the following **15 hours** of coursework. All students in the concentration must complete:

Code and Title	Hours
CIS 668 Social Justice & Inclusion	3

Students must complete **12 hours** from the following courses, with **at least 3 hours from each category** (Foundations, Perspectives, and Applications) and at least 6 hours taken at the 600 level:

Foundations	Hours
CIS 652 Sem Culture Criti Rhetor Stdy	
CIS 667 Persuasive Communication	
COM 565 Intercultural Communication	
LS 583 Social Aspects of Information	
Perspectives	Hours
COM 513 Communication & Diversity	
COM 515 African American Rhetoric	
COM 525 Gender & Political Comm	
LS 582 Race Gender & Sexuality in LIS	
Applications	Hours
CIS 666 Information Policy	
LS 544 Cultural Div Prog Youth & Fam	

LS 580 Outreach to Diverse Population
LS 581 Universal Access

Transfer Credit

The university Graduate School-wide policies related to transfer credit (p. 23) are applicable to the doctoral program in communication and information science, with a notable exception that students in the program are eligible to have no more than 12 hours of credit completed in a master's program be approved by their advisor to count toward the requirement that students complete 48 hours coursework exclusive of dissertation hours.

Doctoral Plan of Study Requirement

University Graduate School-wide policies require that students submit an advisor-approved plan of study (p. 23).

It is recommended that students in the doctoral program in communication and information sciences file an advisor-approved Plan of Study in their first semester in the program. It is strongly recommended students do this no later than the semester during which they will complete 12 hours of university course credit that they plan to count toward their degree requirements. It is required that students do this no later than the semester during which they will complete 30 hours of university and/or transfer course credit. By the time each doctoral student has completed 30 graduate semester hours of university and/or transfer credit, the student must have a doctoral Plan of Study approved by the dean of the University of Alabama Graduate School. Failure to obtain approval of the Plan of Study by the completion of 30 hours may result in the student's having a hold placed on future registrations.

Students admitted to the doctoral program may be required to complete additional coursework to be prepared for doctoral-level (600-level) study and research in communication and information sciences, at the discretion of the student's program advisory committee or the C&IS associate dean for graduate studies.

Doctoral students who begin the program with incomplete master's theses must complete the master's thesis during the first year of doctoral study. Students must provide official transcripts of their master's degree work as evidence that their master's degree has been awarded. If a student fails to provide the transcript, the College may refuse to administer the PhD preliminary examination and/or may withdraw financial support. The Graduate School may nullify the doctoral program admission.

Preliminary Exam

A preliminary examination is required of all students in the doctoral program in communication and information sciences. This examination is given after

- any foreign language/research skill requirements are met;
- two full years of graduate study are completed; and
- the Program Advisory Committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is overseen by the student's Program Advisory Committee Chair, who has discretion on the individuals involved in the examination committee to include no fewer than 2 other members of the student's Program Advisory Committee. The chair may call on other faculty members associated with the student's coursework for assistance in preparing the examination questions.

Whereas one of the purposes of the preliminary examination is to determine the student's research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

The student must demonstrate, through written and oral components, a capacity to understand, synthesize, and apply theory and research techniques in communication and information sciences, as well as demonstrate knowledge of the pertinent literature, issues, and recent advances in the student's concentration or focused area of study and cognate area of study. In other words, the examination must cover the student's (1) theory core, (2) research methodology core, (3) concentration or focused area of study, and (4) cognate area.

Preliminary exam questions may be answered exclusively in a controlled "in-house" format in the College, exclusively as a "take-home" format, or some combination of both "in-house" and "take-home" formats depending on the examination committee's decision about the best way to examine a particular student. The oral component of the exam must be scheduled as quickly as possible following the written component. Oral components are determined by the examination committee, and examples include, but are not limited to, a formal defense by the student of each examination question, an academic discussion about theory and methods between the student and examination committee, or an academic conference-style presentation which includes a question and answer session.

Preliminary examination questions that are assigned as "in-house" are closed book—meaning students must answer those questions on campus without reference material or internet access. No individual "in-house" examination question can exceed 4 hours, and the total time assigned for "in-house" examination questions cannot exceed 16 hours.

Preliminary examination questions that are assigned as "take-home" are open book—meaning students may answer those questions from any location and may use any available reference materials. No individual "take-home" examination question can exceed 5 days, and the total time assigned for all "take-home" examination questions cannot exceed 21 days.

For students whose preliminary examination will consist only of "in-house" questions, the written component of the exam must be completed in no more than 7 days following the day on which the student is provided their first exam question. For students whose preliminary examination will consist only of "take-home" questions or consist of a mix of "take-home" and "in-house" questions, the written component of the exam must be completed in no more than 21 days following the day on which the student is provided their first exam question.

Upon completion of the oral component of the preliminary exam, the examination committee will convene to determine whether the student has passed, must perform additional work to demonstrate understanding of competency, or has failed the examination. All questions must be passed in order to pass the examination.

In the case of a clear failure, the re-examination must take place after six months and before twelve months have elapsed. Each question on the preliminary exam may be taken only twice, and the examining committee may only rule either pass or fail on the second examination.

As noted above, university policy stipulates that failure to pass the examination on a second attempt will result in dismissal from the program and from the Graduate School.

Admission to Candidacy Requirements

A student is certified by the dean of the UA Graduate School for admission to candidacy for the PhD in Communication & Information Sciences after meeting the following requirements:

- completion of the program of coursework and other requirements prescribed by the student's program advisory committee, approved by the C&IS associate dean for graduate studies, and approved by the dean of the UA Graduate School on the Plan of Study and Admission to Candidacy forms
- demonstration, by passing the preliminary examination, of competence in the theory, research methods, the focused area of study, and the cognate
- a successful defense of a dissertation proposal
- approval by the UA Graduate School of the Admission to Candidacy for the Doctoral Degree

Continuous Enrollment Policy

Students should be aware of university policy related to continuous enrollment (p. 23) in Dissertation Research, as specified in the university Graduate Catalog. Students in the C&IS doctoral program are required to complete 24 hours in dissertation research through enrollment in CIS 699 Dissertation Research. The program permits students to initiate enrollment in CIS 699 no earlier than the semester in which they will have completed all non-dissertation hours required for the degree. In other words, students can initiate CIS 699 enrollment in the same semester in which they will complete all non-dissertation coursework required of them, but not sooner.

Students register for CIS 699 with their dissertation advisor as the instructor. If a student does not yet have an approved dissertation committee, the student may enroll in CIS 699 with an intended dissertation advisor if the intended advisor approves of this arrangement, so long as the intended advisor is a member of the C&IS faculty who is eligible to chair or co-chair dissertation committees under university and program guidelines for the dissertation committee. If the student has not yet identified an intended dissertation advisor, the student may initiate CIS 699 enrollment with the chair of the student's approved program advisory committee serving as instructor in CIS 699 if the program committee chair approves of this arrangement.

Students who plan to initiate enrollment in CIS 699 but who do not yet have an approved dissertation committee should contact the associate dean for graduate studies to report that an intended dissertation advisor or their approved program committee chair has agreed to serve as instructor of CIS 699 in the initial semester of registration. The associate dean for graduate studies will verify the intended dissertation advisor or approved program committee chair has agreed to serve as the instructor of CIS 699 in the initial semester of registration. Having verified this, the associate dean for graduate studies will issue a permit for the student to register for CIS 699 with this instructor.

Students unable to secure an instructor for CIS 699 should contact the associate dean for graduate studies to develop a plan to secure an instructor.

Students who initiate enrollment in CIS 699 with an instructor who is the student's intended but not yet approved dissertation advisor or the student's program committee chair must in the next semester register for CIS 699 with the approved dissertation advisor as the instructor. In other words, students who initiate 699 enrollment with an instructor who is not the approved dissertation advisor must have a dissertation committee approved before they will be permitted to

register for second semester in CIS 699. Only students with approved dissertation committees will be permitted to register for a second semester in CIS 699.

Students who may be uncertain that a dissertation committee can be approved before a second semester in CIS 699 begins should not initiate 699 enrollment. Such students should consider registering for coursework other than CIS 699, coursework that can help prepare the student for pursuing dissertation research continuously, under the direction of an approved dissertation advisor, when CIS 699 enrollment is initiated.

Dissertation Requirements

Following a successful completion of preliminary examinations, students in the doctoral program in Communication & Information Sciences must form a dissertation committee. It is important to note that program policy regarding the committee includes stipulations in addition to the stipulations specified in university Graduate School-wide policy regarding the dissertation committee (p. 23).

The dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The committee shall have not fewer than five members. The Graduate Faculty of the College of Communication & Information Sciences must be represented by at least three members. Other members may be from the College of Communication & Information Sciences or from a college or school outside the College of Communication and Information Sciences. One member *must* be from a college or school outside the College of Communication & Information Sciences.

All members of the committee must be members of the university Graduate Faculty. The chair of committee must be a full member of the Graduate Faculty. At least one committee member in addition to the chair must also be a full member of the Graduate Faculty. All other members may be associate members of the Graduate Faculty. No more than one affiliate member of the Graduate Faculty may serve on the committee. A majority of the committee members must be regular UA faculty.

The UA graduate dean's approval of the proposed dissertation committee must be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.

Dissertation proposal

After successful completion of the preliminary examination, degree candidates must submit a written proposal to their dissertation committee.

The proposal describes the importance of the proposed topic, outlines the hypotheses to be evaluated, provides an overview of relevant literature, specifies the methodology to be used, and includes a timetable for completion of the project. The dissertation must make a significant original contribution to the field of communication and information sciences and must demonstrate the candidate's ability to report that research in writing in a clear, comprehensive, and scholarly manner.

The student must submit the proposal, and later the dissertation, to the committee at least 14 days prior to the defense. After the proposal has been circulated among the members, the student's dissertation committee meets for the student's oral defense of the proposal.

Dissertation final examination

The candidate must present a copy of the final draft of the dissertation to each committee member at least two weeks before the scheduled date of the final examination. After the dissertation has been completed and accepted by the candidate's dissertation committee for purposes of the examination, the candidate will be given a final oral examination by the dissertation committee.

The final examination is concerned primarily with the research embodied in the dissertation and with the field in which the dissertation lies, but it may extend over the student's entire primary field of study. The final oral examination is governed by the rules of the Graduate School of The University of Alabama.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester's dissertation deadline, are available at the Graduate School's homepage.

Electronic submission of theses and dissertations (ETD) is required. Consult the ETD website for details of ETD submission.

Time Limits for Degree Completion

The doctoral program in communication and information sciences follows university Graduate School-wide policy regarding the time limits for degree completion (p. 23).

Academic Misconduct Information

The doctoral program in communication and information sciences follows university Graduate School-wide policy regarding academic misconduct. (p. 7)

Withdrawals and Leave of Absence Information

The doctoral program in communication and information sciences follows university Graduate School-wide policy regarding withdrawals and leaves of absence (p. 206).

Academic Grievances Information

The doctoral program in communication and information sciences follows university Graduate School-wide policy regarding academic grievances (p. 219).

Scholastic Requirements

A student must maintain cumulative grade point average of at least 3.0 on a 4.0 scale for graduate courses undertaken following admission to the doctoral program. A doctoral student whose grade point average falls below 3.0 at any time after 12 semester hours have been completed will be placed on academic warning by the Graduate School and the College of Communication & Information Sciences. A student on academic warning will not be permitted to apply for admission to candidacy and may not hold an assistantship. Students who are dismissed from the program for failure to raise their GPA to 3.0 under academic warning status may petition the college for readmission. The college may in turn make a request to the dean of the university Graduate School for approval of the student's readmission.

University Graduate School-wide policies related to scholastic requirements (p. 204).

Graduate School Deadlines Information

College of Community Health Sciences

Department of Community Medicine and Population Health (p. 482)

Department of Family, Internal and Rural Medicine (p. 485)

The courses listed below are open to qualified graduate students.

Medical school and family practice residency curricula are published separately from this catalog.

CHS515 Cultural Competency in Healthcare

Hours 3

The increasing cultural diversity in the United States has profound implications for population health science and practice. This course is designed to address a broad range of theoretical, research, ethical, and clinical issues related to cultural competency in healthcare.

CHS540 Rural Community Interaction I

Hours 3

The purpose of this course is to introduce participants to real life and practical application and topics related to rural medicine, with an emphasis on minority populations. The course is divided into two parts: a shadowing experience with a primary care provider working in a rural or underserved setting, and a seminar series. Additionally the course will include a special service learning project in order to further expose students to practical application of issues and topics in rural or underserved communities.

CHS541 Rural Community Interaction II

Hours 3

The purpose of this course is a continuation of Rural Community Interaction I and introduces participants to additional real life and practical applications and topics related to rural medicine, with an emphasis on minority populations. The course is composed of two class projects of planning, implementation, and evaluation of a community screening event to be selected by the class. Each student will also complete a final paper (5 double-spaced typed pages) describing their cumulative experiences including lessons learned.

Prerequisite(s): CHS 540

CHS550 Introduction to Fundamentals of Medicine I

Hours 6

Introduction to Fundamentals of Medicine I is an interdisciplinary course that provides a foundation for understanding the molecular and biochemical basis of cellular processes and whole body physiology, and initiates an appreciation for their impairment during various human diseases. The course will include an overview of the functional roles of various cellular constituents (e.g., protein, carbohydrate, lipid, nucleic acids) and the processes involved in their synthesis and degradation (e.g., thermodynamics, metabolic pathways, transcription/translation). This will involve not only an understanding of the mechanisms and pathways involved, but will also include an appreciation of their regulation/dysregulation during numerous perturbations of physiologic status (e.g., fed versus fasted, sedentary versus exercise) and disease states. IFM-I consists of a variety of instructional strategies (e.g., lectures, labs, small groups, team-based learning, self-study) to help develop critical thinking and problem solving skills, as well as build a knowledge base that is scientifically and clinically relevant to medical research and practice.

Prerequisite(s): Admission to Rural Community Health Program and Approval by the Instructor

CHS551 Introduction to Fundamentals of Medicine II

Hours 6

Introduction to Fundamentals of Medicine II is an interdisciplinary course that provides a foundation basic pharmacology and cellular physiology. The basic principles of pharmacodynamics and pharmacokinetics will be followed by an introduction to autonomic nervous system pharmacology that will serve as a basis for understanding the pharmacologic treatment of diseases. This course will also cover mechanisms of cellular homeostasis, transport, electrophysiology and communication, and will provide examples of disease states that result from abnormal functioning of these processes. This course consists of a variety of instructional strategies (e.g., lectures, labs, small groups, team-based learning, self-study) to help develop critical thinking and problem solving skills, as well as build a knowledge base that is scientifically and clinically relevant to medical research and practice.

Prerequisite(s): Admission to Rural Community Health Program and Approval by the Instructor

CHS595 Special Topics

Hours 1-3

Selected topics in Community Health Sciences offered by CCHS faculty members.

CHS599 Thesis Research

Hours 1-6

A candidate for the Master of Science in Population Health Sciences pursuing the thesis option is required to complete six credit hours dedicated to original research under the direction of a faculty advisory committee. A written thesis is required to be presented, defended orally, and submitted to the faculty advisory committee for approval. Material covered will be of an advanced nature aimed at providing master's students with an understanding of the latest research and current developments within the field. Discussion and advisor guidance will be directed towards readings of research articles and development of research methodology, with the aim of producing an original research contribution that represents a novel development in the field, or a novel perspective on a pre-existing topic in the field.

CHS620 Ind Study In Prev Med

Hours 1-5

Research or directed reading in community medicine topics, including health care delivery, preventive medicine, and health policy aspects of other related topics.

CHS622 Directed Research in Community Health

Hours 3

An advanced applied-research course designed to develop skills in the analysis and evaluation of health problems of community interest.

Prerequisite(s): CHS 520 and CHS 525

CHS627 Multivar Meth Hlt Stats

Hours 3

Emphasis is on application and interpretation of statistical software that performs techniques such as multivariate analysis of variance, discriminant analysis, logistic regression, log-linear modeling, and factor analysis.

CHS660 Drug Delivery Beyond the Biological Barriers

Hours 4

This course provides an overview of drug discovery, formulation, and delivery with efforts to reflect on the past and peek into the future drug development. This course requires substantial knowledge of chemistry, mathematics, and physics, and basic courses in biological sciences.

CHS661 Imaginary Logic of Advanced Drug Delivery Program

Hours 1

This graduate level course presents topics designed to bring together divergent thinking (imaginary) with convergent thinkers (logical) to provide a platform to train the next generation of graduate students to think horizontally to overcome the valley of death in drug discovery and bring new therapies to clinic. As a career preparation course, it aims to provide graduate students the depth and breadth of understanding in drug discovery and development that will be applicable throughout their careers, regardless of their research focus.

CHS662 Formulations Science Lab

Hours 3

This research-based laboratory course provides training in the developing the next generation of drug delivery systems through a broad spectrum of techniques including synthesis of polyesters and their bioconjugation, characterization of polyesters using the state-of-the-art analytical tools, processing the polyesters into nanoparticulate drug carrier systems encapsulating diverse model drugs, and characterization of the nanoparticles for size, loading, encapsulation, release, and stability. For students who have interest and aspire to research careers in interdisciplinary advanced drug delivery, this course will provide basic training and experience for a smooth start for future laboratory work. This course requires substantial knowledge of chemistry, mathematics, and physics, and basic courses in biological sciences.

Prerequisite(s) with concurrency: CHS 660

CHS663 Formulations Testing Lab

Hours 3

This research-based laboratory course that focuses on training students in testing the next generation of drug delivery systems. Students will be exposed to a broad spectrum of techniques (e.g., in vitro, ex vivo, in vivo). Students will be exposed to a variety of techniques including tissue processing for tissue mechanics, drugestimation, particle tracking, receptor binding, and histology and immunohistochemical analysis, and in vitro and ex vivo study designs. Students will have hands-on experience in a wide variety of microscopy and histology equipment. For students who have interest and aspire to research careers in interdisciplinary advanced drug delivery, this course will provide basic training and experience for a smooth start for future laboratory work involving pharmacology testing. This course requires substantial knowledge of chemistry, mathematics, and physics, and basic courses in biological sciences.

Prerequisite(s): CHS 662

CHS699 Dissertation Research

Hours 1-12

This independent research course partially fulfills required doctoral level research dissertation hours toward the Ph.D. in the student's field. A minimum of 18 dissertation hours are required, at 1-12 hours per semester. The course is conducted under the guidance of the Ph.D. advisor. The student must register for a minimum of 3 hours per semester in this course until reaching the required minimum of 18 credit hours. Thereafter, students must register for a minimum of 1 hour each semester in this course, maintaining continuous enrollment until degree completion.

Prerequisite(s): Admission to Candidacy

CHS700 Clinical Clerkship

Hours 12-18

This course is designed to allow UASOM students to complete their MS3 clerkships on the Tuscaloosa campus. Material covered is defined by UASOM and the UASOM Primary Care Track curriculum. This is a 12 month curriculum and these courses are to define participants' status as UA students during this time.

CHS701 Clinical Clerkship

Hours 12-18

This course is designed to allow UASOM students to complete their MS3 clerkships on the Tuscaloosa campus. Material covered is defined by UASOM and the UASOM Primary Care Track curriculum. This is a 12 month curriculum and these courses are to define participants' status as UA students during this time.

CHS702 Clinical Clerkship

Hours 12-18

This course is designed to allow UASOM students to complete their MS3 clerkships on the Tuscaloosa campus. Material covered is defined by UASOM and the UASOM Primary Care Track curriculum. This is a 12 month curriculum and these courses are to define participants' status as UA students during this time.

CHS800 Clinical Clerkship

Hours 12-18

This course is designed to allow UASOM students to complete their MS3 clerkships on the Tuscaloosa campus. Material covered is defined by UASOM and the UASOM Primary Care Track curriculum. This is a 12 month curriculum and these courses are to define participants' status as UA students during this time.

CHS801 Clinical Clerkship

Hours 12-18

This course is designed to allow UASOM students to complete their MS3 clerkships on the Tuscaloosa campus. Material covered is defined by UASOM and the UASOM Primary Care Track curriculum. This is a 12 month curriculum and these courses are to define participants' status as UA students during this time.

CHS802 Clinical Clerkship

Hours 12-18

This course is designed to allow UASOM students to complete their MS3 clerkships on the Tuscaloosa campus. Material covered is defined by UASOM and the UASOM Primary Care Track curriculum. This is a 12 month curriculum and these courses are to define participants' status as UA students during this time.

Population Health Sciences, MS

Population health is an interdisciplinary field that integrates clinical care and public health practices to prevent, reduce and manage human disease. Population health is particularly interested in the social determinants of health outcomes, and why the distribution of social health determinants is different between population groups. The changing nature of health care due to population shifts and policy reform has created a rising demand for a graduate degree in Population Health. Graduates of the MS program are trained to address the health needs of diverse communities and are equipped with data-driven strategies to help transform health care.

Both in-person and online program options are offered. Our in-person program attracts a small cohort of students desiring an intensive 1-year experience to prepare them for additional graduate educational opportunities, such as medical school or PhD programs. The online program allows individuals across the country to pursue a degree while working full time. Both the in-person and online programs allow us to train future and current health care practitioners in data analytics, research methods, and evidence-based approaches to combating health disparities. Population health is an interdisciplinary field, and our degree

is beneficial for future and current health professionals, health systems administrators, and others interested in health outcomes research, evidence-based care, and health system redesign.

Admission Requirements

The GRE or MCAT is not required for admission. Please note that for applicants with a GPA below a 3.0, an admission test score is strongly recommended to be considered for admission. International applicants will need to demonstrate English proficiency with the TOEFL, IELTS, Duolingo or meet other requirements established by the Graduate School.

Curricular Requirements

This program has a thesis and a non-thesis option. Candidates under the thesis option will complete 18 semester hours of core coursework, 6 hours of elective coursework, and 6 hours of thesis research hours (POPH 599 Thesis Research). Candidates under the non-thesis option will complete 18 semester hours of core coursework, 9 hours of elective coursework, and 3 hours of a “capstone” experience (POPH 595 Population Health Applications).

Transfer Credit

Students may transfer in a maximum of 6 credit hours. Students are recommended to submit graduate coursework for transfer credit evaluation before the end of their first semester in the program.

Graduate School-wide transfer policies.

Plan I - Thesis Process Requirements

The thesis degree completion option requires 6 credit hours of POPH 599. The purpose of the thesis is to investigate an original population health question and to contribute new knowledge back to the field of population health. The investigation should be grounded in proper research design and a solid understanding of the healthcare system. Students should complete all core courses before starting their thesis work. In rare circumstances, the student’s advisor and Graduate Program Director can approve registration for CHS 599 before all core courses are completed. The thesis should be completed in the last 2 semesters of a student’s program. The thesis involves preparation of a research paper that is of publishable quality and a formal presentation defending the work. Information about the thesis proposal approval process can be found in the program handbook.

The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for obtaining IRB approval before beginning their research.

A thesis committee must consist of at least three Graduate Faculty appointed by the dean of the Graduate School. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student’s major department. The majority of the thesis committee must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the student’s thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. All members must agree that the student is ready for the final oral thesis defense. A final oral thesis defense is required of all students completing a thesis. The final oral thesis defense is the culminating experience in the master’s program. As such, all members of the thesis committee are required to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members. Students enrolled in the main campus program are expected to participate in graduate oral examinations in person and on campus. In the event that requiring the student to be in person and on campus for the presentation would cause hardship to the student, the committee chair and the graduate program director may approve virtual participation. The student should clearly outline the extenuating circumstances leading to this need. The student and all committee members must adhere to the Graduate School’s requirements for virtual participation. Students in the online program may defend their thesis virtually and are not required to travel to Tuscaloosa. The thesis defense is conducted publicly and is open to all students and faculty in the Department of Community Medicine and Population Health.

For formatting guidance, follow the UA Graduate School electronic thesis instructions. A “journal-format thesis” is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor

want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations. All theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details. Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website.

Plan II - Non-Thesis Process Requirements

Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of coursework credit of which 3 semester hours is a practicum experience (POPH 595). The practicum is a planned, supervised, and evaluated work experience that compliments the student's classroom education, and allows them the opportunity to apply the lessons learned in their course work. The practicum experience is designed to enhance student's professional experience in the field of population health and is key to a comprehensive understanding of population health in clinical settings. Students are required to complete 24 credit hours, including all core courses, before enrolling in POPH 595. Students must have an approved practicum proposal before they will be allowed to register for this course. Information about the practicum proposal approval process can be found in the program handbook. In the case of practicum projects that involves the use of human subjects in any way, the student must consult with the Practicum Director about the potential for IRB approval before beginning their coursework.

During the practicum experience, students will work under the supervision of their Practicum Director and Site Preceptor, who agree to supervise the practicum experience. Decisions on the nature, site, specific objectives, and activities of the practicum are arrived at following discussions and agreements amongst the student, the Practicum Director, and the Site Preceptor. The student and Practicum Director will also identify two additional Community Medicine and Population Health faculty that will serve on the practicum committee. These faculty will provide additional content expertise to the student.

The practicum experience should demonstrate mastery of at least three of the course competencies in the Population Health program. The student is responsible for completing 120 hours under the guidance of their preceptor and is required to document their completed hours on a regular basis. The practicum experience culminates in a final presentation and creation of an artifact that is agreed upon by the student and the practicum committee (eg, publication, grant submission, quality improvement activity, etc). The practicum presentation is conducted publicly and is open to all students and faculty in the Department of Community Medicine and Population Health. All members of the practicum committee are required to attend and participate in real time. Students enrolled in the main campus program are expected to participate in graduate oral examinations in person and on campus. In the event that requiring the student to be in person and on campus for the presentation would cause hardship to the student, the committee chair and the graduate program director may approve virtual participation. The student should clearly outline the extenuating circumstances leading to this need. The student and all committee members must adhere to the Graduate School's requirements for virtual participation. Students in the online program may present virtually and are not required to travel to Tuscaloosa.

Time Limits for Degree Completion Requirements

Graduate School-wide time limit policy.

Student Progress Requirement

The Population Health program requirements for maintaining good academic standing supplement the Graduate School requirements. Students who are not in good academic standing may lose fellowships, assistantships, other funding support, or may be dismissed from the program. Students must be in good academic standing, which means having a GPA of at least a 3.0 in all graduate work, before progressing to their thesis or practicum project. Students not in good academic standing at the conclusion of their required and elective coursework for the program will have one semester to remove their Academic Warning or they may be dismissed from the program due to insufficient progress towards completing their degree. When warranted by course scheduling restrictions, such as when a course that needs to be repeated is only offered once a year, students can be given a longer time frame to remove their Academic Warning. Students that are dismissed from the program will not be eligible for readmission to the program. In addition to the relevant academic thresholds, a student's standing with the program is also contingent on compliance with the Code of Student Conduct and adherence to the Capstone Creed.

Graduate School-wide policies.

Academic Misconduct Information

All acts of dishonesty in any work constitute academic misconduct. This includes, but is not limited to, cheating, plagiarism, fabrication of information, misrepresentation and abetting any of the above. The Academic Misconduct Disciplinary Policy will be followed in the event that academic misconduct occurs. Students should refer to the Office of Academic Affairs' page on Academic Misconduct: Graduate School-wide academic misconduct information.

Withdrawals and Leave of Absence Information

Students should notify the program director to discuss withdrawals and leave of absences. Please refer to the UA Graduate Catalog for further instructions on how to submit for withdrawal and leave of absences.

RCH500 Rural Envir/Occup Health

Hours 3

The goal of the course is to help the student recognize environmental and occupational health hazards in the rural setting, the effects of exposure to these hazards and preventative measures that should be taken to avoid environmental risks. This course introduces students in the Rural Medicine Program to the basics of environmental and occupational health in the rural setting. The course is designed to help these students recognize biological, chemical, physical, safety, and ergonomic health hazards common to the rural South; the effects of human exposure to these hazards are presented; and preventive measures that should be taken to avoid such exposures are discussed. Applicable environmental and workplace regulations are reviewed.

RCH522 Community Clinical Process I

Hours 3

A combination of scheduled sessions and fieldwork activities. The fieldwork will consist of visiting with an assigned rural advisor, completing a rural community assessment, and assisting with community health screenings and education programs.

Rural Community Health, MS

This 30 hour degree program is designed to provide some of the tools necessary for future rural Alabama physicians to become community health leaders. The program teaches principles of rural public health as a basis for community health leadership, characteristics of rural health concerns and approaches to biomedical science study. The curriculum is combination of Basic Science Courses, Rural Primary Care discussions, activities, visits and an introduction to basic clinical medicine through didactic sessions, clinical simulations and shadowing with physicians. It will help prepare them to lead in the development and maintenance of community health center practices and other health care practices. There are two concentrations: Rural Medical Scholars and Rural Community Health Scholars.

Concentration 1: Rural Medical Scholars (RMS) was established in 1996 by The UAB Heersink School of Medicine (UABSOM) to recruit students who grew up in rural Alabama who desire to practice primary care medicine in rural Alabama. RMS apply to UABSOM, go through a special interview/selection process and enter a RMS 5-year track of study leading to the MD degree. For the first year, RMS spend a year on the Tuscaloosa campus in the MS in Rural Community Health program with a set of courses related to rural community health and basic sciences. Following this year, RMS then complete two years of pre-clinical study at UABSOM in Birmingham. RMS then return to Tuscaloosa for two years of clinical medicine training in the College of Community Health Sciences (CCHS) (UABSOM – Tuscaloosa Campus). After completing the MD degree, RMS enter residency training in the specialty of their choice.

Concentration 2: Rural Community Health Scholars (RCHS) are students who exhibit a desire to be rural primary care physicians, but are not yet eligible for the RMS program. The RCHS have the same rural Alabama residency requirements (8 or more years growing up in a rural Alabama community or have graduated from a rural Alabama high school) as RMS. Most of these students use the Master of Science degree as a bridge to the RMS program by demonstrating their ability to handle graduate-level studies and improving admission test scores. If they do not become eligible for the RMS program, they may choose to complete the degree and/or pursue admission to other programs.

Students will complete degree requirements following Plan II (without thesis). Each student must have a cumulative GPA of 3.2 or better for all graduate courses undertaken at UA, although UABSOM may require a higher science GPA for RMS. At least 75 percent of the graduate hours taken must have been completed with grades of "A" or "B" at UA. All requirements for graduation must be completed within six semesters.

Goal / Purpose

The purpose of the RCH MS - RMSP is to identify, recruit and retain rural students who have the desire to return to the rural setting as physicians. Ten to Twelve rural Alabama students from a competitive applicant pool are selected each year to enter the Rural Community Health Master's Degree Program at the University of Alabama. Upon successful completion of the Master's Degree, these students will matriculate to the UAB Heersink School of Medicine (UABSOM) and complete the first two years of medical education in Birmingham. Students then return to Tuscaloosa to complete the third and fourth years of medical education at the University of Alabama, College of Community Health Sciences. The RCH MS - RMSP provides:

- Creation of a peer support network among rural students
- Interaction with an advisor/mentor who is a practicing physician
- Study of rural health issues
- Community fieldwork/experiences
- Introduction to health care policy and current trends in medicine

Benefits of Being a Rural Scholar:

- Peer relationship development through shared experiences
- Interaction with rural health care professionals through shadowing and community projects
- Interaction with Medical Students, Residents and Medical School Faculty and Preceptors
- Review and evaluation of student progress and guidance as indicated

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission as a Rural Medical Scholar (RMS) student, an applicant must:

- Have an MCAT score of 495 or above
- Have An undergraduate GPA of 3.2 or higher.
- Have been a resident of a rural Alabama county for at least eight years or have attended a rural high school
- Intend to practice medicine in rural Alabama
- Meet Heersink School of Medicine admission requirements

In addition to the minimum Graduate School admission requirements, to be considered for regular admission as a Rural Community Health Scholar (RCHS) student, an application must include:

- An MCAT score of 490 or higher.

Who Should Apply?

Applicants who spent their formative years in rural Alabama who are interested in practicing primary care medicine in rural Alabama Applicants must meet the <https://cchs.ua.edu/rural-programs/medical-scholars/> admission requirements for Rural Medical Scholars and Rural Community Health Scholars See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Each track within the program - the Rural Medical Scholar (RMS) and Rural Community Health Scholar (RCHS) tracks - require a minimum of 30 credit hours to complete. The RMS track is a one-year program, and the RCHS track is a two-year program. All students will complete a set of common core courses, plus the additional core courses and approved electives within their respective tracks. Students who complete the first year of RCHS track and are accepted into the RMS track in spring of year one will complete the RMS track core curriculum and approved electives in year two. Students who complete the first year of RCHS and are NOT accepted or choose not to apply or enroll into the RMS track will complete the remaining RCHS core curriculum in year two.

Of note, though listed as additional core courses in each track, RCH 522 Community Clinical Process I and RCH 532 Community Clinical Process II and CHS 540 Rural Community Interaction I and CHS 541 Rural Community Interaction II, all meet the same student learning outcomes related to rural community health. Clinical Community Processes I & II are separate courses because they also provide preparation for medical school success and careers as rural family physicians.

Transfer Credit

Graduate School Information on Transfer Credit. (p. 18)

Comprehensive Examination/Capstone Project

There is no comprehensive examination. Instead, students will complete a Rural Community Health Assessment as a capstone project.

The Rural Community Health Assessment will be of their hometown or other rural community. It will entail a review of the history and current health status of the community, and interviews with rural community members. Using this data, students will develop a review of community systems (e.g., health, education, government, spiritual, recreational, economic), and identify a comprehensive problem list with one or more priority concerns about the health status of the community.

Students will develop and be evaluated on a written description and oral presentation of their Rural Community Health Assessment. Written work will be evaluated by faculty in the Rural Community Health program using a rubric provided to the students. Oral presentations will be evaluated by a panel of faculty from the Rural Community Health program and additional faculty members from across the College of Community Health Sciences with expertise in rural community health and medicine using a rubric provided to the students. Students must receive a grade of at least a 'B' on the written description and oral presentation components of their capstone project to graduate.

For students enrolled in the Rural Community Health Scholars concentration, the capstone project will be completed as a part of CHS 540 Rural Community Interaction I, and CHS 541 Rural Community Interaction II.

For students enrolled in the Rural Medical Scholars concentration, the capstone project will be completed as part of RCH 522 Community Clinical Processes I and RCH 532 Community Clinical Processes II.

Program Requirements

Candidates for the master's degree must earn a minimum of 30 semester hours of coursework credit and complete a culminating or "capstone experience" as described under the Comprehensive Examinations. Candidate working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function or original investigation in the field.

Time Limits for Degree Completion Requirements

All students will complete degree requirement following Plan II (without thesis). Each student must have a cumulative GPA of 3.2 or better for all graduate courses undertaken at UA, although UABSOM may require a higher science GPA for RMS. All requirement for graduation must be completed within six semester.

Masters Degree Programs in Education

The College of Education offers graduate work for the master of arts degree in counselor education (school counseling, clinical mental health counseling and rehabilitation counseling); educational leadership; higher education administration; educational psychology: general educational psychology; educational psychology: school psychometry; elementary education; kinesiology; secondary education (music education is available as a teaching field within secondary education); and special education.

The rules of The University of Alabama Graduate School pertaining to transfer of credit, academic progress, graduation requirements, admission to candidacy and time limits apply to all students in College of Education masters degree programs and are found in the Degree Requirements section of this catalog.

Masters Programs Prerequisites

The prerequisites for programs leading to the master of arts degree in education include:

- the completion of an appropriate baccalaureate curriculum
- and, in some programs, professional teacher certification

For a student in music education, audition, ensemble performance or teaching sample and music history and music theory testing are required prior to or during the first 12 hours of graduate study.

For the Class A Reading Specialist program, two full years of full-time classroom teaching experience are required. Additionally, the Praxis for Teaching Reading is required for those with prerequisite certification in a teaching field *other than* Elementary, Early Childhood or Collaborative (K-6).

Effective July 1, 2017, two full years of full-time, acceptable professional educational work experience will be required for admission to Class A

instructional support programs (School Counseling, School Psychometry and Sport Management—also includes Library Media in the College of Communication and Information Sciences).

For a student in educational leadership, a valid Alabama Class B Professional Certificate in a teaching field or a valid Alabama Class A Professional Certificate in a teaching field or instructional support area and three full years of full-time, acceptable professional educational experience in a P-12 setting, which must include at least one full year of full-time P-12 teaching experience, are required. In addition, students preparing for positions in educational leadership are required to complete screening procedures, including special tests, interviews and portfolios.

Masters Degree Requirements

There are two study plans available to students pursuing the master of arts degree. Candidates for the masters degree under Plan I must earn a minimum of 24 semester hours of credit in coursework and must write a thesis. Candidates for the masters degree under Plan II must earn a minimum of 30 semester hours of credit; a thesis is not required.

Masters degree programs leading to professional certification normally require a minimum of 30 semester hours. Nontraditional, alternative certification programs requirements vary; however, they normally require 39–45 graduate hours in addition to any of the applicant's undergraduate deficiencies. Courses that are taken for undergraduate credit may not be repeated for graduate credit (except when allowed in an Accelerated Masters Program). In compliance with regulations established by the Alabama Department of Education and outlined in the Alabama Administrative Code, coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification in any teaching field or area of instructional support.

A student completing requirements for a masters degree during a semester or summer session who does not need a full class load to meet those requirements may, with approval of the advisor and department head, register for additional courses toward a Class AA Professional Certificate, not to exceed the maximum prescribed class load.

Additional details on all other degree requirements are in the Degree Requirements section of this catalog and may be outlined in the individual program descriptions in this catalog. Under each plan (including the nontraditional, alternative program) the student must pass a comprehensive assessment in the field(s) of study at an appropriate time toward the close of the student's work. The assessment may include, but may not be limited to, an oral exam.

Nontraditional, Alternative Initial Teacher Certification

The College of Education has been approved by the state board of education to offer special programs of study leading to the masters degree for degree holders who have not previously completed a teacher-education program. Regular admission to these programs requires an acceptable score on an entrance examination—the GRE General Test or the Miller Analogies Test (MAT)—and a minimum 3.0 grade point average for all previous college-level work attempted. Individuals may be considered for admittance if the graduate admission test score or GPA does not meet the above criteria. For admission to an Alternative Class A program, effective July 1, 2017, and thereafter, one must have earned a bachelor's degree with a minimum, overall GPA of 2.75 or a master's degree (or higher) with a minimum GPA of at least 3.0.

Individuals applying to alternative initial teacher certification programs must also meet the minimum qualifications that are expected of candidates entering and completing undergraduate (Class B) certification in the same discipline. This usually means minimum GPA requirements

in the core curriculum as well as minimum GPA requirements within the disciplines in which the applicant is seeking certification. Other requirements, such as completion of writing tests and other screening associated with undergraduate certification, must be completed before formal admission to the alternative teacher education program. Some additional undergraduate work may also be required for admission. In addition to admission to the Graduate School, each prospective student must secure an appropriate transcript evaluation letter from personnel in the Office of Student Services and Certification, 104 Carmichael Hall.

Nontraditional, alternative certification programs are available in elementary, English for speakers of other languages (ESOL), foreign languages, music education, physical education, secondary education (most fields), and special education (collaborative, early childhood special education, gifted, and multiple abilities).

To graduate, students in these programs must complete the required semester hours in specific graduate courses. Upon completion of an Alternative Class A (master's level) program, the student is eligible to be recommended for an Alabama Class A Professional Educator Certificate. For most programs, no more than 12 semester hours of graduate courses may be completed in a nontraditional, alternative program before the removal of all admission deficiencies, unless special permission is granted by department heads in conjunction with personnel in the Office of Student Services and Certification, 104 Carmichael Hall. A student with a master's or higher degree in a secondary teaching field (or K-12 in music) generally may apply up to 12 semester hours from that degree to the fulfillment of teaching field requirements.

Clinical Placements

All Class A and Alternative Class A programs require extensive field experiences in diverse settings. The majority of field experiences must occur in P-12 schools, and at least half of the field experiences shall be in the candidate's teaching field or area of instructional support. These placements are in the greater Tuscaloosa area (with the exception of music education and distance learning) in order to facilitate supervision of students. For Early Childhood Special Education and Early Childhood programs, field experiences shall include placements in at least two of the three main types of early education settings: P-3 classrooms, child care centers and homes, and Office of School Readiness programs. On-campus practicum experiences may include the Children's Program, the Rural Infant Stimulation Environment (RISE) Program, and Early Intervention at The University of Alabama (EI@UA). These programs provide opportunities for students to work with infants, toddlers, pre-K children, and their families. With approval, individuals who are employed in positions appropriate to the area of their current program may complete field experiences on the job, but those experiences must be planned with specific purposes and assessment.

All clinical placements in the College of Education relating to educator preparation are coordinated through the Office of Clinical Experiences. For students in the Class A Instructional Leader program, internships are coordinated through the Department of Educational Leadership, Policy, and Technology Studies.

Professional Liability

Students enrolled in College of Education courses that require a clinical placement should have professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

Teaching Internship Requirements

The teaching internship (formerly called student teaching) is one of the most important experiences College of Education students have. It is generally regarded as the culminating activity of one's preparation to become a teacher.

At The University of Alabama, the internship is a full-semester, full-time assignment and must be taken in residence.

Both alternative (nontraditional, fifth-year) and graduate students must file internship applications with the Office of Clinical Experiences in 105 Autherine Lucy Hall during the semester preceding the semester of the planned internship. The application process begins by attending a mandatory application session, which is held the first Wednesday in October for spring-semester interns and the first Wednesday in March for fall-semester interns. The time, date, and place of the application session are announced at the beginning of each semester. The deadline for filing applications for a spring-semester internship is October 31; for a fall-semester internship the deadline is March 31.

Students may apply to enroll for an internship if they meet the following criteria:

- The student must have completed all courses in the major or majors, or must secure written permission to enroll for an internship from the appropriate department head.
- The alternative master's student must show proof of a passing score on the appropriate Praxis assessments.
- The traditional master's student must show proof of a passing score on the appropriate Praxis subject assessment(s) if seeking certification in an area which differs from current certificate.
- The student must have achieved a minimum grade point average of 3.0, both for all University of Alabama courses attempted and for all University of Alabama courses and transfer courses combined.
- The student must have achieved a minimum grade point average of 2.75 in each major, both for University of Alabama courses in each major and for combined University of Alabama courses and transfer courses in each major.
- The student must have achieved a minimum grade point average of 2.75 for professional education coursework.
- The student must have completed all methods courses and appropriate professional coursework with grades of "C" or better.
- The student must have removed from the transcript any grade of incomplete ("I") recorded in required courses; grades of incomplete are treated as grades of "F."

Registration for Internship Credit Hours

Graduate students are required to register for the number of internship credit hours specified by their program. In some programs, graduate students may be allowed to choose a 6-hour registration or a 9-hour registration; course requirements are the same whether 6 hours or 9 hours are taken. Graduate students whose program requires two internship placements should register for two sections of internship (3 hours per section or 4.5 hours per section). Students enrolled for internship must not expect to be enrolled in other courses while interning.

Policy on Internship Placements

All internship placements are coordinated by the College of Education Office of Clinical Experiences. Placement sites are selected to ensure the quality of the internship experience and of the supervision provided by the cooperating teacher. All internship placements are in the greater

Tuscaloosa area (with the exception of music education) in order to facilitate supervision of students by University of Alabama faculty or other designees of the department heads. Placements outside the greater Tuscaloosa area are made only if the director of clinical experiences and/or the department head determines that an appropriate local placement is unavailable.

With approval, a candidate admitted to a traditional Class A or an Alternative Class A program who is employed in an Alabama school may complete the internship in the candidate's classroom if the candidate holds a valid Interim Employment Certificate (IEC or SAC) for the appropriate teaching field and assignment.

Students may apply for overseas internships if they meet certain criteria and if appropriate placements can be coordinated by the Consortium for Overseas Student Teaching (COST) and/or The University of Alabama. Applications for overseas internships are taken during January for placements for the next fall semester, and in May for placements the succeeding spring semester. Contact the Office of Clinical Experiences in 101 Autherine Lucy Hall for additional information.

Internship Assignments

- Early Childhood (P-3rd grade) interns will receive two internship placements in two of the following age ranges: birth-3 years of age, 3-5 years of age, 5-8 years of age.
- Elementary education (K-6) interns will receive a placement in lower elementary (grades K-3) and upper elementary (grades 4-6) unless substantial field experiences are required and completed at both levels.
- Secondary education (6-12) interns with a comprehensive major may receive one or two internship assignments. If a candidate is seeking certification in two or more distinct teaching fields, an additional internship(s) will be required (unless the internship is defined according to the State-approved program.) If a candidate is seeking certification in two or more related fields, the internship may be divided between the two teaching fields.
- Special education-Collaborative (K-6 or 6-12) interns will receive a split internship assignment: half in a severe and profound setting and half in a mild to moderate setting. The placements will be divided according to their certification grade levels. For candidates seeking certification in BOTH Collaborative K-6 and Collaborative (6-12), the internship shall be divided between early childhood/elementary and middle/secondary grades.
- Special education-early childhood (P-3) interns will receive split placements in pre-K and K-3 in both general education and special education.
- MAP (P-6) interns will receive a minimum of four placements covering two semesters: The placements will be P-3 and upper elementary (4-6), and at least two of the following age groups: pre-K through age 3, age 3-5, and age 5-8. Placements will include children with and without identified disabilities.
- P-12 programs in physical education, foreign language, or music education interns should expect to have a split internship assignment with an elementary and a secondary school.
- English for Speakers of Other Languages (ESOL) interns should expect to have a split internship assignment between an elementary and a secondary school or if ESOL interns are employed full-time as an ESOL teacher in a public school setting, they may complete one semester of internship in their own classroom under the supervision of their building principal and a first-term summer semester of internship in an ESOL summer program coordinated by the Office of

Clinical Experiences under the supervision of a University of Alabama ESOL faculty member.

Summer Internship

Summer internships are rarely available and then only to persons who hold an undergraduate degree and certification and have one or two years of successful teaching experience at the level and in the subject for which they are seeking certification (with approval from the department head). In addition, summer internship assignments are allowed only if an appropriate placement can be secured in the Tuscaloosa area and appropriate supervision can be provided. These conditions also apply to those seeking to update or renew their certification or add an additional endorsement to a current certificate. To apply for a summer internship, file an appropriate application with the Office of Clinical Experiences in 105 Autherine Lucy Hall by March 31 of that year.

Educational Specialist Degree Requirements

The College of Education offers graduate work for the educational specialist (EdS) degree in counselor education; educational leadership; educational psychology: general educational psychology, educational psychology, educational research, and school psychology; elementary education, secondary education (music education is available as a teaching field within secondary education); and special education.

The College of Education conducts its EdS programs in accordance with The University of Alabama Graduate School policies outlined in this catalog. The EdS degree requires a minimum of 30 semester hours of study beyond the master's degree. Effective for candidates admitted July 1, 2017, and thereafter, a cumulative grade point average of not less than 3.50 is required for all courses in a Class AA teaching field or area of instructional support. Additionally, for admission to Class AA instructional support programs (School Counseling or School Psychology), at least two full years of full-time acceptable professional work experience is required. For admission to Class AA Teacher Leader, a minimum of three full years of full-time teaching experience in a P-12 setting is required.

Admission to the Graduate School does not mean that the EdS student is admitted to candidacy for the degree. Requirements for admission to candidacy for the EdS degree are the same as those for the master's degree in the same area. A student should note any foreign language requirement. Each EdS student completes the Admission to Candidacy for the EdS Degree form that is on the Graduate School's website and submits it to the Graduate School. The Graduate School must approve the student's EdS plan of study prior to admission to candidacy for the degree.

A standard form for an EdS plan of study is not available at the Graduate School's website, because each department or program participating in the EdS degree has established a framework of requirements for the degree that indicates the general structure of its program.

Additional information concerning the plan of study, admission to candidacy, admission and degree requirements may be outlined in the individual program descriptions, College of Education Admission requirements (p. 494) and the Graduate School's Admission Criteria and Degree Requirements sections of this catalog.

Class AA Certification Programs

Graduate students seeking Class AA certification must enroll in and complete the EdS (or doctoral) State-approved program in that certification area in order to obtain University of Alabama

recommendation for Class AA certification. A student who takes a course for credit in a master's level program may not take the same course for credit in a sixth-year program. In compliance with regulations established by the Alabama Department of Education and outlined in the Alabama Administrative Code, coursework used to meet Class B or Class A certification requirements may not be used to meet certification requirements for Class AA certification in any teaching field or area of instructional support.

The College of Education conducts its EdS programs in accordance with The University of Alabama Graduate School policies outlined in the Degree Requirements (p. 18) section of this catalog. The EdS degree requires a minimum of 30 semester hours of study beyond the master's degree. (Students completing an EdS program and also expecting to receive an Alabama Class AA certificate for service in the public schools must complete a minimum of 30 semester hours and achieve a minimum 3.50 grade point average on all work attempted.)

Clinical Placements

All Class AA programs require extensive field experiences in diverse settings. The majority of field experiences must occur in P-12 schools, and at least half of these shall be in the candidate's teaching field or area of instructional support. These placements are in the greater Tuscaloosa area (with the exception of music education and distance learning) in order to facilitate supervision of students. For Early Childhood Special Education and Early Childhood programs, field experiences shall include placements in at least two of the three main types of early education settings: P-3 classrooms, child care centers and homes, and Head Start programs. Placements for students in the Class AA Instructional Leader program are coordinated through the Department of Educational Leadership, Policy, and Technology Studies.

All clinical placements in the College of Education relating to educator preparation are coordinated through the Office of Clinical Experiences.

Professional Liability

Students enrolled in College of Education courses that require a clinical placement should have professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

Doctoral Programs in Education

Programs leading to the doctor of philosophy (PhD) degree are offered in counselor education, educational leadership, higher education administration, educational psychology, educational research, elementary education, kinesiology, instructional leadership, school psychology, secondary education (music education is available as a teaching field within secondary education), and special education.

Programs leading to the doctor of education (EdD) degree are offered in counselor education, educational leadership, higher education administration, educational psychology, elementary education, instructional leadership, secondary education (music education is available within secondary education), and special education. The doctoral programs are designed for school personnel and others engaged in educational service and leadership.

A masters degree from an accredited institution is required for admission into most of the EdD or PhD program in the College of Education. Some program areas, however, will consider applicants with only a bachelor's degree for admission into a 90 hour doctoral degree program. Other objective and subjective criteria are employed to select students whose

success can be reasonably predicted. Some doctoral programs have further prerequisites for admission such as a professional teaching certificate and/or certain experience in teaching or a related activity. Those who wish to pursue doctoral study in the College of Education should communicate directly with the head of the department to ensure they meet the prerequisites for the area in which they wish to study.

In planning a program, doctoral students should follow these steps:

Declaration of Intent

If applicable, before establishing a doctoral committee, students must successfully complete a screening process in the department in which they wish to study. The applicant initiates the screening process by filing a declaration of intent form with the appropriate department head. The forms are available in the departmental offices.

Preliminary Conference

As part of the screening process in some departments, appropriate faculty members review information the applicant has supplied and interview the applicant. In this preliminary conference, consideration is given to factors such as the applicant's academic and professional background, test scores, personal traits, professional goals and aspirations, and other factors that pertain to the ability to complete the program successfully and continue a productive career. The applicant is notified of the decision of the screening committee by the department head within a few days following the preliminary conference. The department head notifies the College of Education Office of Student Services of the decision by returning the appropriately marked declaration of intent form.

Appointment of Advisor and Doctoral Program Advisory Committee

Students accepted for doctoral study will be asked to confer with the appropriate department head regarding the appointment of advisors and program advisory committees. Nominations for appointment to these committees are made by the program chairperson through the department head to the dean of the College.

EdD program advisory committees usually consist of a minimum of three members of the graduate faculty: a chairperson who represents the student's major area of study and who will be the major advisor for the student in program planning and research, and two members (one from outside the department of the College in which the student is majoring) who can also be of assistance in their areas of expertise.

PhD program advisory committees must have at least five members: a chairperson, who is drawn from the graduate faculty and who represents the student's major area of study (the chairperson serves as the major advisor in program planning and research) and four members, one of whom must be from outside the department of the student's major.

Program Planning

As soon as possible after the appointment of the doctoral program advisory committee, but no later than the end of the first semester of doctoral study, the student and the major advisor should convene a meeting of the program advisory committee. At this program-planning meeting, the student provides each member with a formal written summary of graduate study to date. The student and the committee then plan a program of study to meet the academic and professional needs of the student and fulfill all requirements of the program, the College, and the Graduate School. Plan of Study forms for both doctoral degrees may be obtained in the departmental offices.

Official copies of the Plan of Study agreed upon by the student and the committee shall be dated, signed by the committee members and the department head, and distributed to the Office of the Graduate School, to the student's program office for inclusion in the student's program file, to the dean, and to the committee members. Any deviation from the Plan of Study must be approved by the committee and noted by the chairperson on the student's official record. An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits the form for Admission to Candidacy for Doctoral Degree.

All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

The program advisory committee continues to assist the student in program planning and advisement until the student satisfactorily completes all major and minor comprehensive examinations.

Degree Requirements

For several COE programs, the PhD requires a minimum of 66 hours of graduate study beyond the master's degree, comprising at least 48 hours of coursework and 18 hours of dissertation research. For specific program stipulations and requirements, please consult with the department. The course of study must include no fewer than 24 semester hours in a major field, a minimum of 12 semester hours in foundational coursework, and a minimum of 12 semester hours in research methods. Although there is no longer a college-wide requirement, individual departments may stipulate additional hours for a minor requirement or research methods. Credit hours designated as dissertation research hours in the College of Education cannot be used to meet credit hour requirements for coursework.

The EdD degree requires a minimum of 72 hours of graduate study beyond the master's degree, including at least 60 hours of coursework and 12 hours of dissertation research. The course of study must include no fewer than 24 hours in a major field, a minimum of 12 semester hours in foundational coursework, and a minimum of 12 semester hours in research methods. Credit hours designated as dissertation research hours in the College of Education cannot be used to meet credit hour requirements for coursework.

Students pursuing PhD and EdD degrees in the College of Education must satisfy the following foundations requirement: 12 hours of graduate coursework comprising (1) any BEF or BEP classes or (2) any non-research methods courses outside the student's department. Foundations courses cannot come from the student's major program. Approved by the program study committee, these classes should introduce the student to theoretical discourses and bodies of knowledge that provide a depth and breadth of understanding necessary for fluency with the research, theory, and scholarship foundational to the student's field of inquiry and dissertation research. A 12–15 semester hour research/statistics competency is also required in all PhD and EdD programs.

Additional information is in the Degree Requirements section of this catalog.

Major and Minor Examinations

Each PhD candidate must demonstrate competence in his or her major fields (and minor fields, if required by the department). Each EdD student must demonstrate competence in the broad area of knowledge and any areas of specialization specified in his or her program of study. Written comprehensive examinations are required to determine competence in the student's major (PhD) or broad area of knowledge (EdD); an oral defense of the written examination may be requested. A student who fails a major or minor examination may repeat it only once.

A student may apply to take the comprehensive examination in the major after filing a Plan of Study, completing at least one semester in residence, and obtaining approval of the department head (or the department head's designee) to take the examination. An examination application should be filed with the appropriate department head at least four weeks in advance of the scheduled testing date.

Comprehensive examinations in minor fields or areas of specialization can be taken after the student has completed all coursework in the minor field. The chairperson of the program or department offering the minor or area of specialization may establish evaluating procedures other than a written comprehensive examination.

Dissertation Committee

The dissertation committee, with the director of the dissertation as its chairperson, is responsible for assisting the doctoral student in developing and conducting dissertation research. Once the dissertation committee is formed, the student's program planning committee is disbanded. To form the dissertation committee, the student meets with the chairperson of the program advisory committee to discuss a potential dissertation topic and identify faculty with relevant expertise who by virtue of full membership in the graduate education faculty may chair the dissertation committee. The student then requests such a faculty member to chair the dissertation committee, and together they recommend at least four additional members of the committee, at least one of whom is from outside the department that includes the student's major field of study.

The graduate dean's approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.

Selection of the committee chairperson and members should be based on the relationship between the expertise and scholarly interests of the faculty members and the student's proposed dissertation topic. The student and committee chairperson recommend the committee to the program chairperson who recommends the committee to the department head, who in turn recommends the committee to the dean of the College of Education.

The dissertation committee chairperson provides intense counsel in selecting the dissertation problem, developing the proposal, coordinating input from committee members, chairing committee meetings, guiding the student's dissertation research, guiding the writing of the dissertation, and chairing the oral defense of the dissertation. The dissertation committee assists the student in developing the proposal, conducting dissertation research and writing the dissertation, and judges the adequacy of the student's dissertation defense. Close cooperation and involvement of all committee members are expected at all stages of the dissertation process, from the development of the proposal to successful

oral defense of the dissertation. The student, in consultation with the chairperson of the committee, is responsible for scheduling committee meetings.

Dissertation Proposal

The dissertation is a contribution to research and literature in a field. It represents the student's ability to identify a problem; develop an understanding of the relevant literature and previous research in an area of inquiry; formulate cogent research questions or hypotheses; report and discuss results of investigation; and derive conclusions, implications, and recommendations from results. The dissertation proposal is the first major step in this process.

The topic of the dissertation should evolve from the student's academic and professional interests. The topic will not be accepted until the dissertation committee formally meets and approves a comprehensive dissertation proposal. While a student may present a brief prospectus to the committee informally, the acceptance of the complete dissertation proposal is necessary before the student has approval from the committee to pursue the dissertation, and before the student is admitted to candidacy for the doctoral degree.

The dissertation proposal will include an introduction to the problem, a statement of the problem, research questions or hypotheses, a comprehensive review of literature and related research, a description of the methods of inquiry or research methods to be employed in the investigation, and the results of pilot studies (where appropriate). It is expected that the information presented in the proposal will be comprehensive and will include discussion of the areas just mentioned in a form that is essentially the same as the final dissertation. Some departments require a formal prospectus prior to the dissertation proposal.

Prior to the formal proposal meeting of the dissertation committee, the student should confer with all committee members. The written dissertation proposal must be provided to members of the committee at least 10 working days prior to the proposal meeting. The Graduate School policy on article-style dissertations may be found in the Degree Requirement section of this catalog.

Upon acceptance of the dissertation proposal, including completion of any changes recommended by the committee, each committee member will sign the acceptance page of the dissertation proposal. One copy of the signed proposal will be filed with the chairperson of the dissertation committee and one copy will be forwarded to the program chairperson and department head for the student's permanent file. The student is then eligible for admission to candidacy for the degree; the application for admission to candidacy for degree must be completed. The dissertation proposal will be maintained in the program and departmental office until the student completes and successfully defends the dissertation.

Typically, the student's major advisor (chairperson of the dissertation committee) will serve as the chief advisor for the dissertation research and preparation of the dissertation. However, another advisor may be selected if the choice of topic warrants such action. Such a change must be approved by the program chairperson and department head, in consultation with the student. In addition, more than five faculty members may serve on the dissertation committee. Students are encouraged to seek advice and assistance with their research from any member of the dissertation committee and from staff members in the College of Education Research Assistance Laboratory.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester's dissertation deadlines, are available at the Graduate School's homepage.

Additional information is in the Degree Requirements section of this catalog. The length of work on dissertation research will vary. In no case shall the student be allowed to take an oral examination on the dissertation before having been admitted to candidacy.

Admission to Candidacy

After approval of the dissertation proposal, and completion of all major and minor examinations, the student is eligible for admission to candidacy for the degree. The Admission to Candidacy for the Doctoral Degree form for the PhD or EdD degree is provided by the Graduate School. The student completes the form; obtains the signatures of the dissertation committee, department head, and other appropriate officials; and has the form forwarded to the dean of the College of Education for signature. The completed candidacy form is submitted to the Graduate School for final approval. The department head reports the results of all comprehensive examinations to the College's Office of Student Services and Certification and to the Graduate School.

No student may be admitted to candidacy in a program requiring teaching experience before completing the minimum number of years of appropriate teaching or other experience acceptable to the dissertation committee. A statement of experience from previous employers may be required.

Once a student has met the requirements for admission to candidacy for a doctoral degree, doctoral students (except those in the DMA program) must pursue completion of the dissertation without interruption by enrolling each semester for at least 3 hours of dissertation research; DMA students must enroll each semester for at least 1 hour of document research. This is true whether or not the student has submitted an application for Admission to Candidacy for the Doctoral Degree. Each PhD student must have completed a minimum of 24 hours of such dissertation work upon completion of the degree. Additional information is in the Degree Requirements section of this catalog.

Oral Examination

Since the dissertation research results from the acceptance of the proposal, a minimum of two semesters normally is anticipated prior to oral defense of the dissertation. This time frame ensures adequate attention to discussion of results, their implications for the field, and recommendations for future scholarship.

When all requirements have been met and the dissertation is completed, the student shall arrange a meeting of the dissertation advisory committee; the student shall distribute copies of the dissertation to the members at least 10 working days prior to this meeting.

At least 10 working days prior to defending the dissertation, the student must send an abstract of the dissertation to all faculty in the College of Education along with an invitation to attend the defense that indicates time and place of the defense. The student must defend the dissertation satisfactorily in that meeting and must pass any other examinations considered appropriate. The record of the student's performance on the final defense of the dissertation will be noted on the proper forms, in accordance with requirements of the Graduate School. These forms will be signed by committee members.

It is the responsibility of the student to submit to the Office of the Graduate School, six weeks prior to graduation, two copies of the dissertation and the abstract in the final, approved form. Further changes or corrections may be suggested by the Graduate School at this time, and these must be completed or reconciled before graduation.

Time Limits for Doctoral Study

All degree requirements must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program.

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period prior to admission to the doctoral program. Such credit must be identified clearly on the Plan of Study and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previous graduate credit to the doctoral degree if the credit was earned during the six-year period prior to admission to the doctoral program.

Time Limits Extension Request

Only under well-documented, extraordinary circumstances beyond the student's control, a student may petition for a one-semester extension to the seven-year time limit that, if recommended by the department head and approved by the college dean and finally the graduate dean or his designee, will not require the student to validate any out-of-date courses. Validation of out-of-date courses is not an option in the College of Education. If a student fails to complete all degree requirements within nine years of his or her admission to the doctoral program or within a Graduate School approved one-semester extension, the student will be officially suspended from the doctoral program and must reapply for admission.

Repeating Courses When Given an Extension

When requests are made for extension of Graduate School deadlines, and it is deemed that an out-of-date course is integral to the degree program, the dean of the College of Education may request permission of the Graduate School for the course to be repeated. In such instances, both grades shall be used in calculation of the GPA.

Residence Requirements for Doctoral Study

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student's doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog's Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Transfer Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level:

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from a regionally accredited institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a "B" grade or better may be transferred. The student must have attained an overall graduate GPA of "B" or better on all graduate work attempted. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.
2. PhD Programs Only: A student holding an earned, in-field master's degree and working in the field or a related field since earning the degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. For departments participating in this program, the use of this option must be indicated on the Plan of Study.

To participate in Option 2, the Plan of Study must be submitted during the first semester of enrollment. If any coursework from the in-field or related-field master's degree was earned more than six years prior to the date of admission, the graduate program director or department head/chair must submit to the Graduate School for evaluation a Field-Related Employment Since Earning Master's Degree form with the student's CV and a PhD Plan of Study.

Consideration of transfer of credit or the acceptance of an earned master's degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the penultimate semester or the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy.

Each department wanting its doctoral students to be able to choose Option 2 needs to "opt in" to this option by informing the graduate dean in writing that they wish to be among the approved departments.

See the Admission Criteria section of this catalog for more information.

General Admission Requirements

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- *If required*, an entrance examination* score of at least 300 on the GRE General Test.

***Entrance examination: The GRE is REQUIRED for the following degree programs:**

- Educational Research, PhD
- Kinesiology, MA (Exercise Science and General Studies in Kinesiology)
- Kinesiology, PhD (Exercise Science only)
- Special Education, PHD

An applicant whose credentials do not meet the above requirements may be considered for admission to some programs if the overall GPA is at least 2.75.

Although GRE scores are not required for admission to many degree programs, a composite GRE score of 300 or better is required for all candidates, irrespective of degree program, who are seeking an appointment as a Graduate Assistant and students who are required or otherwise choose to submit their GRE scores should have composite scores no less than 300 to be considered for admission.

Admission to graduate programs is competitive. Meeting minimum requirements does not guarantee admission, only that students will be reviewed for admission. Applications are reviewed by departmental screening committees with consideration given to such factors as academic and professional backgrounds, test scores, personal traits, professional goals and aspirations, and other factors that pertain to the ability to complete the program successfully and continue a productive career. The Graduate School makes final admissions decisions based on departmental recommendations and the Graduate School's review of applications.

With approval, a student may enroll for one semester only as a non-degree student in the College of Education and is subject to the conditions outlined in this catalog for non-degree students. Responsibility rests with the student to observe the limitations imposed on credit hours, coursework, and transfer of credit.

An applicant to a College of Education program that leads to professional certification must submit references from current and former professors and/or supervisory personnel knowledgeable of the applicant's academic and professional capabilities.

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program.

For Class A and Class AA Instructional Leadership programs, individuals must meet ALSDE requirements for "unconditional admission" before enrolling in ANY instructional leadership courses in the program, as prescribed in the Alabama Administrative Code.

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Fingerprinting Requirement

Applicants to a state-approved teacher education program shall be required to be fingerprinted for a criminal history background check through the Alabama State Department of Education to the Alabama Bureau of Investigation (ABI) and the Federal Bureau of Investigation (FBI) pursuant to ACT 2002-457. This includes all students (traditional, alternative, out-of-state, and distance learners) enrolled in MA and EDS programs that lead to Alabama certification, regardless of whether or not they are pursuing Alabama certification. The background check is

completed at the student's expense, and suitability must be documented in the Office of Student Services & Certification before the student is assigned placement in a clinical setting. [Alabama Administrative Code]

A candidate whose suitability determination precludes admission to a state-approved teacher education program has the right to due process procedures in accordance with the current Educator Certification Chapter of the Alabama Administrative Code (Revocation and Suspension of Certificates and Unsuitability Determinations).

Policies for Out-of-State Students at the Master's Level (Class A) and Educational Specialist Level (Class AA) for Any Area *Except* Educational Administration

Admission requirements for master's level (Class A) programs for teachers include "eligibility for Class B certification in the teaching field(s) in which Class A certification is sought," except in a few specified fields.

Admission requirements for educational specialist level (Class AA) programs for teachers include "eligibility for Class A certification in the teaching field(s) in which Class AA certification is sought," except in a few specified fields.

Foreign Credentials

Coursework and/or a degree accepted from institutions outside the United States shall be substantiated by an evaluation of the foreign credentials from a state, federal, or private foreign credential evaluation service recognized by the Teacher Education and Certification Office. Contact the College's **Office of Student Services & Certification** for more information.

See the Admission Criteria section of this catalog for more information.

Professional Licensure (Certification)

The curricula offered by the College of Education are designed to prepare teachers and school administrative and supervisory officials for the appropriate certificates. Certification programs are available for the Alabama Class A and Class AA professional certificates. The College of Education, in accordance with the regulations of the Alabama State Board of Education, also provides assistance to individuals who need courses for the renewal of a certificate.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Application for Certification

All students must complete the proper application form for Alabama certification. Forms are available online through the Alabama Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional licensure within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to teach in other states must secure the proper professional licensure application forms from those states' departments of education.

Alabama Class A Professional Certificate

Class A teacher education programs are designed to help teachers more effectively serve the purposes defined for the same teaching field at the Class B level, provided such programs exist. The intent of the fifth-year program is to help the teacher develop higher levels of competence than is possible in the Class B program.

Effective for candidates admitted July 1, 2017, and thereafter, a cumulative GPA of not less than 3.25 is required for all courses used to meet the requirements on the approved program checklist for a Class A teaching field or area of instructional support, and a final comprehensive examination is required.

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting requirements for unconditional admission to a Class A program on July 1, 2017, and thereafter, must take an approved course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.

Following a review by the Alabama State Board of Education, the Class A Professional Certificate is granted to the student who (a) has applied for and has been recommended for certification by the College of Education, and (b) has completed a pre-planned graduate program, approved by the state board of education, that includes a master's degree. It is important to remember that the awarding of a master's or higher degree does not necessarily imply that the student is eligible for Class A certification.

If applicable, applicants for the certificate must also present to the Alabama Department of Education evidence of successful and appropriate educational experience, as follows: for certification as a library/media specialist, two years; as a school counselor or psychometrist, two years; sport management, two years; as an instructional leader, three years. [Effective July 1, 2017, two full years of full-time, acceptable professional educational work experience is required for admission to instructional support programs (Library Media, School Counseling, School Psychometry, and Sport Management).]

Applicants for *initial* certification in a teaching field or area of instructional support must meet the requirements of the Alabama Educator Certification Assessment Program (AECAP). Information about Praxis assessments is available at <https://www.ets.org/praxis/al> or in the Office of Student Services & Certification (104 Carmichael Hall).

An individual who completes an Alabama State-approved program must submit an application for Alabama certification within 60 calendar months of the program completion date. The Class A certificate is valid for five years and may be renewed according to regulations of the **Alabama State Board of Education**. Individuals are responsible for meeting renewal requirements and submitting the application for renewal.

Alabama Class AA Professional Certificate

The essential objective of the sixth-year program is to extend upward the level of competence of the teacher. Following a review by the Alabama State Board of Education, the Class AA Professional Certificate is granted to students who (a) have applied for and are recommended for certification by the College of Education, and (b) have completed a pre-planned graduate program, approved by the state board of education. Students seeking Class AA professional certification must enroll in and complete the EdS (or doctoral) degree program in the desired certification area in order to obtain the University's recommendation for Class AA professional certification. Courses used to qualify for a lower-level supporting certificate may not be used again as part of a higher-level certification program.

Effective for candidates admitted July 1, 2017, and thereafter, a cumulative GPA of not less than 3.50 is required for all courses used to meet the requirements on the approved program checklist for a Class AA teaching field or area of instructional support; and a final comprehensive examination is required.

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting requirements for unconditional admission to a Class AA program on July 1, 2017, and thereafter, must take a course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.

Applicants for *initial* certification in a teaching field or area of instructional support must meet the requirements of the Alabama Educator Certification Assessment Program (AECAP). Information about Praxis assessments is available at <https://www.ets.org/praxis/al> or in the Office of Student Services & Certification (104 Carmichael Hall).

A maximum of 15 semester hours of appropriate post-master's-degree credit earned through an institution approved to offer graduate programs beyond the master's level in the field of study in which the credits were earned may, with approval by the department head or his or her designee, be applied toward the Class AA Professional Certificate. It is important to remember that the awarding of a graduate degree does not necessarily imply that the student is eligible for Alabama certification.

An individual who completes an Alabama State-approved program must submit an application for Alabama certification within 60 calendar months of the program completion date. The Class AA certificate is valid for five years and may be renewed according to regulations of the **Alabama State Board of Education**. Individuals are responsible for meeting renewal requirements and submitting the application for renewal.

Alternative Approaches to Certification

In addition to "regular" certification programs, the Alabama State Board of Education offers alternative approaches to certification. Some of these include: (a) Alternative Class A approach (see information in this catalog); (b) provisional certificate in a teaching field; (c) provisional certificate in Library Media or School Counseling; (d) CACREP-accredited School Counseling Program approach; (e) Nationally Certified School Psychologist approach; and (f) National Board for Professional Teaching Standards approach. Information regarding these approaches is available via the **Alabama Department of Education**.

Policies for Out-of-State Students at Master's Level (Class A) and Educational Specialist Level (Class AA) for Any Area Except Educational Administration

Students planning to teach outside the state of Alabama are held personally responsible for knowledge of professional licensure requirements in those states.

Admission requirements for master's level (Class A) programs for teachers include "eligibility for Class B certification in the teaching field(s) in which Class A certification is sought," except in a few specified fields.

Admission requirements for educational specialist level (Class AA) programs for teachers include "eligibility for Class A certification in the

teaching field(s) in which Class A certification is sought," except in a few specified fields.

Out-of-state students who do not meet the above admission requirements to enroll in courses at the respective levels may be recommended to other state departments of education based only on completion of coursework, not completion of approved programs. Thus, these students will not be eligible for Alabama certification and, if and when the students wish to receive Alabama certification and teach in Alabama, they must present verification of eligibility for an appropriate prerequisite Alabama certificate before being recommended for Alabama certification.

Foreign Credentials

Coursework and/or a degree accepted from institutions outside the United States shall be substantiated by an evaluation of the foreign credentials from a state, federal, or private foreign credential evaluation service recognized by the Teacher Education and Certification Office. Contact the College's **Office of Student Services and Certification** for more information.

Changes in Certification Requirements

The programs listed in this catalog that lead to Alabama Class A and Class AA professional certificates for service in the public schools may be altered to meet certification standards adopted by the Alabama State Board of Education. Check with the appropriate department head for information.

Elementary Education Courses

CEE515 Science in Early Childhood and Elementary School

Hours 3

Designed to expand knowledge and competencies of early childhood and elementary teachers of science with specific focus on current standards, research, and inquiry models of instruction.

CEE516 Social Science in Early Childhood and Elementary School

Hours 3

The focus is on current trends in early childhood and elementary social studies, with particular attention to innovative instructional modes and to relating learning to the learners' social environment.

Curriculum and Instruction Courses

CIE523 Teaching Visual Arts

Hours 3

This course will focus on the practice of teaching art education in pre-kindergarten, primary, middle and secondary levels. The theory supporting engaging art education and the available and appropriate tools, strategies and resources will be investigated. Students will develop a working knowledge of art materials and methods appropriate for each level of growth.

Prerequisite(s): CSE 390, EDU 200, SPE 500, CEE 320, BEF 510

Prerequisite(s) with concurrency: CIE 592, CRD 512

CIE524 Improving Visual Arts Instruction

Hours 3

This course will focus on the practice of teaching visual arts education in pre-kindergarten, primary, middle and secondary levels. The theory supporting engaging visual arts education and the available and appropriate tools, strategies and resources will be investigated. Students will develop a working knowledge of art materials and methods appropriate for each level of growth.

Prerequisite(s): CSE 390, EDU 200, SPE 500, CRD 512, BEF 510, CIE 523, CIE 592

Prerequisite(s) with concurrency: EDU 500 and CIE 597

Reading Education Courses

CRD510 Expanding Reading

Hours 3

A comprehensive study of the major factors involved in teaching reading at the intermediate grade levels. Techniques for teaching word recognition and comprehension skills are studied extensively.

CRD511 Beginning Reading in Pre-K and Primary Grades

Hours 3

Attends to the theory and practice of beginning reading; key areas of study include diagnostic and evaluative procedures and the organization and implementation of appropriate instruction for P-6. A field component is required.

Secondary Education Courses

CSE530 Mod Sec School Program

Hours 3

The evolving secondary school and its program, with emphasis on analysis of current trends that directly affect modern school practices in a societal context.

CSE532 Secondary Sch Curric

Hours 3

The evolving secondary school curriculum, from historical, current trends, and projective perspectives.

Literacy Research, Theory, and Pedagogy Certificate

The Certificate in Literacy Research, Theory, and Pedagogy provides educators with the expertise to address issues related to the teaching and learning of literacy at local, state and national levels.

NOTE: This certificate is not a credential for teacher certification/licensure.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for admission an applicant must have a Master's degree in education (or a related field) or be enrolled in a doctoral program at The University of Alabama. The application must also include:

- A Statement of Purpose focusing on the student's goals in pursuing a Literacy Education Certificate.
- A writing sample submitted directly to the department for faculty consideration when the faculty review the Graduate School certificate program application.

This certificate is not a credential for teacher certification/licensure.

Curricular Requirements

Code and Title	Hours	
Select 12 hours from the following:		
CSE 690 Advanced Seminar	12	
CEE 690 Advanced Seminar		
CRD 690 Advanced Seminar Crd		
CIE 627 Second Language Literacy		
CIE 606 New Literacies		
CIE 609 Discourse & Pedagogy	3	
CRD 653 Literacy Foundations P-12		
Choose ONE of the following electives		
CIE 610 Effective Teaching		
CIE 620 Design Res Classrm Teach		
CIE 640 Sem Teachr Educ Program	15	
CIE 645 Prof Cont: Tchng & Lrning Com		
CIE 660 Cognitive Perspectives		
CIE 670 Critical Inquiry Curric Pedago		
Total Hours	15	

Coursework from this certificate program cannot be used to meet requirements for any other academic program.

Transfer Credit

Transfer credit will not be accepted toward this certificate

Graduate School information on Transfer Credit (p. 13).

Time Limit for Certificate Completion Requirements

Coursework must be completed in six (6) years.

Graduate School information on Time Limits (p. 23).

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Graduate School information on Academic Grievances (p. 219).

Scholastic Requirements

Graduate School information on Scholastic Requirements (p. 204).

Curriculum and Instruction, Ed.D.

The Ed.D program in the Department of Curriculum and Instruction is designed to develop the contextually-driven and purposive capacities required to independently conduct research and nurture the skills necessary to conduct place-based, applied research in support of communities, schools, teachers, and educational leaders in higher education. Ed.D. program graduates take faculty positions in Colleges of Education, leadership positions in pre-K-12 schools, and various administrative positions in governmental agencies, such as the Alabama State Department of Education.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A grade point average of 3.0/4.0 overall for a completed, relevant master's degree program
- Curriculum Vitae
- Statement of Purpose
- Three (3) letters of recommendation

A preferred qualification is for two years of experience in related professions, designing curriculum, or instructing learners at any level, in the U.S. or abroad.

Under exceptional circumstances, an applicant who does not meet the GPA requirement may be offered Admission with Permission to Continue.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

1. Students will take 42 hours minimum in departmental coursework as follows.
 - a. Students choose 12 hours of departmental doctoral core coursework consistent with their primary area of interest from a set of courses offered by the department.
 - b. To include CIE 693 Workshop (3 hours). Required introductory seminar for Curriculum and Instruction doctoral students.

c. To include CIE 675 Emergent Multilinguals (3 hours) or another diversity/ESL course.

d. Other coursework (24 hours) is related to the student's primary professional area of interest and is identified collaboratively with the doctoral program committee.

2. Students will take 18 hours of support coursework in research including 15 required hours and 3 hours of electives. Required coursework will include: BER 540 Statistical Methods In Educ; BER 631 Inqy As Interp: Qual I; BER 632 Reflect Resist: Qual II; BER 640 Adv Statistical Methods in Ed; and CIE 620 Design Res Classrm Teach.
3. Students will take 12 hours of humanistic/behavioral support coursework of their choice from a wide range of applicable coursework within the College of Education and the university.
4. Students will take a minimum of 12 hours of dissertation research. Dissertation hours can exceed 12 hours as some students carry out research investigations that may take more time to complete than do others.
5. Total coursework will be 72 hours plus a minimum of 12 hours additional dissertation credit equaling a minimum of 84 hours.

Transfer Credit

Graduate School information on Transfer Credit (p. 13).

Doctoral Plan of Study Requirement

Within 30 hours or less, students will submit a Plan of Study, which will be agreed upon with a program of study committee. The committee includes the major advisor and a minimum of four additional faculty, one of whom must be external to the department and at least three of whom hold faculty lines within the department. At least three of the committee members must have Full Graduate Faculty status.

Graduate School information on the Doctoral Plan of Study (p. 23).

Comprehensive Exams

The Ed.D. program will require a comprehensive examination when coursework is within six-twelve hours or less of completion. The comprehensive examination will be developed and scored by the doctoral program committee, which includes the major advisor. Should a student

fail the examination, the student will have one more opportunity to take and pass the comprehensive examination.

The goals of the comprehensive examination are (a) to give students an opportunity to reflect on and integrate the knowledge and skills they have developed in their doctoral studies, and (b) to give faculty members the opportunity to evaluate whether students show sufficient breadth and depth of knowledge and skills in their particular fields.

Students are eligible to take the examination when they have 6-12 credit hours of coursework remaining in their program. The student's program of study must have been completed and be on file in the program office, and a Doctoral Committee Advisory form must be completed and on file in the program office. It is the student's responsibility to complete the Application for Comprehensive Exams (available from the Curriculum & Instruction Department office—Autherine Lucy Hall 204). The student must submit the request to take the comprehensive examination at least 3 weeks in advance of the time in which the exam will be taken. This request form must be signed by the program planning committee chair.

Procedures

Students will be provided with 3 questions relative to their expertise and research interests that are to be completed independently. The committee Chair contacts the program committee members who will write questions for the examination. The date will be determined by the student in conjunction with the Chair of the student's Doctoral Program Advisory Committee. The questions will be delivered electronically to the student with receipt required by the SCTL or elementary program secretary. The completed exam must be returned electronically to the SCTL or elementary education program assistant within 10 calendar days.

Each question will include appropriate subsections to ensure that all areas identified are assessed. Faculty members from the student's advisory committee will write the questions and may assist students by clarifying any details about the questions. No additional assistance may be obtained from the faculty members or any other individuals (see <http://education.ua.edu/academics/ci/>). Students are required to give numerous and appropriate references to the sources they use and to include a reference section in their examinations. Plagiarism on the exam will be considered academic misconduct, resulting in automatic failure of the examination and possible termination from the program. Students who are unclear on what constitutes plagiarism or the improper paraphrasing of others' work are advised to ask for guidelines from department faculty members. Students wishing additional clarification on a question can approach the faculty member who wrote the question.

- The electronically submitted responses for each question should be comprehensive. Each response should not exceed 10 double-spaced pages with one-inch margins. The written comprehensive exam is considered to be passed when all questions are passed. The committee has the option of requiring an oral defense of the comprehensive exam, in which case a student passes the exam only they pass both the written and oral portions.

Students are allowed two attempts to pass comprehensive exams, as stated in the University of Alabama Graduate Catalog.

1. If a student fails the first attempt at comprehensive exams, a remediation plan will be established with the student and Program of Study chair. Additional faculty members may be included in the remediation plan as deemed appropriate by the Program of Study chair. The remediation plan will be submitted in writing to the department chair for approval.

2. Students are not allowed to attempt the comprehensive exams twice within the same semester.
3. Upon successful completion of remediation, as determined by the Program of Study chair, the student will be allowed a second attempt to pass comprehensive exams.
 - Questions for the second attempt at comprehensive exams are to be written by the same faculty members who wrote questions for the first attempt. Program of Study faculty members may use the same questions for both attempts, as deemed appropriate by the Program of Study chair.
 - Faculty members who grade responses from the first attempt at comprehensive exams are to grade the responses from second attempt.
 - A student who fails the second attempt at comprehensive exams will be dismissed from the degree program and from the Graduate School (Graduate Catalog Policies 4.11.1, 4.11.2, 4.11.3)

Graduate School information on Comprehensive Exams (p. 23).

Admission to Candidacy Requirements

Upon successful completion of the comprehensive examination, the student will identify the doctoral dissertation committee membership, which will follow the same guidelines as did the Plan of Study committee formation. The student will develop the dissertation proposal with input from the committee, present it in writing and orally to the committee for approval, and revise as needed until it is acceptable to the committee. When the dissertation proposal has been deemed acceptable, the student is admitted to candidacy once the Admission to Candidacy Form is signed by the committee.

Graduate School information on Admission to Candidacy (p. 23).

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

Once admitted to candidacy, the student will complete the dissertation research proposed under the supervision of the Major Advisor and dissertation committee. Upon completion of the dissertation research, which includes the submission of a draft the written dissertation to the doctoral dissertation committee, the student must successfully defend the work via an oral presentation to the committee, which is also open to the public. A successful defense may still entail some revision to the written dissertation.

Curriculum and Instruction, Ph.D.

The PhD program in the Department of Curriculum & Instruction is designed to assist in developing the skills and capacities required to independently conduct scholarly research on many different scales. The courses and programs of study allow for flexibility to address a variety of interests, differences, and directions as framed by the many epistemic, rhetorical, and contextual approaches available to researchers in the field of education.

Admission Requirements

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A grade point average of 3.0/4.0 overall for a completed, relevant master's degree program
- Curriculum Vitae
- Statement of Purpose
- Three (3) letters of recommendation

A preferred qualification is for two years of experience in related professions, designing curriculum, or instructing learners at any level, in the U.S. or abroad.

See the Admission Criteria section of this catalog for more information.

Curriculum Requirements

1. Students will take 48 hours minimum in courses related to their major area of research interest in Curriculum and Instruction.
2. Students will take 24 hours of support coursework in educational research and humanistic/behavioral studies.
3. Students will take 6 hours of free electives, such as additional educational research courses.
4. Students will take 18 hours of dissertation.
5. Total coursework, including the dissertation hours, will be 96 hours.
6. At the discretion of the major advisor, it may be possible to transfer in 24 credit hours from a relevant master's degree program or Ed.S. program.

Transfer Credit

At the discretion of the major advisor, it may be possible to transfer 24 credit hours from a relevant master's degree program or EdS program.

Graduate School information on Transfer Credit (p. 18).

Doctoral Plan of Study

Within 30 hours or less, students will submit a Plan of Study, which will be agreed upon with a program of study committee. The committee includes the advisor and a minimum of four additional faculty, one of whom must be external to the department and at least three of whom must hold faculty lines within the department. At least three of the committee members must have Full Graduate Faculty status.

Graduate School information on the Doctoral Plan of Study (p. 23).

Comprehensive Exam

The goals of the comprehensive examination are (a) to give students an opportunity to reflect on and integrate the knowledge and skills they have developed in their doctoral studies, and (b) to give faculty members the opportunity to evaluate whether students show sufficient breadth and depth of knowledge and skills in their particular fields.

Students are eligible to take the examination when they have 6-12 credit hours of coursework remaining in their program. The student's program of study must have been completed and be on file in the program office, and a Doctoral Committee Advisory form must be completed and on file in the program office. It is the student's responsibility to complete the Application for Comprehensive Exams (available from the Curriculum & Instruction Department office—Aatherine Lucy Hall 204). The student must submit the request to take the comprehensive examination at least 3 weeks in advance of the time in which the exam will be taken. This request form must be signed by the program planning committee chair.

Procedures

Students will be provided with three (3) questions relative to their expertise and research interests that are to be completed independently. The committee Chair contacts the program committee members who will write questions for the examination. The date will be determined by the student in conjunction with the Chair of the student's Doctoral Program Advisory Committee. The questions will be delivered electronically to the student with receipt required by the SCTL or elementary program secretary. The completed exam must be returned electronically to the SCTL or elementary education program assistant within 10 calendar days.

Each question will include appropriate subsections to ensure that all areas identified are assessed. Faculty members from the student's advisory committee will write the questions and may assist students by clarifying any details about the questions. No additional assistance may be obtained from the faculty members or any other individuals (see <http://education.ua.edu/academics/ci/>). Students are required to give numerous and appropriate references to the sources they use and to include a reference section in their examinations. Plagiarism on the exam will be considered academic misconduct, resulting in automatic failure of the examination and possible termination from the program. Students who are unclear on what constitutes plagiarism or the improper paraphrasing of others' work are advised to ask for guidelines from department faculty members. Students wishing additional clarification on a question can approach the faculty member who wrote the question.

The electronically submitted responses for each question should be comprehensive. Each response should not exceed 10 double-spaced

pages with one-inch margins. The written comprehensive exam is considered to be passed when all questions are passed. The committee has the option of requiring an oral defense of the comprehensive exam, in which case a student passes the exam only they pass both the written and oral portions.

Students are allowed two attempts to pass comprehensive exams, as stated in The University of Alabama Graduate Catalog.

1. If a student fails the first attempt at comprehensive exams, a remediation plan will be established with the student and Program of Study chair. Additional faculty members may be included in the remediation plan as deemed appropriate by the Program of Study chair. The remediation plan will be submitted in writing to the department chair for approval.
2. Students are not allowed to attempt the comprehensive exams twice within the same semester.
3. Upon successful completion of remediation, as determined by the Program of Study chair, the student will be allowed a second attempt to pass comprehensive exams.
 - Questions for the second attempt at comprehensive exams are to be written by the same faculty members who wrote questions for the first attempt. Program of Study faculty members may use the same questions for both attempts, as deemed appropriate by the Program of Study chair.
 - Faculty members who grade responses from the first attempt at comprehensive exams are to grade the responses from second attempt.

A student who fails the second attempt at comprehensive exams will be dismissed from the degree program and from the Graduate School (Graduate Catalog Policies 4.11.1, 4.11.2, 4.11.3)

Graduate School information on Comprehensive Exams (p. 23).

Admission to Candidacy

Upon successful completion of the comprehensive examination, the student will identify the doctoral dissertation committee membership, which will follow the same guidelines as did the Plan of Study committee formation. The student will develop the dissertation proposal with input from the committee, present it in writing and orally to the committee for approval, and revise as needed until it is acceptable to the committee. When the dissertation proposal has been deemed acceptable, the student is admitted to candidacy once the Admission to Candidacy Form is signed by the committee.

Elementary Education, Ed.S.

The Educational Specialist program in Elementary Education leads to Class AA Elementary certification.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to date information about requirements. Students should consult their advisors each semester before registering.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- three letters of recommendation
- a master's degree from an accredited institution
- a valid master's level professional educator certificate in Elementary Education. An applicant who holds both Class B Elementary certification AND Class A Reading is also eligible.
- a GPA of 3.0 or higher in a completed graduate degree program

Applications are accepted each semester.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

This course listing applies to those who begin this program June 1, 2019. Candidates earning graduate credit prior to this date may elect to utilize this program. A minimum of 30 hrs of appropriate work beyond the MA degree and the completion and passing of an electronic portfolio as a final comprehensive assessment are required for the educational specialist degree. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C.

²The research courses must be taken before CEE 687 Topical Research Review.

A current program checklist may be obtained from the departmental office in 204 Autherine Lucy Hall. A maximum of 6 hrs of approved transfer credit (maximum of nine hours from UAB/UAH) may be applied toward the degree.

Transfer Credit

A maximum of six hours of approved transfer credit may be applied toward the degree. Credits over 6 years old may not be used for degree purposes, and credits used for the previous Class A support certificate may not be used for this program.

Graduate School information on Transfer Credit (p. 21).

Comprehensive Exam

In lieu of a comprehensive exam, EdS candidates are assessed against the completion of a professional portfolio. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C, to qualify to submit their final checkpoint #3 for graduation in their final semester. The electronic portfolio is assessed for required components using the Electronic Portfolio Rubric and Dispositions Rubric at three checkpoints by students' advisors. Passing at the target level at Checkpoint #3 is required for graduation. Students are required to complete an application for comprehensive exams the semester of graduation with advisor approval.

Graduate School information on Comprehensive Exams (p. 21).

Fieldwork/Practicum/Internship Requirements

30 advanced clinical hours are required in an elementary school placement which is most often the classroom in which the graduate student is employed teaching elementary students. This placement is attached to the required course, CEE 687 Topical Research Review, on the required program of study course checklist. In this experience students will demonstrate, analyze, and assess how they make an impact on P-12 student learning. In this experience, candidates should apply coursework in the classroom/school settings, analyze student learning, and reflect on their practice in the context of theories on teaching and learning. Specifically, candidates should:

- Research, design, and implement an assessment of the P-12 students' knowledge and capabilities based on appropriate research-based practices in the certification/disciplinary area *Application of data literacy (CAEP Standard A.1.1)*;
 - Research, implement, and evaluate appropriate research-based disciplinary and technology practices to advance P-12 student learning that addresses the differing background knowledge and learning needs of all students *Supporting appropriate applications of technology for their field of specialization (CAEP Standard A.1.1)*;
 - Conduct an assessment and that measures student success *Use of research and understanding of qualitative, quantitative, and/or mixed methods research methodologies specialization (CAEP Standard A.1.1)*;
 - Reflect on instructional changes appropriate to the certification/disciplinary area that should be implemented in the future based on the assessment results *Employment of data analysis and evidence to develop supportive school environment; specialization (CAEP Standard A.1.1)*;
- Application of professional dispositions, laws, and policies, codes of ethics and professional standards appropriate to their field of specialization (CAEP Standard A.1.1);*
Leading and/or participating in collaborative activities with others such as peers, colleagues, teachers, administrators, community organizations, and parents (CAEP Standard A.1.1).

The Office of Clinical Experiences requires documentation of the 30 hours in the student documentation online portal with approval of the minimum of 30 hours from the student's supervisor (cooperating

teacher/administrator). Students are expected to complete a project in relation to the above standards connected to the 30 hours of placement. Students are required to complete that project focused on Student Learning Outcomes. The Action Research Prospectus project in CEE 687 Topical Research Review serves as this key assessment and passing that project at the Developing Level or higher on the College-wide Rubric is necessary for a passing grade in the course and for graduation with the AA certificate. Students cannot pass the course without scoring at the developing level or higher on the College-wide Advanced Clinical Rubric

Plan I - Thesis Process Requirements

The Action Research Prospectus and Project are required for graduation.

Plan II - Non-Thesis Process Requirements

EdS students are required to complete an action research project in the last two semesters of their coursework with support in classes CEE 687 Topical Research Review (Fall) and CEE 697 Specialist Degree Res (Spring).

In CEE 687, students complete the planning of an action research project through required course assignments resulting in an Action Research Prospectus. Students are required to pass the course with a B or higher to move forward to CEE 697.

In CEE 697, students register for 3 hours of the course with their advisor. Students are required to conduct action research following their prospectus and finish the Action Research Project, completing the course with a formal written document combining the planning from the Action Research Prospectus and the full written description of the action research as carried out and with results and discussion. The Action Research Assignment must be completed with advisor approval for submission to Checkpoint #3 in the requisite electronic portfolio required for graduation. Students must earn a B on their Action Research Project to be approved for graduation.

Time Limit for Degree Completion Requirements

Graduate School information on Time Limits (p. 21).

Student Progress Requirement

As required for certification at the AA level, EdS Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a "C."

Additionally, students are monitored for progress at Checkpoints #1, #2, and #3 in their requisite Electronic Portfolio. Passing at the Developing Level on the Electronic Portfolio and Dispositions Rubrics is required for moving forward in the program at Checkpoints #2 and for graduation at Checkpoint #3.

Students who cannot meet the following requirements could be dismissed for lack of satisfactory progress:

- maintain the required 3.5 required graduate GPA, and/or
- pass all courses with allowance of one retake with a level of B or higher and/or
- complete the 30 hours of advanced clinical practicum with supervisor approval and/or
- pass their Action Research Prospectus Advanced Clinical Placement Assignment at a level of B or higher and/or

- pass their Advanced Clinical Placement Collegewide Rubric at a developing level or higher and/or
- complete their Action Research Project at a level of B or higher and/or
- complete their Electronic Portfolio at Checkpoints #1, #2, and #3 at the developing level or higher

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Students who have been inactive in their progress toward degree requirements for more than an academic year must submit the following items to gain readmittance to the graduate program:

- a written request to reenter the program
- an explanation (if possible) of why the student left
- a plan for success if allowed to reenter

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 219).

Scholastic Requirements

As required for certification at the AA level, EdS Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a "C." Credits over 6 years old may not be used for degree purposes, and credits used for the previous Class A support certificate may not be used for this program.

Graduate School information on Scholastic Requirements (p. 204).

Graduate School Deadlines Information

Information on Graduate School Deadlines.

Application for Graduation Information

Information on the Application for Graduation (p. 21).

Certification

The Alabama State Board of Education grants Class AA professional educator certification in Elementary (K-6). To be eligible, candidates must hold appropriate, prerequisite Class A certification and must complete all requirements for the EDS degree as described in this catalog, including a comprehensive assessment. According to Alabama regulations, individuals admitted to a Class AA program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class AA (specialist level) certification.

Elementary Education, MA

Traditional Class A Program

The department offers a traditional Class A program for those with appropriate prerequisite certification in Elementary Education (or an approved equivalent). This program leads to Alabama Class A certification in Elementary Education (K-6).

Alternative Class A Program (Nontraditional, Initial Teacher Certification)

The department offers an Alternative Class A program that does not require prior certification in a teaching field. This program leads to Alabama Class A certification in Elementary Education (K-6) and Early Childhood (P-3) and is designed to allow individuals with undergraduate degrees in non-teaching fields to enter the field of education.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to date information about requirements. Students should consult their advisors each semester before registering.

Admissions

Admission requirements for the Graduate School (Admission Criteria (p. 7)) and the College of Education (General Admission (p. 494)) are detailed in earlier sections of this catalog.

See the Admission Criteria section of this catalog for more information.

Admission Requirements for Traditional Class A Elementary (K-6) Certification

In addition to meeting admission requirements for the Graduate School and the College of Education, applicants must hold appropriate prior certification in Elementary Education (or the approved equivalent). Fingerprinting/background clearance is also required for admission.

Admission Requirements for Alternative Class A Elementary (K-6) certification and Early Childhood (P-3) (Nontraditional, Initial Teacher Certification Program)

For admission to the Alternative Class A (non-traditional) program in elementary education, applicants must meet the following requirements:

- **Transcript evaluation:** Applicants should contact the Office of Student Services & Certification for a transcript evaluation to determine prerequisite courses.
- **Degree requirement:** An appropriate bachelor's degree from a regionally accredited institution with a minimum overall GPA of 2.75 OR a master's degree with a GPA of at least 3.0 is required.
- **General Studies and Teaching Field:** For Alternative Class A in Elementary, applicants must have completed 12 credit hours of English Language Arts and earn passing scores on **all** subtests of Praxis 5901–Elementary Education: Three Subject Bundle.
- **Fingerprinting/background clearance**

Admission Requirements for the Non-Certification Overseas Program for Elementary Education, MA

The following are required for the Non-Certification Overseas Program for Elementary Education, MA

- An undergraduate grade point average (GPA) of 3.0 on a 4.0 scale, a 3.0 GPA for the last 60 semester hours in a degree program, or a 3.0 or higher GPA in a completed graduate degree program.

Application Requirements:

- Submit a degree-seeking application online at <https://graduate.ua.edu/prospective-students/apply-now/>;
- Submit official, certified transcripts and degree certificates/diplomas in the native language with official, literal, word-for-word English translations directly from the issuing institution to the Graduate School. Documents must bear original signatures and seals of the issuing institution. Notarized documents are not accepted.

- Submit a statement of purpose and three letters of recommendation in the application system.

Curricular Requirements

Curriculum Requirements for Traditional Class A Elementary Education (K-6)

This course listing applies to those who begin this program June 1, 2019, or thereafter. Candidates earning graduate credit prior to this date may elect to utilize this program. A minimum of 30 hrs of course credit must be earned, and a comprehensive assessment must be successfully completed. An extensive professional portfolio, to be completed by candidates, will be used as a comprehensive assessment in lieu of a comprehensive exam. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to date information about requirements. Students should consult their advisors each semester before registering.

Curriculum Requirements for Alternative Class A Elementary (K-6) certification and Early Childhood (P-3) (Non-traditional, Initial Teacher Certification Program)

This course listing applies to those who begin this program June 1, 2019, or thereafter. Candidates earning graduate credit prior to this date may elect to utilize this program. A minimum of 40 semester hours of specific graduate credit plus some undergraduate prerequisites are required for certification. The program of study must be planned with an advisor. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C, and a passing score on a comprehensive assessment is required. The extensive professional portfolio completed by candidates will be used as a comprehensive assessment in lieu of a comprehensive exam.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to date information about requirements. Students should consult their advisors each semester before registering.

¹ The early childhood placement will include at least two of the following age groups: birth-age 3, age 3-5, and age 5-8. The elementary placement(s) will include upper and lower grades unless substantial field experiences are completed at both levels.

Curriculum Requirements for Non-Certification Overseas Program for Elementary Education, MA

This is a non-certification program offered only to overseas students. Completion of this program does not lead to professional educator licensure or certification.

A minimum of 30 hours of course credit must be earned, and a comprehensive assessment must be successfully completed. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C.

Non-Certification Overseas Program for Elementary Education, MA

Group I: Elementary Education Courses

AREA 1. Required Courses. Students select ONE course from the following:	3
CEE 530 Modern Elementary School Progr	
CEE 532 Early Child/Elem Sch Curric	
AREA 2. Program Specifics. Students select FIVE courses from the following—OR select three or four courses from Program Specifics plus 6 or 3 hours of graduate credit courses* in the student's subject field.	15
CEE 515 Science Early Childhood/Elem	
CEE 516 Social Sci in Early Child/Elem

Total Hours	30

Footnotes

* Courses must have a graduate-level equivalent at The University of Alabama, be part of the curriculum in a graduate degree program, and be from a regionally accredited institution. Students must secure permission to enroll in transfer courses prior to enrolling in those courses.

Transfer Credit

Students may not count more than six hours in certain seminar/workshop/problems courses toward the completion of the degree. A maximum of 12 hours of transfer credit, if approved by the student's advisor, may be applied toward the degree. Transferred courses over six years old from semester of admission may not be used for degree purposes. Students should see their advisors regarding which courses are appropriate for transfer credit.

For the traditional Class A Elementary program, credits used for the previous Class B certificate may not be used for this program.

Graduate School information on Transfer Credit (p. 18).

Comprehensive Exam

In lieu of a comprehensive exam, MA, Alt MA and Non-Certification Overseas Program for ELE candidates will be assessed against the completion of a professional portfolio. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C to qualify to submit their final checkpoint #3 for graduation in their final semester. The electronic portfolio is assessed for required components using the Electronic Portfolio Rubric and Dispositions Rubric at three checkpoints by students' advisors. Passing at the developing or above level at Checkpoint #3 is required for graduation. Students are required to complete an application for their comprehensive assessment the semester of graduation with advisor approval.

<https://graduate/about/academic-policies/degree-requirements/#mastersdegreestext> (p. 18)

Fieldwork/Practicum/Internship Requirements

Traditional Class A Elementary Education (K-6)

Fifteen (15) advanced clinical placement hours are required in an elementary school placement, which is most often the classroom in which the graduate student is employed teaching elementary students. This placement is attached to the required course, CEE 532 Early Child/Elem Sch Curric, on the required program of study course checklist. In this experience students will demonstrate, analyze, and assess how they make an impact on P-12 student learning. In this experience, candidates should apply coursework in the classroom/school settings, analyze student learning, and reflect on their practice in the context of theories on teaching and learning. Specifically, candidates should demonstrate the impact on student learning that occurs through curricular changes and must address the following components:

- Undertaking a diagnosis of P-6 curriculum in connection with student learning
- Planning an appropriate sequence of instruction to advance P-6 student learning with graduate students and early childhood/elementary students using technology collaboratively and appropriately
- Conducting authentic assessments and documenting what student learning occurred/did not occur from these curricular changes impacting instructional practices
- Reflecting on required curricular components through research-supported arguments and ideas

The Office of Clinical Experiences requires documentation of the 15 hours in the student documentation online portal with approval of the minimum of 15 hours from the student's supervisor (cooperating teacher/administrator). Students are expected to complete a project in relation to

the above standards connected to the 15 hours of placement. Students are required to complete that project focused on Student Learning Outcomes. The Technological Curriculum Project in CEE 532 Early Child/Elem Sch Curric serves as this key assessment and passing that project at the Developing Level or higher on the Collegewide Rubric is necessary for a passing grade in the course and for graduation with the A certificate. Students cannot pass the course without scoring at the developing level or higher on the Collegewide Advanced Clinical Rubric

Alternative Class A Elementary (K-6) certification and Early Childhood (P-3) (Non-traditional, Initial Teacher Certification Program)

Alternative Class A students are required to complete the practicum hours associated with the Block 1, Block 2, Block 3, and Block 4 courses: CEE 491, CEE 595, CEE 596, and CEE 597, including the EC pre-internship placement at the beginning of Block 3. CEE 597 serves as the culminating internship in two field placements.

Non-Certification Overseas Program for Elementary Education, MA

OIP students are not required to complete practicum hours as this degree is not associated with certification; however, many course assignments are assigned in connection with experiences of the graduate students when working in the field with elementary ages.

Plan II - Non-Thesis Process Requirements

MA, Alt MA, and OIP MA students are required to complete an electronic portfolio at three checkpoints in their master's program. Students are assessed for progress at Checkpoints #1, #2, and #3 in their requisite Electronic Portfolio. Passing at the Developing Level or higher on the Electronic Portfolio and Dispositions Rubrics is required for moving forward in the program at Checkpoints #1 and 2 and for graduation at Checkpoint #3. Checkpoint #3 in the Electronic Portfolio must be completed with assessor approval for graduation.

Time Limit for Degree Completion Requirements

Graduate School information on Time Limits (p. 18).

Student Progress Requirements

Traditional Class A Elementary Education (K-6)

Students are monitored for progress at Checkpoints #1, #2, and #3 in their requisite Electronic Portfolio. Passing at the Developing Level on the Electronic Portfolio and Dispositions Rubrics is required for moving forward in the program at Checkpoints #1 and #2 and for graduation at Checkpoint #3.

Students who cannot meet the following requirements could be dismissed for lack of satisfactory progress:

- maintain the required 3.25 graduate GPA, and/or
- pass all courses with allowance of one retake with a level of B or higher and/or
- complete the 15 hours of advanced clinical practicum with supervisor approval and/or
- pass their Technological Curriculum Project (CEE 532) Advanced Clinical Placement Assignment at a level of C or higher and/or
- pass their Advanced Clinical Placement Collegewide Rubric at a developing level or higher and/or

- complete their Electronic Portfolio at Checkpoints #1, #2, and #3 at the developing level or higher

Alternative Class A Elementary (K-6) certification and Early Childhood (P-3) (Non-traditional, Initial Teacher Certification Program)

Students are monitored for progress at Checkpoints #1, #2, and #3 in their requisite Electronic Portfolio. Passing at the Developing Level on the Electronic Portfolio and Dispositions Rubrics is required for moving forward in the program at Checkpoints #1 and #2 and for graduation at Checkpoint #3.

Students who cannot meet the following requirements could be dismissed for lack of satisfactory progress:

- maintain the required 3.25 graduate GPA, and/or
- pass all courses with allowance of one retake with a level of B or higher and/or
- complete the clinical placement requirements of practicum hours and internship with supervisor approval and at a level of B or higher and/or
- complete their Electronic Portfolio at Checkpoints #1, #2, and #3 at the developing level or higher

Non-Certification Overseas Program for Elementary Education, MA

Students are monitored for progress at Checkpoints #1, #2, and #3 in their requisite Electronic Portfolio. Passing at the Developing Level on the Electronic Portfolio and Dispositions Rubrics is required for moving forward in the program at Checkpoints #1 and #2 and for graduation at Checkpoint #3.

Students who cannot meet the following requirements could be dismissed for lack of satisfactory progress:

- maintain the required 3.25 graduate GPA, and/or
- pass all courses with allowance of one retake with a level of B or higher and/or
- complete their Electronic Portfolio at Checkpoints #1, #2, and #3 at the developing level or higher

Additional Academic Requirements

For the Alternative Class A program, a passing score on the appropriate Praxis subject assessments are required.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Students who have been inactive in their progress toward degree requirements for more than an academic year must submit the following items to gain readmittance to the graduate program:

- a written request to re-enter the program
- an explanation (if possible) of why the student left
- a plan for meeting success if allowed to re-enter

Faculty permission is required for reentry upon evaluation of these requirements.

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 219).

Scholastic Requirements

Traditional Class A Elementary Education (K-6)

As required for Class A certification, candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a "C." Credits over 6 years old may not be used for degree purposes, and credits used for the previous Class B certificate may not be used for this program.

Alternative Class A Elementary (K-6) certification and Early Childhood (P-3) (Non-traditional, Initial Teacher Certification Program)

As required for Alternative Class A certification, candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a "C." Credits over 6 years old may not be used for degree purposes.

Non-Certification Overseas Program for Elementary Education, MA

Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a "C." Credits over 6 years old may not be used for degree purposes.

Graduate School information on Scholastic Requirements (p. 204).

Graduate School Deadlines Information

Information on Graduate School Deadlines.

Application for Graduation Information

Information on the Application for Graduation (p. 18).

Certification

Traditional Class A Elementary Education (K-6)

The Alabama State Board of Education grants Class A professional educator certification in Elementary Education (K-6). To be eligible, candidates must hold appropriate prerequisite certification and must complete all requirements for the MA degree in the chosen program as described in this catalog, including a comprehensive assessment, state assessments (if applicable), and the *Praxis* subject assessment(s). According to Alabama regulations, individuals admitted to a Class A program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class A (master's level) certification.

Alternative Class A Elementary (K-6) certification and Early Childhood (P-3)

The Alabama State Board of Education grants Class A professional educator certification in Elementary Education (K-6) and Early Childhood (P-3). To be eligible, candidates must complete all requirements of the Alternative Class A program, including a comprehensive assessment, state assessments (if applicable), and the *Praxis* subject assessment(s).

Secondary Education, Ed.S.

Programs leading to Class AA certification in Secondary Education (6-12) are available in

- Biology
- Chemistry
- English for Speakers of Other Languages
- English Language Arts (comprehensive)
- Foreign Language (French or Spanish)

- General Science (comprehensive)
- Geography
- History
- Mathematics
- Physics
- Social Science (comprehensive)

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. A current program checklist may be obtained from the program office in 204 Autherine Lucy Hall. Students should consult their advisors each semester before registering.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must:

- hold appropriate, prerequisite master's level certification
- have a master's program GPA of 3.0 on a 4.0 scale.
- Provide a Statement of Purpose explaining their interest in the program, which will serve as a writing sample.

Admission with Permission to Continue

In exceptional circumstances, Admission with Permission to Continue may be granted if the GPA is below the required 3.0/4.0. In such a case, the student must earn a 3.5 overall GPA for the first nine semester hours of the program. If the student does not meet this requirement, then they will not be permitted to continue in the program.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A minimum of 30 hours of appropriate work beyond the MA degree, including either the completion of classroom inquiry projects (CSE 693) or a thesis (CSE 697), is required for the educational specialist degree.

Students must be certain that their planned programs meet all certification requirements according to programs approved by the state department of education. Approved program checklists are available from the program office.

NOTE: The comprehensive fields of general science, general social science, and English language arts require at least one course in two areas within the broader field as follows:

- English language arts must include courses from at least two of the following areas: EN, JCM, COM or TH
- General science must include courses from at least two of the following areas: BSC, CH, PH or GEO.
- General social science must include courses from at least two of the following areas: HY, SOC, PY, PSC, GY or EC

Candidates moving from the comprehensive fields of general science or general social science to a single teaching field must earn passing scores on the appropriate *Praxis* subject assessment for certification in the single teaching field. For example, a student admitted with Class A general science certification who completes teaching field coursework only in physics must earn a passing score on the *Praxis* for physics to earn Class AA physics certification.

These course listings apply to candidates having appropriate prior certification. Candidates must present a GPA of at least 3.50 on all courses in the program below, with no grade below a C.

Transfer Credit

Courses applied to the master's degree may not be transferred to the EdS degree.

Graduate School information on Transfer Credit (p. 21).

Comprehensive Exams

In lieu of a Comprehensive Exam, candidates will submit a Comprehensive, Advanced Portfolio. Due in the last semester of the program, the final portfolio must be passed in all areas with scores of 2/4 (Developing) or better. A score of 1 in any area will require resubmission and graduation will be delayed until the comprehensive assessment is passed.

Graduate School information on Comprehensive Exams (p. 21).

Fieldwork/Practicum/Internship Requirements

One 15-hour Advanced Clinical Placement is required for this degree. This placement is typically carried out in the student's own classroom as they engage in action research or inquiry projects, but it need not be.

Time Limit for Degree Completion Requirements

Graduate School information on Time Limits (p. 21).

Student Progress Requirement

Students submit an Advanced Portfolio upon entrance, at midway point, and in the final semester. Feedback will be provided at each phase.

Students must pass the final submission of the Advanced Portfolio with 2/4 (Developing) or better on all items in order to graduate.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 219).

Scholastic Requirements

Graduate School information on Scholastic Requirements (p. 204).

Graduate School Deadlines Information

Information on Graduate School Deadlines.

Admission to Candidacy

Students should contact their academic advisor/graduate director to initiate the form for Admission to Candidacy for the Ed.S. degree and submit a program of study. The Graduate School must approve the student's EdS plan of study prior to admission to candidacy for the degree.

Application for Graduation Information

Information on the Application for Graduation (p. 21).

Class AA Certification

The Alabama State Board of Education grants Class AA professional educator certification in Secondary Education (6-12) teaching fields and P-12 teaching fields. To be eligible, candidates must hold appropriate prerequisite certification and must complete all requirements of the State-approved program, including a comprehensive assessment. The extensive professional portfolio completed by candidates will be used as a comprehensive assessment in lieu of a comprehensive exam.

According to Alabama regulations, individuals admitted to a Class AA program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class AA (specialist level) certification.

Postsecondary Instruction

Graduate students in the EdS program who have an interest in teaching in postsecondary institutions may take advantage of the program's flexibility to acquire a maximum of 18 hours in cognate field courses. Students who have this option in mind should coordinate the program of study carefully with their advisors.

Secondary Education, MA

Traditional Class A and Alternative Class A certification programs in Secondary Education (6-12) are available in

- Biology
- Chemistry
- English for Speakers of Other Languages
- English Language Arts (comprehensive)
- Foreign Language (French, German, Latin, or Spanish)
- General Science (comprehensive)
- Geography
- History
- Mathematics
- Physics
- Reading Specialist (P-12, traditional Class A only)
- Social Science (comprehensive)

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. A current program checklist may be obtained from the program office. Students should consult their advisors each semester before registering.

Admission Requirements

Admission Requirements for Traditional Class A Programs

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must:

- hold appropriate prior certification.

Admission Requirements for Alternative Class A (Master's-Level), Nontraditional, Initial Teacher Certification Program

The department of Curriculum & Instruction offers Alternative Class A programs that do not require prior certification in a teaching field. These programs lead to Alabama Class A certification in Secondary Education (6-12) and are designed to allow individuals with undergraduate degrees in non-teaching fields to enter the field of education.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission to an Alternative Class A program, the application must include:

- Completion of specified undergraduate prerequisite courses.
- **Transcript evaluation:** Applicants should contact the Office of Student Services & Certification for a transcript evaluation to determine prerequisite courses and other requirements.
- **Degree requirement:** An appropriate bachelor's degree from a regionally accredited institution with a minimum overall GPA of 2.75 OR a master's degree with a GPA of at least 3.0 is required.
- **Teaching Field:** For single teaching fields at the secondary level (6-12), applicants must have an academic content major (or the equivalent) in the teaching field OR passing scores on the appropriate Praxis subject assessment. For comprehensive teaching fields at the secondary level (English Language Arts, General Science, or General Social Science), applicants must have an academic content major (or the equivalent) in the teaching field plus one course in each of the four areas of the teaching field OR passing scores on the appropriate Praxis subject assessment. For English for Speakers of Other Languages (P-12), applicants must have an academic content major (or the equivalent) in English or a foreign language OR passing scores on the appropriate Praxis subject assessment. The transcript evaluation will determine if an applicant meets the teaching field requirement.
- **Fingerprinting/background clearance**

Fingerprinting Requirement

Applicants to a State-approved certification program shall be required to be fingerprinted for a criminal history background check through the Alabama State Department of Education to the Alabama Bureau of Investigation (ABI) and the Federal Bureau of Investigation (FBI) pursuant to ACT 2002-457. This includes all students enrolled in programs that lead to Alabama certification, regardless of whether or not they are pursuing Alabama certification. The background check is completed at the student's expense, and suitability must be documented in the Office of Student Services & Certification before the student is assigned placement in a clinical setting. [Alabama Administrative Code] A candidate whose suitability determination precludes admission to a state-approved teacher education program has the right to due process procedures in accordance with the current Educator Certification Chapter of the Alabama Administrative Code (Revocation and Suspension of Certificates and Unsuitability Determinations).

Changes to Certification Requirements

The programs listed in this catalog that lead to Alabama Class A professional educator certification for service in the public schools may be altered to meet certification standards adopted by the Alabama State Board of Education. The Graduate Catalog is published annually; however, requirements for State-approved programs are subject to change between publications. Current students, as well as prospective students, should check with the specific program for the most up-to-date information.

Overseas Programs

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A CV/resume
- 3 letters of recommendation

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Curricular Requirements for Traditional Class A Programs

A minimum of 30 hours of course credit must be earned; see specific program checklists. The program of study must be planned with an advisor.

NOTE: The comprehensive fields of General Science, General Social Science, and English Language Arts require at least one course in two areas within the broader field as follows:

- English Language Arts must include courses from at least two of the following areas: EN, JCM, COM, and TH
- General Science must include courses from at least two of the following areas: BSC, CH, PH, and GEO.
- General Social Science must include courses from at least two of the following areas: HY, SOC, PY, PSC, GY, and EC

Candidates moving from the comprehensive fields of general science or general social science to a single teaching field must earn passing scores on the appropriate *Praxis* subject assessment for certification in the single teaching field. For example, a student admitted with Class B General Science certification who completes teaching field coursework only in biology must earn a passing score on the *Praxis* for biology to earn Class A Biology certification. Individuals who intend to earn Class AA certification in a secondary education field must hold valid Class A certification in the same teaching field as the Class AA program.

Unless otherwise specified, these course listings apply to candidates having appropriate prior certification who begin this program at UA on June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program below, with no grade below a C.

Curricular Requirements for Alternative Class A Programs

A minimum of 37 semester hours of specific graduate credit plus some undergraduate prerequisites are required for certification. The program of study must be planned with an advisor.

The Alternative Class A course listings apply to candidates having completed a baccalaureate degree at a regionally accredited college or university who begin the program June 1, 2017 and thereafter. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program below, with no grade below a C.

Postsecondary Instruction

Graduate students in the MA program who have an interest in teaching in postsecondary institutions may take advantage of the program's flexibility to acquire a maximum of 18 hours in cognate field courses. Students who have this option in mind should coordinate the program of study carefully with their advisors.

Certification**Traditional Class A Certification**

The Alabama State Board of Education grants Class A professional educator certification in Secondary Education (6-12) teaching fields and

P-12 teaching fields. To be eligible, candidates must hold appropriate prerequisite certification and must complete all requirements for the MA degree in the chosen program as described in this catalog, including a comprehensive assessment, state assessments (if applicable), and the *Praxis* subject assessment(s). The extensive professional portfolio completed by candidates will be used as a comprehensive assessment in lieu of a comprehensive exam.

According to Alabama regulations, individuals admitted to a Class A program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class A (master's level) certification.

Alternative Class A Certification

The Alabama State Board of Education grants Class A professional educator certification in Secondary Education (6-12) teaching fields and P-12 teaching fields. To be eligible, candidates must complete all requirements of the Alternative Class A program, including a comprehensive assessment, state assessments (if applicable), and the *Praxis* subject assessment(s). The extensive professional portfolio completed by candidates will be used as a comprehensive assessment in lieu of a comprehensive exam.

Educational Leadership

AEL520 Leadership for Communities

Hours 3

A study of individual and group leadership skills for purpose of addressing issues that impact student learning, engaging families in decisions at the school and district levels and building community support for schools.

Prerequisite(s): SPE 300 or SPE 500

AEL521 Leadership for Improvement

Hours 3

Prepares prospective educational administrators for grade P-12 to provide the instructional leadership for continuous improvement of schools. Focuses on knowledge and understanding about learning methods and strategies for program planning, design, implementation and evaluation.

Prerequisite(s): SPE 300 or SPE 500

Higher Education

AHE500 Perspect High Educ Admin

Hours 3

How higher education has been shaped by the major trends in American society, how it has contributed to the development of this country, and what may be expected of higher education in the future. Higher education is also viewed in institutional and conceptual forms from the perspective of students, faculty, and administrators.

AHE503 Learning with Technology in Higher Education

Hours 3

This course provides students with an overview of the main issues surrounding the use of technology for the advancement of teaching in higher education settings. It includes some hands-on experiences designed to enhance the productivity and creativity of learning in both classroom and online environments.

Instructional Leadership

AIL600 Integr Tech Educ & Train

Hours 3

An examination of advanced applications of current and emerging instructional technological applications in a variety of settings and in the context of various fields of study and job environments. Technologies and applications addressed in current course include computers, the Internet, presentation media, and multimedia. Cognitive, product, and skill competencies are included. Cognitive competencies are integrated into product and skills evaluations. Products are required to reflect some competencies, while skills competencies are either observed directly or inferred from the products.

AIL601 Prin Instruct Technology

Hours 3

Advanced theory and applications of educational technology. Including the effects of technology on thinking and learning, and the effects of technology in problem solving and other higher-level thinking skills, the course examines current research on computerized learning (CAI, simulation, and tutorials) and other relevant topics such as virtual reality, games and gaming theory, hypertext (design and comprehension), presentation software, groupware for cooperative learning, and telecommunications (distant and/or distributed learning).

Educational Foundations

BEF503 History Of Amer Educn

Hours 3

An interpretive history of the educational and social movements and conflicts leading to understanding contemporary issues of educational aims, curriculum, teaching methodology, administrative policy, and the professionalization of teaching. Offered in alternate semesters and in summer school.

BEF504 Philosophy Of Educ

Hours 3

An examination into the meaning and purpose of education in light of major philosophical problems of knowledge, value, and reality. Offered in alternate semesters and in summer school.

Computers and Applied Technology

CAT531 Computer Based Instruction

Hours 3

This is an introductory course in the fundamentals of computer applications for educational use. The course explores current and emerging tools and trends for online learning strategies, communication, productivity, presentation, research, and classroom administration.

Instructional Technology

INTE532 Instructional Technology Design

Hours 3

This course provides an introduction to the elements of instructional design and their application to the design of technology-mediated instruction, with a primary focus on blended and online learning.

INTE533 Online Teaching and Learning

Hours 3

This course provides students with knowledge and skills in the methods of online teaching and learning, including the creation of effective online learning environments.

College Teaching Certificate

The Graduate Certificate in College Teaching is a 12-credit (4-course) sequence designed to help graduate students advance their understanding of teaching and learning in a variety of higher education settings. Students enrolled in the certificate program will be immersed in the theory, research, and practice related to college teaching. The intent of the Graduate Certificate in College Teaching is to help professionals better understand the increasingly complex and diversifying features of college teaching while focusing on key instructional and assessment concerns. It also aims to examine many of the issues unique to the professoriate in the United States. Students who complete the Certificate will have it listed on their transcripts.

Interested students should apply through the Graduate School's Online Application Center. The time limit to complete the certificate requirements is four years.

NOTE: This certificate is not a credential for teacher certification/licensure.

Admissions

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Graduate Certificate in College Teaching involves a shortlist of required courses and an elective related to a specific area of interest. Students also participate in a mentored teaching experience. The coursework includes:

Code and Title	Hours
AHE 602 Problems In Higher Education	3
AHE 603 College & University Teaching	3
AHE 688 Mentored Teaching	3
Please select from the following electives:	3

Educational Leadership, Ed.D.

The EdD is a professional degree designed to meet the needs of individuals seeking to improve their knowledge and skills as educational leaders. The EdD is intended to meet the growing demands that educational leaders must face as they address concerns related to instructional leadership, public accountability, increased globalization, diversity concerns, the emergence of new digital technologies and more. The EdD program is guided by a model of professional inquiry and reflection that emphasizes the development of key decision making skills. Students examine the core content domains related to organizational theory, data-driven decision-making, law, supervision and evaluation, curriculum design, professional development, school economics, budget planning, and other relevant content areas. Knowledge from these domains facilitates the process of framing and critically addressing the problems of practice. Although the primary purpose of the EdD degree is focused on practice and leadership, the research rigor of the EdD experience can also qualify an individual for a position in higher education.

Admissions

Application and Entrance Requirements

Potential applicants should be aware that admission to the UA doctoral programs is a competitive process and that submitting an application does not guarantee admission. In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. An earned Master's degree from an accredited institution.
2. Reference Letters – The application must include three letters of professional and academic reference letters, including one from a current supervisor, as described in the Graduate School Application Process.
3. Purpose, Rationale and Career Statement – A statement of purpose which addresses the following: (1) the student's rationale for applying for the Ed.D.; (2) a statement regarding career/professional goals; and (3) a statement of how the student's rationale and career goals are consistent with the purpose of the Ed.D. degree as articulated by the Department and Program.
4. Writing Sample – An academic or professional writing sample written by the applicant within the last year that provides evidence of the student's writing ability.
5. Professional Experience – It should be noted that for the Ed.D. degree, experience in teaching and/or leadership are key factors considered in the admission process.

6. An updated résumé.
7. Prior to admission, applicants must provide evidence that they have completed courses in the following areas with the following parameters:
 - Special Education Course. Applicants must have taken a special education course with a grade of 'B' or better.
 - Graduate Level Statistics Research Course. In addition, if applicants have not taken BER 540 Statistical Methods In Educ or an acceptable/pre- approved masters-level equivalent within the last four years with a grade of 'B' or better, then if accepted into the doctoral program, students must complete this course before beginning the 12 hour research requirement.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A minimum of 72 semester credit hours beyond the Masters degree is required for completion of the Ed.D. program. These 72 hours must consist of the following courses: Educational Leadership Courses (AEL) = 36 hours; Educational Foundations Courses (BEF) = 12 hours; Educational Research (BER) = 12 hours; Dissertation Hours = 12 hours. It should be noted that depending on coursework prior to admission to the Ed.D. program, that prerequisites for more advanced study in educational leadership may be required.

Educational Leadership (AEL) Course Requirements: *36 hours*: Ed.D. students must successfully complete a total of 36 semester hours to qualify for the degree. These requirements must be distributed as follows:

Core Educational Leadership (AEL) Requirements: *15 hours* – All doctoral students in Educational Leadership are required to take the core AEL course requirements at the University of Alabama. The AEL core consists of following 600-level courses:

Code and Title	Hours
Educational Leadership (AEL) Courses (Required Ed.D. Core Courses)	15
AEL 619 Politics Of Education	
AEL 650 Organizational Theory

AEL 699	Dissertation Research	
Total Hours		72

Footnotes

- ¹ Beyond the AEL 15 hour core requirements, Ed.D. students are required to take 21 hours of AEL electives. All electives must be at the 600 or doctoral level. While the electives available have been identified and scheduled in advance for the Ed.D. cohort, other AEL 600-level courses may be approved by AEL program faculty. Note, this is the exception rather than the rule.
- ² While foundation course requirements for the Ed.D. have been identified and scheduled in advance for each Ed.D. cohort, other BEF 600-level courses may be approved by AEL program faculty. Note, this is the exception rather than the rule. BEF 640 may be replaced with another BEF course depending on availability.
- ³ Prerequisite Statistics Requirement: BER 540 Statistical Methods In Educ – If students have not taken BER 540 or an acceptable/pre- approved masters-level equivalent within the last four years with a grade of 'B' or better, then students must complete this course before beginning the 12 hour research requirement. This prerequisite *cannot* be used to fulfill the 12-hour Research Requirement. While research course requirements for the Ed.D. have been identified and scheduled in advance for each Ed.D. cohort, other BEF 600-level courses may be approved by AEL program faculty. This is the exception rather than the rule.

Transfer Credit

Transfer Parameters on AEL courses – Please note that as of April 2019, the following policies guide the transference of courses into the Ed.D. program:

- Applicants with an Ed.S. in leadership from The University of Alabama – For students with an Ed.S. from The University of Alabama *and* at the discretion of a student's program of study committee, up to 27 hours of the AEL Ed.S. may be counted toward the Ed.D. degree *if* the following parameters are met: (1) the course was completed no more than 5 years from the date of the student's admittance, (2) a grade 'B' or better (note, not a 'B-') was earned in the course, and (3) the course is not an independent study nor a "practicum" type course.
- Applicants with an Ed.S. in leadership not from University of Alabama – (*Effective April 1, 2017*) For students who have completed an Ed.S. at institutions other than the University of Alabama *and* at the discretion of a student's Program of Study committee, up to 27 hours of their Ed.S. program may be counted to the Ed.D. degree *if* the following parameters are met: (1) the institution from which the student took these courses is accredited; (2) the course(s) addresses a major curricular component of the Ed.D. program at the University of Alabama as captured in the Program's current array of doctoral AEL courses; (3) the course(s) was completed no more than 5 years from the date of the student's admittance, (4) a grade 'B' or better (note, not a 'B-') was earned in the course(s), and (5) the course is not an independent study nor a practicum course.
- Applicants with an Ed.S. in a specific curricular area of education, or in Teacher Leadership or School Library Media Specialist rather than in educational leadership.

Transfer Parameters for Research Courses (*Effective April 1, 2012*) – Given the importance of research methods to doctoral study and the propensity of human knowledge to recede if not used on a consistent basis,

faculty and students are strongly encouraged to minimize the number of research courses transferred into the doctoral program. Graduate level statistics courses taught by research faculty at other universities may be accepted for transfer only if the following conditions are met: (a) the institution from which the student took these courses is accredited; (b) the course taken was a doctoral level course; (c) the course was completed no more than 4 years from the date of the student's admittance to the UA doctoral program, and (d) the student received a grade of 'B' or better (note, not a 'B-') in the course.

Graduate Information on Transfer Credit (p. 23).

Doctoral Plan of Study

During their second fall semester of study and no later than the second year of study, doctoral students are required to submit an approved Program of Study (POS). Completed under the guidance of the student's assigned advisor, the POS must be officially approved by this advisor and the program POS committee. The Program of Study functions to: (1) specify in advance program course requirements; (2) plan, chart and monitor a student's progress in the program; and (3) define the parameters regarding the course credits taken at other colleges/universities that may be transferred in to meet doctoral program requirements at the University of Alabama. Note, students are advised against making premature judgments about courses to be transferred in from other institutions and programs. In addition to the guidelines specified in the Program of Study (above), such decisions are based on the professional judgments of tenure-track faculty in the Educational Leadership Program at the University of Alabama-Tuscaloosa campus. Other UA personnel are *not* authorized to advise nor approve a student's Program of Study.

Graduate Information on the Doctoral Plan of Study (p. 23).

Comprehensive Exam

A comprehensive exam designed to assess the breadth and depth of a student's knowledge and skills is administered twice each academic year. It should be noted that the Doctoral Comprehensive Qualifying Exam is not offered in the Summer. Policies governing this exam are as follows:

1. Purpose of Comp Exam: The comprehensive exam is designed to assess the breadth and depth of a student's knowledge and skills based on the entire range of his/her doctoral course work and consistent with the purpose of the Ed.D. degree, as well as the ability to apply what they have learned to investigate and solve problems, and inform leadership.
2. Logistics of Exam: The exam committee chair selects questions and prepares the exam instruction based on the suggestions from the committee. The chair disseminates the exam instruction to the examination proctor, who coordinates the evaluation, and reports the results. Students may choose either to type or handwrite their examination. While it is appropriate for students to seek information from professors on the general domains to be examined, students should not solicit nor be given specific information regarding about the exam. Unless specified otherwise, the exam often takes place in October and March each year. Students are required to take and successfully pass this exam before they can formally begin the dissertation process and register for dissertation research hours (AEL 699 Dissertation Research).
3. Requirements for Taking Exam: Before sitting for the Comprehensive Exam, the following parameters must be met by the student:
 - Approved Program of Study – Students cannot sit for the Comprehensive exam unless his/her Program of Study has been both completed and officially approved.

- Completed all AEL course requirements – Students cannot sit for the Comprehensive Exam unless they have completed all AEL course requirements (AEL core + electives) or are in the last semester of doing so.
- Removal of all Incompletes from Academic Record – Students cannot sit for the Comprehensive Exam unless they have removed all Incompletes ('I') from their academic record.
- Completion of Comprehensive Exam Application Form – Students cannot sit for the Comprehensive Exam unless they have completed and submitted the *Request To Take Comprehensive Exam Form*.

Graduate School information on Comprehensive Exams (p. 23).

Admission to Candidacy Requirements

Students are admitted to candidacy after they pass the comprehensive exam.

Graduate School information on Admission to Candidacy (p. 23).

Continuous Enrollment Policy

For those students pursuing the Doctor of Education (EDD), participation in the cohort experience simultaneously fulfills the residency requirement pending the approval and recommendations of the student's advisor and Program of Study Committee.

Graduate information on Continuous Enrollment (p. 23).

Dissertation Requirements

Dissertation Research Requirements: *12 hours*: Ed.D. students are required to complete a minimum of 12 hours of AEL 699 Dissertation Research. Policies regarding registration for this course are as follows:

1. Passing of Comprehensive Exam required – Students cannot register for AEL 699 Dissertation Research until after they have passed the Doctoral Comprehensive Exam.
2. Continuous enrollment required – Continuous enrollment in AEL 699 Dissertation Research is required until the dissertation is completed. It should be noted that unless they are drawing on the resources of the University and making use of their dissertation advisor, students do not need to register for dissertation hours in the Summer. However, students working with and being advised by their chair during the Summer must register for dissertation hours in the Summer.

Minimum number of hours allowed for registration: *3 semester hours* – While the number of hours per semester will vary depending on the advice to the student given by his/her committee chair in conjunction with the workload of the student, students must register for a minimum of 3 hours per semester. It should further be noted that if students complete their dissertation work prior to having registered for 12 hours of AEL 699 Dissertation Research, that the Registrar's Office will require the student to enroll in and pay for the full 12 hour requirement prior to graduation.

Graduate School information on Dissertation Requirements (p. 23).

Time Limits for Degree Completion Requirements

A minimum of two academic years of graduate study beyond the Masters degree is required for completion of Ed.D. degree. Students accepted into the Ed.D. program in Educational Leadership or in Instructional Leadership at the University of Alabama have nine years from the

semester in which they were admitted to complete the Ed.D. degree. This translates into 27 fall, spring and summer semesters. Students who exceed this limit must request an extension from the Graduate School at the University of Alabama and approval from the student's advisor, the department chair, and from the Graduate School. The Graduate School Catalog at the University of Alabama says: Only under well-documented, extraordinary circumstances beyond the student's control, a student may petition for a one-semester extension to the nine-year time limit that, if recommended by the advisor, the department head and approved by the college dean, and finally by the graduate dean or his/her/their designee. If a student fails to complete all degree requirements within nine years of his/her/their admission to the doctoral program or within a Graduate School approved one-semester extension, the student will be officially suspended from the doctoral program and must reapply for admission.

Educational Leadership, Ed.S.

The EdS degree in educational leadership requires a minimum of 30 hours and provides coursework for those seeking **Class AA Instructional Leader** certification or **Class AA Teacher Leader** certification. Additionally, a concentration in School Library Media Specialist, leading to **Class AA Library Media Specialist** certification, is also offered.

Admission and degree requirements for the Graduate School and for the College of Education are detailed in the relevant sections of this catalog. Admission and degree requirements are subject to change and may be under revision at the time of publication. Please check with the Office of Student Services and Certification or the Department of Educational Leadership, Policy, and Technology Studies for the most current information.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to date information about requirements. A current program checklist may be obtained from the program office. Students should consult their advisors each semester before registering.

Admissions

Class AA Instructional Leader (P-12) Certification

To be considered, applicants must qualify for regular admission to the Instructional Leadership program.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission, applicants must:

1. hold a valid Alabama Class A Professional Educator certificate in Instructional Leadership or a valid Class A Professional Leadership certificate
2. meet one of the following criteria:
 - currently serving as a superintendent, assistant or associate superintendent, principal, assistant principal, supervisor (any subject and/or grade level), administrator of career and technical education, coordinator or evaluator;
 - three years of experience in an instructional leadership position; OR
 - demonstrate each of the abilities in the Class A Instructional Leadership standards

Fingerprinting Requirement

Applicants to a State-approved certification program shall be required to be fingerprinted for a criminal history background check through the Alabama State Department of Education to the Alabama Bureau of Investigation (ABI) and the Federal Bureau of Investigation (FBI) pursuant to ACT 2002-457. This includes all students enrolled in programs that lead to Alabama certification, regardless of whether or not they are pursuing Alabama certification. The background check is completed at the student's expense, and suitability must be documented in the Office of Student Services & Certification before the student is assigned placement in a clinical setting. [Alabama Administrative Code] A candidate whose suitability determination precludes admission to a state-approved teacher education program has the right to due process procedures in accordance with the current Educator Certification Chapter of the Alabama Administrative Code (Revocation and Suspension of Certificates and Unsuitability Determinations).

Changes to Certification Programs

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. In order to maintain compliance with the Alabama Board of Education, admission and program requirements are subject to change. Admission forms and requirements, specific program parameters, departmental policies and contact information can be found at the departmental website.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

This course listing applies to those who begin this program June 1, 2017, and thereafter. A comprehensive exam is required, and candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C. Students should consult with their advisors before registering each semester.

Transfer Credit

Courses taken for Class A certification and credits over six years old cannot be counted toward this degree.

Graduate School information on Transfer Credit (p. 21).

Comprehensive Exam

Students must complete a comprehensive assessment during their last semester of coursework. Assessment dates are announced in the first week of each semester. Assessment structure is based on each student's course of study. Students will have a minimum of 14 calendar days to complete the assessment. Submissions are assessed by members of the program committee.

Graduate School information on Comprehensive Exams (p. 21).

Time Limit for Degree Completion Requirement

Graduate School information on Time Limits (p. 21).

Additional Academic Requirements

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Survey of Special Education Course

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting requirements for unconditional admission to a Class A program on July 1, 2017, and thereafter, must take an approved course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.

Graduate School Deadlines Information

Information on Graduate School Deadlines.

Application for Graduation Information

Information on the Application for Graduation (p. 21).

Certification

To be awarded Alabama Class AA Instructional Leader certification, students must:

- earn a passing score on a comprehensive assessment covering the content of the program,
- maintain a GPA of at least 3.5 (effective July 1, 2017) on all courses with no grade below a C,
- hold a valid, appropriate, prerequisite Alabama certificate, and
- complete the State Department of Education certification application forms

Students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Class AA School Library Media Specialist (Concentration in School Library Media Specialist)

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application requires valid, master's level certification as a School Library Media Specialist and at least two full years of full-time acceptable P-12 professional educational work experience.

Fingerprinting Requirement

Applicants to a State-approved certification program shall be required to be fingerprinted for a criminal history background check through

the Alabama State Department of Education to the Alabama Bureau of Investigation (ABI) and the Federal Bureau of Investigation (FBI) pursuant to ACT 2002-457. This includes all students enrolled in programs that lead to Alabama certification, regardless of whether or not they are pursuing Alabama certification. The background check is completed at the student's expense, and suitability must be documented in the Office of Student Services & Certification before the student is assigned placement in a clinical setting. [Alabama Administrative Code] A candidate whose suitability determination precludes admission to a state-approved teacher education program has the right to due process procedures in accordance with the current Educator Certification Chapter of the Alabama Administrative Code (Revocation and Suspension of Certificates and Unsuitability Determinations).

Changes to Certification Programs

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. In order to maintain compliance with the Alabama Board of Education, admission and program requirements are subject to change. For the most current information, please check with the Office of Student Services and Certification or the Program in School Library Media.

Curricular Requirements

A minimum of 30 hours of appropriate work beyond the MA degree and a passing score on a comprehensive assessment are required for the educational specialist degree.

This course listing applies to candidates having appropriate prior certification. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C. At least 15 semester hours of the 30 semester hour total must be at the 600-level. All requirements must be completed during the 6 years preceding the date on which the degree is to be awarded. Students should consult with their advisors before registering each semester.

Certification

To be awarded Alabama Class AA School Library Media Specialist certification, students must:

- earn a passing score on a comprehensive assessment documenting mastery of the curriculum
- maintain a GPA of at least 3.5 on all courses with no grade below a C
- hold valid, prerequisite Alabama Class A School Library Media Specialist certification
- complete an application for certification through the Alabama State Department of Education

Students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Educational Leadership, MA

A Master of Arts degree (30 semester hours) in educational leadership leading to Alabama Class A Instructional Leader certification provides students with initial certification in Alabama for Instructional Leadership in P-12 schools. The coursework provides students with a thorough knowledge and understanding of the central concepts, tools of inquiry, and structures in the field of instructional leadership. Candidates learn to work with students, families, and communities in ways that reflect the professionalism and expertise expected of educational leaders.

The program content is consistent with state and national standards. A *reduced-hour* option to earn Class A Instructional Leader certification is available for applicants who qualify.

An Overseas master's degree program in Educational Leadership is offered to overseas students. The Overseas program does not lead to professional licensure or certification.

The Graduate Catalog is published annually. For certification programs, State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to date information about requirements. A current program checklist may be obtained from the program office. Students should consult their advisors each semester before registering.

Admissions

See the Admission Criteria section of this catalog for more information.

Admission requirements for the MA in Educational Leadership with Class A Instructional Leader certification

Applicants must earn regular admission to the Instructional Leadership program. In addition to meeting admission requirements of the Graduate School and the College of Education, applicants must meet the following additional requirements for admission to the Educational Leadership/MA program leading to Class A Instructional Leader certification:

- a valid Alabama Class B professional educator certificate in a teaching field or a valid Alabama Class A professional educator certificate in a teaching field or instructional support area,
- Experience Option One: a minimum of three full years (or six full semesters) of full-time, acceptable professional educational experience in a P-12 setting, which must include at least one full year of full-time P-12 classroom teaching experience,

OR

Experience Option Two: Alabama Class A certification as a library media specialist or school counselor, seven full years of full-time employment, in the same school system, as a library media specialist or school counselor in a P-12 setting if admitted Spring 2022 or thereafter,

- the submission of a portfolio before the interview,
- an application to the educational leadership department,
- passing an interview conducted by the program committee, and
- submission of a writing sample

The application portfolio must include:

- a. three letters of recommendation, one of which must be from the applicant's principal or direct supervisor; applicants applying under Experience Option Two must provide a written recommendation from the current employing superintendent,
- b. a completed copy (all forms) of the most recent performance evaluation including the professional development component, if available,
- c. evidence of ability to improve student achievement,
- d. evidence of leadership and management potential, including evidence of most recent accomplishments in educational leadership,
- e. a summary of the candidate's reasons for pursuing the certification in instructional leadership, and
- f. a summary of what the candidate expects from the certification program.

Fingerprinting Requirement

Applicants to a State-approved certification program shall be required to be fingerprinted for a criminal history background check through the Alabama State Department of Education to the Alabama Bureau of Investigation (ABI) and the Federal Bureau of Investigation (FBI) pursuant to ACT 2002-457. This includes all students enrolled in programs that lead to Alabama certification, regardless of whether or not they are pursuing Alabama certification. The background check is completed at the student's expense, and suitability must be documented in the Office of Student Services & Certification before the student is assigned placement in a clinical setting. [Alabama Administrative Code]

A candidate whose suitability determination precludes admission to a state-approved teacher education program has the right to due process procedures in accordance with the current Educator Certification Chapter of the Alabama Administrative Code (Revocation and Suspension of Certificates and Unsuitability Determinations).

Admission Requirements for the Reduced-Hour Option leading to Class A Instructional Leader (certification only)

Applicants must earn regular admission to the Instructional Leadership program. Individuals holding a valid, Alabama Class A professional educator certificate may apply for admission to the reduced-hour option to pursue certification only.

Minimum requirements include:

- a valid [Alabama](#) Class A professional educator certificate in a teaching field or instructional support area,
- a minimum of three full years (or six full semesters) of full-time, acceptable professional educational experience in a P-12 setting, which must include at least one full year of full-time P-12 classroom teaching experience,
- [Experience Option One](#): a minimum of three full years of full-time, acceptable professional educational experience in a P-12 setting, which must include at least one full year of full-time P-12 classroom teaching experience,

OR

[Experience Option Two](#): Alabama Class A certification as a library media specialist or school counselor, seven full years of full-time employment, in the same school system, as a library media specialist or school counselor in a P-12 setting if admitted Spring 2022 or thereafter,

- a graduate GPA of 3.0 or above on a 4.0 scale,
- submission of a portfolio before participation in the assessment process, which will include an interview, and
- submission of a writing sample.

The application portfolio must include:

- three letters of recommendation, one of which must be from the applicant's principal or direct supervisor; applicants applying under Experience Option Two must provide a written recommendation from the current employing superintendent,
- a completed copy (all forms) of the most recent performance evaluation including the professional development component, if available,
- evidence of ability to improve student achievement,

d. evidence of leadership and management potential, including evidence of most recent accomplishments in educational leadership,

e. a summary of the candidate's reasons for pursuing the certification in instructional leadership, and

f. a summary of what the candidate expects from the certification program.

Fingerprinting Requirement

Applicants to a State-approved certification program shall be required to be fingerprinted for a criminal history background check through the Alabama State Department of Education to the Alabama Bureau of Investigation (ABI) and the Federal Bureau of Investigation (FBI) pursuant to ACT 2002-457. This includes all students enrolled in programs that lead to Alabama certification, regardless of whether or not they are pursuing Alabama certification. The background check is completed at the student's expense, and suitability must be documented in the Office of Student Services & Certification before the student is assigned placement in a clinical setting. [Alabama Administrative Code]

A candidate whose suitability determination precludes admission to a state-approved teacher education program has the right to due process procedures in accordance with the current Educator Certification Chapter of the Alabama Administrative Code (Revocation and Suspension of Certificates and Unsuitability Determinations).

Admission Requirements for the Non-Certification Overseas Program for Educational Leadership, MA

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

To be considered for regular admission to an International Programs graduate program in the College of Education, a student must meet the minimum Graduate School admission requirements

Curricular Requirements

MA in Educational Leadership with Class A Instructional Leader certification

Individuals must be unconditionally admitted to the Class A Instructional Leader program before enrolling in any leadership courses in the program.

This course listing applies to those who begin this program June 1, 2017. A minimum of 30 hrs of appropriate graduate work, successful completion of a comprehensive exam, and passing scores on the appropriate Praxis subject assessment are required. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C.

Transfer Credit

In compliance with regulations established by the Alabama State Department of Education and the Alabama Administrative Code, coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification.

Graduate School information on Transfer Credit (p.).

Comprehensive Exam

Graduate School information on Comprehensive Exams (p.).

Fieldwork/Practicum/Internship Requirements

For certification programs, field experience objectives, including progression from observation through participation to leadership behaviors are embedded in each course and assessed by the faculty member of record for each course. This collaborative model requires that LEAs provide release time for candidates and for universities to work with LEAs so that the candidate's experiences are comprehensive and valuable. The internship experiences are the total sum of practical experiences, either field or clinical, as part of every course taken for preparation, plus a residency. The residency is uninterrupted service in an active P-12 school with students present for the equivalent of ten full days. For students in the Class A Instructional Leader program, internships are coordinated through the Department of Educational Leadership, Policy, and Technology Studies.

Time Limits for Degree Completion

Graduate School information on Time Limits (p.).

Additional Academic Requirements

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Survey of Special Education Course

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting

requirements for unconditional admission to a Class A program on July 1, 2017, and thereafter, must take an approved course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.

Praxis Requirement

For the Class A Instructional Leader program (MA and reduced-hour option), a passing score on the appropriate Praxis subject assessment is required. This requirement does not apply to the Overseas program.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Application for Graduation Information

Information on the Application for Graduation (p.).

Certification

To be awarded Alabama Class A Instructional Leader certification, students must:

- maintain a GPA of at least 3.25 (effective July 1, 2017) on all courses with no grade below a C,
- receive a passing score on a comprehensive assessment documenting mastery of the curriculum,
- successfully complete the internship and residency,
- receive a passing score on the required Praxis subject assessment,
- complete a survey of special education course (SPE 300 Survey Spe Accomd Stratg or SPE 500 Intro Exc Childr/Youth) or its equivalent.

All students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education.

The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

The Overseas program does not lead to professional certification.

Educational Leadership, Ph.D.

The purpose of the Doctor of Philosophy (Ph.D.) degree programs is to prepare students for a career in the professoriate as well as for work as a policy analyst, researcher, consultant, or school practitioner. The Ph.D. degree in Educational Leadership requires extensive contact with and immersion in the university research and teaching culture.

Both the Ph.D. and Ed.D. programs emphasize the development of theoretical thinking and knowledge development in the field of educational leadership.

Admissions

Doctoral students are admitted annually. Each applicant should submit a complete application for admission before the deadline of **April 1** for fall admission. (Applications past the deadline will be considered if space allows or due to exceptional circumstances).

Potential applicants should be aware that admission to the UA doctoral programs is a competitive process and that submitting an application does not guarantee admission. In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A Master's Degree – An earned master's degree from an accredited institution
- Reference Letters – The application must include three letters of professional and academic reference, including one from a current supervisor.
- Purpose, Rationale, and Career Statement – Students who apply to the Ph.D. degree must provide a convincing written rationale as to why they wish to pursue this degree, how its focus/purposes are consistent with their career goals, and how they plan to meet the on-campus residency requirement. Applicants whose interests are deemed inconsistent with this focus/purposes of Ph.D. degree—yet who are otherwise qualified for doctoral study—will be encouraged to apply to the Department's Ed.D. program. This purpose statement must address the following: (1) the student's rationale for applying for the Ph.D.; (2) a statement regarding career and professional goals; and (3) a statement of how the student's rationale and career goals are consistent with the purpose of the Ph.D. degree as articulated by the Department and Program.
- Professional Experience – While for the Ed.D. degree, experience in teaching and or leadership are key factors considered in the admission process, these factors are desirable yet less important for the Ph.D. degree.
- Writing Sample – Applicants are required to include a recent sample (within the last year) of their academic or professional writing.
- An updated resume.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A minimum of 69 semester credit hours beyond the Master's degree is required for completion of the Ph.D. program. These hours are distributed as follows:

- Students must successfully complete the 15-hour AEL Core plus 9 additional hours of AEL electives.
- A 12-hour set of Education Foundation courses is also required. Students may take any graduate-level BEF or BEP course and/or any non-research methods courses outside of the AEL Program to fulfill this requirement.
- Students must also complete 15 semester hours of Educational Research (BER) and enroll in a minimum of 18 hours of dissertation AEL 699 Dissertation Research.

Prerequisites

Prior to admission, applicants must provide evidence that they have completed a course in the following areas with the following parameters:

- Special Education Course – Applicants must have taken a special education with a grade of 'B' or better.
- Graduate Level Statistics Research Course – In addition, if applicants have not taken BER 540 – Quantitative Methods I (Intro to Statistical Methods) or an acceptable pre-approved masters-level equivalent within the last four years with a grade of 'B' or better, then if accepted into the doctoral program, students are required to complete this course before beginning the 12-hour research requirement.

Transfer Credit

Transfer Parameters on AEL courses – Please note that as of Fall 2019, the following policies guide the transference of courses into the Ph.D. program:

- Applicants with an Ed.S. Degree from The University of Alabama – For students with an Ed.S. from the University of Alabama and at the discretion of a student's advisor and program of study committee, up to 24 hours (including Foundation and Research courses) of the AEL Ed.S. may be counted toward the Ph.D. degree upon advisor approval if the following parameters are met: (1) the course was completed no more than 5 years from the date of the student's admittance, and (2) a grade 'B' or better (note, not a 'B-') was earned in the course.
- Applicants with an Ed.S. Degree not from University of Alabama – (Effective April 1, 2017) For students who have completed an Ed.S. at institutions other than the University of Alabama and at the discretion of a student's Advisor and Program of Study committee, up to 24 hours (including Foundation and Research courses) of their Ed.S. program may be counted toward the Ph.D. degree upon advisor approval if the following parameters are met: (1) the institution from which the student took these courses is accredited; (2) the course(s) addresses a major curricular component of the Ph.D. program at the University of Alabama as captured in the Program's current array of doctoral AEL courses; (3) the course(s) was completed no more than 5 years from the date of the student's admittance, and (4) a grade 'B' or better (note, not a 'B-') was earned in the course(s).

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study Requirement

During their second fall semester of study and no later than the second year of study, doctoral students are required to submit an approved Program of Study (POS). Completed under the guidance of the student's assigned advisor, the Program of Study must be officially approved by his/her/their advisor and the student's program POS committee. The

Program of Study functions to: (1) specify in advance program course requirements; (2) plan, chart and monitor a student's progress in the program; and (3) define the parameters regarding the counting of course credits taken at other colleges or universities to meet doctoral program requirements at the University of Alabama. Students are advised against making premature judgments about courses to be transferred in from other institutions and programs. In addition to the guidelines specified by the Program of Study, such decisions are based on the professional judgments of tenure-track faculty in the Educational Leadership Program at The University of Alabama-Tuscaloosa campus. Personnel at the UA-Gadsden are not authorized to provide advice or to approve a student's Program of Study.

Graduate School information on the Doctoral Plan of Study (p. 23).

Comprehensive Exams

A comprehensive exam designed to assess the breadth and depth of a student's knowledge and skills is administered twice each academic year. The Doctoral Comprehensive Qualifying Exam is not offered in the summer.

Purpose of Comp Exam: The comprehensive exam is designed to assess the breadth and depth of a student's knowledge and skills based on his/her doctoral course work and consistent with the purpose of the Ph.D. degree, as well as the ability to apply what they have learned from their coursework to investigate and solve problems, and inform leadership.

Logistics of Exam: The exam committee chair selects questions and prepares the exam instruction based on the suggestions from the committee. The chair disseminates the exam instruction to the examination proctor, who coordinates the evaluation and reports the results. Students may choose either to type or handwrite their examination. While it is appropriate for students to seek information from professors on the general domains to be examined, students should not solicit nor be given specific information regarding about the exam. Unless specified otherwise, the exam often takes place in October and March each year. Students are required to take and successfully pass this exam before they can formally begin the dissertation process and register for dissertation research hours (AEL 699 Dissertation Research).

Requirements for Taking Exam: Before sitting for the Comprehensive Exam, the following parameters must be met by the student:

- Approved Program of Study – Students cannot sit for the Comprehensive exam unless a Program of Study has been both completed and officially approved.
- Completed all AEL course requirements – Students cannot sit for the Comprehensive Exam unless they have completed all AEL course requirements (AEL core + electives) or are in the last semester of doing so.
- Removal of all Incompletes from Academic Record – Students cannot sit for the Comprehensive Exam unless they have removed all Incompletes ('I') from their academic record.
- Completion of Comprehensive Exam Application Form – Students cannot sit for the Comprehensive Exam unless they have completed and submitted the Request To Take Comprehensive Exam Form.

Higher Education Administration, Ed.D.

The Higher Education Administration Program offers the EdD program in Tuscaloosa. The EdD degree provides academic preparation and professional development for those individuals who have or will assume upper-level administrative and executive roles in two- and four-year colleges and universities, state and federal postsecondary education agencies and other education-related organizations. The curriculum is designed around the key competencies necessary to assume a leadership role, with courses in program assessment and evaluation, policy, finance, organizational change and student affairs administration.

The EdD program is also offered in an executive format. The Executive EdD program is designed to meet the unique needs of experienced professionals seeking a doctorate in higher education. The program helps students develop the knowledge, skills, and abilities necessary to advance in leadership positions by combining theoretically-rich studies with an applied research approach. The Executive EdD is a cohort program that allows students to build an immediate network of colleagues. Intensive coursework and a carefully-structured dissertation process allow students to complete the degree in nine semesters while maintaining their professional positions. The Executive EdD program's alternative format meets all the expectations of a rigorous higher education program, including the credit hour and degree requirements stipulated by the College of Education and the Graduate School.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Higher Education Administration Application
- Three letters of recommendation

- A one-page statement of purpose for pursuing the degree
- Vita or resume
- Writing Sample: A five-page writing sample describing a problem that faces higher education today (nationally), analyzing salient points of the issue, and evaluating potential solutions. The sample should demonstrate formal writing and should include appropriate citations. Applicants may submit an academic paper in lieu of the five-page essay, preferably on a recent topic related to higher education.

Deadlines

- The application deadline for the Main Campus program is January 15th.
- The application deadline for the Executive Ed.D. program is February 15th.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The EdD requires 66 semester hours beyond the master's degree. These 66 semester hours include at least 54 hours of coursework and 12 hours of dissertation research. The plan of study also includes 12 semester hours in theoretical foundations and a minimum of 12 semester hours in research methods.

The Executive Ed.D. program is an accelerated program designed to be completed in 3 academic years (9 semesters). Students enroll in 9 hours of coursework per semester for 6 semesters and 12 dissertation hours during the final year.

Doctoral Plan of Study Requirement

Graduate School information on the Doctoral Plan of Study (p. 23).

Comprehensive Exams

Students take the comprehensive exam when they have completed their required coursework for the EDD program. Doctoral students complete a take-home exam question which is followed by an oral defense at the end with their dissertation chair and one other faculty member.

Graduate School information on Comprehensive Exams (p. 23).

Admission to Candidacy Requirements

Once students pass the comprehensive exam, they will be considered a candidate and can enroll in dissertation hours, based on the approval of faculty.

Graduate School information on Admission to Candidacy (p. 23).

Continuous Enrollment Policy

Once a student begins taking dissertation hours, continuous enrollment must be maintained until the dissertation project is completed and approved by the Graduate School.

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

Ed.D. students complete a dissertation, with the guidance of a faculty chair during the third year of the program. A student should invite a faculty member to chair and secure her/his/their agreement to do so prior to signing up for that faculty member's section of AHE 699 Dissertation Research. Once a student begins taking dissertation hours, continuous enrollment must be maintained until the dissertation project is completed and approved by the Graduate School. Students should not enroll for hours during the summer without having gained prior approval from the dissertation chair.

The dissertation committee consists of five faculty: a dissertation chair and four members. While the dissertation chair may be a member of another program doctorate in the College of Education, students are encouraged to work with a Higher Education faculty member when possible. At least three members of the committee (may include chair) must be Higher Education Faculty members. At least one member must be from outside of the Department of Educational Leadership, Technology, and Policy Studies.

The dissertation proposal generally comprises the first three chapters of the dissertation. The student works carefully with a dissertation chair and submits work to a committee for review. The committee must have 10 working days prior to the proposal defense to review the document. An oral defense follows, with all committee members present to review and critique the proposal.

The dissertation defense comprises all chapters of a dissertation. The committee must have 10 working days prior to the dissertation defense to review the document. An oral defense follows, with all committee members present to review and critique the proposal.

Higher Education Administration, MA

The Master of Arts degree in higher education is offered on the Tuscaloosa campus and online. The Master of Arts is a 36-hour degree program designed for students seeking to enter into a range of professional careers in postsecondary education. The program follows standards and guidelines taken from the Council for the Advancement of Standards in Higher Education, and provides courses in foundational studies, professional studies, supervised practice, research methodology and elective study.

The campus program partners with staff in Student Life and Academic Affairs to provide professional development opportunities inside and outside of the classroom experience. An internship is required for most students in the campus program. The online program offers courses in grant writing, technology, and higher education assessment.

Admission Requirements

See the Admission Criteria section of this catalog for more information.

Admission Requirements for Higher Education Administration, MA (Main Campus)

Application deadline: January 15

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- three letters of recommendation
- a one-page statement of purpose for pursuing the degree
- updated vita or résumé
- a five-page writing sample describing a problem that faces higher education today (nationally), analyzing salient points of the issue, and evaluating potential solutions. The sample should demonstrate formal writing and should include appropriate citations. Applicants may submit an academic paper in lieu of the five-page essay, preferably on a recent topic related to higher education.

Admission Requirements for Higher Education Administration, MA (Distance Learning - Online)

Application Deadlines:

- July 15 - fall admission
- April 15 - summer admission
- November 1 - spring admission

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- three letters of recommendation
- a one-page statement of purpose for pursuing the degree

- updated vita or résumé
- a five-page writing sample describing a problem that faces higher education today (nationally), analyzing salient points of the issue, and evaluating potential solutions. The sample should demonstrate formal writing and should include appropriate citations. Applicants may submit an academic paper in lieu of the five-page essay, preferably on a recent topic related to higher education.

Curriculum Requirements

Higher Education Administration, MA (Main Campus)

One plan is offered for the master's degree. Candidates for the master's degree must earn a minimum of 36 total semester hours of credit.

The Capstone Seminar in Higher Education (AHE 593 Student Affairs Capstone Sem) is the required culminating experience for the program. The 36-hour degree program is designed for students seeking to enter a range of professional careers in postsecondary education. The program includes courses in foundational studies, professional studies, supervised practice, and research methods. As a rule, all master's students are required to complete an internship and a capstone seminar.

Unless substitutions are approved by the student's faculty advisor, all of the following courses are required for the award of the MA in Higher Education Administration.

All candidates will be required to participate successfully in a seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Higher Education Administration, Ph.D.

The Higher Education Administration Program offers a PhD program in Tuscaloosa only.

The PhD degree prepares students to assume scholarly roles in higher education. The PhD program emphasizes working with faculty in one-on-one settings with students participating in a mentored teaching and research sequence. Students investigate and contribute to a body of knowledge that informs higher education policy and practice at institutional, statewide, national, and international levels.

Admission Requirements

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Higher Education Administration application
- Three letters of recommendation
- A one-page statement of purpose for pursuing the degree

- Vita or resume
- Writing Sample: A five-page writing sample describing a problem that faces higher education today (nationally), analyzing salient points of the issue, and evaluating potential solutions. The sample should demonstrate formal writing and should include appropriate citations. Applicants may submit an academic paper in lieu of the five-page essay, preferably on a recent topic related to higher education.

Application Deadline

- Doctor of Philosophy (PhD) in Higher Education: January 15. Qualified students interested in graduate assistantships should have all application materials by this date.

See the Admission Criteria section of this catalog for more information.

Curriculum Requirements

The PhD requires 78 semester hours beyond the master's degree. These 78 semester hours include at least 54 hours of coursework and 24 hours of dissertation research. The program of study also includes 12 semester hours in theoretical foundations and a minimum of 12 semester hours in research methods.

PhD students also are required to complete mentored teaching and mentored research courses. In mentored teaching, students are required to assist a higher education faculty member with course instruction. In mentored research, students work individually with a higher education faculty member to complete a research project.

Code and Title	Hours

Information on the Application for Graduation (p. 23).

Instructional Leadership, Ed.D.**Instructional Leadership, EdD–Nurse Education**

The UA College of Education and the Capstone College of Nursing have combined to offer a Doctor of Education in Instructional Leadership with a concentration in nurse education. This low-residency program is designed to prepare future faculty with the teaching and research skills necessary for positions in community colleges, four-year colleges, and universities.

Working within annual cohorts and employing distance-based and on-campus instruction, students typically complete coursework requirements and the dissertation study in 5 years.

The curriculum supports the competencies for nurse educators specified by the National League for Nursing (NLN) and the Southern Regional Education Board Council on Collegiate Education in Nursing (SCCEN).

Admissions

See the Admission Criteria section of this catalog for more information.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- An unencumbered RN license in the state in which the student will practice
- A BSN degree from an accredited institution
- An M.S.N. degree or equivalent degree from an accredited institution
- A resume
- Three letters of recommendation
- A sample of academic writing (e.g., a scholarly paper presented in a previous graduate course that demonstrates knowledge of an area, powers of organization, command of language, and communication skills.)

The fall admission deadline is July 1st. An admissions committee comprised of nursing and education faculty selects the best qualified applicants based upon the following materials.

Curricular Requirements

The Doctorate of Education requires a minimum of 72 credit hours beyond the master's degree (60 hours of coursework and 12 hours of dissertation study). Students must also meet all Graduate School degree and dissertation requirements.

The 60 hours of required coursework is normally completed in three years of full-time study through a blended format of online courses and spring-fall campus meetings (scheduled once a semester on Friday evenings and Saturdays). Summer classes are delivered online. A comprehensive examination must be passed and the dissertation completed no later than nine years after first enrollment.

Transfer Credit

Due to the cohort-based model and the unique nature of specific MSN degrees, transfer credits are reviewed on a student-by-student basis.

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study Requirement

A Plan of Study form will be submitted to the Program Coordinator and the Graduate School after completion of the first year of coursework. Students will work with the Coordinator of Student Recruitment to submit this form.

Graduate School information on the Doctoral Plan of Study (p. 23).

Comprehensive Exams

A comprehensive exam is used to measure command of the content presented in the coursework portion of the degree. Students will complete the comprehensive exam during their final summer of coursework. Students will have one month to complete the exam, which consists of a written research paper followed by an oral defense. Upon successful completion, the student commences dissertation study.

Graduate School information on Comprehensive Exams (p. 23).

Admission to Candidacy Requirements

Students will be admitted to candidacy once they pass their proposal defense. Students will work with the Coordinator of Student Recruitment to complete the Admission to Candidacy paperwork.

Graduate School information on Admission to Candidacy (p. 23).

Continuous Enrollment Policy

During dissertation research, continuous registration is required for a minimum of 3 hours per term (fall and spring) until graduation. Registration is also necessary for summer defenses and/or graduation.

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

Purpose. A dissertation—demonstrating the ability to conduct independent research, analyze, and present findings—must be prepared on a topic in the area of Nursing Education. The subject of the dissertation must be approved by the student's dissertation committee and should constitute an original contribution to the field of study. A dissertation committee will be comprised of two education faculty, two nursing faculty, and one external member. Students will choose their committee members during their final semester of coursework.

Policy. The dissertation progresses through the following benchmarks:

(i) *Prospectus.* The dissertation committee meets to review a brief outline (typically around 20 pages) of the proposed research project. Upon approval, the Doctoral Dissertation Committee Appointment Form is completed in the Graduate School portal.

(ii) *Proposal.* The dissertation committee meets to review the first three chapters of the dissertation manuscript. Where appropriate, this should include the justification and design of any proposed field research. Upon approval, the **Admission to Candidacy** form is signed and submitted to the Graduate School. The student can then seek the IRB approval necessary to conduct their research.

(iii) *Defense.* The dissertation committee meets to review the final manuscript, including analysis of the study's findings and discussion of their significance in light of current research and policy. Upon approval, the **Committee Acceptance** form is signed and submitted to the Graduate School. The completed and edited dissertation is then uploaded to the ETD website.

Graduate School information on Dissertation Requirements (p. 23).

Time Limit for Degree Completion Requirements

Students must complete the degree within nine (9) years.

Graduate School information on Time Limits (p. 23).

Student Progress Requirements

Students are expected to complete their coursework in conjunction with their cohort within three years. An alternate plan of study can be created under extenuating circumstances. Lack of satisfactory progress during dissertation hours will result in a failing grade. Students are required to pass 12 hours of dissertation research for graduation.

Instructional Leadership, Ph.D.

Instructional Leadership – Instructional Technology Concentration (PhD)

The Instructional Leadership PhD with a concentration in Instructional Technology is dedicated to the improvement of professional practice and to the work of school engagement. The PhD prepares individuals to conduct original research and to use current and emerging technologies and instructional strategies to help develop effective learning environments. The degree prepares individuals to assume positions tied to the preparation of researchers in the area of educational technology and to the design of instructional work in school and college environments, as well as to positions in business and industry settings.

Instructional Leadership – Social and Cultural Studies Concentration (PhD)

The Instructional Leadership PhD with a concentration in Social and Cultural Studies is dedicated to the improvement of professional practice and to the work of school engagement. The program aims to develop scholars, researchers, and instructional leaders for schools, colleges, and other educational institutions. The work of the program is guided by the principles of reflective practice, professional growth, democratic action, and individual responsibility. The overarching goal is to prepare theoretically informed leaders with a critical understanding of social and cultural issues necessary to enact insightful organizational, curricular, and pedagogic decisions within their respective institutional settings.

Doctoral Degrees

The PhD in instructional leadership prepares educational leaders, scholar practitioners, policy makers, professors, and researchers who can use—and contribute to—knowledge of learning processes, pedagogy, and the social foundations of schooling. Courses focus on curriculum, professional development, supervision, learning, pedagogy, and questions of diversity and social justice. Throughout, the overarching aim is to develop the skills of inquiry and reflective decision making needed to construct ethical and politically informed judgments that advance education while respecting diversity, honoring difference, and promoting social justice. The PhD offers two concentrations: instructional technology (preparing future researchers, teachers, and corporate trainers in the field of instructional design and e-learning) and social and cultural foundations of education (preparing students for academic positions in higher education or public policy and advocacy groups). Students enrolled in the PhD must select one of the concentrations.

Instructional Leadership, PhD (Instructional Technology)

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- An earned master's degree in any field.
- A curriculum vita or resume
- A writing sample.

During the application process, applicants should select the Instructional Technology concentration.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

When admitted to the program, applicants are assigned a temporary advisor—they may continue to work with this person or select another advisor when they get to know the faculty. Advisors work with students to complete a Program of Study. This is your degree plan; it specifies the courses you must complete in order to graduate.

The Instructional Leadership PhD with an Instructional Technology concentration is comprised of 60 hours of coursework and 18 hours of dissertation credit.

Dissertation Research	
AIL 699 Dissertation Research	18
Total Hours	78

Transfer Credit

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study Requirement

Within the first 30 hours of study, copies of students' Program of Study Form must be submitted to the department and to the Graduate School. Any changes to the program of study must be made by completing a course substitution form.

Graduate School information on the Doctoral Plan of Study (p. 23).

Comprehensive Exams

The comprehensive examination consists of the development of an electronic portfolio. The portfolio is due at the end of coursework and must be successfully passed before having a dissertation proposal meeting. A student does not have to be enrolled in courses when completing the comprehensive examination (i.e., a student might finish courses in the spring, planning to start dissertation hours in the fall and complete the comprehensive examination during the summer).

Graduate School information on the Comprehensive Exam (p. 23).

Admission to Candidacy Requirements

A student is admitted to candidacy after successfully passing the comprehensive examination electronic portfolio requirement.

Graduate School information on Admission to Candidacy (p. 23).

Continuous Enrollment Policy

Dissertation (AIL 699 Dissertation Research, 18 hours). Continuous enrollment of a minimum of 3 hours during fall and spring semesters is required until the minimum 18 hours of dissertation are reached. Students may then register for one dissertation hour each fall and spring until the dissertation is complete. Summer registration for AIL 699 is only required if a student is defending the dissertation and/or graduating during the summer semester.

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

When a student has completed coursework, they will select a dissertation committee chair and send a request to that professor, who must be in the ELPTS department and a full member of the graduate faculty. If that professor accepts, they will help the student select the additional committee members. It is the student's responsibility to contact the committee members and request that they serve on the student's committee. If the professor requested as the chair does not accept, then the student will make the request of another professor. The student will enroll for dissertation hours under their dissertation committee chair's section following the Graduate School's requirements for continuous enrollment.

Some dissertation chairs in the Instructional Technology program require a prospectus while others do not; it is at the discretion of the dissertation committee chair. The student will work with their committee chair to develop their prospectus and/or proposal and final dissertation document and send it to the other committee members once the chair has approved it. Committee members must have the document two weeks before a meeting. It is the student's responsibility to contact the dissertation committee members to set up a meeting once the chair has approved a meeting and provided times they are available.

Once a student has had their proposal approved by the dissertation committee, they will submit their protocol to IRB. Once a student has successfully defended their final dissertation, they will hire an editor recommended by their chair to check the final document for APA, grammar and UA requirements. When the dissertation chair approves the final document, a student will then submit the document to ProQuest.

Graduate School information on Dissertation Requirements (p. 23).

Time Limits for Degree Completion Requirements

All requirements must be completed within nine years. Credit earned in the six years preceding enrollment in the doctoral program may be applied.

The minimum period in which the doctoral degree can be earned is three full academic years of graduate study.

Graduate School information on Time Limits (p. 23).

Instructional Leadership, PhD (Social and Cultural Studies)

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A Curriculum Vitae
- Three (3) letters of recommendation
- A writing sample

An entrance exam is not required for the application to the Instructional Leadership PhD with concentration in Social and Cultural Studies.

However, students who have already taken the GRE or MAT and scored at or above the 50th percentile are encouraged to submit their results to supplement their application.

Applicants with grade point averages below 3.0, but not below 2.5, may be considered for Admission with Permission to Continue

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The doctoral program requires a minimum of 66 credit hours beyond the master's degree or 84 hours beyond the bachelor's degree. A typical 66-credit hour PhD is comprised of 48 hours of coursework (including a minimum of 18 hours of BEF classes), a comprehensive examination, 18 hours of dissertation credit, and the University residency requirement.

In consultation with their advisors, students are encouraged to seek relevant courses outside the program and College to fulfill both

disciplinary and elective needs according to their academic interests and professional goals.

A majority of courses in the program of study must be at the 600 level or higher.

Code and Title	Hours
Required Foundations Courses	
BEF 644 Phil Science Rel Ed Res	3
AEL/BEF 667 Multicult Soc Ed Leadshp	3
AEL/BEF 681 Ethics and Education	3
BEF 690 Social Theory Analysis	3
Additional Foundations Courses	21
Students are encouraged to complete at least one course in each of the constituent program disciplines. Pre-approved courses include the following:	
Sociology: BEF 507/607, BEF 641, BEF 650	
History: BEF 503, BEF 640, BEF 653	
Philosophy: BEF 504, BEF 642, BEF 654	
Elective Courses	
Remaining hours of coursework may come from any disciplinary course not taken from above and/or the following elective courses:	
BEF 534 Multicultural Education	
BEF 575 Found Educn Through Film	
BEF 585 Language Politics & Education	
BEF 607 Readings In Soc Of Ed	
BEF 639 Educ Theory And Policy

AEL 695 Sem Curriculum Leadershp	
Research Courses (quantitative and/or qualitative research methods)	15
Dissertation	18
AEL 699 Dissertation Research (Continuous enrollment is required until the dissertation is complete. The number of hours will vary depending on the workload of the student and professor.)	
Total Hours	66

Transfer Credit

Up to 21 hours of required course work may be transferred if credit meets conditions stated in the Doctoral Degrees section of the Graduate Catalog. Use the Transfer Graduate Credit Form.

Graduate School information on Transfer credit Information (p. 23) .

Doctoral Plan of Study Requirement

When admitted to the program you will be assigned a temporary advisor—you may continue to work with this person or select another advisor when you get to know the faculty. One of the first projects, usually completed in the first or second semester, is to form a Program Advisory Committee and complete a Program of Study Form. This is your degree plan; it lays out the courses you must complete in order to graduate.

- Within your first 30 hours of study, copies of your Program of Study Form must be submitted to the department and to the Graduate

School. Any changes to the program of study must be made by completing a course substitution form.

- Your Program of Study Form must indicate how you will meet the University Residency Requirement.

Graduate School information on the Doctoral Plan of Study (p. 23).

Comprehensive Exams

Upon completion of coursework or during their last semester of coursework, students may complete a traditional, on-site exam or pursue a publication option to fulfill the exam requirement. Students completing the on-site exam must also complete an oral defense. This requirement will be waived if the student has presented their work at two approved conferences.

Graduate School information on the Comprehensive Exam (p. 23).

Admission to Candidacy Requirements

Students will be admitted to doctoral candidacy upon successful completion of the comprehensive exam.

Graduate School information on Admission to Candidacy (p. 23).

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

Students will choose their dissertation chair and, in consultation with their chair, form a 5 member committee. The committee must include one member outside the student's home department.

Proposal. The dissertation proposal normally constitutes the first three chapters of the dissertation study. Typically, this comes after the student has met to discuss a 12-15 page prospectus.

Graduate School information on Dissertation Requirements (p. 23).

Time Limit for Degree Completion Requirements

All requirements must be completed within nine years. Credit earned in the six years preceding enrollment in the doctoral program may be applied. See the checklist pertaining to each degree for any exceptions.

The minimum period in which the doctoral degree can be earned is three full academic years of graduate study.

Graduate School information on Time Limits (p. 23).

Additional Academic Requirements

Doctoral Residency. The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the university. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student's doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog's Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Instructional Technology Certificate

The Graduate Certificate in Instructional Technology provides students with the knowledge, skills, and dispositions needed to effectively integrate technology into their teaching, to design and deliver distance and online courses, and to lead organizational instructional technology initiatives. The program takes a research-to-practice approach by grounding instructional technology practice in research-based evidence.

NOTE: This certificate is not a credential for teacher certification/licensure.

Admissions

Applicants to the IT Certificate Program (Instructional Technology CRT) must be students in good standing in a master's, specialist, or doctoral degree program. Alternatively, students may hold a bachelor's degree and 18 graduate semester hours in a teaching discipline or professional field.

See the Admission Criteria section of this catalog for more information.

Curriculum Requirements

Code and Title	Hours
Required Core Coursework (6 hours):	
AIL 602 Electrcn Instruct Design	3

Instructional Technology, MA

The Master of Arts in instructional technology is an online degree program for individuals who wish to increase their understanding of technology's role in the work of teaching and learning. This online degree is designed to prepare individuals to use current and emerging technologies to create instructionally-sound learning environments. The degree prepares individuals for positions in instructional technology, educational technology and instructional design as they exist in a variety of settings, including business and industry.

Admission Requirements

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

- Candidates for the master's degree must earn a minimum of 30 semester hours of credit.
- There are 21 required hours (7 courses) and 9 elective hours (3 courses) of CAT/INTE hours; one elective course may be taken outside the INTE program from other programs/colleges at The University of Alabama, with advisor approval.

Instructional Technology, MA		Hours
Required courses:		
CAT 531	Computer Based Instruction	3

Counselor Education

BCE301 Introduction To Counseling

Hours 3

A survey course featuring a comprehensive examination of the history, functions, and related issues for the practice of counseling in school, agency, and rehabilitation settings.

BCE511 Principles Of Guidance

Hours 3

Explores the rationale for guidance by examining human development and sociological, psychological, and philosophical bases for guidance. Provides awareness of services by surveying components of guidance programs. Offered fall semester.

Educational Psychology

BEP500 Adv Educational Psych

Hours 3

Principles of educational psychology for teaching and for educational services in schools and colleges.

BEP501 Proseminar in Educational Psychology

Hours 3

This course presents an introduction to doctoral studies in Educational Psychology at The University of Alabama.

Educational Research

BER500 Intro Educatn Research

Hours 3

An overview of research methodology, primarily for master's students. Offered fall, spring, and summer semesters.

BER540 Statistical Methods In Educ

Hours 3

This course covers basic descriptive and inferential statistics, including measures of central tendency and dispersion. Hypothesis testing related to one-sample z-and t-tests; independent and dependent sample t-tests; correlations; and chi-square and simple regressions are included.

School Psychology

BSP500 Intro School Psychology

Hours 3

The history, role, and ethical and legal issues of school psychology are studied. The school psychologist's role in team decision making is emphasized.

BSP501 Professional Issues and Ethics in School Psychology

Hours 3

This course deals with pertinent issues in school psychology, such as ethics, theory, history and foundations of school psychology, legal issues, professional issues and standards, alternative models for delivery of school psychological services, as well as, roles and foundations of the school psychologist.

Counselor Education, Ed.S.

The Educational Specialist degree in counselor education leads to advanced certification for school counselors. Successful completion of the program results in eligibility to be recommended for Class AA (specialist-level) certification as a school counselor.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an applicant requires:

- A master's degree in school counseling from an accredited institution
- Valid master's level certification in School Counseling
- At least two full years of full-time acceptable professional educational work experience in a P-12 school system.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A minimum of 30 hours of appropriate work beyond the MA degree in Counselor Education (School Counseling) and the completion of a comprehensive portfolio are required for the educational specialist degree.

This course listing applies to candidates having appropriate prior certification who begin this program on June 1, 2019, and thereafter. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C. At least 15 semester hours of the 30 semester hour total must be at the 600-level. All requirements must be completed during the 6 years preceding the date on which the degree is to be awarded.

Please note: Courses taken for the prerequisite Class A certification and credits over six years old cannot be counted toward this degree. The certification programs of the department have been designed to fulfill current requirements of the Alabama State Department of Education.

In order to maintain compliance with the Alabama State Department of Education, admission and program requirements are subject to change. For the most current information, please check with the Office of Student Services and Certification or the Program in Counselor Education.

Transfer Credit

Graduate School information about Transfer Credit (p. 18).

Comprehensive Exams

EDS students are required to create a comprehensive portfolio to serve as a final exam of the school counselor's ability to apply knowledge, design a comprehensive school counseling program and be a reflective practitioner.

Graduate School information on Comprehensive Exams (p. 21).

Fieldwork/Practicum/Internship Requirements

Students in the EDS program are required to complete 100-hour fieldwork experience. This may be done in an existing placement or school counselors may look for a placement in their local school system.

Time Limit for Degree Completion Requirements

All requirements must be completed during the 6 years preceding the date on which the degree is to be awarded.

Graduate School information on Time Limits (p. 18).

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Students inactive for one calendar year without communication between the student and department will be considered withdrawn. Leave of absence can be requested through the student's advisor.

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances Information

Student Complaint Procedures

Step 1. (optional) Student raises the issue of concern with the faculty member involved and tries to resolve the concern to the satisfaction of both parties. If the student is not comfortable with taking this first step, the student may proceed to Step 2.

Step 2. If the first Step is taken, and no resolution is found, the student may file a formal complaint or grievance with the Department Head and offer any documentation in support of the grievance. As indicated above, the student may also start the grievance process with a formal complaint to the Department Head. Once in receipt of the complaint, the Department Head is expected to work with the two parties to find a resolution to the mutual satisfaction of the parties. The Department Head is also expected to keep a documented record of the effort and to forward all documentation, as it pertains to the complaint, to the Senior Associate Dean if the complaint remains unresolved. Step 2 should take no longer than two weeks.

Step 3. Should the problem remain unresolved, the complaint (and all the accumulated documentation) is forwarded to the Senior Associate Dean to come under University grievance policies as outlined in the University's Faculty Handbook. The Senior Associate Dean then investigates the grievance, surveys the documentation pertaining to the case and provides a summary and a recommendation to the Dean. The Dean then renders a final decision. This final Step should not take any longer than two weeks.

Step 4. If the student is not satisfied with the decision offered by the Dean, the student may appeal to the Office of Academic Affairs.

Graduate School information on Academic Grievances (p. 219).

Application for Graduation Information

Information on the Application for Graduation (p. 18).

Certification

To be awarded Alabama Class AA School Counselor certification, students must:

- maintain a GPA of at least 3.5 (effective July 1, 2017) on all courses with no grade below a C
- receive a passing score on a comprehensive assessment documenting mastery of the curriculum
- hold valid, prerequisite Alabama Class A School Counselor certification
- complete an application for certification through the Alabama State Department of Education

Counselor Education, Ph.D.

The Doctor of Philosophy (Ph.D.) is the terminal degree in Counselor Education. This preparation program features a variety of preparation options for students. These include the preparation of (a) counselor educators for professional positions in colleges and universities; (b) agency/school administrators; (c) counselor supervisors; and, (d) advanced practitioners in governmental agencies, non-profit settings, or private practice. A common core of preparation in doctoral study includes advanced theoretical foundations, counselor pedagogy, counselor supervision training, and research. The doctoral program meets the accreditation criteria of Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Admission Requirements

Cohort admission decisions are made annually. Regular admission to the Graduate School is the initial step for those seeking the doctoral degree. Statement of purpose and letters of recommendation consistent with goals of the program, entrance exam scores (300 or above on the GRE or at least the 50 percentile on the MAT), and a GPA of 3.0 on a 4.0 scale are needed for regular admission.

An applicant for doctoral study must:

1. possess a completed master's degree in Counselor Education
2. when necessary, complete supplemental master's-equivalency courses to comply with the CACREP-accredited course of study for the master's degree
3. successfully complete a pre-admission doctoral interview for formal pursuit of the doctoral degree in Counselor Education

See the Admission Criteria section of this catalog for more information.

Footnotes

* Students who have taken an Introduction to Statistics course (BER 54) in the master's program may move directly to BER 640. Advisor approval is needed for decision.

** Doctoral students will decide two or three 600-level BER courses collaboratively with academic advisors to meet research requirement of 18 hours.

Degree requirements are noted on the official Plan of Study for the various degrees/tracks. These documents are available from the chairperson or administrative staff for the department.

All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

Course credit in post-master's study may be used to fulfill doctoral degree requirements only after supplemental master's-equivalency study is completed and a successful interview is conducted.

If later there are changes in the Plan of Study, the student submits an amended plan of study to the Graduate School at the time the student applies for admission to candidacy for the degree. A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the comprehensive (preliminary) examination. Students should contact the departmental advisor for submission of the Admission to Candidacy form.

Counselor Education: Clinical Mental Health Counseling, MA

The Masters of Arts Degree in Clinical Mental Health Counseling is designed to prepare students for employment in public and private mental-health settings. The curriculum offers course work and applied experiences in specialty areas, including couple/family counseling, addictions counseling, play therapy, and work with unique populations, using a wide range of counseling methods. The clinical mental health counseling program is 60 credit hours and meets accreditation criteria put forward by Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Admissions

Cohort admission decisions for MA in Clinical Mental Health Counseling are made once annually in the fall. Additional admission opportunities may become available for the spring if all spaces are not filled.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- CV/Resume
- A Statement of Purpose consistent with goals of the program. This must include details on the goals and purpose in seeking graduate training
- 3 letters of recommendation from persons who can attest to the applicant's potential for success in graduate school

Admission decisions are made based on application materials submitted and applicant interview with admission committee. After reviewing application packets, the Admission Committee, which is comprised of program faculty members, will schedule applicant interviews. Dates and times of interviews will be determined and communicated to potential candidates by program faculty.

While GRE or MAT is not required for admission, an applicant with a GPA below 3.0 but with a score of 300 or higher (verbal and quantitative combined) on the Graduate Record Examination (GRE) or a score of 50th percentile or higher on the Miller Analogies Test (MAT), may be considered for Admission with Permission to Continue.

Applicants may be eligible to be considered for Admission with Permission to Continue if they do not fully meet the requirements for regular admission. Applicants who do not meet at least one criterion for Admission with Permission to Continue will not be considered. A decision to admit an applicant with Permission to Continue will be based upon several factors including the combination of the GPA and admission test scores (if provided), the applicant's goals, and previous work experience.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

All Counselor Education Master's degree programs have a planned program of study. The plan follows the appropriate requirements for accreditation in that area. Once an academic advisor has been assigned, students should make an appointment to discuss their preferences and career aspirations. The program of study that a student accepts when they enter the program will be the one they will follow until they graduate. If there are any changes, they need to be approved by the advisor.

While the majority of courses will be offered through the Program in Counselor Education (designated as BCE), many required courses will be offered by affiliated programs. Students will likely enroll in courses in Educational Psychology (designated as BEP), Educational Research (designated as BER), School Psychology (designated as BSP), and other areas. These courses afford the opportunity to take advantage of the expertise of faculty in other programs in the College of Education.

Graduate School information about Transfer Credit (p. 18).

Comprehensive Exam

The policy of the UA Graduate School is that a comprehensive examination or summary project must be completed by all students seeking to graduate from any UA graduate program. The content and scheduling of the master's comprehensive examination in Counselor Education is consistent with this expectation. Per Graduate School policies, students have two (2) opportunities for successful performance on the comprehensive examination established for their program/department.

Eligibility for the initial attempt to secure a passing score on the master's comprehensive examination in Counselor Education is granted in the semester in which students are completing their master's internship. Because the completion of a student's master's internship typically occurs in the semester of anticipated graduation, the timing of initial access allows for a second attempt to be completed during that semester. The second attempt can be scheduled to occur no less than three (3) weeks subsequent to notification of a failure on the student's initial attempt for a passing score on the master's comprehensive examination. A passing score on the second attempt of the master's comprehensive examination can then allow the student to graduate as planned. Otherwise, the Graduate School policy limiting students to two (2) opportunities for successful performance on the comprehensive examination will lead to the student's dismissal from the program.

Graduate School information on Comprehensive Exams (p. 21).

Fieldwork/Practicum/Internship Requirements

While the skills necessary to performing classroom, settings are fundamental to the educational process, a significant element of the training program or any degree sought in the Program in Counselor Education is the applied experiences. In many ways, the activities associated in typical classroom work such as examinations, presentations, research papers, and special projects are the building blocks for the work a counselor does in the field: serving their clients! The curriculum in the program features a variety of practical, applied requirements. These are typically noted as "practicum" or "internship" on the student's Program Planning Records. As was noted previously, the academic advising process is critical in the sequence of the student's applied experiences in that the general rule is "practicum precedes internships" and deviation from that sequence is not allowed. Again, the academic advisor is quite aware of this principle and will assist in course selection from the annual academic schedule to ensure both efficient and effective progress in your preparatory program.

A. Practicum

As an initial experience in applied work, students typically engage in closely supervised work with clients in courses noted as "practicum." For clinical mental health students. BCE 516 Practicum Counseling II typically involves 2 hours of weekly group supervision and one hour of

weekly individual supervision with client contact throughout. University supervision for clinical mental health students is provided on campus. Students enrolled in BCE 516 may wish to secure a practicum placement at distant sites, but the expectation for on-campus supervision is not compromised. Some practicum courses are noted as "Pass/Fail" courses, meaning that performance expectations for students in these courses are NOT tied to the completion of an academic semester.

Since practicum is a prerequisite to internship and features expectations for certain skills levels, students may not be allowed to proceed to the next course in their applied experiences. Such a decision reflects the fundamental commitment of our program to quality service to clients, a position we advocate, and we expect all affiliated with our program to advocate. Practicum placements are typically arranged prior to the semester in which the student anticipates enrolling for course credit. Pre-placement arrangements should be discussed and approved by the faculty listed in the University Schedule for the section of the practicum in which the student is enrolled

Documentation. Students are responsible for retaining cumulative documentation of all practicum activities. The program requires completion of a supervised practicum in the student's designated program area of 100 clock hours. Each student's practicum includes all of the following:

Required CACREP 2016 Standards for Practicum Students:

- Students complete supervised counseling practicum experiences that total a minimum of 100 clock hours over a full academic term that is a minimum of 10 weeks.
- Practicum students complete at least 40 clock hours of direct service with actual clients that contributes to the development of counseling skills.
- Practicum students have weekly interaction with supervisors that averages one hour per week of individual and/or triadic supervision throughout the practicum by (1) a counselor education program faculty member, (2) a student supervisor who is under the supervision of a counselor education program faculty member, or (3) a site supervisor who is working in consultation on a regular schedule with a counselor education program faculty member in accordance with the supervision agreement.
- Practicum students participate in an average of 1½ hours per week of group supervision on a regular schedule throughout the practicum. Group supervision must be provided by a counselor education program faculty member or a student supervisor who is under the supervision of a counselor education program faculty member."

B. Internship

The internship is considered to be the culminating academic experience and, consequently, occurs at the end of a student's training program. Expectations for internships are rather demanding in terms of placement duties and hours of commitment. Essentially, students completing the internship have the option of either one full-time placement (40 hours per week for 6 hours of credit for SC and 12 hours for CMHC) or two (2) consecutive half-time placements (20 hours per week for 3 hours of credit per semester for SC or 6 hours credit for CMHC). Student interns perform the duties of a counselor in a setting in which the student aspires to work upon graduation. Students employed in full-time work should anticipate meeting this challenge. The culminating internship experience must feature at least 600 hours of internship-related activity in the placement, of which at least 240 hours are in direct contact with clients. As with practicum, internship placements are prearranged during the semester

prior to enrollments. For school and clinical mental health students, on-campus supervision is provided weekly.

Prearranged Placement. Internship placements are to be arranged and approved by the University Supervisor of Internships prior to the beginning of the semester/term for which the intern is enrolled for internship credit. To assist in making the internship experience as meaningful as possible, students are responsible for making preliminary contacts with prospective internship site placements. (This activity is very much like a job interview, a procedure we ALL hope you will undertake in the future!) Prospective interns are encouraged to develop their vita and arrange to interview with a prospective site supervisor. (A copy of the Program Planning Record may be helpful for students to discuss their academic experiences.)

Internship responsibilities and duties. The internship is an academic course and, therefore, is subject to the same scrutiny and the same rights of due process for faculty and students as with any other academic course. For this reason, the syllabus features the same language and accompanying documentation as with any other course. However, because of the uniqueness of each student's internship placement, determination of an academic grade must be based on evaluations of each student's work in that setting. No syllabus could possibly be developed to address each aspect of each intern's placement. Therefore, to clarify the expectations of the intern, the site supervisor, and the university supervisor, each intern is responsible for developing an internship agreement specifying the nature of their duties. This document serves two (2) critical purposes: (a) it becomes the basis for clarifying the agreements among all parties involved in the internship, and (b) it serves as a reference for assigning a final internship grade.

At the point of pre-approval for the internship placement, all parties will have a verbal understanding of the expectations for the internship placement. Interns should develop an initial draft of the internship agreement for discussion with their site supervisor during the first week of the placement to ensure that all desired aspects of the internship experience are addressed (copies and guidelines are provided in supplemental handouts). Once approved by both the site supervisor and the intern, draft documents are printed on University of Alabama letterhead and signed by all parties (original document retained in University files; copies provided to intern and site supervisor). Supervision contracts are developed by each student to define roles and responsibilities of the counseling supervisor, site supervisor, and the student during practicum and internship. Departures from the stated contents of the internship agreement are to be discussed by and agreed upon by all parties. Grade determination for interns is based upon successful completion of the elements of the internship agreement.

Orientation, assistance, consultation, and professional development opportunities are provided by the counseling program faculty to site supervisors. All internship forms and supervision training are electronically provided to site supervisors.

Documentation. Interns are responsible for retaining cumulative documentation of all internship activities. The program requires completion of a supervised internship in the student's designated program area of 600 clock hours, begun after successful completion of the practicum. The internship is intended to reflect the comprehensive work experience of a professional counselor appropriate to the designated program area. Each student's internship includes all of the following:

Required CACREP 2016 Standards for Interns:

- After successful completion of the practicum, students complete 600 clock hours of supervised counseling internship in roles and settings with clients relevant to their specialty area.
- Internship students complete at least 240 clock hours of direct service.
- Internship students have weekly interaction with supervisors that averages one hour per week of individual and/or triadic supervision throughout the internship, provided by (1) the site supervisor, (2) counselor education program faculty, or (3) a student supervisor who is under the supervision of a counselor education program faculty member.
- Internship students participate in an average of 1½ hours per week of group supervision on a regular schedule throughout the internship. Group supervision must be provided by a counselor education program faculty member or a student supervisor who is under the supervision of a counselor education program faculty member."

Internship Evaluation. Evaluations of internships are secured from two (2) sources at the conclusion of the internship placement. The first source of evaluation is derived from the site supervisor using the Internship Performance Evaluation rubric. The second source of evaluation is derived from the student. These evaluations, along with the Summary of Internship Activities, are due to the university supervisor as noted on the schedule for internship. Site supervisor evaluations offer formal ratings of performance and a recommended grade based on the Internship Performance Evaluation rubric.

Site Supervisors Requirements for Practicum and Internship:

Prospective site supervisors must meet the following CACREP and program criteria:

- A minimum of a master's degree in counseling or related profession with equivalent qualifications, including appropriate certifications and/or licenses.
- A minimum of two (2) years of pertinent professional experience in the program area in which the student is enrolled.
- Knowledge of the program's expectations, requirements, and evaluation procedures for students (faculty will provide additional information if necessary).
- Relevant training in counseling supervision.

The Procedure for completing a prearranged practicum or internship is:

1. Prospective intern interviews with prospective site supervisor.
2. Prospective intern discusses placement opportunity with university supervisor.
3. Prospective intern discusses placement opportunity with prospective site supervisor.
4. If an unapproved site, university supervisor visits site to determine placement suitability based on prospective intern's training and aspirations as well as the program
5. If approved, UA supervisor informs both site supervisor and intern of approval.

Student Insurance. Prior to 8/18/20, students are enrolled for UA liability insurance through registration for any practicum or internship in Counselor Education per policy of the Office of Risk Management. Students must complete the liability form each term and return the form to BCE instructor for course. Beginning from 8/19/2020, all students who plan to start practicum or internship for counseling/supervision practices are responsible to purchase individual liability insurance for professional counseling at their own expense and submit a copy of

insurance verification to the Practicum/Internship Coordinator prior to their practice.

Time Limit for Degree Completion Requirements

Graduate School information on Time Limits (p. 18).

Student Progress Requirement

Each student enrolled in a degree-seeking status in every degree level of study in Counselor Education is involved in a Student Performance review near the end of the Fall and Spring semesters. The rubric used is the Faculty Review of Student Performance and Review of Student Dispositions. The faculty review professional and personal strengths and concerns, while monitoring progress. This form entails five sections: academic skills, clinical skills, ethical and professional behaviors, personal characteristics, and the four professional dispositions, endorsed by the College of Education are also included.

Within each section, faculty members will discuss their observed student performance or individual characteristics/dispositions over various indicators and rate a student on a four-point scale: advanced, target, developing, and unacceptable. If dispositions do not meet the minimum standard of "Target," a concern for remediation plan is raised. Student data on their dispositions are also aggregated to help faculty members annually evaluate program objectives for the purpose of program improvement.

Based on this evaluation, students will receive one of the following based on rubric scores: (1) A letter stating exemplary progress in the program, (2) Communication that there were no concerns related to progress in the program, (3) Communication to meet advisor because of a provisional recommendation, and (4) An action plan is required (Remediation). Such reviews are regular components of the training program. Student reviews are conducted with the participation of all Program faculty. Results of student evaluations are entered into each student's record and discussed with the student and their advisor.

In instances of concern about a student, pertinent materials and observations about the student are examined and discussed among the faculty and remedial decisions are determined according to the Selection, Review, Retention, and Dismissal Policy noted in the appendices of the Student Handbook. Due process issues affecting student evaluations are followed in accordance with all published guidelines in materials from the Graduate Catalog and University of Alabama Faculty Handbook.

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances Information

Student Complaint Procedures

Step 1. (optional) Student raises the issue of concern with the faculty member involved and tries to resolve the concern to the satisfaction of both parties. If the student is not comfortable with taking this first step, the student may proceed to Step 2.

Step 2. If the first Step is taken, and no resolution is found, the student may file a formal complaint or grievance with the Department Head and offer any documentation in support of the grievance. As indicated above, the student may also start the grievance process with a formal complaint to the Department Head. Once in receipt of the complaint, the Department Head is expected to work with the two parties to find a resolution to the mutual satisfaction of the parties. The Department Head is also expected to keep a documented record of the effort and to forward all documentation, as it pertains to the complaint, to the Senior Associate Dean if the complaint remains unresolved. Step 2 should take no longer than two weeks.

Step 3. Should the problem remain unresolved, the complaint (and all the accumulated documentation) is forwarded to the Senior Associate Dean to come under University grievance policies as outlined in the University's Faculty Handbook. The Senior Associate Dean then investigates the grievance, surveys the documentation pertaining to the case and provides a summary and a recommendation to the Dean. The Dean then renders a final decision. This final Step should not take any longer than two weeks.

Step 4. If the student is not satisfied with the decision offered by the Dean, the student may appeal to the Office of Academic Affairs

Counselor Education: Rehabilitation Counseling, MA

The Masters of Arts Degree in Rehabilitation Counseling is designed to prepare rehabilitation counselors to serve persons with disabilities in a variety of work settings. The rehabilitation counseling program is a 60 hour credit program and is fully accredited by the Council for the Accreditation of Counseling & Related Educational Programs (CACREP). The curriculum provides both didactic and experiential learning opportunities and culminates in a 600 hour internship.

Professional rehabilitation counselors encourage and provide support to persons with disabilities and their families by helping them meet their personal, social, vocational, psychological and wider quality of life goals. The program focuses on the provision of individual and group counseling, vocational assessment, case management, advocacy, assistive technology, and consultation services. The mission of the Rehabilitation Counselor Education (RCE) distance-based program is to produce professional rehabilitation counselors who will provide quality rehabilitation counseling services for persons with disabilities and their families.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- CV/Resume
- A Statement of Purpose consistent with goals of the program
- 3 letters of recommendation consistent with goals of the program

Admission decisions to MA in Rehabilitation Counseling are made on a rolling basis for each semester. Priority is given to prospective students whose applications are reviewed in November and April. Admission decisions may be made in the summer if openings remain after April admission decisions have been completed. Please attend to the following priority dates to allow adequate time for your application to be reviewed:

- October 15: Priority deadline for all application materials to be received to be considered for spring admission
- March 15: Priority deadline for all application materials to be received to be considered for summer or fall admission
- May 15: Priority deadline for all application materials to be considered for fall admission (only applies if openings remain available after April admission decisions are made).

Admission decisions are made based on application materials submitted and applicant interview with admission committee. After reviewing application packets, interviews between applicants and faculty will be scheduled. The Admission Committee is comprised of corresponding program faculty members. Dates and times of interviews will be determined and communicated to potential candidates by program faculty.

While GRE or MAT is not required for admission, an applicant with a GPA below 3.0 but with a score of 300 or higher (verbal and quantitative combined) on the Graduate Record Examination (GRE) or a score of 50th percentile or higher on the Miller Analogies Test (MAT), may be considered for Admission with Permission to Continue.

Applicants may be eligible to be considered for Admission with Permission to Continue if they do not fully meet the requirements for regular admission. Applicants who do not meet at least one criterion for conditional admission will not be considered for admission. Applicants who do not meet at least one criterion for Admission with Permission to Continue will not be considered. A decision to admit an applicant with Permission to Continue will be based upon several factors including the combination of the GPA and admission test scores (if provided), the applicant's goals, and previous work experience.

Please be reminded that delays in processing applications are both necessary and inevitable. In this way, we can ensure adequate provision of faculty and Program resources for students admitted to the Program in Counselor Education.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Rehabilitation Counselor Education program is an online program. Similar to all Counselor Education Master's degree programs, RCE students have a planned program of study. Once an academic advisor has been assigned for your program of study, you should make an appointment to discuss your preferences and career aspirations. Some rehabilitation courses are offered as synchronous courses and will require weekly participation via live virtual classroom. The Rehabilitation Counseling program is 60 credit hours and meets accreditation criteria put forward by Council for Accreditation of Counseling and Related Educational Programs (CACREP).

While the majority of your courses will be offered through the Program in Counselor Education (designated as BCE) many required courses will be offered by affiliated programs. During your academic career, you

will likely enroll for courses in Educational Psychology (designated as BEP), Educational Research (designated as BER), School Psychology (designated as BSP), and other areas. These courses afford the opportunity to take advantage of the expertise of faculty in other programs in the College of Education.

Comprehensive Exam

The policy of the UA Graduate School is that a comprehensive examination or summary project must be completed by all students seeking to graduate from any UA graduate program. The content and scheduling of the master's comprehensive examination in Counselor Education is consistent with this expectation. Per Graduate School policies, students have two (2) opportunities for successful performance on the comprehensive examination established for their program/department.

Eligibility for the initial attempt to secure a passing score on the master's comprehensive examination in Counselor Education is granted in the semester in which students are completing their master's internship. Because the completion of a student's master's internship typically occurs in the semester of anticipated graduation, the timing of initial access allows for a second attempt to be completed during that semester. The second attempt can be scheduled to occur no less than three (3) weeks subsequent to notification of a failure on the student's initial attempt for a passing score on the master's comprehensive examination. A passing score on the second attempt of the master's comprehensive examination can then allow the student to graduate as planned. Otherwise, the Graduate School policy limiting students to two (2) opportunities for successful performance on the comprehensive examination will lead to the student's dismissal from the program.

Graduate School information Comprehensive Exams (p. 18).

Fieldwork/Practicum/Internship Requirements

While the skills necessary to performing classroom, settings are fundamental to the educational process, a significant element of the training program or any degree sought in the Program in Counselor Education is the applied experiences. In many ways, the activities associated in typical classroom work such as examinations, presentations, research papers, and special projects are the building blocks for the work a counselor does in the field: serving their clients! The curriculum in your program features a variety of practical, applied requirements. These are typically noted as "practicum" or "internship" on your Program Planning Records. As was noted previously, the academic advising process is critical in the sequence of your applied experiences in that the general rule is "practicum precedes internships" and deviation from that sequence is not allowed. Again, your academic advisor is quite aware of this principle and will assist in your course selection from the annual academic schedule to insure both efficient and effective progress in your preparatory program.

A. Practicum

As an initial experience in applied work, students typically engage in closely supervised work with clients in courses noted as "practicum." For rehabilitation counseling students, BCE 546 typically involves 1.5 hours of weekly group supervision and one hour of weekly individual supervision with client contact throughout. University supervision for rehabilitation counseling students is provided via Zoom online video conference.

Since practicum is a prerequisite to internship and features expectations for certain skills levels, students may not be allowed to proceed to the next course in their applied experiences. Such a decision reflects the fundamental commitment of our program to quality service to clients, a position we advocate and we expect all affiliated with our program to advocate. Practicum placements are typically arranged prior to the semester in which the student anticipates enrolling for course credit. Pre-placement arrangements should be discussed and approved by the faculty listed in the University Schedule for the section of the practicum in which the student is enrolled.

Documentation. Students are responsible for retaining cumulative documentation of all practicum activities. The program requires completion of a supervised practicum in the student's designated program area of 100 clock hours. Each student's practicum includes all of the following:

Required CACREP 2016 Standards for Practicum Students:

- Students complete supervised counseling practicum experiences that total a minimum of 100 clock hours over a full academic term that is a minimum of 10 weeks.
- Practicum students complete at least 40 clock hours of direct service with actual clients that contributes to the development of counseling skills.
- Practicum students have weekly interaction with supervisors that averages one hour per week of individual and/or triadic supervision throughout the practicum by (1) a counselor education program faculty member, (2) a student supervisor who is under the supervision of a counselor education program faculty member, or (3) a site supervisor who is working in consultation on a regular schedule with a counselor education program faculty member in accordance with the supervision agreement.

- Practicum students participate in an average of 1½ hours per week of group supervision on a regular schedule throughout the practicum. Group supervision must be provided by a counselor education program faculty member or a student supervisor who is under the supervision of a counselor education program faculty member.”

B. Internship

The internship is considered to be the culminating academic experience and, consequently, occurs at the end of a student’s training program. Expectations for internships are rather demanding in terms of placement duties and hours of commitment. Essentially, students completing the internship have the option of either one full-time placement (40 hours per week for 6 hours of credit for Rehabilitation Counseling) or two (2) consecutive half-time placements (20 hours per week for 3 hours of credit per semester for Rehabilitation Counseling). Student interns perform the duties of a counselor in a setting in which the student aspires to work upon graduation. Students employed in full-time work should anticipate meeting this challenge. The culminating internship experience must feature at least 600 hours of internship-related activity in the placement, of which at least 240 hours are in direct contact with clients. As with practicum, internship placements are prearranged during the semester prior to enrollments. For rehabilitation counseling students, Zoom online video conference is provided weekly for the supervision purpose.

Prearranged Placement. Internship placements are to be approved by the University Supervisor of Internships prior to the beginning of the semester/term for which the intern is enrolled for internship credit. To assist in making the internship experience as meaningful as possible, students are responsible for making preliminary contacts with prospective internship site placements (this activity is very much like a job interview, a procedure we ALL hope you will undertake in the future!). Prospective interns are encouraged to develop their vita and arrange to interview with a prospective site supervisor (a copy of your Program Planning Record may be helpful for students to discuss their academic experiences).

Internship responsibilities and duties. Basic Student Responsibilities: (a) Complete work at internship site as specified in Internship Agreement, (b) Participate in weekly individual site supervision, (c) Participate in weekly university group supervision, and (d) Complete and submit all required forms including weekly progress reviews/summaries/ time log, mid-internship self-evaluation, and final self- evaluation.

Basic Agency Responsibilities: (a) Assign a site supervisor who meets minimum education and experience requirements, (b) Provide intern with an orientation to the agency, (c) Provide an average of one hour of weekly individual supervision, (d) Expose intern to the range of services provided by the agency, (e) Provide intern with opportunities to perform multiple functions in the agency, depending on the focus of the agency, (f) Communicate at least three times with the university supervisor for progress review, (g) Complete a mid-internship evaluation of the student and (h) Complete a final evaluation of the student. **Basic University Supervisor Responsibilities:** (a) Maintain direct and periodic communication (at least 3 times a semester) with the site supervisor, (b) Provide one hour of weekly individual supervision or 1½ hours of group supervision, (c) Be available for consultation with both site supervisor and intern, and (d) Assign a final grade for the internship.

Orientation, assistance, consultation, and professional development opportunities are provided by the counseling program faculty to site supervisors. All internship forms and supervision training are electronically provided to site supervisors.

Documentation. Interns are responsible for retaining cumulative documentation of all internship activities. The program requires

completion of a supervised internship in the student’s designated program area of 600 clock hours, begun after successful completion of the practicum. The internship is intended to reflect the comprehensive work experience of a professional counselor appropriate to the designated program area. Each student’s internship includes all of the following:

Required CACREP 2016 Standards for Interns:

- After successful completion of the practicum, students complete 600 clock hours of supervised counseling internship in roles and settings with clients relevant to their specialty area.
- Internship students complete at least 240 clock hours of direct service.
- Internship students have weekly interaction with supervisors that averages one hour per week of individual and/or triadic supervision throughout the internship, provided by (1) the site supervisor, (2) counselor education program faculty, or (3) a student supervisor who is under the supervision of a counselor education program faculty member.
- Internship students participate in an average of 1½ hours per week of group supervision on a regular schedule throughout the internship. Group supervision must be provided by a counselor education program faculty member or a student supervisor who is under the supervision of a counselor education program faculty member.”

Internship Evaluation. Evaluations of internships are secured from two (2) sources at the conclusion of the internship placement. The first source of evaluation is derived from the site supervisor using the Internship Performance Evaluation rubric. The second source of evaluation is derived from the student. These evaluations, along with the Summary of Internship Activities, are due to the university supervisor as noted on the schedule for internship. Site supervisor evaluations offer formal ratings of performance and a recommended grade based on the Internship Performance Evaluation rubric.

Site Supervisors Requirements for Practicum and Internship:

Prospective site supervisors must meet the following CACREP and program criteria:

1. A minimum of a master’s degree in counseling or related profession with equivalent qualifications, including appropriate certifications and/or licenses.
2. A minimum of two (2) years of pertinent professional experience in the program area in which the student is enrolled.
3. Knowledge of the program’s expectations, requirements, and evaluation procedures for students (faculty will provide additional information if necessary).
4. Relevant training in counseling supervision.

The Procedure for completing a prearranged practicum or internship is:

1. Prospective intern interviews with prospective site supervisor.
2. Prospective intern discusses placement opportunity with university supervisor.
3. Prospective intern discusses placement opportunity with prospective site supervisor.
4. If an unapproved site, university supervisor visits site to determine placement suitability based on prospective intern’s training and aspirations as well as the program
5. If approved, UA supervisor informs both site supervisor and intern of approval.

Student Insurance. Prior to 8/18/20, students are enrolled for UA liability insurance through registration for any practicum or internship in Counselor Education per policy of the Office of Risk Management. Students must complete the liability form each term and return the form to BCE instructor for course. Beginning from 8/19/2020, all students who plan to start practicum or internship for counseling/supervision practices are responsible to purchase individual liability insurance for professional counseling at their own expense and submit a copy of insurance verification to the Practicum/Internship Coordinator prior to their practice.

Plan II Non-Thesis Process Requirements

The policy of the UA Graduate School is that a comprehensive examination or summary project must be completed by all students seeking to graduate from any UA graduate program. The content and scheduling of the master's comprehensive examination in Counselor Education is consistent with this expectation. Per Graduate School policies, students have two (2) opportunities for successful performance on the comprehensive examination established for their program/department. Eligibility for the initial attempt to secure a passing score on the master's comprehensive examination in Counselor Education is granted in the semester in which students are completing their master's internship. For students who do not achieve a score of 140 or higher, the objective section (multiple choice exam) may only be retaken in the following semester or a semester other than the first administration. Students who do not pass the objective portion of the comprehensive exam at the second administration are dismissed from the program; this is a Graduate School policy.

The objective portion of the examination will be given online. Each student will work with the examination coordinator to identify a proctor for the examination. The objective portion of the comprehensive examination consists of 200 multiple-choice items. Questions are taken from courses required for the degree. This includes questions from the research and the Life Span Development courses. Students must achieve a score of 70% (140) or higher on the objective section in order to pass this section.

Typically, students are provided three hours for completing the objective section of the master's comprehensive examination. Dates and times for the objective examination are posted on the Rehabilitation Counseling webpage at the beginning of each academic year. In the event that a student requires an accommodation beyond the typical examination conditions/stipulates, the student should submit such a request in writing to your advisor by no less than one (1) working week prior to the examination date. Students are encouraged to be familiar with regulations affecting comprehensive examinations published in the University of Alabama Graduate Catalog on their website or contact the Graduate School for further information.

Time Limit for Degree Completion Requirements

Graduate School information on Time Limits (p. 18).

Student Progress Requirement

Each student enrolled in a degree-seeking status in every degree level of study in Counselor Education is involved in a Student Performance review near the end of Fall and Spring semesters. The rubric used is the Faculty Review of Student Performance and Review of Student Dispositions. The faculty review professional and personal strengths and concerns, while monitoring progress. This form entails five sections: academic skills, clinical skills, ethical and professional behaviors,

personal characteristics, and the four professional dispositions, endorsed by the College of Education are also included.

Within each section, faculty members will discuss their observed student performance or individual characteristics/dispositions over various indicators and rate a student on a four-point scale: advanced, target, developing, and unacceptable. If dispositions do not meet the minimum standard of "Target," a concern for remediation plan is raised. Student data on their dispositions are also aggregated to help faculty members annually evaluate program objectives for the purpose of program improvement.

Based on this evaluation, students will receive one of the following based on rubric scores: (1) A letter stating exemplary progress in the program, (2) Communication that there were no concerns related to progress in the program, (3) Communication to meet advisor because of a provisional recommendation, and (4) An action plan is required (Remediation). Such reviews are regular components of the training program. Student reviews are conducted with the participation of all Program faculty. Results of student evaluations are entered into each student's record and discussed with the student and their advisor.

In instances of concern about a student, pertinent materials and observations about the student are examined and discussed among the faculty and remedial decisions are determined according to the Selection, Review, Retention, and Dismissal Policy noted in the appendices of the Student Handbook. Due process issues affecting student evaluations are followed in accordance with all published guidelines in materials from the Graduate Catalog and University of Alabama Faculty Handbook.

Counselor Education: School Counseling, MA

The Master's of Arts Degree in School Counseling is designed to provide prospective school counselors with the skills necessary to establish and conduct effective developmental guidance and counseling programs in schools - pre-kindergarten through twelfth grade. Students are trained through a comprehensive curriculum and internship program that qualifies them for work at all levels of school counseling. The school counseling program meets accreditation criteria of The Council for the Accreditation of Educator Preparation (CEAP; formally NCATE)

and Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- CV/Resume
- A Statement of Purpose consistent with goals of the program. This must include a statement of goals and purpose in seeking graduate training.
- 3 letters of recommendation consistent with goals of the program from persons who can attest to your potential for success in graduate school

Admission decisions are made each semester. Admission decisions may be made in the summer if openings remain after May admission decisions have been completed. Applicants should be aware of the following priority dates and allow adequate time for applications to be reviewed:

- May 1: Priority deadline for all application materials to be considered for fall admission
- October 15: Priority deadline for all application materials to be considered for spring admission

Admission decisions are made based on application materials submitted and applicant interview with admission committee. After reviewing application packets, interviews between applicants and faculty will be scheduled. The Admission Committee is comprised of corresponding program faculty members. Dates and times of interviews will be determined and communicated to potential candidates by program faculty.

While GRE or MAT is not required for regular admission, an applicant with a GPA below 3.0 but with a score of 300 or higher (verbal and quantitative combined) on the Graduate Record Examination (GRE) or a score of 50th percentile or higher on the Miller Analogies Test (MAT), may be considered for Admission with Permission to Continue. You may be eligible to be considered for Admission with Permission to Continue if you do not fully meet the GPA or admission test score requirements. If you do not meet at least one criterion for Admission with Permission to Continue, we do not consider you for admission. A decision to admit you with Permission to Continue into the program will be based upon several factors including the combination of your GPA and admission test scores (if provided), your goals, and previous work experience.

Please be reminded that delays in processing applications are both necessary and inevitable. In this way, we can ensure adequate provision of faculty and Program resources for students admitted to the Program in Counselor Education. After reviewing application packets, interviews between applicants and faculty will be scheduled. Dates and times of interviews will be determined and communicated to potential candidates by program faculty.

Applicants without prior certification and/or professional educational experience may be considered for admission to this CACREP-accredited program.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

All Counselor Education Master's degree programs consist of a planned program of study. The plan follows the appropriate requirements for accreditation in that area. Once an academic advisor has been assigned,

you should make an appointment to discuss your preferences and career aspirations. The program of study that you accept when you enter the program will be the one you will follow until you graduate. If there are any changes, they need to be approved by your advisor.

While the majority of your courses will be offered through the Program in Counselor Education (designated as BCE) many required courses will be offered by affiliated programs, including courses in Educational Psychology (designated as BEP), Educational Research (designated as BER), School Psychology (designated as BSP), and other areas. These courses will afford you the opportunity to take advantage of the expertise of faculty in other program areas.

Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C. Passing scores on a comprehensive exam and the appropriate Praxis assessment(s) are required.

Code and Title		Hours

- * If the student took an Introduction to Exceptional Children course as an undergraduate, substitute another 500-level course with advisor approval. SPE 500 is an ALSDE requirement for certification.

Transfer Credit

Graduate School information on Transfer Credit (p.).

Comprehensive Exam

The policy of the UA Graduate School is that a comprehensive examination or summary project must be completed by all students seeking to graduate from any UA graduate program. The content and scheduling of the master's comprehensive examination in Counselor

Education is consistent with this expectation. Per Graduate School policies, students have two (2) opportunities for successful performance on the comprehensive examination established for their program/department.

Eligibility for the initial attempt to secure a passing score on the master's comprehensive examination in Counselor Education is granted in the semester in which students are completing their master's internship. Because the completion of a student's master's internship typically occurs in the semester of anticipated graduation, the timing of initial access allows for a second attempt to be completed during that semester. The second attempt can be scheduled to occur no less than three (3) weeks subsequent to notification of a failure on the student's initial attempt for a passing score on the master's comprehensive examination. A passing score on the second attempt of the master's comprehensive examination can then allow the student to graduate as planned. Otherwise, the Graduate School policy limiting students to two (2) opportunities for successful performance on the comprehensive examination will lead to the student's dismissal from the program.

Concurrent with comprehensive exams, students must submit the following documents: (1) current curriculum vita, (2) personal theory paper, and (3) an additional paper, project, or presentation that the student believes is their best work in their area of study and preparation.

Graduate School information on Comprehensive Exams (p.).

Fieldwork/Practicum/Internship Requirements

While the skills necessary to performing in the classroom settings are fundamental to the educational process, a significant element of the training program or any degree sought in the Program in Counselor Education is the applied experiences. In many ways, the activities associated in typical classroom work such as examinations, presentations, research papers, and special projects are the building blocks for the work a counselor does in the field: serving their clients! The curriculum in your program features a variety of practical, applied requirements. These are typically noted as "practicum" or "internship" on your Program Planning Records. As

A. Practicum

As an initial experience in applied work, school counseling students engage in closely supervised work with students in the schools in course noted as "practicum." BCE 516 typically involves at least 1.5 hours of weekly group supervision and one hour of weekly individual supervision with student contact throughout. University supervision for school counseling students is provided on campus. Students enrolled in BCE 516 may wish to secure a practicum placement at distant sites, but the expectation for on-campus supervision is not compromised.

The Practicum course is noted as "Pass/Fail" courses, meaning that performance expectations for students in these courses are NOT tied to the completion of an academic semester.

Since practicum is a prerequisite to internship and features expectations for certain skills levels, students may not be allowed to proceed to the next course in their applied experiences until they have "passed" the course. Such a decision reflects the fundamental commitment of our program to quality service to students, a position we advocate, and we expect all affiliated with our program to advocate. Practicum placements are typically arranged prior to the semester in which the student anticipates enrolling for course credit. Pre-placement arrangements should be discussed and approved by the faculty listed in the University Schedule for the section of the practicum in which the student is enrolled.

Documentation. Students are responsible for retaining cumulative documentation of all practicum activities. The program requires completion of a supervised practicum in the student's designated program area of 100 clock hours. Each student's practicum includes all of the following:

Required CACREP 2016 Standards for Practicum Students:

- Students complete supervised counseling practicum experiences that total a minimum of 100 clock hours over a full academic term that is a minimum of 10 weeks.
- Practicum students complete at least 40 clock hours of direct service with actual clients or students that contributes to the development of counseling skills.
- Practicum students have weekly interaction with supervisors that averages one hour per week of individual and/or triadic supervision throughout the practicum by (1) a counselor education program faculty member, (2) a student supervisor who is under the supervision of a counselor education program faculty member, or (3) a site supervisor who is working in consultation on a regular schedule with a counselor education program faculty member in accordance with the supervision agreement.
- Practicum students participate in an average of 1½ hours per week of group supervision on a regular schedule throughout the practicum. Group supervision must be provided by a counselor education program faculty member or a student supervisor who is under the supervision of a counselor education program faculty member."

B. Internship

The internship is considered to be the culminating academic experience and, consequently, occurs at the end of a student's training program. Expectations for internships are rather demanding in terms of placement duties and hours of commitment. Essentially, students completing the internship have the option of either one full-time placement (40 hours per week for 6 hours of credit for SC) or two (2) consecutive half-time placements (20 hours per week for 3 hours of credit per semester for SC). Student interns perform the duties of a school counselor in a setting in which the student aspires to work upon graduation. Students employed in full-time work should anticipate meeting this challenge. The culminating internship experience must feature at least 600 hours of internship-related activity in the placement, of which at least 240 hours are in direct contact with clients or students. As with practicum, internship placements are prearranged during the semester prior to enrollments. For school counseling students, on-campus supervision is provided weekly.

Prearranged Placement. Internship placements are to be arranged and approved by the University Supervisor of Internships prior to the beginning of the semester/term for which the intern is enrolled for internship credit. To assist in making the internship experience as meaningful as possible, students are responsible for making preliminary contacts with prospective internship site placements (this activity is very much like a job interview, a procedure we ALL hope you will undertake in the future!). Prospective interns are encouraged to develop their vita and arrange to interview with a prospective site supervisor (a copy of your Program Planning Record may be helpful for students to discuss their academic experiences).

Internship responsibilities and duties. The internship is an academic course and, therefore, is subject to the same scrutiny and the same rights of due process for faculty and students as with any other academic course. For this reason, your syllabus features the same language and accompanying documentation as with any other course. However,

because of the uniqueness of each student's internship placement, determination of an academic grade must be based on evaluations of each student's work in that setting. No syllabus could possibly be developed to address each aspect of each intern's placement. Therefore, to clarify the expectations of the intern, the site supervisor, and the university supervisor, each intern is responsible for developing an internship agreement specifying the nature of their duties. This document serves two (2) critical purposes: (a) it becomes the basis for clarifying the agreements among all parties involved in the internship, and (b) it serves as a reference for assigning a final internship grade.

At the point of pre-approval for the internship placement, all parties will have a verbal understanding of the expectations for the internship placement. Interns should develop an initial draft of the internship agreement for discussion with their site supervisor during the first week of the placement to ensure that all desired aspects of the internship experience are addressed (copies and guidelines are provided in supplemental handouts). Once approved by both the site supervisor and the intern, draft documents are printed on University of Alabama letterhead and signed by all parties (original document retained in University files; copies provided to intern and site supervisor). Supervision contracts are developed by each student to define roles and responsibilities of the counseling supervisor, site supervisor, and the student during practicum and internship. Departures from the stated contents of the internship agreement are to be discussed by and agreed upon by all parties. Grade determination for interns is based upon successful completion of the elements of the internship agreement.

Orientation, assistance, consultation, and professional development opportunities are provided by the counseling program faculty to site supervisors. All internship forms and supervision training are electronically provided to site supervisors.

Documentation. Interns are responsible for retaining cumulative documentation of all internship activities. The program requires completion of a supervised internship in the student's designated program area of 600 clock hours, begun after successful completion of the practicum. The internship is intended to reflect the comprehensive work experience of a professional counselor appropriate to the designated program area. Each student's internship includes all of the following:

Required CACREP 2016 Standards for Interns:

- After successful completion of the practicum, students complete 600 clock hours of supervised counseling internship in roles and settings with clients or students relevant to their specialty area.
- Internship students complete at least 240 clock hours of direct service.
- Internship students have weekly interaction with supervisors that averages one hour per week of individual and/or triadic supervision throughout the internship, provided by (1) the site supervisor, (2) counselor education program faculty, or (3) a student supervisor who is under the supervision of a counselor education program faculty member.
- Internship students participate in an average of 1 ½ hours per week of group supervision on a regular schedule throughout the internship. Group supervision must be provided by a counselor education program faculty member or a student supervisor who is under the supervision of a counselor education program faculty member."

Internship Evaluation. Evaluations of internships are secured from two (2) sources at the conclusion of the internship placement. The first source of evaluation is derived from the site supervisor using the Internship

Performance Evaluation rubric. The second source of evaluation is derived from the student. These evaluations, along with the Summary of Internship Activities, are due to the university supervisor as noted on the schedule for internship. Site supervisor evaluations offer formal ratings of performance and a recommended grade based on the Internship Performance Evaluation rubric.

Site Supervisors Requirements for Practicum and Internship:

Prospective site supervisors must meet the following CACREP and program criteria:

1. A minimum of a master's degree in counseling or related profession with equivalent qualifications, including appropriate certifications and/or licenses.
2. A minimum of two (2) years of pertinent professional experience in the program area in which the student is enrolled.
3. Knowledge of the program's expectations, requirements, and evaluation procedures for students (faculty will provide additional information if necessary).
4. Relevant training in counseling supervision.

The Procedure for completing a prearranged practicum or internship is:

1. Prospective intern interviews with prospective site supervisor.
2. Prospective intern discusses placement opportunity with university supervisor.
3. Prospective intern discusses placement opportunity with prospective site supervisor.
4. If an unapproved site, university supervisor visits site to determine placement suitability based on prospective intern's training and aspirations as well as the program
5. If approved, UA supervisor informs both site supervisor and intern of approval.

Student Insurance. Prior to 8/18/20, students are enrolled for UA liability insurance through registration for any practicum or internship in Counselor Education per policy of the Office of Risk Management. Students must complete the liability form each term and return the form to BCE instructor for course. Beginning from 8/19/2020, all students who plan to start practicum or internship for counseling/supervision practices are responsible to purchase individual liability insurance for professional counseling at their own expense and submit a copy of insurance verification to the Practicum/Internship Coordinator prior to their practice.

Time Limit for Degree Completion Requirements

Graduate School information on Time Limits (p.).

Student Progress Requirement

Each student enrolled in a degree-seeking status in every degree level of study in Counselor Education is involved in a Student Performance review near the end of Fall and Spring semesters. The rubric used is the Faculty Review of Student Performance and Review of Student Dispositions. The faculty review professional and personal strengths and concerns, while monitoring progress. This form entails five sections: academic skills, clinical skills, ethical and professional behaviors, personal characteristics, and the four professional dispositions, endorsed by the College of Education are also included.

Within each section, faculty members will discuss their observed student performance or individual characteristics/dispositions over various

indicators and rate a student on a four-point scale: advanced, target, developing, and unacceptable. If dispositions do not meet the minimum standard of "Target," a concern for remediation plan is raised. Student data on their dispositions are also aggregated to help faculty members annually evaluate program objectives for the purpose of program improvement.

Based on this evaluation, students will receive one of the following based on rubric scores: (1) A letter stating exemplary progress in the program, (2) Communication that there were no concerns related to progress in the program, (3) Communication to meet advisor because of a provisional recommendation, and (4) An action plan is required (Remediation). Such reviews are regular components of the training program. Student reviews are conducted with the participation of all Program faculty. Results of student evaluations are entered into each student's record and discussed with the student and their advisor.

In instances of concern about a student, pertinent materials and observations about the student are examined and discussed among the faculty and remedial decisions are determined according to the Selection, Review, Retention, and Dismissal Policy noted in the appendices of the Student Handbook. Due process issues affecting student evaluations are followed in accordance with all published guidelines in materials from the Graduate Catalog and University of Alabama Faculty Handbook.

Additional Academic Requirements

All students are required to complete fingerprinting for background clearance before going into the schools. A passing score on the Professional School Counselor Praxis subject assessment is required.

Students who do not have valid professional educator certification (valid teaching certificate in AL) and two years of full-time acceptable professional educational work experience prior to admission to the School Counseling/MA program will be required to take and pass the National Counselor Examination (NCE) before applying for certification in Alabama.

Students in the School Counseling program are required to maintain a VIA/Watermark account. Students are required to submit (1) Showcase of Resources for Advanced Certification Students (i.e., School Counseling Portfolio), at three checkpoints, throughout their program of study and (2) assignments for CACREP-affiliated course.

Certification

To be eligible for Alabama Class A School Counselor certification, students must:

- maintain a GPA of at least 3.25 on all courses with no grade below a C
- earn a passing score on the appropriate, Alabama approved Praxis for School Counseling
- hold at least a valid Alabama Class B professional educator certificate in a teaching field, a valid Class A professional leadership certificate, or a valid Class A professional educator certificate in another area of instructional support

Alternatively, individuals who have completed at least the master's degree level CACREP-accredited school counseling program may apply for Alabama certification in school counseling through the CACREP-Accredited School Counseling Program Approach.

Educational Psychology, Ed.S.

The University of Alabama School Psychology Program is designed to provide exemplary graduate training in research and in the application of practice related to the learning, development, and mental health of children and youth, and their families. The Educational Specialist (EdS) degree in Educational Psychology with a concentration in School Psychology prepares students for direct school-based practice as credentialed as school psychologists. The EdS program includes an integrated and sequential program of study with comprehensive coursework and supervised field experiences. Candidates participate in courses and seminars in assessment and data collection, interventions and decision making, prevention and consultation, professional school psychology, sociocultural foundations, psychological foundations, human development, educational foundations, statistics and research, and other areas. Candidates are required to participate in extensive practicum, internship, and research experiences.

Note: The EdS program takes place in person in Tuscaloosa, AL, and there is also a distance learning (hybrid) program offered through UA Online .

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include a statement of purpose, vita/resume and three letters of recommendation consistent with goals of the program.

For the *on-campus* concentration in School Psychology, prospective students are encouraged to complete their applications by January 15 for admission the following fall. Note that a prior graduate degree or educator certification is not required for admission to the on-campus program.

For the *distance learning/hybrid* concentration in School Psychology, applicants are encouraged to complete their applications by April 1. In addition, *distance learning* applicants must meet admission requirements established by the Alabama State Department of Education:

1. valid master's level certification in school psychometry, school psychology, or special education
2. two years of acceptable, professional educational experience in a P-12 setting
3. fingerprinting/background clearance

Changes to Certification Programs

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education.

In order to maintain compliance with the Alabama Board of Education, admission and program requirements are subject to change. For the most current information, please check with the Office of Student Services and Certification or the program advisor.

See the Admission Criteria section of this catalog for more information.

Course Requirements (Distance Learning/Hybrid Program)

This course listing applies to those who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide

the most up-to date information about requirements. Students should consult their advisors each semester before registering.

Transfer Credit

The School Psychology Program has more stringent requirements than the Graduate School maximums for transfer credit for students who have completed previous graduate coursework. Generally, fewer courses will be approved for transfer credit than the Graduate School maximums. In some circumstances, a student with a previous graduate degree may be allowed to count some coursework from the previous degree. After a student begins enrollment in our program, transfer credit or use of previous graduate coursework must first be evaluated and approved by program faculty to determine equivalency to a required course in our program. Equivalency is determined by consistency between the proposed transfer course and required program course in terms of objectives, content, projects, and other activities. Only in very unusual circumstances will a student be approved to transfer previous graduate coursework for required courses with the "BSP" (school psychology core) designation in our program of study. However, it may be possible for students to transfer educational psychology, educational foundations, special education, etc., courses that are equivalent to those in our required program of study.

For the distance learning/hybrid program, courses taken for prior Class A certification cannot be counted toward this degree.

Graduate School information on Transfer Credit (p. 21).

EdS Plan of Study

The *on-campus* EdS degree requires a minimum of three years of full-time study or the equivalent beyond the baccalaureate degree. Fall, spring, and summer semester enrollment is necessary to achieve these timelines.

The *on-campus* EdS degree requires a total of 72 graduate credit hours, which include hours from courses, practica, and internship.

School psychology coursework, clinical experiences, internship, and other requirements are designed to address the domains of knowledge and expertise specified by the National Association of School Psychologists (2010), as well as the Alabama Department of Education. These domains are as follows:

- Data-Based Decision Making and Accountability
- Consultation and Collaboration
- Interventions and Instructional Support to Develop Academic Skills
- Interventions and Mental Health Services to Develop Social and Life Skills
- School-Wide Practices to Promote Learning
- Preventive and Responsive Services
- Family–School Collaboration Services
- Diversity in Development and Learning
- Research and Program Evaluation
- Legal, Ethical, and Professional Practice

The *distance learning/hybrid* program is a State-approved program, so students complete requirements as outlined on the State-approved program checklist.

All students must complete an internship at or near the end of formal training. Students must be approved by the program to begin planning for internship and before an internship placement begins.

Comprehensive Exam

All students in the School Psychology Program are required to successfully complete written examinations before any degrees will be granted. The examinations are completed independently on a “take-home” basis and require students to integrate knowledge and skills obtained during coursework and other graduate education activities. Successful completion of the program requires that a student passes the exams. Further, no student will be allowed to enroll in internship until all exams are passed. Students must obtain an average of 80% of higher across faculty ratings for all questions to pass. Students who earn less than 80% of points on any one question may orally defend that question in front of the school psychology faculty. Earning less than 80% on two or more questions will result in failure of the examination.

Graduate School information on Comprehensive Exams (p. 21).

Fieldwork/Practicum/Internship

Fieldwork and Practicum

Most of the required school psychology courses with the BSP prefix include some type of clinical or field-based experiences. In the first year in the *on-campus* program, BSP 501 Ethics and Professional Issues in School Psychology, BSP 521 Cognitive and Academic Assessment and Data-Based Decision Making, and BSP 522 Social-Behavioral Assessment and Data-Based Decision Making all require field or clinical experiences, including classroom observations in local schools, assessment and data collection with youth, families, or other carefully supervised experiences. Several other required courses for the program (prefixes SPE, CRD, BCE,

etc.) may also require clinical and field experiences on campus and in local public schools.

Formal practicum courses are required in addition to field work experiences. In the second year in the *on-campus* program, EdS students take BSP 580 School-Based Practicum in Assessment for 200+ hours of on-site field activities in local schools in fall semester and BSP 683 Advanced School-Based Practicum for 200+ hours of on-site field activities in local schools in spring semester. Practicum sites are schools and other agencies relevant for school psychology practice. BSP 580 School-Based Practicum in Assessment and BSP 683 Advanced School Practicum are taken by EdS students in local public schools in the immediate Tuscaloosa or surrounding areas.

Internship

All students must complete an internship at or near the end of formal training. Students must be approved by the program to begin planning for internship and before an internship placement begins. With program approval, internships may occur in qualified settings across the country. The EdS internship requires a minimum of 1,200 clock hours and may be completed on a full-time basis in one academic year (600+ clock hours over a continuous 15+ week period in each of a consecutive fall and spring semester) or, with special permission, on a half-time, continuous basis over two consecutive academic years. EdS internships are not offered during summer terms. At least 600 internship hours must be in a school setting.

Students seeking internship placements must discuss the placement with their advisor and program coordinator at least a year in advance—during the first few weeks of the fall semester preceding an internship placement for the following fall term. By May 31 prior to the internship, potential interns must document that all program requirements for internship have been met and must seek and obtain program approval to begin internship by submitting the Internship Approval form. Once program approval has been provided to the intern, the intern will share the UA School Psychology Program MOA with the internship site for signature. When the internship site has agreed to and signed the MOA, the intern will return it to the program coordinator who will ensure the remaining UA personnel signatures are completed. The intern must provide the MOA to their internship site by June 1st. Students may not begin their internship without a completed and signed MOA.

Admission to Candidacy

It is the student’s responsibility to ensure that all necessary forms including the program of study form, admission to candidacy form, and application for degree are submitted to the Graduate School and must pay all necessary fees for graduation. Students are reminded to apply for admission to candidacy and graduation for each degree level, as soon as requirements for the applications are met. Each student for a graduate degree must apply for graduation no later than the semester preceding the semester in which degree requirements are to be completed. Thus, *on-campus* EdS students must complete all required forms for the MA degree, which is typically awarded during the first 1½ years in the program, and for the EdS degree, which is awarded at completion of internship.

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 21).

Student Progress Requirements

Continuous Review of Student Progress

Each student is required to undergo a formal progress review during an annual progress evaluation at the end of every spring semester after entering the program; thus students entering the program in a fall term will have their first formal progress review at the end of the following spring, after two complete semesters of graduate study in the program. At the end of each spring term in the program, students are required to submit a comprehensive electronic progress evaluation of their work by the due date provided by the program coordinator; faculty members review the progress evaluation and evaluate knowledge, skills, and other relevant characteristics of students as shown in coursework, clinical work, field placements, and other program activities.

Students are expected to receive satisfactory ratings on all progress evaluation components to continue with the planned program of study. In some cases, students may receive ratings of satisfactory that also include program requirements for improvement. Ratings of non-satisfactory on a few components may result in program requirements for additional course or field activities before continuation with the planned program of coursework, practicum, or internship. Thus, failure to make adequate progress in the program, based on a variety of quantitative and qualitative factors, will result in the student being placed on warning or perhaps being dropped from the program. There are four possible outcomes to the annual progress review evaluation process:

- 1) satisfactory progress in all areas,
- 2) satisfactory progress but with requirements for improvement
- 3) unsatisfactory progress in a few areas with probation for student and requirements for improvement, and
- 4) unsatisfactory progress in several areas, with discontinuation of student.

Please note that students may be given a probationary period before they are discontinued, if deemed appropriate or necessary.

Minimum Grade/GPA Policies in School Psychology Courses

Students enrolled in the School Psychology Program must maintain a grade of B or higher in all core school psychology courses. Students may be able to repeat a course if they earn a grade lower than a B. Failure to receive a grade of a B or higher when taking a core school psychology course a second time results in dismissal from the program.

Students also must continually maintain a GPA of at least 3.0 to continue advancing toward key degree-related milestones. These include taking qualifying exams, comprehensive exams, advancing to candidacy, and accepting/beginning an internship.

Practica and Field Placement Policies

Addressing Concerns about Students in Field Placements, Practica, and Internships Field supervisors are asked to immediately report any concerns, issues, or suggestions to the student and to the university professor. Concerns by the field supervisor and/or university professor may be addressed through improvement plans developed for the student, in collaboration with the student, field supervisor, and university professor. Significant concerns may result in temporary suspension of the field placement, removal of the student from the placement, a grade of F for the course, and/or dismissal from the program.

Improvement Plans

If a student improvement plan for courses, field placement, or other program activities becomes necessary, the program faculty, placement site supervisors, and students will develop an improvement plan that identifies concerns/issues, specific goals, deadlines, evaluation methods, and required outcomes needed for the student to meet all criteria and

achieve all objectives and earn a satisfactory grade for the course or field placement. The improvement plan will include frequent meetings between the student, professors, and supervisors to monitor progress. The improvement plan will include frequent submission of materials by the student and frequent submission of a formal evaluation by the professors and supervisors.

Program Dismissal

The student will have the right to meet with the program faculty and department chair. If the decision is to be that the student is dismissed from the program, the student will be informed in writing. If the student disagrees with the program decision, or feedback provided, the student may consult with someone outside the program, and consider submitting an appeal. The University of Alabama College of Education Grievance Procedures (<https://education.ua.edu/students/student-complaint/>) will be followed if a student has a grievance about the decision to dismiss the student or another type of academic concern.

Additional Academic and Program Requirements

Fingerprinting/Background Check

The UA College of Education requires that all students must clear a fingerprinting/background check prior to field experiences. Prior to their first semester of enrollment in the program, school psychology students must meet this requirement for activities in schools under the jurisdiction of the Alabama Department of Education. Students should contact our college's Student Services Office at (205) 348-0193 to obtain instructions or confirm if a background check has been completed. Students also have the responsibility to meet fingerprinting/background check requirements of their specific agency, state, etc. for all field, practica, and internship placements or other field experiences. Students should note that fingerprinting/background checks usually cannot be transferred from one state to another or, within a state, from one type of agency to another. New background checks typically are required by each state or type of agency. NOTE: After your graduation from the program, additional fingerprinting/background checks also typically are required to receive a state credential/certificate/license to practice as a professional in schools and other agencies.

National School Psychology Examination and State Credentialing Exams

According to UA College of Education and Alabama Department of Education policy, all school psychology EdS students are required to take the National School Psychology Examination offered as a Praxis assessment by ETS. The exam must be taken and scores submitted to the program prior to the completion of 1,200 hours of EdS internship. However, students are encouraged to take the exam soon after completing program coursework and either prior to or during the first few months of internship to allow opportunities to retake the exam, if needed to meet the program's criterion score.

Students must obtain a passing score on the Praxis National School Psychology Exam [PRAXIS number (5402)] to receive a grade for internship and graduate from the program. Currently, the program requires a score of 147 to receive a grade for internship and, thus, to graduate from the program. Students must have their scores sent to the UA (recipient code 1858; this same code should be recorded as the student's "attending institution"). The exam also is required for school psychology certification in Alabama; students desiring certification in our state should also have their scores sent to the Alabama Dept. of Education (recipient code 7020). Many other states require the PRAXIS school psychology exam for a state school psychology certificate;

students should obtain the recipient code for the state in which they will apply for certification and have scores sent. The exam is required for the National Certificate in School Psychology (NCSP), and students should have their scores sent to the National Association of School Psychologists (recipient code R1549). A passing score of 147 also is currently required for the NCSP.

Students should be aware that additional exams may be required for applications for state credentials and should determine these requirements well in advance of graduation. Students should keep in mind that they may need to apply for Alabama certification to meet certification requirements in another state, even if they do not plan to work in Alabama. Other states also have their own specific requirements for examinations, which should be identified by students well in advance of graduation from the program.

Survey of Special Education Course

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting requirements for unconditional admission to a Class AA program on July 1, 2017, and thereafter, must take an approved course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.

Academic Misconduct

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence

The School Psychology Program faculty members and field placement agencies recognize that major emergencies can happen for some students and that they may have a short or long-term impact on a student's participation across program activities during a semester, including coursework, field placements, graduate assistantships, comprehensive exams, portfolio submissions, etc. The program is committed to supporting students in their program activities and providing assistance and guidance when emergencies have an impact on the student's activities. If you experience a major emergency (e.g., personal or family medical issue, etc.) that significantly impacts across your course, program, or field placement activities and prevents your participation for a period of time, notify the program coordinator immediately or as soon as possible after the emergency. The program coordinator will assist you with making immediate requests to course professors, field or assistantship supervisors, or program faculty about making sure that your duties and responsibilities are covered, extending deadlines, rescheduling assignments, withdrawing from activities or field placements, etc. Again, student's requests to faculty for possible solutions must be based on a major medical or similar emergency and requests must be submitted immediately or as soon as feasibly possible following the emergency. Students should be aware that any extensions, rescheduling, or withdrawal from any type of program activity possibly may impact your schedule of courses, field placements, internship dissertation, final graduation, etc. The faculty will assist students in evaluating and making plans if major emergencies affect program activities.

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances

The Department of Educational Studies in Psychology, Research Methods, and Counseling has procedures by which students may resolve any type of issue or concern. For students in the School Psychology Program, all grievances, complaints, and concerns must be filed with the Head for Department of Educational Studies in Psychology, Research Methods, and Counseling.

Graduate School information on Academic Grievances (p. 219).

Scholastic Requirements

For the *distance learning/hybrid program*, candidates must earn a GPA of at least 3.50 on all courses in the program, with no grade below a C.

Graduate School information on Scholastic Requirements (p. 204).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation

Information on the Application for Graduation (p. 21).

Certification

Requirements for certification and licensure in school psychology vary from state to state. Students are expected to determine the requirements in the state or states in which they are interested in practicing before beginning the program. The degrees from the School Psychology program may lead to state and national credentials:

- Graduates of the NASP-approved (main campus) program, who obtain the EdS and PhD degrees in School Psychology, are eligible for the National Certification in School Psychology (NCSP), following successful completion of the national school psychologist *Praxis* assessment and internship. The NCSP is used by over 30 states, including Alabama, as one possible route to grant state certification in school psychology.
- EdS and PhD degree graduates of the School Psychology program who obtain the NCSP may meet requirements for the Alabama Class AA certificate in School Psychology using the Nationally Certified School Psychologist Approach described at <http://www.alsde.edu/sec/ec/Pages/nationalschoolpsychologist-all.aspx?navtext=Other%20Approaches:%20National%20School%20Psychologist>.
- Graduates of the distance learning program who obtain the EdS in Educational Psychology-School Psychology may be eligible for Alabama Class AA certification in School Psychology if the following prerequisites are met:
 - a. a passing score on the appropriate *Praxis* assessment, and
 - b. a minimum GPA of 3.50 on all program courses (effective for candidates unconditionally admitted to a Class AA School Psychology program July 1, 2017, and thereafter.)

Students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Certification for Degree-Seeking Students Only

The School Psychology Program enrolls degree-seeking students and, occasionally with special permission, approves students for non-degree status to take only 1 or 2 courses, as noted earlier. The program typically does not enroll, evaluate, or endorse individuals who are not admitted to our degree programs. Only students admitted and enrolled in the EdS or PhD degree programs in school psychology and who complete our required coursework, field experiences, internships, and degrees are recommended by the program for the National Certificate in School Psychology (NCSP).

Educational Psychology, MA

The MA in Educational Psychology provides an advanced introduction to the field. Students may select a thesis or non-thesis option.

The program offers a concentration in Learning and Assessment, specifically designed for practitioner in an online format. There are two new MA options offered in collaboration with the Educational Research program. These options include a Learning and Evaluation option (thesis and non-thesis options) and a Program Evaluation option (non-thesis only). Educators interested in developing their research skills as they relate to the learning process and to school-based assessment practices are encouraged to apply.

The program also offers a concentration in School Psychometry through a distance learning/hybrid program. Successful completion of all requirements leads to Alabama Class A School Psychometry certification for eligible individuals.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include a statement of purpose, vita/resume and three letters of recommendation consistent with goals of the program.

For the School Psychometry concentration (distance learning/hybrid program), applicants are encouraged to complete their applications by April 1. A statement of purpose, vita/resume, and letters of recommendation consistent with goals of the program, and a GPA of 3.0 on a 4.0 scale, are needed for regular admission. In addition, distance learning applicants must meet the following admission requirements established by the Alabama State Department of Education:

1. valid bachelor's level or master's level professional educator certificate in a teaching field OR valid master's level professional educator certificate in another area of instructional support,
2. two years of acceptable, professional P-12 educational experience, and
3. fingerprinting/background clearance.

Fingerprinting Requirement

Applicants to a State-approved certification program shall be required to be fingerprinted for a criminal history background check through

the Alabama State Department of Education to the Alabama Bureau of Investigation (ABI) and the Federal Bureau of Investigation (FBI) pursuant to ACT 2002-457. This includes all students enrolled in programs that lead to Alabama certification, regardless of whether or not they are pursuing Alabama certification. The background check is completed at the student's expense, and suitability must be documented in the Office of Student Services & Certification before the student is assigned placement in a clinical setting. [Alabama Administrative Code] A candidate whose suitability determination precludes admission to a state-approved teacher education program has the right to due process procedures in accordance with the current Educator Certification Chapter of the Alabama Administrative Code (Revocation and Suspension of Certificates and Unsuitability Determinations).

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A major part of graduate training is successful participation in courses. Coursework requirements for the MA degree options in Educational Psychology are listed below. The MA degree requires 30 graduate credit hours. Main campus students may choose from non-thesis and thesis options.

Each student is appointed a temporary faculty adviser upon initial acceptance into the program. A student may select a permanent adviser after beginning coursework. Advisers assist students with planning coursework, registering for courses, completing program planning records, portfolio evaluations and other activities. Students are expected to maintain Program Planning Records with their advisors in order to monitor completion of coursework requirements.

Program Outcomes

All degree requirements in the Educational Psychology Program are carefully designed and sequenced according to program outcomes. Program outcomes are the areas of knowledge and skill students are expected to demonstrate upon successful completion of the coursework and other training activities.

Transfer Credit

The University of Alabama allows students to transfer equivalent courses from other accredited institutions where the student was enrolled in the graduate school. The greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from another institution. Credits may be transferred only if they were earned during the six-year period prior to graduation from the program. Transfer of courses must be approved by the student's adviser. The Dean of the Graduate School must also approve transfer of courses. The form to request consideration of transfer of credits is available from the Graduate School's website.

For the School Psychometry concentration, credits used for previous Class B certification may not be used.

Graduate School information on Transfer Credit (p. 18).

Comprehensive Exam

All degree students in the Educational Psychology Programs are required to successfully complete written comprehensive examinations before the degrees will be granted. The specific procedures for comprehensive examinations for the M.A. degree are designed in collaboration with the student's advisor. For the non-thesis option, the examination is in the form of the Capstone experience; for the thesis option, it is the thesis. The examinations are completed independently on a "take-home" basis and require students to integrate knowledge and skills obtained during coursework and other training activities. Each student is allowed to take comprehensive examinations only twice.

Graduate School information on Comprehensive Exams (p. 18).

Fieldwork/Practicum/Internship Requirements

For the School Psychometry concentration, internship hours of at least 300 clock hours at the P-12 level are required.

Time Limit for Degree Completion

Graduate School information on Time Limits (p. 18).

Student Progress Requirements

All students in the Educational Psychology Program are required to participate in a continuous review process in order to monitor student progress and determine that program outcomes are being achieved.

Additional Academic Requirements

All students in the Educational Psychology Program are expected to obtain skills in research. Each student is expected to join a faculty member's research team during the first semester of graduate study. Master's students take a number of research courses and are encouraged to participate in research projects during courses and field experiences.

Academic Misconduct

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances

Graduate School information on Academic Grievances (p. 219).

Scholastic Requirements

Educational Psychology Program requirements exclude credit for undergraduate study, study which is remedial, or study which is designed to remove deficiencies in meeting requirements for program admission. In addition, the program limits the number of courses not open exclusively to graduate students to no more than one-third of a student's program.

For the School Psychometry concentration, students must earn a GPA of at least 3.25 on all courses in the program, with no grade below a C.

Graduate School information Scholastic Requirements (p. 204).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation

Information on the Application for Graduation (p. 18).

Certification

For the School Psychometry concentration, requirements for certification and licensure in School Psychometry vary from state to state. Students are expected to determine the requirements for the state in which they intend to practice before beginning the program.

Graduates who met admission criteria above and obtain the MA degree in Educational Psychology - School Psychometry in the *hybrid* program may be eligible for Alabama Class A certification in School Psychometry IF the following prerequisites are met:

- a GPA of at least 3.25 on all courses with no grade below a C
- a passing score on a comprehensive assessment documenting mastery of the curriculum, and
- at least a valid Alabama Class B professional educator certificate in a teaching field or a valid Alabama Class A professional educator certificate in another area of instructional support

All students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek

employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Educational Psychology, Ph.D.

The Educational Psychology Program offers a number of graduate programs leading to a master's (MA), Educational Specialist (EdS), and PhD degree. The mission of the program is to provide students with a thorough understanding of the theory and research related to the nature of the learner and to the processes of teaching and learning. All degree programs reflect this mission and prepare students for careers as faculty members, researchers, and school practitioners.

The PhD is an advanced research degree and is designed specifically for students interested in careers within academic and research settings. PhD students may develop areas of study in:

- a. learning
- b. motivation
- c. human development
- d. educational neuroscience (an established PhD concentration)

The PhD in Educational Psychology with a concentration in Educational Neuroscience is based on an emerging transdisciplinary field that incorporates findings, methods, and theoretical perspectives from various fields, including cognitive neuroscience, learning sciences, cognitive science, and educational psychology. The concentration is currently open only to educational psychology PhD students. However, graduate students from any program can enroll in the courses offered.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A curriculum vita
- Three reference letters
- A Statement of Purpose that indicates a preferred track (i.e., learning, motivation, development, or educational neuroscience)

The Educational Psychology Ph.D. Program does not require GRE scores for admission, and applications without GRE scores will be given a full review. However, applicants are encouraged to submit GRE scores, especially if they are seeking an assistantship, applying without a master's degree, and/or if they do not have previous post-undergraduate research experience. To be competitive for the majority of assistantships, a minimum of 300 for the combined scores on the verbal and quantitative portions of the GRE is required.

We will start reviewing all applications on December 15th for fall admission. Please contact the graduate program coordinator if you have any questions.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A total of 90 credit hours (including 24 dissertation hours) is required to complete the coursework requirements for the Educational Psychology PhD Program.

Code and Title	Hours
Doctoral Required Core Courses (18 hours minimum)	
BEP 500 Adv Educational Psych	3
HD 500 Lifespan Human Development	3
BEP 501 Proseminar in Ed. Psychology (in the first year of PhD or MA studies)	3
Choose THREE 3-hour Educational Psychology Core courses (typically 500-level BEP and HD courses)	9
Specialization or Concentration Courses (15 hours minimum)	
Choose courses based on specialization, including but not limited to BEP, HD, PY, and BEF courses.	15
Foundations Courses (12 hours minimum)	
These courses should inform student research at a foundational level, especially covering philosophy, history, or broad epistemological/methodological topics. Such courses may include, but are not limited to, HD, PY, and BEF offerings.	
BEF History and/or Philosophy of Education (Suggested courses include BEF 503, BEF 504, or BEF 510.)	3
BER 631 or BEF 642 Inqry As Interp: Qual I Studies Philosophy Education	3
Foundations course (500- or 600-level)	3
Foundations course (500- or 600-level)	3
Research Courses (15 hours minimum)	
These should be courses that will help students conduct research and data analysis for their research, including but not limited to BER courses.	
Quantitative I (BER 540 is suggested.)	3
Quantitative II (BER 640 is suggested.)	3
Research course (600-level course is suggested.)	3
Research course (600-level course is suggested.)	3
Research course (600-level course is suggested.)	3
Electives (6 hours minimum)	
Electives can be any graduate-level course relevant to the student's focus and interests, including but not limited to courses from education, psychology, biology, human development, statistics, or computer science.	
Elective 1	3
Elective 2	3
Dissertation Research	24
Total Hours	90

Educational Neuroscience Concentration Courses

Students in the Educational Neuroscience concentration are expected to fulfill all requirements of the Educational Psychology PhD Program. In addition, they are expected to complete the concentration courses and/or other relevant courses offered by other departments (e.g., human development, psychology, anthropology, and computer science). For the concentration students, the recommended progression is BEP 570

Foundations of Educational Neuroscience and BEP 670 Methods & Trends in Ed. Neuro..

Students choose a combination of courses to meet the minimum credit requirement (15 credits) to complete the Educational Neuroscience concentration. Students will choose from the course list shown in the table below. This list is not exhaustive, and students are encouraged to work with their advisors to develop a suitable plan-of-study.

Educational Neuroscience Concentration Courses		Hours
BEP 570	Foundations of Educational Neuroscience	3
BEP 670	Methods & Trends in Ed. Neuro.	3
Select One of the following BEP Courses		3
BEP 600	Contemp Educ Psych Prob	
BEP 641	Learning and Cognition	
Other 600-Level BEP courses with advisor approval		
Select Two of the following courses or consult with your advisor for a course that will best prepare you for the dissertation topic.		6
Other 600-Level BEP courses with advisor approval		
PY 650	Cognition And Learning	
PY 655	Seminar in Cognitive Psych	
Courses selected with advisor consultation		
Total Hours		15

Transfer Credit

Students may transfer up to 24 credit hours of coursework from previous graduate studies, including a completed master's degree, contingent upon the relevance of the coursework and the approval of the advisor and the department chair.

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study

All Ph.D. students entering the program will be allocated a major advisor who will represent the student's major area of study.

Doctoral students are required to file official program of study forms with the Graduate School at the beginning of graduate studies. These forms require each student and her or his advisor to list the specific course requirements necessary for the student's completion of the degree. Doctoral programs of study may not be completed until the student successfully completes doctoral screening. Although a master's degree is not required for initial admission into the doctoral program, the completion of a master's degree is required before any student may complete and file the official program of study form. Doctoral programs of study are approved by the program advisory committee, area head, and assistant/associate deans of the College of Education.

Graduate School information for the Doctoral Plan of Study (p. 23).

Comprehensive Exam

All degree students in the Educational Psychology program are required to successfully complete written comprehensive examination before the degrees will be granted. To be eligible to take the comprehensive examination for the Doctor of Philosophy degree, a student must have completed the majority of their coursework, especially all required Educational Psychology Core Courses and all areas of specialization courses, and received approval from their advisor. The Educational Psychology program's comprehensive examination is designed to assess the development of the student's competencies and skills according to the following criteria:

- *Written*: Students review current and historic literature in two of the four major areas of educational psychology (learning, motivation, development, or neuroscience). Responses should highlight seminal papers and people. Each response should include 10-12 pages of text and approximately 40 references.
- *Oral*: Students review the existing literature and propose a novel study in their specialty area. Students should prepare a written document or “prospectus” and give an oral presentation. The document should include 20-25 pages of text and approximately 50 references. **Note that the prospectus is intended to serve as the basis for the dissertation proposal.**

Scoring of the Comprehensive Exam

- *Written*: Written exams are scored by faculty members. There are seven scoring categories: evidence of knowledge, accuracy, adequacy, depth, organization and flow, grammar, and format (e.g., APA style). Each category is scored 1-5, but the first five categories are weighted two points while the other two are weighted one point. A student must average 3.0 or more on each response to pass the written exam.
- *Oral*: Oral exams are scored by prospective dissertation committees (see *Dissertation Proposal* subsection below for further details about the committee composition). Each committee member votes (pass/fail) at the end of the student’s presentation. A student must receive a majority “pass” votes to pass the oral exam and be deemed to be capable of conducting independent research.

For further details about the timeline and deadlines, refer to the program website.

Graduate School information for Comprehensive Exams (p. 23).

Admission to Candidacy Requirements

PhD students advance to PhD candidacy when they pass their comprehensive exam.

Graduate School information on Admission to Candidacy (p. 23).

Continuous Enrollment Policy

Graduate School Policy on Continuous Enrollment (p. 23).

Dissertation Requirements

Dissertation Proposal

Upon preparation of a dissertation proposal, students should form their dissertation committee and the committee should be approved by the Graduate School. A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. If the committee chair is not a faculty member of the Educational Psychology Program, then the co-chair of the committee should be a program faculty member. The committee shall have not fewer than five members, all of whom are appointed by the dean of the Graduate School. At least two committee members should be Educational Psychology faculty members. All members of a dissertation committee must hold Graduate Faculty status at UA and must represent at least two academic departments. The chair of the committee must be a full member of the Graduate Faculty. A majority of the Dissertation Committee members must be regular UA faculty.

The proposal involves writing the first three features of the dissertation – introduction, literature review, and methods. The proposal needs to be presented orally to the dissertation committee who will provide feedback and decide whether or not the student can progress to the next stage by becoming a PhD candidate. This is known as the proposal defense.

Similar to the prospectus, the student will need to take account of the following:

1. The student will need to send the proposal to their dissertation committee to read 10 working days before they attend an oral presentation of it.
2. The student will need to book a room and check availability of their dissertation committee who all need to attend a presentation by the student of their proposal.
3. The student will need to present their proposal to the committee and receive their signatures from all members of the committee.
4. After successfully passing the proposal defense, the student will need to consult with their advisor about dissertation committee feedback, apply to the IRB if it is necessary, start to conduct their project, and write their dissertation.

Dissertation

The dissertation involves completing 5 features of the dissertation – introduction, literature review, methods, results, and discussion. The dissertation needs to be presented orally to the dissertation committee who will provide feedback and decide whether or not the dissertation of the student is accepted to get a PhD degree. This is known as the dissertation defense. Similar to the proposal, the student will need to take account of the following:

1. The student will need to send the dissertation committee to read 10 working days before they attend an oral presentation of it.
2. The student will need to book a room and check availability of their dissertation committee who all need to attend a presentation by the student of their dissertation.
3. The student will need to present their dissertation to the committee.

The student will need to consult with their advisor about dissertation committee feedback, make necessary corrections on their thesis, get signature from the committee on the presentation form to submit it to the graduate school, and submit their thesis to ProQuest.

Graduate School information on Dissertation Requirements (p. 23).

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 23).

Student Progress Requirement

Annual Review

As a way to provide students with evaluation about their progress and appropriate feedback on the direction of their studies, the program faculty conduct a progress review for each student at the end of each academic year. Review materials, including a summary of achievements in domains of teaching, research, and/or service and an up-to-date CV should be submitted to the Educational Psychology program coordinator at the end of each academic year. A request for these materials and a submission deadline will be provided during the Spring semesters. Once the faculty have reviewed these materials, they will make recommendations regarding the student’s continued progress in their Program of Study.

Additional Academic Requirements

1. Obtain a grade of A or B in all coursework
2. Produce one research or evaluation effort (e.g., presentation of a paper to a professional conference or have an article accepted for

publication). Note that this is a minimal requirement—consult with your advisor to develop a more optimal plan

3. Pass First Year Review
4. Plan Ph.D. program with Program Chair and Program Committee
5. Pass written and oral comprehensive examinations
6. Pass defense of dissertation proposal to be admitted into Ph.D. candidacy
7. Complete dissertation
8. Successfully defend the dissertation

Doctoral students are required to participate in and conduct research, and faculty members work closely with doctoral students to help them complete their research requirements. Each doctoral student takes a number of research courses and seminars and is required to participate in ongoing research projects prior to dissertation.

Educational Research, Ph.D.

The Educational Research program focuses on the understanding of research and its varied methodologies. It prepares scholars to conduct sound research studies and to analyze research work from the perspectives of both the social sciences and health sciences. The strength of the program centers around a core of collaborative faculty and prominent scholars who are dedicated to the development and application of dynamic research methodologies situated within contemporary conceptual frameworks. Areas of specialization within the degree program include qualitative methods, quantitative methods, mixed methods, psychometrics, and evaluation.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- 1-3 letters of recommendation consistent with goals of the program
- GRE score of 300 or above

Prospective students will find resources on the program's website to support writing a statement of purpose and requesting letters of support that are focused on educational research, which students are encouraged to review ahead of submitting the additional application materials.

Prospective students are encouraged to complete their applications by the priority application deadline of December 15th. Applicants who submit their materials prior to December 15th will receive priority consideration for graduate assistantships and other forms of funding.

Applications received after the December 15th date will be accepted and reviewed on a rolling basis.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Educational Research program offers a PhD program with a selected focus on research methods within one of the following areas of study: Qualitative Methods, Quantitative Methods, Mixed Methods, Psychometrics, or Evaluation. The PhD program requires a minimum of 72 credit hours, with a required 18 hours of courses within an area of specialization.

Code and Title	Hours
Professional Seminar in Educational Research	
BER 610 Prof Seminar in Ed Research	3
Required Educational Research Core Courses	
BER 540 Statistical Methods In Educ	3
BER 558 or Psychometric Theory	3
BER 657 Psychometric Theory	
BER 600 Survey of Educational Research	3
BER 631 Inqry As Interp: Qual I	3
BER 660 Eval I:Theory & Practice	3
Educational Research Area of Specialization Courses 18	
At least one area of specialization must be selected. Students may select any set of courses related to their area of specialization. Many, but not all of the courses may come from the Educational Research course listing in the following areas: Program Evaluation, Measurement, Classroom Assessment, Qualitative Research, and Statistics. It is expected that students will take all available BER courses in their area of specialization.	
Practica/Fieldwork in Educational Research	
BER 687 or Field Work Educ Research	3
BER 689 Practicum Educ Research	
BER 687 or Field Work Educ Research	3
BER 689 Practicum Educ Research	
College of Education Foundations 12	
The foundations requirement must consist of any non-research methods course outside of the student's program.	
Dissertation 18	
BER 699 Dissertation Research	
Total Hours	72

Transfer Credit

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study Requirement

All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree. Otherwise, a "hold" may be place on future registrations.

Graduate School information on the Doctoral Plan of Study (p. 23).

Comprehensive Exams

After completing doctoral candidacy coursework, students must successfully complete the doctoral comprehensive examination. To

be eligible to take the comprehensive examination for the Doctor of Philosophy degree, a student must have completed the preliminary review and evaluation, all required Educational Research Core Courses, all area of specialization courses, and practicum and/or fieldwork. Registering to take the comprehensive examination must be done in writing (e.g. via email) at the beginning of the semester the student plans to take the examination. This is done by notifying the student's Program Committee Advisor, who then submits a copy to the Program Chair and the Department's Program Assistant.

The examination is conducted by the student's supervisory committee or other committee established in the program area. Typically, the comprehensive exam committee is comprised of two faculty members from the Educational Research program, and one external to the program. The purpose of the comprehensive examination is designed to assess the development of the student's competencies and skills according to the following criteria: (1) Receive a passing mark on the written comprehensive examinations; and (2) Receive a passing mark on the oral examination. The comprehensive examination will be evaluated by all Comprehensive Exam Committee members using the program's Educational Research Rubric for Comprehensive Exam Assessment. The comprehensive examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Because the comprehensive exam is typically administered in a take-home format, it is expected that students will use course and reference materials in a manner consistent with the UA Academic Code of Conduct. While students are encouraged to utilize resources, both internal and external to the university, resources to improve technical writing (e.g., copyediting by someone other than the student) are prohibited on this exam. Failure to adhere to this policy is a violation of the UA Academic Code of Conduct and will be subject to disciplinary action. Specifically, if a student is found to violate the Academic Code of Conduct during their comprehensive exam, they will fail the exam.

Graduate School information on Comprehensive Exams (p. 23).

Fieldwork/Practicum/Internship Requirements

Students are required to complete 6 hours in practicum and/or fieldwork in educational research. Students may choose to take 6 hours in BER 687 or BER 689, or to take 3 hours of each. The fieldwork course, BER 687, is a student-initiated research project done with faculty supervision. The practicum course, BER 689, is student participation in faculty-initiated research, with work related to the supervising faculty member's research interests. The student's performance on fieldwork and/or practicum will be evaluated by the supervising faculty member using the Educational Research Program's Rubric for Intermediate Scholarly Writing Assessment.

Admission to Candidacy Requirements

The requirements for advancing to candidacy are:

- a successful preliminary review;
- completion of all coursework as listed on the approved program of study;
- passing the comprehensive examination;
- receiving approval of the dissertation subject from the student's committee.

A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the comprehensive examination.

Graduate School information on Admission to Candidacy (p. 23).

Continuous Enrollment Policy

Graduate School Policy on Continuous Enrollment (p. 23).

Dissertation Requirements

Prospectus

The dissertation prospectus aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written prospectus to their dissertation committee through a prospectus meeting. The student, in communication with their chair and committee, is responsible for scheduling this meeting and managing related logistics. For the dissertation prospectus, students will typically present content related to a proposed research study, which may be an in-process research study, and should include elements such as: 1) an introduction to/significance of the study, 2) draft research questions, 3) a theoretical or conceptual framework, 4) a concise review of literature, 5) potential methodology/ies, and 6) potential methods. Students should submit their draft prospectus to their chair and receive approval before sending the document to their dissertation committee. Committees should then have at least two weeks to review the prospectus before the prospectus meeting. The goal of the prospectus meeting is for the student to receive formative feedback on their proposed study prior to developing their dissertation research proposal.

Proposal

The dissertation research proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The student, in communication with their chair and committee, is responsible for scheduling this meeting and managing related logistics. The dissertation proposal typically includes both an introduction giving an overview of the proposed research and the following: 1) the significance of the proposed research, 2) a review of the literature, 3) the theoretical framework, 4) research questions, 5) the methodology, 6) data generation methods, and 7) data analysis methods. The proposal will be evaluated by all committee members using the Educational Research Program Proposal/Thesis/Dissertation Document Rubric.

Successfully defending the dissertation proposal provides evidence that the student and the committee have arrived at a sound methodology that the student will use to address (a) worthwhile research question(s). The proposal forms a working plan that can be used by the student and the committee to guide the research, to evaluate progress, and to provide ongoing feedback.

Dissertation

Dissertation guidelines are provided on the Graduate School's website. Please note that these are guidelines only; alternative formats are permitted. The dissertation must follow an established scholarly form, but that form may vary at the discretion of the chair and committee with final approval from the Graduate School. These guidelines are designed to assist the student with the development of the dissertation. The dissertation is to be written in American English, unless otherwise necessary to the dissertation topic and approved by the student's committee. It is not unusual for students to need the assistance of the UA Writing Center or a professional editor.

In addition, students are required to use the Publication Manual of the American Psychological Association (current edition) because it is the dominant style for educational research journals. It is the student's responsibility to maintain regular contact with their dissertation chair. The dissertation document and oral defense will be evaluated by all committee members using the Educational Research Program Proposal/Thesis/Dissertation Document Rubric. Even with consistent communication with the Chair and committee, it may take a month or more for the committee member(s) to be able to provide feedback. Please plan accordingly, relative to Graduate School deadlines for the dissertation and graduation.

Students are allowed a maximum of two dissertation oral defenses, in which they have an opportunity to successfully defend their dissertation. On the second attempt, a student must pass both the oral defense and have the dissertation voted acceptable by the committee. If the student fails both oral defenses, the student is automatically removed from the doctoral program, and must appeal to the Post-Master's Appeals Committee for reinstatement if interested in continuing.

Graduate School information on Dissertation Requirements (p. 23).

Time Limit for Degree Completion Requirement

Graduate School information on Time Limits (p. 23).

Student Progress Requirements Preliminary Review

The first programmatic checkpoint, the preliminary review and evaluation, applies after a student has taken 15 hours of coursework in Educational Research. Students must make arrangements with their advisor to initiate the process. Students who remain in good standing with the Graduate School are required to submit a portfolio consisting of an unofficial transcript, a completed draft of the Program of Study, an original sole-authored writing sample focused on educational research, and a declaration of intent (i.e., a statement of professional aspirations). Materials should be submitted to the student's advisor, at which point the advisor will share the materials with all program faculty for review. The faculty will review the student's materials using the program's Rubric for Intermediate Scholarly Writing Assessment and make written recommendations regarding the continuation of the student's Program of Study. Students will either "pass" or "fail" the examination. A recommendation of "fail" will result in an action plan created by the program faculty and will be supervised by the student's advisor. Adherence to the action plan is required for successful growth and development in the program.

Students who transfer into the PhD in Educational Research program and have already successfully completed 15 hours of coursework in Educational Research prior to admittance may ask their advisor to initiate a review by program faculty to waive their participation in the preliminary examination. Using the writing sample submitted at time of application, the student's advisor will submit a completed rubric to the Program Chair as documentation for request of the waiver.

The student may not advance to the program's practicum and/or fieldwork courses or doctoral comprehensive exam without a passing score on either the preliminary review and evaluation or development plan materials.

Qualitative Research Certificate

The Graduate Certificate in Qualitative Research is a 15-credit course sequence that integrates theoretical knowledge with practical applications and field-based experiences. Although this certificate is housed in the College of Education, students from all disciplines are welcome to apply.

NOTE: This certificate is not a credential for teacher certification/licensure.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. Statement of Purpose focusing on the student's goals in pursuing a Qualitative Research certificate;
2. Writing sample, involving qualitative research, submitted directly to the department for faculty consideration
3. Student must have a Master's degree in education (or a related field)

It is recommended to apply after successful completion of BER 630 Qual Case Study Research or BER 631 Inqry As Interp: Qual I with a grade of B or better.

Certificate completion will be monitored by the assigned certificate program advisor.

See the Admission Criteria section of this catalog for more information.

Quantitative Research Certificate

The Graduate Certificate in Quantitative Educational Research places an emphasis on acquiring the skills necessary not only to complete statistical calculations, but to know how and when to apply and use appropriate calculations. This 15 credit-hour certificate prepares students from various disciplines to conduct research that documents the effects of educational programs. The courses required for the completion of this certificate are advanced educational research/statistics courses. Students will gain significant and valuable knowledge and skills beyond what is required for typical degree requirements. Although this certificate is housed in the College of Education, students from all disciplines are welcome to apply.

The primary mission of the Educational Research Program aims to offer a quality graduate program that prepares scholars to critically engage with educational research and evaluation, to develop appropriate and innovative research design, and to contribute conceptually sound analyses to the research problems of the field.

Requirements for the Graduate School (Degree Requirements (p. 18)) and the College of Education (Master's (p. 18), Professional Certification, EdS, Doctoral (p. 18)) are detailed in earlier sections of this catalog. For specific program requirements visit the College of Education Programs website or for a student handbook and additional information, email or call: Chairperson, School Psychology, The University of Alabama, College of Education, Box 870231, Tuscaloosa, AL

35487-0231; phone 205-348-7575; fax 205-348-0683; program office, 306 Carmichael Hall.

NOTE: This certificate is not a credential for teacher certification/licensure.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. Statement of Purpose focusing on the student's goals in pursuing a Quantitative Research certificate;
2. Evidence of prerequisite research/statistics courses comparable to BER 540 Statistical Methods In Educ, must have achieved a grade of B or better in prerequisite research courses

Certificate completion will be monitored by certificate program administrators.

See the Admission Criteria section of this catalog for more information.

School Psychology, Ph.D.

School Psychology

The University of Alabama School Psychology Program is designed to provide exemplary graduate training in research and in the application of practice related to the learning, development, and mental health of children and youth, and their families. The doctoral degree in school psychology prepares students for direct school-based practice and for careers as faculty members, researchers, and practitioners. The doctoral degree program in school psychology focuses on the provision of school psychology services that are based on a strong foundation of research. The school psychology doctoral degree program includes an integrated and sequential program of study with comprehensive coursework and supervised field experiences. Candidates participate in courses and seminars in assessment and data collection, interventions and decision making, prevention and consultation, professional school psychology, sociocultural foundations, psychological foundations, human development, educational foundations, statistics and research, and other areas. Candidates are required to participate in extensive practicum, internship, and research experiences.

The doctoral program is an on-campus option only; there is no distance learning option. The doctoral School Psychology Program holds full approval status from the National Association of School Psychologists (NASP) and national recognition by CAEP.

Admissions

See the Admission Criteria section of this catalog for more information.

Prospective students for the doctoral program are encouraged to complete their applications by December 15 for admission the following fall semester.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. Vita/resume
2. Three letters of recommendation consistent with goals of the program

Note that a prior graduate degree or educator certification is NOT required for admission to our on-campus PhD degree program.

Curricular Requirements

Code and Title	Hours
Data-Based Decision Making and Accountability:	
BSP 522 Soc-Behavioral Assessment	3
BSP 521 Cog Acad Assess	3
Consultation, Intervention, and Prevention:

Advanced Doctoral Practicum (BSP 696)	6-12
Doctoral Internship in School Psychology (BSP 688)	15-18
Total Hours	123-132

Transfer Credit

The School Psychology Program has more stringent requirements than the Graduate School maximums for transfer credit for students who have completed previous graduate coursework. Generally, fewer courses will be approved for transfer credit than the Graduate School maximums. In some circumstances, a student with a previous master's, EdS, or doctoral degree may be allowed to count some coursework from the previous degree. After a student begins enrollment in our program, transfer credit or use of previous graduate coursework must first be evaluated and approved by program faculty to determine equivalency to a required course in our program. Equivalency is determined by consistency between the proposed transfer course and required program course in terms of objectives, content, projects, and other activities. Only in very unusual circumstances will a student be approved to transfer previous graduate coursework for required courses with the "BSP" (school psychology core) designation in our program of study. However, it may be possible for students to transfer educational psychology, educational foundations, special education, etc., courses that are equivalent to those in our required program of study.

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study Requirement

The doctoral degree provides greater depth and breadth in graduate studies than the program's EdS degree. The greater depth in our doctoral program is demonstrated in our extensive required coursework and field experiences for the 120+ credit doctoral degree. Our doctoral students receive greater depth of school psychology preparation in multiple NASP domains, beyond what is provided in our EdS program, by taking additional required courses in the following areas.

- Data-Based Decision Making
- School-wide Practices to Promote Learning
- Services to Promote Safe and Support Schools
- Research and Evidence-Based Practice
- Legal, Ethical, and Professional Practices

Doctoral students are required to complete comprehensive preparation in research. Research skills and activities include additional coursework in research, pre-dissertation research, and a comprehensive doctoral dissertation study.

Doctoral Elective Focus Areas

In addition to required coursework in the school psychology doctoral program, students should complete coursework and practicum experiences to focus on a specific area of practice and/or research. Each doctoral student is required to complete at least two additional courses in a specific individual focus area in which they wish to receive more preparation in knowledge and skills for practice and/or research. Students and their advisors should plan practicum and internship experiences that complement areas of focus. Focus areas may include reading/literacy, curriculum, special education, statistics, early childhood special education, counseling, and others. Permission must be obtained from programs that offer coursework and experiences in which the student wishes to obtain focused skills.

Graduate School information on the Doctoral Plan of Study. (p. 23)

Doctoral Qualifying and Comprehensive Exams

Written Examinations

All students in the School Psychology Program are required to successfully complete written examinations before any degrees will be granted. The examinations are completed independently on a "take-home" basis and require students to integrate knowledge and skills obtained during coursework and other graduate education activities. Successful completion of the program requires that a student passes the exams. Further, no student will be allowed to enroll in EdS or PhD internship until all exams are passed.

Written Qualification Examination

All doctoral students take the qualification examination at the end of the spring semester of their first year of study. The exam results are reported to the Graduate School to meet university requirements for the MA degree as well as the EdS degree. Qualification exams will be offered annually in school psychology unless special circumstances arise. Students who wish to sit for the exam at a different time should submit a written petition to the program coordinator. Students must obtain an average of 80% or higher across faculty ratings for all questions to pass. Students who earn less than 80% of points on any one question may orally defend that question in front of the school psychology faculty. Earning less than 80% on two or more questions will result in failure of the qualification examination.

According to UA Graduate School policy, students may only take these examinations twice, a first attempt and one retake if the first attempt is not successful. If the student did not pass, the student can reattempt the relevant questions. Students will have an additional month to complete the new questions and will be required to orally defend their responses. Students who do not pass qualification exams following two attempts will be dismissed from the program.

Written Comprehensive Examination

Doctoral students in the School Psychology Program are required to successfully complete the comprehensive examination. Passing the comprehensive exam is required for proceeding with other program requirements (e.g., internship, dissertation) and obtaining the doctoral degree. Thus, no student will be allowed to enroll in a doctoral internship until the comprehensive examination is passed.

All doctoral students are expected to take the comprehensive examination no later than fall of their fourth year in the program. Students are eligible to take the comprehensive examination following:

1. Completion of all master's degree requirements in school psychology at The University of Alabama (or demonstration of earned master's degree)
2. Completion of pre-dissertation research requirement (or demonstration of equivalency)
3. Selection of dissertation chair
4. Permission from dissertation chair and program advisor

Graduate School information on Comprehensive Exams (p. 23).

Fieldwork/Practicum/Internship Requirements

Clinical and Field-Based Training

All students in the School Psychology Program are required to engage in several supervised, sequential, and organized field-based experiences, practica, and internships. Students engage in course-based clinical and field experiences during their first year in the program, formal practicum courses after the first year, and a final culminating internship at the conclusion of the program. Thus, students are engaged in clinical or field experiences each fall and spring term in the program.

During all field placements (e.g., practica, internships, course-embedded field experiences), students are evaluated continuously by university and field supervisors. In addition, a formal evaluation is submitted by the field supervisor to the university instructor at the end of each semester. The students must meet all requirements and achieve all objectives to be given a satisfactory grade for the field placement.

Practicum

Most of the required school psychology courses with the BSP prefix include some type of clinical or field-based experiences. In the first year in the program, BSP 501 Prof Issues/ Ethics Sch Psych, BSP 521 Cog Acad Assess, and BSP 522 Soc-Behavioral Assessment all require field or clinical experiences, including classroom observations in local schools, assessment and data collection with youth, families, or other carefully supervised experiences. Several other required courses for the program (prefixes SPE, CRD, BCE, etc.) may also require clinical and field experiences on campus and in local public schools.

In addition, several formal practicum courses are required. In the second year in the program, doctoral students take BSP 580 Sch Based Pract Assessment for 200+ hours of on-site field activities in local schools in fall semester and BSP 683 Adv Sch Based Pract for 200+ hours of on-

site field activities in local schools in spring semester. In their third and fourth years in the program, doctoral students continue to take BSP 696 Adv Doctoral Practicum most semesters, with 200+ onsite hours for each fall and spring term in local schools or other agencies that provide psychological services. School psychology practicum courses are offered in fall and spring terms, but typically are not offered in summer terms, except in special, pre-approved circumstances for doctoral practicum only.

Practicum sites are schools and other agencies relevant for school psychology practice. BSP 580 Sch Based Pract Assessment and BSP 683 Adv Sch Based Pract are taken by both EdS and doctoral students and occur in local public schools in the immediate Tuscaloosa or surrounding areas. Additional sites for doctoral students during doctoral placements in BSP 696 Adv Doctoral Practicum in the 3rd+ year of the program may include local public schools, university clinics, and other agencies in the immediate Tuscaloosa, Birmingham, or surrounding areas. Doctoral students wishing to complete a portion of their practica in other settings during their 3rd+ years may be given permission if the practicum site meets the needs of doctoral focus areas of the students and the program's requirements for practicum experience. If approved by the program, doctoral students may have two placement sites in the same semester and spread the required field hours between the two sites.

Doctoral students must successfully complete at least 600 hours of practicum prior to internship, generally in school and other agency settings, although 1000+ practicum hours are typically recommended if the student is considering an American Psychological Association (APA), Council of Directors of School Psychology Programs (CDSPP), or Association of Psychology Postdoctoral and Internship Centers (APPIC) internship placement. Doctoral students should begin review and completion of the comprehensive and stringent internship application procedures early in their graduate studies.

Internship

Prior to beginning the doctoral internship, students must successfully complete all courses, practica, a qualifying exam, a comprehensive exam, portfolio evaluations, a pre-dissertation research requirement, a dissertation proposal, and be approved by the program.

All students must complete an internship at or near the end of formal training. Students must be approved by the program to begin planning for internship and before an internship placement begins. With program approval, internships may occur in qualified settings across the country. The doctoral internship requires a minimum of 2,000 hours and may be completed on a full-time basis in one calendar year (600+ clock hours over a continuous 15+ week period in each of a consecutive fall, spring, and summer/fall semester), or, with special permission, based on a half-time week over two consecutive and continuous calendar years. Because they are conducted throughout an entire calendar year, or three semesters, doctoral internships are completed in consecutive fall, spring, and summer (or another fall) terms. At least 600 internship hours must be in a school setting.

Students seeking internship placements must discuss the placement with their advisor and program coordinator at least a year in advance—during the first few weeks of the fall semester preceding an internship placement for the following fall term. By May 31 prior to the internship, potential interns must document that all program requirements for internship have been met and must seek and obtain program approval to begin internship by submitting the Internship Approval form. Once program approval has been provided to the intern, the intern will share the UA School Psychology Program MOA with the internship site for signature. When the internship site has agreed to and signed the MOA,

the intern will return it to the program coordinator who will ensure the remaining UA personnel signatures are completed. The intern must provide the MOA to their internship site by June 1st. Students may not begin their internship without a completed and signed MOA.

Admission to Candidacy Requirements

The student must file all necessary forms with the UA Graduate School for each degree, including the program of study form, admission to candidacy form, and application for degree and must pay all necessary fees for graduation. Students are reminded to apply for admission to candidacy and graduation for each degree level, as soon as requirements for the applications are met. Each student for a graduate degree must apply for graduation no later than the semester preceding the semester in which degree requirements are to be completed. Thus, EdS students must complete all required forms for the MA degree, which is typically awarded during the first 1½ years in the program, and for the EdS degree, which is awarded at completion of internship. Doctoral students must complete all required forms for the MA degree typically awarded after the first 1½ years in the program, for the EdS degree awarded at completion of the first 1,200 hours of the doctoral internship, and the doctoral degree awarded at completion of all 2,000 hours of the doctoral internship and completion of dissertation.

Each semester, the Graduate School publishes dates by which students must meet degree requirements, submit forms, and engage in other activities necessary for admission to candidacy and awarding of the degrees. Most deadlines occur in the semester before the degree will be granted. Graduate School deadlines and forms are posted every semester. It is the student's responsibility to review and meet all deadlines. Failure to meet the Graduate School's deadlines may result in the Graduate School delaying a student's receipt of a degree.

The UA Graduate School's official admission to candidacy for the EdS in Educational Psychology-School Psychology requires that students submit the form after 12 post-MA credits have been completed.

The UA Graduate School's official admission to candidacy for the doctorate in School Psychology requires the following:

1. Completion of the program plan of study form approved by the Program Advisory Committee.
2. Demonstrated competence through the written or oral examination procedures or other evaluations required for the major field.
3. Completion of the pre-dissertation research project for the doctoral research requirement and the oral presentation of the completed project to peers and faculty.
4. Approval of dissertation proposal by the Dissertation Committee.

Official admission to candidacy is required before PhD students may complete their dissertation.

Graduate School information on Admission to Candidacy (p. 23).

Continuous Enrollment Policy

Graduate School Policy on Continuous Enrollment (p. 23).

Dissertation Requirements

All doctoral students are required to complete a research dissertation. University policies for dissertations are outlined in the Graduate Catalog. College of Education and department policies must be followed. According to School Psychology Program policy, the dissertation prospectus (a preliminary description of the dissertation project) and proposal (a more comprehensive description of the planned dissertation project) must be prepared and approved by the committee.

The dissertation prospectus and proposal should be completed prior to beginning the doctoral internship

The general steps in preparing the dissertation are listed below:

- Identify dissertation committee chair
- Successful completion of comprehensive exam
- Finalize dissertation committee
- Preparation of Complete Dissertation Proposal
- Proposal Meeting and Approval of Proposal by Dissertation Committee; Admission to Doctoral Candidacy
- Approval by UA Internal Review Board for Human Subjects Research and by Data Collection Site
- Collection of Data
- Data Analyses
- Preparation of Final Dissertation
- Final Examination, Defense, and Approval of Dissertation by Dissertation Committee
- Submission and Approval of Dissertation by Graduate School

Institutional Review Board Procedures

All graduate students and faculty who conduct research must be certified as having completed comprehensive training in human participants research regulations. All research conducted by graduate students and faculty in the School Psychology Program in any coursework, field experience, or research project must be reviewed and approved by the University of Alabama's Institutional Review Board (IRB). This includes research for students' class projects, theses, and dissertations. Proposals describing the research, its risks and benefits, and the procedures of obtaining informed consent and protecting confidentiality must be submitted to the IRB. For research conducted in schools or other private or public settings, additional approvals may be needed. Information about research compliance training and IRB approval may be found at http://osp.ua.edu/site/irb_training.html and http://osp.ua.edu/Research_compliance.html.

<http://services.graduate.ua.edu/etd/templates.html>

Graduate School information on Dissertation Requirements (p. 23).

Time Limit for Degree Completion Requirements

Graduate School information on Time Limits (p. 23).

Student Progress Requirements Continuous Review of Student Progress

Each student is required to undergo a formal progress review during an annual progress evaluation at the end of every spring semester after entering the program; thus students entering the program in a fall term will have their first formal progress review at the end of the following spring, after two complete semesters of graduate study in the program. At the end of each spring term in the program, students are required to submit a comprehensive electronic progress evaluation of their work by the due date provided by the program coordinator; faculty members review the progress evaluation and evaluate knowledge, skills, and other relevant characteristics of students as shown in coursework, clinical work, field placements, and other program activities. Doctoral students also must submit an updated progress evaluation and have a progress review during the spring semester in internship. Doctoral students must continue to submit a progress evaluation every spring semester until graduation. Students prepare progress evaluation submission in an

electronic format and will be provided information about submitting the annual progress evaluation.

While a portfolio is not required for the annual progress evaluation, students are expected to retain electronic copies of all work in graduate courses and other experiences beginning with their first semester of enrollment in the program. Annual progress evaluation components and professional work characteristics of the student are evaluated by program faculty according to a rating scale, in which student progress is judged to be satisfactory or non-satisfactory.

Students are expected to receive satisfactory ratings on all progress evaluation components to continue with the planned program of study. In some cases, students may receive ratings of satisfactory that also include program requirements for improvement. Ratings of non-satisfactory on a few components may result in program requirements for additional course or field activities before continuation with the planned program of coursework, practicum, or internship. Thus, failure to make adequate progress in the program, based on a variety of quantitative and qualitative factors, will result in the student being placed on warning or perhaps being dropped from the program. There are four possible outcomes to the annual progress review evaluation process:

1. satisfactory progress in all areas,
2. satisfactory progress but with requirements for improvement
3. unsatisfactory progress in a few areas with probation for student and requirements for improvement, and
4. unsatisfactory progress in several areas, with discontinuation of student.

Please note that students may be given a probationary period before they are discontinued, if deemed appropriate or necessary.

Minimum Grade/GPA Policies in School Psychology Courses

Students enrolled in the School Psychology Program must maintain a grade of B or higher in all core school psychology courses. Students may be able to repeat a course if they earn a grade lower than a B. Failure to receive a grade of a B or higher when taking a core school psychology course a second time results in dismissal from the program.

Students also must continually maintain a GPA of at least 3.0 to continue advancing toward key degree-related milestones. These include taking qualifying exams, comprehensive exams, advancing to candidacy, and accepting/beginning an internship.

Practica and Field Placement Policies

Addressing Concerns about Students in Field Placements, Practica, and Internships Field supervisors are asked to immediately report any concerns, issues, or suggestions to the student and to the university professor. Concerns by the field supervisor and/or university professor may be addressed through improvement plans developed for the student, in collaboration with the student, field supervisor, and university professor. Significant concerns may result in temporary suspension of the field placement, removal of the student from the placement, a grade of F for the course, and/or dismissal from the program.

Improvement Plans

If a student improvement plan for courses, field placement, or other program activities becomes necessary, the program faculty, placement site supervisors, and students will develop an improvement plan that identifies concerns/issues, specific goals, deadlines, evaluation methods, and required outcomes needed for the student to meet all criteria and achieve all objectives and earn a satisfactory grade for the course or

field placement. The improvement plan will include frequent meetings between the student, professors, and supervisors to monitor progress. The improvement plan will include frequent submission of materials by the student and frequent submission of a formal evaluation by the professors and supervisors.

Program Dismissal

The student will have the right to meet with the program faculty and department chair. If the decision is to be that the student is dismissed from the program, the student will be informed in writing. If the student disagrees with the program decision, or feedback provided, the student may consult with someone outside the program, and consider submitting an appeal. The University of Alabama College of Education Grievance Procedures (<https://education.ua.edu/students/student-complaint/>) will be followed if a student has a grievance about the decision to dismiss the student or another type of academic concern.

Additional Academic and Program Requirements

Fingerprinting/Background Check

The UA College of Education requires that all students must clear a fingerprinting/background check prior to field experiences. Prior to their first semester of enrollment in the program, school psychology students must meet this requirement for activities in schools under the jurisdiction of the Alabama Department of Education. Students should contact our college's Student Services Office at (205) 348-0193 to obtain instructions or confirm if a background check has been completed. Students also have the responsibility to meet fingerprinting/background check requirements of their specific agency, state, etc. for all field, practica, and internship placements or other field experiences. Students should note that fingerprinting/background checks usually cannot be transferred from one state to another or, within a state, from one type of agency to another. New background checks typically are required by each state or type of agency. NOTE: After your graduation from the program, additional fingerprinting/background checks also typically are required to receive a state credential/certificate/license to practice as a professional in schools and other agencies.

Non-Dissertation Research

Doctoral students are required to participate in and conduct research. Faculty members work closely with doctoral students to help them complete their research requirements. Doctoral students take a number of experiential, research and statistics courses and seminars, are required to complete at least one research project prior to the dissertation, and are required to submit this project for publication or presentation at a national conference. The research project may be in collaboration with a faculty member and must include collecting data, analyzing, and reporting results for a research study. Doctoral students also are required to complete a comprehensive dissertation research study (see Dissertation Requirements above for more information).

National School Psychology Examination and State Credentialing Exams

According to UA College of Education and Alabama Department of Education policy, all doctoral students are required to take the National School Psychology Examination offered as a Praxis subject assessment by ETS. The exam must be taken and scores submitted to the program prior to the completion of 1,200 hours of EdS or doctoral internship. However, students are encouraged to take the exam soon after completing program coursework and either prior to or during the first few

months of internship to allow opportunities to retake the exam, if needed to meet the program's criterion score.

Students must obtain a passing score on the *Praxis* School Psychologist exam (National School Psychology Exam, *Praxis* test code 5402) to receive a grade for internship and graduate from the program. Currently, the program requires a score of 147 to receive a grade for internship and, thus, to graduate from the program. Students must have their scores sent to the UA (score recipient code 1858; this same code should be recorded as the student's "attending institution"). The exam also is required for school psychology certification in Alabama; students desiring certification in our state should also have their scores sent to the Alabama Dept. of Education (recipient code 7020). Many other states require the *Praxis* School Psychologist exam for a state school psychology certificate; students should obtain the recipient code for the state in which they will apply for certification and have scores sent. The exam is required for the National Certificate in School Psychology (NCSP), and students should have their scores sent to the National Association of School Psychologists (recipient code R1549). A passing score of 147 also is currently required for the NCSP.

Students should be aware that additional exams may be required for applications for state credentials and should determine these requirements well in advance of graduation. Students should keep in mind that they may need to apply for Alabama certification to meet certification requirements in another state, even if they do not plan to work in Alabama. Other states also have their own specific requirements for examinations, which should be identified by students well in advance of graduation from the program.

Academic Misconduct

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

The School Psychology Program faculty members and field placement agencies recognize that major emergencies can happen for some students and that they may have a short or long-term impact on a student's participation across program activities during a semester, including coursework, field placements, graduate assistantships, comprehensive exams, portfolio submissions, etc. The program is committed to supporting students in their program activities and providing assistance and guidance when emergencies have an impact on the student's activities. If you experience a major emergency (e.g., personal or family medical issue, etc.) that significantly impacts across your course, program, or field placement activities and prevents your participation for a period of time, notify the program coordinator immediately or as soon as possible after the emergency. The program coordinator will assist you with making immediate requests to course professors, field or assistantship supervisors, or program faculty about making sure that your duties and responsibilities are covered, extending deadlines, rescheduling assignments, withdrawing from activities or field placements, etc. Again, student's requests to faculty for possible solutions must be based on a major medical or similar emergency and requests must be submitted immediately or as soon as feasibly possible following the emergency. Students should be aware that any extensions, rescheduling, or withdrawal from any type of program activity possibly may impact your schedule of courses, field placements, internship dissertation, final graduation, etc. The faculty will assist students in evaluating and making plans if major emergencies affect program activities.

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances Information

The Department of Educational Studies in Psychology, Research Methods, and Counseling has procedures by which students may resolve any type of issue or concern. For students in the School Psychology Program, all grievances, complaints, and concerns must be filed with the Head for Department of Educational Studies in Psychology, Research Methods, and Counseling.

Graduate School information on Academic Grievances (p. 219).

Scholastic Requirements

Graduate School information on Scholastic Requirements (p. 204).

Graduate School Deadlines Information

Information on Graduate School Deadlines.

Application for Graduation Information

Information on the Application for Graduation (p. 23).

Certification

Requirements for certification and licensure in school psychology vary from state to state. Students are expected to determine the requirements in the state or states in which they are interested in practicing before beginning the program. The degrees from the School Psychology program may lead to state and national credentials:

- Graduates of the NASP-approved (main campus) program, who obtain the EdS and PhD degrees in School Psychology, are eligible for the National Certification in School Psychology (NCSP), following successful completion of the national school psychologist *Praxis* assessment and internship. The NCSP is used by over 30 states, including Alabama, as one possible route to grant state certification in school psychology.
- EdS and PhD degree graduates of the School Psychology program who obtain the NCSP may meet requirements for the Alabama Class AA certificate in School Psychology using the Nationally Certified School Psychologist Approach.

For a student handbook or additional information, email or call: Program Coordinator, School Psychology, The University of Alabama, College of Education, Box 870231, Tuscaloosa, AL 35487-0231; phone (205) 348-7575; fax (205) 348-0683; program office, 306 Carmichael Hall. <https://education.ua.edu/programs/bsp>.

Certification for Degree-Seeking Students Only

The School Psychology Program enrolls degree-seeking students and, occasionally with special permission, approves students for non-degree status to take only 1 or 2 courses, as noted earlier. The program typically does not enroll, evaluate, or endorse individuals who are not admitted to our degree programs. Only students admitted and enrolled in the EdS or PhD degree programs in school psychology and who complete our required coursework, field experiences, internships, and degrees are recommended by the program for the National Certificate in School Psychology (NCSP).

KIN500 Sociology of Sport

Hours 3

Examines the institution of sport from a sociological perspective. Provides an opportunity to critically analyze the assumptions surrounding the social significance of sport through a process of reflective thought.

KIN506 Techniques of Research

Hours 3

Designed to acquaint the student with the types of research and the methods and materials necessary for scientific inquiry. Includes the development of a research proposal, with emphasis on form and style.

Kinesiology, MA

The Department of Kinesiology offers the Master of Arts degree with coursework in the following:

- exercise science
- general studies in kinesiology
- sport pedagogy (traditional Class A and Alternative Class A certification in physical education)

Admissions

See the Admission Criteria section of this catalog for more information.

Admission Requirements for Physical Education, Traditional Class A Certification

In addition to the minimum Graduate School admission requirements, to be considered for regular admission applicants must hold appropriate prior certification in physical education (P-12) or the approved equivalent.

Admission Requirements for Physical Education, Alternative Class A Certification

In addition to the minimum Graduate School admission requirements, to be considered for regular admission applicants must complete specified undergraduate prerequisite courses.

For admission to the Alternative Class A (non-traditional) program in physical education (sport pedagogy), applicants must meet the following requirements:

- **Transcript evaluation:** Applicants should contact the Office of Student Services & Certification (104 Carmichael Hall) for a transcript evaluation to determine prerequisite courses and other requirements.
- **Degree requirement:** An appropriate bachelor's degree from a regionally accredited institution with a minimum overall GPA of 2.75 OR a master's degree with a GPA of at least 3.0 is required.
- **Teaching Field:** Applicants must have an academic content major (or the equivalent) in the teaching field. The transcript evaluation will determine if an applicant meets the teaching field requirement.
- **Fingerprinting/background clearance**

Admission Requirements for Applicants not Seeking Certification

In addition to the minimum Graduate School admission requirements, to be considered for regular admission applicants must:

- Score of at least 300 (combined verbal and quantitative) on the GRE

Prospective students who fail to satisfy one of the criteria above may be considered for Admission with Permission to Continue at the discretion of Kinesiology faculty.

Curricular Requirements

Kinesiology, MA (Class A Physical Education)

This course listing applies to those who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. A minimum of 30 hrs of course credit must be earned, and a comprehensive exam must be successfully completed. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C.

Kinesiology, MA (Physical Education, Alternative Class A Certification)

This course listing applies to those who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C, and earn passing scores on a comprehensive exam and the appropriate Praxis subject assessment(s).

Kinesiology, MA (Alternative Class A Physical Education)	Hours
Curriculum and Teaching:

Optional Work (6 hours):		
Complete an additional 6 hours of graduate level work either inside or outside the Department of Kinesiology. Courses chosen outside the Department of Kinesiology must support the student's main academic interest.		

Total Hours **30**

Transfer Credit

A maximum of six (6) hours of graduate credit earned in the field of the master's degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied toward the requirements for a master's degree in Kinesiology under the following conditions:

- The credit hours must have been completed prior to the student enrolling in the master's program at The University of Alabama.

The credit hours must not have been taken in order to satisfy the requirements for degrees the student has earned previously. For the traditional Class A Physical Education program, credits used for the previous Class B certification may not be used for this program.

Graduation School information on Transfer Credit (p.).

Accelerated Master's Program

The Accelerated Master's Program (AMP) allows highly motivated students concentrating in Exercise Science to take courses that dual count toward the BS in Kinesiology degree as well as toward an MA in Kinesiology degree (with coursework focusing on Exercise Science). Students admitted to the program take 12 hours of 500-level coursework during the senior year. Upon completion of the undergraduate degree, students can take an additional 18 hours of coursework during year 5 in order to complete the 30-hour MA degree. Students are not obligated to complete the master's degree and choosing not to complete it will not adversely affect the ability to earn the BS degree.

Information on the Accelerated Master's Program (p. 13).

Comprehensive Exam

Dates for and Registering to Take Comprehensive Exams

- Master's degree comprehensive examinations for students opting not to write a thesis will be offered twice a year. During the fall semester, they will be offered in the second full week of October. During the spring semester, they will be offered in the second full week of March.
- Only eligible students may take their comprehensive examination, eligibility being dictated by policies provided in the university's Graduate Catalog.
- Students wishing to take comprehensive examinations must inform the departmental representative responsible for scheduling and organizing the comprehensive examination (Dr. Sinelnikov) at least four weeks prior to their desired examination date.
- During the fall semester, any retakes of the master's comprehensive examination will take place in the first week of December. During the spring semester, they will take place in the first week of May. Students can also delay retaking the comprehensive examination to the first opportunity during the following fall or spring semester.

Master's Degree Comprehensive Examination Format and Content

- The master's degree comprehensive examination for students opting not to write a thesis will consist of a morning and afternoon session during one day. Each session is 3 hours in duration.
 - Exercise Science only:* Within 1 month after the written session, an oral examination will follow. At the discretion of each faculty member, the student may receive feedback regarding the written answers during the 1-month period before the oral follow-up. A single comprehensive examination attempt will comprise a written and oral component. The oral component will be administered by the faculty members who provided questions.
- During each session, students answer questions on relatively narrow topics drawn from specific courses taught within the Department of Kinesiology.
 - Exercise Science only:* Questions are provided by at least 3 exercise science faculty.
- The departmental representative responsible for scheduling and organizing the master's degree comprehensive examinations will solicit questions from those Kinesiology faculty who have taught graduate courses to each student.
- Students will be asked questions based on coursework from a minimum of 4 courses.
- The departmental representative responsible for scheduling and organizing the master's degree comprehensive examination may provide examples of past questions for students studying for the examination.
- Students will complete the examination by typing within a word processing program on a computer.
- Personal technology including phones, tablets, personal laptop computers, and portable drives will not be permitted in the examination room.
- Each examination session will be monitored by a rotation of faculty members organized by the departmental representative overseeing the examination process.
- On completion of the examination, the departmental representative responsible for its scheduling and organization will distribute students' answers to the faculty who composed individual questions for evaluation, collect all evaluated answers, and inform each student of his or her result (pass or fail) and average score (based on a rubric).
- Students failing the comprehensive examination will be required to rewrite individual questions on which they received a score of 1.

They will be permitted only one further attempt to pass and may be required to take additional coursework.

- *Exercise Science only:* The faculty administering questions will consider both the written and oral components in determining a score on a given attempt. Students failing the examination must wait until the following semester to retake the exam. Additional coursework may be required. Retakes of written portions will only involve question(s) failed, but the oral portion of a retake will be administered by the full committee of faculty who administered questions. The committee will decide the pass/fail outcome of the retake attempt.

The departmental representative responsible for coordinating the master's degree comprehensive examinations will keep a record of and report results to the Graduate School.

Graduate School information on Comprehensive Exams (p.).

Fieldwork/Practicum/Internship Requirements

Clinical Placements

All Class A and Alternative Class A programs require extensive field experiences in diverse settings. The majority of field experiences must occur in P-12 schools, and at least half of the field experiences shall be in the candidate's teaching field. These placements are in the greater Tuscaloosa area in order to facilitate supervision of students. With approval, individuals who are employed in positions appropriate to the area of their current program may complete field experiences on the job, but those experiences must be planned with specific purposes and assessment. All clinical placements in the College of Education relating to educator preparation are coordinated through the Office of Clinical Experiences.

Professional Liability

Students enrolled in College of Education courses that require a clinical placement should have professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

Internship - Alternative Class A

The teaching internship (formerly called student teaching) is one of the most important experiences College of Education students have. It is generally regarded as the culminating activity of one's preparation to become a teacher. At The University of Alabama, the internship is a full-semester, full-time assignment and must be taken in residence.

Alternative Class A students must file internship applications with the Office of Clinical Experiences in 105 Autherine Lucy Hall during the semester preceding the semester of the planned internship. The application process begins by attending a mandatory application session, which is held the first Wednesday in October for spring-semester interns and the first Wednesday in March for fall-semester interns. The time, date, and place of the application session are announced at the beginning of each semester. The deadline for filing applications for a spring-semester internship is October 31; for a fall-semester internship the deadline is March 31.

Alternative Class A students may apply to enroll for an internship if they meet the following criteria:

- The student must have completed all courses in the major or majors, or must secure written permission to enroll for an internship from the appropriate department head.
- The student must show proof of a passing score on the appropriate Praxis assessments.
- The student must have achieved a minimum grade point average of 3.0, both for all University of Alabama courses attempted and for all University of Alabama courses and transfer courses combined.
- The student must have achieved a minimum grade point average of 2.75 in each major, both for University of Alabama courses in each major and for combined University of Alabama courses and transfer courses in each major.
- The student must have achieved a minimum grade point average of 2.75 for professional education coursework.
- The student must have completed all methods courses and appropriate professional coursework with grades of "C" or better.
- The student must have removed from the transcript any grade of incomplete ("I") recorded in required courses; grades of incomplete are treated as grades of "F."

Students are required to register for the number of internship credit hours specified by their program. Students enrolled for internship must not expect to be enrolled in other courses while interning. Interns in P-12 programs such as physical education should expect to have a split internship assignment with an elementary and a secondary school.

Summer internships are rarely available and then only to persons who hold an undergraduate degree and certification and have one or two years of successful teaching experience at the level and in the subject for which they are seeking certification (with approval from the department head). In addition, summer internship assignments are allowed only if an appropriate placement can be secured in the Tuscaloosa area and appropriate supervision can be provided. These conditions also apply to those seeking to update or renew their certification or add an additional endorsement to a current certificate. To apply for a summer internship, students should file an appropriate application with the Office of Clinical Experiences in 105 Autherine Lucy Hall by March 31 of that year.

Plan I - Thesis Process Requirements

Dates for and Registering to Complete the Thesis

- Students wishing to complete a thesis will register for at least 6 credit hours of KIN 599 Thesis Research.
- The student will work with the research advisor to formulate a committee of 3 faculty members, one of whom must be from outside the Department of Kinesiology.
- The thesis proposal meeting will be scheduled by the student at any time of the academic year in conjunction with the thesis chair and committee and following the policies provided in the university's graduate catalog.
- Students can opt to write a "traditional" five-chapter thesis consisting of an introductory chapter, a literature review chapter, a methods chapter, a results chapter, and a conclusions chapter. In this case, the formal proposal will consist of the first three chapters with the methods section being written in the future tense.
- Alternatively, students can opt to write an "article-style" thesis which describes one study to be conducted by the student and written in a format consistent with a reputable journal in the student's subdiscipline of Kinesiology. In this case, the proposal will consist of all sections of the study article prior to the reporting of results and any discussion of or conclusions about the results (e.g., introduction,

literature review, theoretical framework, purpose statement, and methods) with the methods written in the future tense.

Thesis Proposal

- The student will provide a copy of his/her final thesis proposal to his/her thesis chair and committee prior to the proposal meeting in conjunction with the policies provided in the university's graduate catalog.
- The student will then make a formal presentation of the proposed thesis research.
- Faculty will then question the student and provide feedback about the presentation and/or written document and content related to the proposed research.
- Once the thesis chair and committee have completed their questioning of the student, the student and all other parties, with the exception of the chair and the committee, will retire from the room in which the proposal is being held. Faculty will then deliberate as to the standard of the proposal and score it using a rubric.
- IRB approval may be necessary for research involving human subjects. More info here: <http://ovpred.ua.edu/research-compliance/institutional-review-board-irb/>

Thesis Defense

- The thesis defense will be scheduled by the student at any time of the academic year in conjunction with his/her thesis chair and committee and following the policies provided in the university's graduate catalog.
- The student will provide a copy of the final thesis to the thesis chair and committee prior to the defense in conjunction with the policies provided in the university's graduate catalog.
- The chair of the student's thesis committee will announce the date, time, and place of the thesis defense to members of the department and College of Education at least one week in advance of the defense.
- The defense will begin with a formal presentation of the thesis research made by the student.
- Faculty will then question the student about the presentation and/or written document and content related to the thesis research.
- Other interested parties attending the thesis defense will also be given an opportunity to question the student about the thesis research.
- Once the thesis chair and committee have completed their questioning of the student, the student and all other parties, with the exception of the chair and the committee, will retire from the room in which the defense is being held. Faculty will then deliberate as to the standard of the thesis defense and score it using a rubric.
- Students failing the thesis defense will be required to defend their thesis a second time. They will be permitted only one further attempt to defend their thesis and may be required to take additional coursework.

Plan II - Non-Thesis Process Requirements

See previous Comprehensive Exam section.

Time Limit for Degree Completion Requirements

Graduate School information on Time Limits (p.).

Student Progress Requirements

For the Alternative Class A program in Physical Education, students must be formally admitted to the Alternative Certification Teacher Education Program during their program. Students must meet the minimum qualifications that are expected of candidates entering and completing undergraduate (Class B) certification in the same discipline. This usually means minimum GPA requirements in the core curriculum as well as minimum GPA requirements within the disciplines in which the applicant is seeking certification. Other requirements, such as completion of a writing assessment and other screening associated with undergraduate certification must be completed before formal admission to the alternative teacher education program.

Additional Academic Requirements

For the Alternative Class A program, a passing score on the appropriate Praxis subject assessment is required.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances Information

Information on Academic Grievances (p. 219).

Scholastic Requirements

As required for traditional Class A and Alternative Class A certification, students must earn a GPA of at least 3.25 on all courses in the program, with no grade below a "C."

Graduate School information on Scholastic Requirements (p. 204).

Graduate School Deadlines Information

Information on Graduate School Deadline.

Application for Graduation Information

Information on the Application for Graduation (p.).

Certification

Physical Education (P-12), Traditional Class A and Alternative Class A

The Alabama State Department of Education grants Class A professional educator certification in Physical Education (P-12). To be eligible, candidates must hold appropriate prerequisite certification OR complete an Alternative Class A program and must successfully complete all requirements for the MA degree as described in this catalog.

To be awarded Alabama Class A Physical Education (P-12) certification, students must:

- maintain a GPA of at least 3.25 on all courses with no grade below a C,
- receive a passing score on a comprehensive assessment documenting mastery of the curriculum,
- earn a passing score on the required Praxis subject assessment (Alternative Class A)

According to Alabama regulations, individuals admitted to a Class A program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class A (master's level) certification.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Department of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

Kinesiology, PhD

The Department of Kinesiology offers programs leading to the Doctor of Philosophy (PhD) degree in Kinesiology with areas of study in exercise science and sport pedagogy.

Admissions

Admission to the Ph.D. program is competitive and based on prior academic achievement, graduate record examination (GRE) scores, recommendations, and research interests. In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- a graduate degree or PGCE (sport pedagogy only) from an accredited institution
- a GRE score
- 3.0 GPA for a completed graduate degree program.

Preference is given to students who have strong backgrounds in the Life Sciences (for the exercise science focused area of study), teaching (for the sport pedagogy focused area of study), or related fields, meet the minimum requirements stated above, and have research interests compatible with at least one of the Kinesiology faculty members.

Prospective students who fail to satisfy one of the criteria above may be considered for Admission with Permission to Continue at the discretion of faculty.

Students will be admitted on a rolling basis at the discretion of program faculty as applications are received. Prospective students should identify a prospective research mentor and contact that person for more information regarding an admission timeline. For coursework focusing on exercise science, prospective students are encouraged to submit admission and graduate assistantship applications prior to January 15 to be considered for Fall admission. For coursework focusing on sport pedagogy, applications are accepted year round.

A limited number of graduate assistantships are available each year. These assistantships are awarded on a competitive basis. Graduate assistants may be asked to assist with teaching, research, and/or the outreach mission of the academic unit.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Ph.D. degree requires a minimum of 72 hours beyond the master's degree. This program includes 1) 24-hour kinesiology (i.e., exercise science or sport pedagogy) core; 2) 12-hour competency in research and statistics; 3) 12 hours of foundation courses to support the major (must be taken outside of the department); and 4) 24 hours of dissertation.

Advising

All doctoral students will be advised by a major professor with whom they will have been aligned as part of the admissions process. In the event a doctoral student is granted admission without a research mentor/major

professor, they will be assigned an interim advisor upon admission to the Ph.D. program. The advisor will assist the student in the evaluation of previous work, selection of coursework, and research oversight.

Dissertation Research		24
KIN 699	Dissertation Research	
Total Hours		72

Footnotes

- * Sport pedagogy students who have not completed a master's degree at The University of Alabama take these 8 courses for a total of 24 hours. Sport pedagogy students who have taken some of the major field courses in a master's degree program at The University of Alabama may substitute the major field courses with KIN 596, KIN 602, KIN 603, KIN 685, and/or KIN 698. Students who will focus on adapted sport pedagogy may obtain approval from Dr. Hardin to substitute a maximum of two of these courses for KIN 632 and KIN 691: KIN 596, KIN 602, KIN 603, KIN 685, and/or KIN 698.

- ** Research/Statistics prerequisite: If a student has not completed a basic research methods course in a master's degree program, KIN 506 Techniques of Research is a prerequisite. If a student has not completed a basic statistics course in a master's degree program, BER 540 Statistical Methods In Educ must be completed. Neither KIN 506 nor BER 540 counts toward the required 12 hours of Research/Statistics.

- *** Sample areas include health promotion, human development, educational psychology, educational leadership, educational foundations, educational policy, research, special education, or other areas to suit student's research/teaching interests.

Transfer Credit

A maximum of 6 hours of graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree in Kinesiology under the following conditions:

- The credit hours must have been completed prior to the student enrolling in the doctoral program at The University of Alabama.

The credit hours must not have been taken in order to satisfy the requirements for degrees the student has earned previously.

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study Requirements

Graduate School information on the Doctoral Plan of Study (p. 23).

Comprehensive Exam

Dates for and Registering to Take Comprehensive Exams

- Doctoral degree comprehensive examinations for students will be offered at any time of the academic year in conjunction with the student's dissertation chair (or academic advisor in the event a dissertation chair has not yet been designated, hereafter referred to as "major professor") and following the policies provided in the university's Graduate Catalog.
- Only eligible students may take their comprehensive examination, eligibility being dictated by policies provided in the university's Graduate Catalog.
- Students wishing to take their comprehensive examinations must inform their major professor—who will be responsible for scheduling, organizing, and proctoring the comprehensive examination—at least four weeks prior to their desired examination date.
- Any necessary retakes of the doctoral comprehensive examination will take place when the major professor deems the student ready. The time frame in which retakes must be completed is decided by the major professor in conjunction with the faculty member whose question is being retaken.

Doctoral Degree Comprehensive Examination Format and Content

- The faculty member organizing the comprehensive examination will solicit at least 8 questions from program faculty.
 - Exercise Science only:* Questions will be solicited from at least 3 and no more than 5 exercise science faculty.
 - Within 1 month after the written session, an oral examination will follow. At the discretion of faculty, the student may receive feedback regarding the written answers during the 1-month period before the oral follow-up. A single comprehensive examination attempt will comprise a written and oral component.

The oral component will be administered by the faculty members who provided questions.

- The doctoral degree comprehensive examination will consist of morning and/or afternoon sessions to be completed over the course of 1 work week (Monday – Friday).
- During each session, students answer relatively broad questions and are expected to draw on coursework, coursework reading, and work and reading done outside of coursework.
- Questions asked may not be tied to specific courses. Instead, they may cross the boundaries of a number of different courses.
- The faculty member responsible for scheduling and organizing the doctoral degree comprehensive examination may provide examples of past questions for students studying for the examination.
- Students will complete the examination by typing within a word processing program on a computer.
- Personal technology including phones, tablets, personal laptop computers, and portable drives will not be permitted in the examination room.
- Each examination session will be monitored as needed by the faculty member overseeing the examination process.
- On completion of the examination, the faculty member responsible for its scheduling and organization will distribute students' answers to the faculty who composed individual questions for evaluation, collect all evaluated answers, and inform each student of his or her result (pass or fail) and average score (based on rubric).
- Students failing the comprehensive examination will be required to rewrite individual questions on which they received a score of 1. They will be permitted only one further attempt to pass and may be required to take additional coursework.
 - *Exercise Science only:* The faculty administering questions will consider both the written and oral components in determining a score on a given attempt. Students failing the examination must wait until the following semester to retake the exam. Additional coursework may be required. Retakes of written portions will only involve question(s) failed, but the oral portion of a retake will be administered by the full committee of faculty who administered questions. The committee will decide the pass/fail outcome of the retake attempt.

The major professor will keep a record of and report results to the program administrative assistant, who will then report results to the graduate school.

Graduate School information on Comprehensive Exams (p. 23).

Admission to Candidacy Requirements

A student is admitted to candidacy after completing all coursework and passing the comprehensive exam.

Graduate School information on Admission to Candidacy (p. 23).

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

Dates for and Registering to Complete the Dissertation

- Students wishing to complete a dissertation will register for KIN 699 Dissertation Research.

- The student will work with the research advisor to formulate a committee of 5 faculty members, one of whom must be from outside the Department of Kinesiology.
- The dissertation proposal meeting will be scheduled by the student at any time of the academic year in conjunction with the dissertation chair and committee and following the policies provided in the university's graduate catalog.
- Students can opt to write a "traditional" five-chapter dissertation consisting of an introductory chapter, a literature review chapter, a methods chapter, a results chapter, and a conclusions chapter. In this case, the formal proposal will consist of the first three chapters with the methods section being written in the future tense.
- Alternatively, students can opt to write an "article-style" dissertation which describes 3 studies to be conducted by the student and written in a format consistent with a reputable journal in the student's subdiscipline of Kinesiology. In this case, the proposal will consist of all sections of each study article prior to the reporting of results and any discussion of or conclusions about the results (e.g., introduction, literature review, theoretical framework, purpose statement, and methods) with the methods written in the future tense.

Dissertation Proposal

- The student will provide a copy of his/her final dissertation proposal to his/her dissertation chair and committee prior to the proposal meeting in conjunction with the policies provided in the university's graduate catalog.
- The student will then make a formal presentation of the proposed dissertation research.
- Faculty will then question the student and provide feedback about the presentation and/or written document and content related to the proposed research.
- Once the dissertation chair and committee have completed their questioning of the student, the student and all other parties, with the exception of the chair and the committee, will retire from the room in which the proposal is being held. Faculty will then deliberate as to the standard of the proposal and score it using a rubric.
- IRB approval may be necessary for research involving human subjects. More info here: <http://ovpred.ua.edu/research-compliance/institutional-review-board-irb/>.

Dissertation Defense

- The dissertation defense will be scheduled by the student at any time of the academic year in conjunction with the dissertation chair and committee and following the policies provided in the university's graduate catalog.
- The student will provide a copy of the final dissertation to the dissertation chair and committee prior to the defense in conjunction with the policies provided in the university's graduate catalog.
- The chair of the student's dissertation committee will announce the date, time, and place of the dissertation defense to members of the department and College of Education at least one week in advance of the defense.
- The defense will begin with a formal presentation of the dissertation research made by the student.
- Faculty will then question the student about the presentation and/or written document and content related to the dissertation research.
- Other interested parties attending the dissertation defense will also be given an opportunity to question the student about the dissertation research.

- Once the dissertation chair and committee have completed their questioning of the student, the student and all other parties, with the exception of the chair and the committee, will retire from the room in which the defense is being held. Faculty will then deliberate as to the standard of the dissertation defense and score it using a rubric.
- Students failing the dissertation defense will be required to defend their dissertation a second time. They will be permitted only one further attempt to defend their dissertation and may be required to take additional coursework.

Graduate School information on Dissertation Requirements (p. 23).

Time Limit for Degree Completion Requirements

Graduate School information on Time Limits (p. 23).

Student Progress Requirements

The sequence of steps for a doctoral student from admission to graduation is:

1. Satisfaction of admission requirements
2. Formation of doctoral program of study
3. Completion of coursework
4. Completion of major comprehensive exams
5. Formation of doctoral dissertation committee
6. Proposal of doctoral dissertation
7. Admission to candidacy
8. Oral defense of the dissertation
9. Submission of final copies of the dissertation

Application for Graduation Information

Graduate School information on the Application for Graduation (p. 23).

Department of Music Education

General Requirements

The content of all graduate programs in music education is determined, in part, by the background and goals of the individual student. Each program will include graduate courses in music education (choral, instrumental, or general) and professional education, and may include other graduate study as indicated by the student's background and

interests in consultation with his or her advisor. It is recommended that each student work closely with his or her academic advisor during the first year of graduate study in order to plan the program.

Degree requirements are noted on the official Plan of Study for the various degrees and tracks. These documents are available from the chairperson or administrative staff for the department.

Graduate-level music education courses that meet requirements for specific State-approved certification programs (Class A, Class AA) are offered on a two-year rotation during spring, summer, and fall. Applicants for music education graduate degrees should anticipate that summer enrollment may be necessary to complete degree requirements. Questions concerning the rotation of course offerings should be directed to the **Music Education Department**; Box 870366; Tuscaloosa, AL 35487-0366; (205) 348-6054.

Before 12 hours of graduate study are completed in any graduate degree program, students enrolled in music education graduate programs may be required, at the discretion of the department, to demonstrate professional competence in music theory and music history and, if requested, to perform a placement audition on their major instrument. Information about specific examinations can be obtained through the Music Education Office, Box 870366, Tuscaloosa, AL 35487-0366 (205) 348-6054.

Fingerprinting Requirement

Applicants to a State-approved certification program shall be required to be fingerprinted for a criminal history background check through the Alabama State Department of Education to the Alabama Bureau of Investigation (ABI) and the Federal Bureau of Investigation (FBI) pursuant to ACT 2002-457. This includes all students enrolled in programs that lead to Alabama certification, regardless of whether or not they are pursuing Alabama certification. The background check is completed at the student's expense, and suitability must be documented in the Office of Student Services & Certification before the student is assigned placement in a clinical setting. [Alabama Administrative Code] A candidate whose suitability determination precludes admission to a state-approved teacher education program has the right to due process procedures in accordance with the current Educator Certification Chapter of the Alabama Administrative Code (Revocation and Suspension of Certificates and Unsuitability Determinations).

Traditional Class A Certification in Music Education, MA in Secondary Education

Admission Requirements

Applicants to the traditional Class A program must hold appropriate prior certification in Music Education (Instrumental or Choral) to be considered for admission.

Applicants may be required, at the discretion of the department, to demonstrate professional competence in music theory and music history; to submit a recording of an ensemble performance or teaching sample; and, if requested, to perform a placement audition on the major instrument prior to the completion of 12 hours of graduate study. If requested, applicants will interview with the music education faculty prior to an admission decision. Contingent upon faculty and Graduate School approval, conditional admission is granted in some instances.

Curriculum Requirements

Two MA plans in Music Education (Plan I and Plan II, below) are offered in the College of Education. Both Plan I and Plan II lead to Alabama Class A (masters level) professional educator certification. Both require

compliance with the State-approved certification program and a minimum of 30 graduate semester hours as follows: (a) required music education courses, 6 hours; (b) foundations of professional studies, 6 hours; (c) educational research, 3 hours; (d) technology, 3 hours; (e) faculty-approved teaching field, 12 hours; and, additional requirements/electives, 0-3 hours. Candidates under Plan I for the master's degree must write a thesis (6 semester hours of thesis research may be used toward the degree). Plan II candidates must earn a minimum of 30 graduate semester hours. No music education master's degree programs are available without satisfying Alabama certification requirements; those earning a master's degree must be eligible for recommendation for Alabama Class A Music Education (P-12) teaching certification.

This course listing applies to candidates having appropriate prior certification who begin this program at UA on June 1, 2017, and thereafter. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program below, with no grade below a C.

Transfer Credit

In compliance with regulations established by the Alabama State Department of Education and the Alabama Administrative Code, coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification.

Graduate School information on Transfer Credit (p.).

Comprehensive Exams

Graduate School information on Comprehensive Exams (p.).

Plan I - Thesis Process Requirements

Information about the thesis process including committee formation, scheduling of proposal and defense, IRB procedures, and formatting and submission are arranged with the Graduate Program Coordinator in Music Education. Students in Plan I present and defend a thesis in lieu of taking a comprehensive exam.

Plan II - Non-Thesis Process Requirements

A passing score on a comprehensive written exam covering the content of the curriculum is required. The written exam is scheduled during the last semester of enrollment. Students contact the Graduate Program Coordinator in the Music Education Office to arrange to take the exam.

Time Limit for Degree Completion

Graduate School information on Time Limits (p.).

Additional Academic Requirements

Electronic Learning Management System Requirement

A designated, electronic learning management system is required of all students in programs leading to professional educator certification.

Survey of Special Education Course

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting requirements for unconditional admission to a Class A program on July 1, 2017, and thereafter, must take an approved course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.

Academic Misconduct

Graduate School information on Academic Misconduct.

Withdrawals and Leave of Absence

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances

Graduate School information on Academic Grievances (p. 219).

Scholastic Requirements

Candidates must present a GPA of at least 3.25 on all courses in the program below, with no grade below a C.

Graduate School information on Scholastic Requirements (p. 204).

Graduate School Deadlines

Information on Graduate School Deadlines.

Application for Graduation

Information on the Application for Graduation (p. 18).

Certification

To be awarded Alabama Class A Music Education certification, students must:

- maintain a GPA of at least 3.25 on all courses with no grade below a C,
- earn a passing score on a comprehensive assessment documenting mastery of the curriculum,
- hold valid Alabama Class B Music Education certification

All students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Alternative Class A Certification in Music Education--Nontraditional, Initial Teacher Certification, MA in Secondary Education

Admission Requirements

The Alternative Class A program is designed for those who possess an undergraduate degree in an area of music *other than music education* from a school accredited by the National Association of Schools of Music. Specified undergraduate prerequisite courses are also required.

Applicants must meet the following requirements:

- **Transcript evaluation:** Applicants should contact the Office of Student Services & Certification for a transcript evaluation to determine prerequisite courses and other requirements.
- **Degree requirement:** An appropriate bachelor's degree from a regionally accredited institution with a minimum overall GPA of 2.75 OR a master's degree with a GPA of at least 3.0 is required.
- **Teaching Field:** Applicants must have an academic content major (or the equivalent) in the teaching field. The transcript evaluation will determine if an applicant meets the teaching field requirement.
- **Fingerprinting/background clearance**

Curriculum Requirements

This course listing applies to those who begin this program June 1, 2017, and thereafter. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C, and a passing score on a comprehensive assessment is required. Successful fulfillment of all requirements leads to a master's degree and recommendation for the Alabama Class A professional educator certificate in Music Education (P-12).

Certification

To be awarded Alabama Class A Music Education certification, students must:

- maintain a GPA of at least 3.25 on all courses with no grade below a C,
- receive a passing score on a comprehensive assessment documenting mastery of the curriculum,
- earn a passing score on the appropriate Praxis subject assessment

All students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Class AA Certification in Music Education, EdS in Secondary Education

Admission Requirements

Applicants to the EdS program must hold valid Alabama Class A certification in Music Education or an approved equivalent certification to be considered for admission.

Applicants must successfully complete a formal screening interview with the music education faculty prior to an admission decision. Applicants are required to demonstrate professional competence in music theory and music history; to submit a recording of an ensemble performance or teaching sample; and, if requested, to perform a placement audition on the major instrument prior to the completion of 12 hours of graduate study. It is highly recommended that applicants have a minimum of three years of full-time contractual teaching experience prior to beginning a post-masters degree program. Contingent upon faculty and Graduate School approval, conditional admission is granted in some instances. See the Admission Criteria section of this catalog for more information.

Curriculum Requirements

A minimum of 30 hours of appropriate work beyond the MA degree, including completion of a research project, is required for the educational specialist (EdS) degree. The total hours of graduate work, including the MA degree, must be 60 hours. Those pursuing certification options must be certain their programs of study meet all certification requirements according to programs approved by the Alabama Department of Education. Courses used to qualify for a lower level supporting certificate cannot be used again in a higher level certification program. The fulfillment of these requirements leads to the Alabama Class AA professional educator certificate in Music Education (P-12). This course listing applies to candidates having appropriate prior certification who begin this program at UA on June 1, 2017, and thereafter. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.50 on all courses in the program below, with no grade below a C. [At least 1/2 of the coursework must be in music and at least 15 semester hours of the 30 semester hour total must be at the 600-level.]

Certification

To be awarded Alabama Class AA Music Education certification, students must:

- maintain a GPA of at least 3.50 on all courses with no grade below a C,
- receive a passing score on a comprehensive assessment documenting mastery of the curriculum,
- hold valid Alabama Class A Music Education certification

All students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

EdD in Curriculum and Instruction (Music Education option)

The Music Education EdD program is designed to develop the performance, pedagogical, and research capabilities required to conduct applied research, prepare preservice music teachers, and actively participate in creative activity as a performer or conductor while allowing for flexibility to address a variety of differences and directions. Graduates aspire to careers as advanced practitioners and leaders in Music Education and the innovative teaching of Music Education. The degree is awarded to candidates who complete the course of study with distinction, demonstrating ability in teaching, musicianship, scholarly study, and ability to conduct original research.

Admission Requirements

Applicants should submit the following items with the application:

- official transcripts with either a bachelor's or master's degree in music education and a grade point average of 3.0/4.0 overall
- resume or curriculum vitae
- three (3) letters of recommendation
- a video recording of a rehearsal or classroom teaching sample
- a video recording of a conducted/directed ensemble performance (if possible)
- a writing sample
- a passing TOEFL score (international students)

Applicants will have a formal screening interview with the music education faculty prior to an admission decision.

A preferred qualification is for a minimum of three years of full-time contractual teaching experience in a public or private school music program. Contingent upon faculty and Graduate School approval, conditional admission is granted in some instances.

Applicants may be required to demonstrate professional competence in music theory and music history; and, if requested, to perform a placement audition on the major instrument prior to the completion of 12 hours of graduate study.

Under exceptional circumstances, an applicant who does not meet requirements may be conditionally accepted. In this case, the student must demonstrate a 3.0 grade point average in the first 12 hours attempted in the doctoral program. If successful, the status will change to unconditional admission. If unsuccessful, the student will be asked to leave the program.

Curriculum Requirements

The EdD is designed to include a broad field of study in a major area of specialization. Selection and sequence of courses are contingent on the skills, background, and professional goals of the student. Each student's program will include courses in music, music education, professional education, and research.

All doctoral students must have a completed Program of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree.

1. Students will take 42 hours minimum in courses related to their major area of interest in Music, Music Education, Conducting, Diversity, and Curriculum and Instruction.
2. Students will take 30 hours of support coursework in educational research, humanistic/behavioral studies, and free electives.
3. Students will take 12 hours of dissertation. Dissertation hours can exceed 12 hours as some students carry out research investigations that may take more time to complete than do others.
4. Total coursework, including the dissertation and transfer hours, will be 72 hours (60 post master's) plus a minimum of 12 hours of dissertation credit equaling 84.

Transfer Credit

At the discretion of the Graduate Program Director in Music Education, it may be possible to transfer in 24 credit hours from a relevant master's degree program or Ed.S. program.

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study

Within 30 hours or less, students will submit a Plan of Study, which will be agreed upon with a program of study committee and based on results of the MUE Diagnostic Exam. The committee includes the graduate program director (or designee) and a minimum of four additional faculty, one of whom must be external to music education and at least three of whom must hold faculty lines within music education. At least three of the committee members must have Full Graduate Faculty status.

The MUE Diagnostic Examination will be taken no later than the second semester in residence. The student must register for MUE 631 Doctor of Philosophy Diagnostic/Admission Exam, a zero credit-hour course, to show successful completion of the examination.

Graduate School information on the Doctoral Plan of Study (p. 23).

Doctoral Comprehensive Exam

In order to be admitted to candidacy, a final comprehensive examination representing a culminating experience is required of all students pursuing the EdD degree. The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. The graduate program director, with approval of the program committee, determines the most appropriate format. The various exams may consist of one or more of the following: a written and/or oral examination based on the content of the degree program; a thesis and final oral defense; a course requiring interpretation and integration of information from previous courses; a research paper, a policy and practice paper, or equivalent experience; a public performance or exhibition along with a contextualizing paper; and/or a practicum or internship.

The EdD program will require a comprehensive examination when coursework is within six-twelve hours or less of completion. The comprehensive examination will be developed and scored by the doctoral program committee, which includes the major advisor. Should a student fail the examination, the student will have one more opportunity to take and pass the comprehensive examination.

The goals of the comprehensive examination are (a) to give students an opportunity to reflect on and integrate the knowledge and skills they have developed in their doctoral studies, and (b) to give faculty members the opportunity to evaluate whether students show sufficient breadth and depth of knowledge and skills in their particular fields.

Students are eligible to take the examination when they have 6-12 credit hours of coursework remaining in their program. The student's program of study must have been completed and be on file in the Music Education Office, and a Doctoral Committee Advisory form must be completed and on file.

Graduate School information on Doctoral Comprehensive Exams (p. 23).

Admission to Candidacy

A department-approved **Admission to Candidacy for the Doctoral Degree** is submitted to the Graduate School as soon as possible after passing the comprehensive (preliminary) examination. Upon successful completion of the comprehensive examination, the student will identify the doctoral dissertation major advisor and dissertation committee membership, which will follow the same guidelines as did the Plan of Study committee formation but with the major advisor assuming the previous role of the graduate program director. The student will develop the dissertation proposal with input from the committee, present it in writing and orally to the committee for approval, and revise as needed until it is acceptable to the committee.

The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. The student cannot propose a dissertation and have its final defense in the same semester.

When the dissertation proposal has been deemed acceptable, the student is admitted to candidacy once the Admission to Candidacy Form is signed by the committee.

Graduate School information on Admission to Candidacy (p. 23).

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

Once admitted to candidacy, the student will complete the dissertation research proposed under the supervision of the Major Advisor and dissertation committee.

Upon completion of the dissertation research, which includes the submission of a draft of the written dissertation to the doctoral dissertation committee, the student must successfully present the work via an oral presentation to the committee, which is also open to the public. The student must successfully defend the work immediately after the oral presentation to the committee, which is closed to the public. A successful defense may still entail some revision to the written dissertation.

Information on the Application for Graduation (p. 23).

PhD in Curriculum and Instruction (Music Education option)

The Music Education PhD program is designed to develop the pedagogical, performance, and research capabilities required to independently conduct scholarly research, thoroughly prepare pre-service music teachers, and actively participate in high-level creative activity as a performer or conductor while allowing for flexibility to address a variety of differences and directions. Graduates pursue positions as collegiate teachers, conductors, performers, and researchers. The degree is awarded to candidates who complete the course of study with distinction, demonstrating ability in teaching, musicianship, scholarly study, and outstanding aptitude in conducting original research.

Admission Requirements

Applicants should submit the following items with the application:

- official transcripts with either a bachelor's or master's degree in music education and a grade point average of 3.0/4.0 overall
- resume or curriculum vitae
- three (3) letters of recommendation
- a video recording of a rehearsal or classroom teaching sample
- a video recording of a conducted/directed ensemble performance (if possible)
- a writing sample
- a passing TOEFL score (international students)

Applicants will have a formal screening interview with the music education faculty prior to an admission decision.

A preferred qualification is for a minimum of three years of full-time contractual teaching experience in a public or private school music program. Contingent upon faculty and Graduate School approval, conditional admission is granted in some instances.

Applicants may be required to demonstrate professional competence in music theory and music history; and, if requested, to perform a placement audition on the major instrument prior to the completion of 12 hours of graduate study.

Curriculum Requirements

The Music Education PhD is designed to include a broad field of study in a major area of specialization. Selection and sequence of courses are contingent on the skills, background, and professional goals of the student. Each student's program will include courses in music, music education, professional education, and research.

All doctoral students must have a completed Program of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree.

1. Students will take 48 hours minimum in courses related to their major area of research interest in Music, Music Education, Conducting, and Curriculum and Instruction.
2. Students will take 30 hours of support coursework in educational research, humanistic/behavioral studies, and free electives.
3. Students will take 24 hours of dissertation.
4. Total coursework, including the dissertation and transfer hours, will be 102 hours (78 post masters).

Transfer Credit

At the discretion of the Graduate Program Director in Music Education, it may be possible to transfer in 24 credit hours from a relevant master's degree program or Ed.S. program.

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study

Within 30 hours or less, students will submit a Plan of Study, which will be agreed upon with a program of study committee and based on results of the MUE Diagnostic Exam. The committee includes the graduate program director (or designee) and a minimum of four additional faculty, one of whom must be external to music education and at least three of whom must hold faculty lines within music education. At least three of the committee members must have Full Graduate Faculty status.

The MUE Diagnostic Examination will be taken no later than the second semester in residence. The student must register for MUE 631 Doctor of Philosophy Diagnostic/Admission Exam, a zero credit-hour course, to show successful completion of the examination.

Graduate School information on Doctoral Plan of Study (p. 23).

Doctoral Comprehensive Exam

The comprehensive exam in music education includes the Written Doctoral Projects and Oral Comprehensive Examination.

Written Doctoral Projects. Doctoral of Philosophy students in music education at the University of Alabama complete and submit three (3) doctoral research projects. The doctoral projects may comprise work completed in graduate courses and may be completed as a combination with or in addition to such courses according to the

following stipulations. The projects will be approved by the graduate program director or designee; be deemed by the advisory committee to be exemplary of sufficient quality, substance, and breadth for presentation/publication in a professional forum; and afford the doctoral student an opportunity to develop potential foci for the doctoral dissertation and refined pedagogical expertise.

In some cases, the doctoral student may complete an extended service project in the place of one of the research projects (e.g., institute a music program in schools, develop specific music curricula, develop a community music organization, etc.). Documentation for such projects will be decided in advance and must be approved by the graduate program director (or designee) and the doctoral committee and be of sufficient scope to justify its replacement of one of the doctoral research projects.

Oral Comprehensive Examination. After the Graduate Program Director or designee and the advisory committee deem the three research projects to be of sufficient merit, the student will be required to successfully complete a comprehensive oral examination that will be juried by the graduate program director or designee, the advisory committee, and other appropriate faculty. The examination will include a presentation of the doctoral research projects immediately followed by a defense with the advisory committee and the graduate program director or designee.

Graduate School information on Doctoral Comprehensive Exams (p. 23).

Admission to Candidacy

A department-approved **Admission to Candidacy for the Doctoral Degree** is submitted to the Graduate School as soon as possible after passing the comprehensive (preliminary) examination. Upon successful completion of the comprehensive examination, the student will identify the doctoral dissertation major advisor and dissertation committee membership, which will follow the same guidelines as did the Plan of Study committee formation but with the major advisor assuming the previous role of the graduate program director. The student will develop the dissertation proposal with input from the committee, present it in writing and orally to the committee for approval, and revise as needed until it is acceptable to the committee.

The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. The student cannot propose a dissertation and have its final defense in the same semester.

When the dissertation proposal has been deemed acceptable, the student is admitted to candidacy once the Admission to Candidacy Form is signed by the committee.

Graduate School information on Admission to Candidacy (p. 23).

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

Once admitted to candidacy, the student will complete the dissertation research proposed under the supervision of the Major Advisor and dissertation committee.

Upon completion of the dissertation research, which includes the submission of a draft of the written dissertation to the doctoral dissertation committee, the student must successfully present the work via an oral presentation to the committee, which is also open to

the public. The student must successfully defend the work immediately after the oral presentation to the committee, which is closed to the public. A successful defense may still entail some revision to the written dissertation.

MUE500 Foundatn Music Education

Hours 3

Investigation of the purposes and functions of music education from antiquity to the present. Philosophical foundations and a chronological survey of historical issues related to the inclusion of music in general education will also be discussed.

MUE522 General Music: Approaches and Practices

Hours 3

This course examines curricular approaches and contemporary practices in general music education. Students explore important questions about the purposes and characteristics of general music programs and how those programs meet the needs of diverse learners and communities. Students develop critical and reflective understandings of general music education within the context of current challenges and opportunities facing the field.

Special Education, Ed.D.

The Doctor of Education (EdD) program in special education at The University of Alabama is designed to prepare educational leaders who will work to provide a direct educational benefit to the lives of children and youth with disabilities and their families. Graduates will likely work as administrators but they could also be teacher trainers or executive directors of nonprofit organizations.

The program is delivered online and designed to prepare students for leadership roles in special education.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- An earned master's degree in special education (or a related area)
- Three years of appropriate experience, defined as three years of teaching experience (that will be accompanied by teaching certification).
- An interview
- Three letters of recommendation
- Responses to two program-specific questions:

- In one page, please describe what is meant by evidence-based practices.
- In three to five pages, please list some of these evidence-based practices and describe their role in contemporary gifted education or special education (select the area of program application). Please also discuss why you think there is a gap in implementing these practices.

Graduate faculty members individually evaluate and collectively discuss admission applications.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A minimum of 72 semester credit hours beyond the master's degree is required for completion of the Ed.D. program. These 72 hours consist of the following required courses: 36 hours of special education courses, 12 hours of educational foundations courses, 12 hours of research courses, and 12 dissertation hours.

Transfer Credit

A student holding an earned, in-field master's degree and working in the field or a related field since earning the degree may request approval for up to 1/2 coursework hours of credit to be applied to the EdD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the EdD degree.

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study Requirement

Graduate School information on the Doctoral Plan of Study (p. 23).

Comprehensive Exams

Students may take comprehensive examinations during the last semester of coursework. Students should notify their chair as soon as possible at the beginning of the semester if they intend to take comprehensive examinations in order to solicit questions from the committee members. Dates for comprehensive examinations are announced at the beginning of each semester. Students must be registered for at least one hour in order to take comprehensive examinations per Graduate School policy.

The dissertation committee will write the comprehensive examination questions for the student in view of the course of study as well as the anticipated dissertation study. Comprehensive examinations will be delivered via Blackboard. Students have 10 consecutive days to complete their questions. The comprehensive examinations are open book and open note. Students may not consult with other students or faculty members outside of their committee when completing their comprehensive examinations. Comprehensive examination responses are subject to evaluation for plagiarism and other forms of academic dishonesty as outlined in the code of student conduct.

If a student fails or comprehensive examinations, they must wait until the next semester before taking it again. A student may only retake their comprehensive examinations once. If a student fails or comprehensive examination twice, they will be terminated from the program.

Graduate School information on Comprehensive Exams (p. 23).

Admission to Candidacy Requirements

After approval of the dissertation proposal and the completion of comprehensive examinations, the student is eligible for admission to candidacy for the degree. Once a student has met the requirements for admission to candidacy for a doctoral degree, doctoral students must pursue completion of the dissertation without interruption by enrolling each semester for at least 3 hours of dissertation research.

Graduate School information on Admission to Candidacy (p. 23).

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

Selecting a chair

Upon admission to the program, the student will be assigned an advisor. This advisor may or may not become the chair of the dissertation study. In selecting a chair, it is highly recommended that the student has had past interactions with this faculty member sufficient to discern their work style and interests. Throughout their coursework, students will have the opportunity to interact with many faculty members. If a student wants to work with a particular faculty member that they may not have had the opportunity to interact with through coursework, the student may want to reach out to this faculty member indicating interest in their work and ask to be involved in some way. Based on a student's research interests and past interactions with faculty members, the student should contact a potential chair begin by e-mail to begin this discussion.

In this e-mail, the student should describe their potential research idea(s) for a dissertation study. This email should be limited to approximately one paragraph. A faculty member may respond that they are unable to chair any additional students at this time. They may also respond that that the student's research interests are not sufficiently aligned with theirs. Please note that both faculty members and students have academic freedom, so they must both come to an agreement when it comes to the dissertation study. For some students, the selection of a chair may be obvious, but for other students it may require more flexibility in terms of what their dissertation study will be. Finally, it is important to be open to faculty members honing and reshaping research ideas for the dissertation study. Faculty members understand the time and effort entailed to complete a dissertation study. We want the dissertation study to be a success.

Selecting committee members

After selecting a chair and discussing potential research ideas, the chair will have suggestions as to who should serve on the dissertation committee. For dissertation study, students will need at least three faculty members including the chair to serve on the committee per Graduate School policy for EdDs.

"EdD program advisory committees usually consist of a minimum of three members of the graduate faculty: a chairperson who represents the student's major area of study and who will be the major advisor for the student in program planning and research, and two members (one from outside the department of the College in which the student is majoring) who can also be of assistance in their areas of expertise."

One of these committee members is typically a methodologist, who is a person who has demonstrated expertise in the methodology used in the dissertation study. This person might or might not be on the SPEMA faculty. As mentioned above, another member of the committee is an

outside member of the committee. This person will be a faculty member in another department, outside of the department. In taking courses with a non-SPE prefix, please think about the selection of the outside member.

The dissertation at a distance

Each student will complete a dissertation while enrolled in SPE 699 Dissertation Research hours. Students are not permitted to enroll in SPE 699 hours until after having successfully passed their comprehensive examination. In selecting the dissertation topic, both faculty and students have academic freedom. Faculty members will guide students to dissertation topics aligned with their mutual interests and that can be executed at a distance. There are generally five categories of research studies that can be well executed at a distance:

1. Studies with existing or archival publicly-available data. Students can access many publicly available data sets relevant to special education. Publicly-available data sets include but are not limited to:
 - a. National Center for Education Statistics
 - i. Early Childhood Longitudinal Study
 - ii. High School Longitudinal Study
 - iii. National Household Education Study
 - iv. School Survey on Crime and Safety
 - b. Office of Civil Rights Data Collection
 - c. IDEA Part B data
 - d. National Survey of Children's Health
 - e. National Survey of Children with Special Health Care Needs (can be merged with NSCH)
 - f. CDC Survey of Pathways to Diagnosis and Services
 - g. National Survey of the Diagnosis and Treatment of ADHD and Tourette Syndrome
2. Studies with existing or archival data from your state or local education agency. Students will most likely need approval from your agency to use data belonging to the agency.
3. Studies using online survey techniques. The University of Alabama provides access to Qualtrics free of charge to faculty and students. This is the perfect tool for students to design an online survey.
4. Historical studies using archival collections or from papers held in private collections.
5. Qualitative studies using such data as policy documents, interviews, and focus groups.

Other categories of research studies could work for a dissertation at a distance as well. Ultimately, your chair needs to be comfortable supervising your dissertation study at a distance and the Institutional Review Board (IRB) approving studies with human subjects needs to be willing to approve this study with the understanding that faculty supervision would be at a distance. For instance, the IRB may not approve a study involving an intensive intervention, where it would be impossible for a faculty member being at a distance to supervise the research process. Students need to consider dissertation studies, where faculty supervision at a distance is appropriate.

Dissertation Proposal

Once the student and the chair have agreed upon a dissertation topic, the student should begin to write the dissertation proposal. The dissertation proposal is the first three chapters of the dissertation study. This document is written in future tense that is as if it is what the student proposes to do for the dissertation. After the dissertation is completed in its entirety, the student will then need to change the tense of the proposal accordingly. In Chapter 1, the student will write an introduction to the dissertation study. In Chapter 2, the student will provide a complete

review of the literature related to the dissertation topic. In Chapter 3, the student will provide the methodology that will be utilized for the proposed study. The student will need to follow all formatting guidelines per the Graduate School requirements. Students must adhere to the most recent edition of APA style. The student and the chair will determine the process for developing the dissertation proposal. The chair may request one chapter at a time, a complete draft of the dissertation proposal, or some other approach. Students should discuss this with their chair before proceeding.

Once the chair and the student have agreed upon a draft of the proposal, the student will provide this agreed-upon draft to all committee members. The student will also ask committee member members for their availability in the next two to three weeks to meet online via videoconferencing to discuss the dissertation proposal. According to the Graduate Catalog, "the written dissertation proposal must be provided to members of the committee at least 10 working days prior to the proposal meeting." The student should not under any circumstances send a draft of a proposal or ask the committee members to meet to discuss your proposal without the chair and the student agreeing on this step. When meeting with the committee via videoconferencing, the student will give a 30- to 45-minute slide presentation summarizing the dissertation proposal. After the presentation, the committee members will ask questions regarding the proposal. The student should take the feedback constructively and be prepared to have revisions requested by the committee members.

After the presentation and discussion have ended on the proposal, the committee members will meet without the student present. The committee members will discuss whether the student has passed, passed with revisions, or failed. Students who fail at the dissertation proposal stage will need to write a new proposal or discontinue in the program. Once students have passed the dissertation proposal stage, they are permitted to carry out their dissertation study pending any IRB approval needed. Students may not submit the dissertation study to the IRB before passing the proposal stage.

Dissertation Formatting

The dissertation study will follow *APA Publication Manual* for the reporting of references and statistics unless otherwise specified by the Graduate School. The most recent edition of the manual should be used. The Graduate School provides a manual to guide students on the preparation and formatting of the dissertation study, which can be found here on their website.

IRB approval

The student will work with the chair to obtain Institutional Review Board (IRB) approval for the dissertation study, if human subjects will be involved. The purpose of the University of Alabama's IRB is to ensure the safe and ethical treatment of humans as subjects in research, public service, and training programs. In accordance with federal and university regulations, it is required that the IRB review all research involving human subjects conducted at or sponsored by the University of Alabama regardless of the funding source. The University of Alabama's IRB has a moral duty and obligation to protect human subjects prior to the commencement of any research study and to discontinue any protocol upon notification of irregular activity warranting such action.

The time it takes to obtain IRB approval varies considerably by the study submitted. Students may not start the recruitment nor collection of any human subjects data before IRB approval. Please note that archival data requires IRB approval, though typically exempt, unless specified otherwise. After the student has obtained IRB approval, the collection of

human subjects data may begin. Students should retain a copy of the IRB approval once received.

Appointment of Doctoral Dissertation Committee

As indicated in the Graduate Catalog, the graduate dean's approval of the proposed dissertation committee is required. This approval is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting.

Dissertation Defense

After completing dissertation study as proposed at the proposal meeting, the student will write the final two chapters of the dissertation. Chapter 4 contains the results of the dissertation study while Chapter 5 contains a discussion of the dissertation study. Again, the student and the chair will work together to develop an agreed upon draft of the entire dissertation study. Once the student and the chair are both satisfied with the draft of the entire dissertation study, then the student may contact the committee members and inform and ask their availability to set a date to defend the dissertation as well as provide the agreed upon draft. Again, the student will ask committee member for their availability in the next two to three weeks to meet online via zoom to discuss the dissertation and provide the defense. Per the Graduate Catalog, at least 10 working days is required. According to the Graduate Catalog, virtual participation is permitted for online programs and specifically states:

For online and hybrid programs that handle oral examinations in an online setting, all committee members as well as the student may participate virtually in the oral examination. However, these programs must fully adhere to the guidelines outlined in the Technical Requirements section above for any oral examination involving the entire committee.

In scheduling the dissertation defense, students should be mindful of Graduate School deadlines. The student will present a 45 minute to one hour long presentation summarizing the entire dissertation. Given Chapters 1 through 3 have already been presented at the proposal meeting, the student should focus the dissertation defense presentation more on Chapters 4 and 5. After the student presents, the committee members will ask questions. Students should respond as best as they can and take the feedback constructively. Revisions to some degree are typical but should be much less than the revisions requested during the proposal stage. The dissertation document should reflect a close to final piece of work.

According to the Graduate Catalog, at least 10 working days before defending the dissertation, **the student** must arrange to send an abstract of the dissertation to all faculty in the College of Education along with an invitation to attend the defense that indicates time and place of the defense. The chair will help with this, but the student should prompt him or her to ensure at least 10 working days.

According to the Graduate Catalog, it is the responsibility of the student to submit to the Office of the Graduate School, six weeks prior to graduation, two copies of the dissertation and the abstract in the final, approved form. Further changes or corrections might be suggested by the Graduate School at this time, and these must be completed or reconciled before graduation.

Students will be required to submit their dissertation document via Blackboard to check the originality of their document via iThenticate, TurnItIn, or similar service provided. The chair will evaluate the results accordingly.

Special Education, Ed.S.

Special education graduate programs are designed to help bring improvements to the educational services offered to exceptional children. Courses of study leading to the Educational Specialist (EdS) degree and Class AA professional educator certification in the education of exceptional children are listed below:

Traditional Class AA programs are available in

- collaborative education
- early childhood special education
- gifted and talented

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must:

- have earned a master's degree with appropriate prerequisite Class A certification.
- be aware of the admission requirements established by the Alabama Department of Education.
- hold valid master's level certification in a teaching field.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Collaborative (K-6, 6-12), Class AA

This course listing applies to candidates having appropriate prior certification who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C. Credits used for the previous Class A support certificate may not be used for this program.

Candidates admitted to the Class AA program without prior Class A certification in collaborative or an approved area of special education

must take the following courses in addition to the coursework below: SPE 590, SPE 591 or SPE 592, SPE 594, SPE 501 (or the equivalent), and SPE 596. Up to three semester hours of the prerequisite work may be used to meet the elective requirements in this program.

Early Childhood Special Education (P-3), Class AA

This course listing applies to candidates having appropriate prior certification who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C. Credits used for the previous Class A support certificate may not be used for this program.

Candidates admitted to the Class AA program without prior Class A certification in early childhood special education must take the following courses in addition to the coursework below: SPE 576 (or its equivalent), SPE 571, SPE 578, SPE 594, and SPE 579. Up to three semester hours of the prerequisite work may be used to meet the elective requirements in this program.

Gifted (P-12), Class AA

This course listing applies to candidates having appropriate prior certification who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C. Credits used for the previous Class A support certificate may not be used for this program.

Candidates admitted to the Class AA program without prior certification in gifted must take the following courses in addition to the coursework below: SPE 581, SPE 582, SPE 583, SPE 501 (or its equivalent), and SPE 589 (S.E.W.). Up to three semester hours of the prerequisite work may be used to meet the elective requirements in this program.

Transfer Credit

Graduate School information on Transfer Credit (p. 21).

Comprehensive Exam

Students complete a comprehensive examination during their last semester of coursework. Dates for comprehensive examinations are announced at the beginning of each semester. Students must be registered for at least one hour in order to take comprehensive examinations per Graduate School policy. The student's advisor/chair will write the comprehensive examination questions in view of each student's course of study. The comprehensive examination will be delivered via Blackboard, and students will have 10 consecutive days to complete their questions. Comprehensive examination responses are subject to evaluation for plagiarism and other forms of academic dishonesty as outlined in the code of student conduct. Two graders will grade the comprehensive examinations. A third reviewer will be added if there is not agreement of pass/fail among the original two readers.

Certification

The Alabama State Department of Education grants Class AA professional educator certification in special education (collaborative, early childhood special education, or gifted). To be eligible, students must hold appropriate Class A certification and must complete all requirements for the EDS degree in the chosen program as described in this catalog, including *Praxis* subject assessment(s) (if applicable).

To be awarded Alabama Class AA Special Education certification, students must:

- earn a passing score on a comprehensive assessment covering the content of the program,
- maintain a GPA of at least 3.5 (effective July 1, 2017) on all courses with no grade below a C,
- hold a valid, appropriate, prerequisite Alabama certificate, and
- complete the State Department of Education certification application forms

Students must complete the proper application form for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional certification within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to seek employment in other states must secure the proper professional licensure application forms from those states' departments of education.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

Special Education, M.A.

Special education graduate programs are designed to bring improvements to the educational services accorded to exceptional children. Courses of study leading to the Master of Arts (MA) degree and Class A professional educator certification in the education of exceptional children are listed below:

Traditional Class A certification programs are available in

- autism (Class A, Innovative)
- collaborative education
- early childhood special education
- gifted and talented
- severe disabilities (Class A only)

Alternative Class A certification programs are available in

- collaborative education
- early childhood special education with dual certification in early childhood
- gifted and talented

Additionally, an Overseas master's degree program in Special Education is offered to overseas students. The Overseas Program does not lead to professional licensure or certification.

While the graduate catalog is published annually, program checklists for state-approved certification programs may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. Students should refer to the appropriate program checklists for their teaching fields and consult their advisors before registering each semester.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must be aware of the admission requirements established by the Alabama State Department of Education.

A student in his or her last semester of work toward the master's degree who does not need a full course load to complete the course requirements of his or her master's degree may register for work toward the EdS degree, in the amount needed to complete full registration loads.

Traditional Class A Certification Programs

For admission to traditional Class A programs of study in collaborative education, early childhood special education, or gifted and talented education, the appropriate prior certification must be held in a teaching field.

For admission to the Class A program of study in severe disabilities, the appropriate prior certification must be held in an appropriate area of special education.

For admission to the Class A program of study in autism, the prior certification must be held in an appropriate area of special education.

Fingerprinting Requirement

Applicants to state-approved teacher education programs shall be required to be fingerprinted for a criminal history background check through the Alabama State Department of Education to the Alabama Bureau of Investigation (ABI) and the Federal Bureau of Investigation (FBI) pursuant to ACT 2002-457. This includes all students (traditional, alternative, out-of-state, and distance learners) enrolled in MA programs that lead to Alabama certification, regardless of whether or not they are pursuing Alabama certification. The background check is completed at the student's expense, and suitability must be documented in the Office of Student Services & Certification before the student is assigned placement in a clinical setting. A candidate whose suitability determination precludes admission to a state-approved teacher education program has the right to due process procedures in accordance with the current Educator Certification Chapter of the Alabama Administrative Code (Revocation and Suspension of Certificates and Unsuitability Determinations).

Alternative Class A, Nontraditional, Initial Teacher Certification Programs

Special Education & Multiple Abilities offers teacher education programs that do not require prior certification in a teaching field. These programs lead to Alabama Alternative Class A certification in special education (collaborative teacher, K-6; collaborative teacher, 6-12; early childhood special education, P-3; or gifted, P-12) and are designed to allow individuals with undergraduate degrees in nonteaching fields to enter the field of education.

Admission to a nontraditional, alternative certification program in special education requires full admission to the Graduate School and the completion of specified undergraduate prerequisite courses.

For admission to the Alternative Class A (non-traditional) program in collaborative education, early childhood special education, or gifted and talented education, applicants must meet the following requirements:

- **Transcript evaluation:** Applicants should contact the Office of Student Services & Certification for a transcript evaluation to determine prerequisite courses. [NOTE: Coursework and/or a degree from institutions outside the United States shall be substantiated by an evaluation of the foreign credentials through a foreign credential

evaluation service recognized by the Alabama State Department of Education. Contact the College's Office of Student Services and Certification for more information.]

- **Degree requirement:** An appropriate bachelor's degree from a regionally accredited institution with a minimum overall GPA of 2.75 OR a master's degree with a GPA of at least 3.0 is required.
- **General Studies and Teaching Field:** For Alternative Class A in Collaborative or Early Childhood Special Education, applicants must have completed 12 hours of coursework in each of four areas: English Language Arts, social studies, science, and mathematics. (This is called the 4 x 12 requirement.) Applicants who do not meet the 4 x 12 requirement have the option to earn a passing score on the appropriate Praxis subject assessment(s) in lieu of completing the deficient 4 x 12 courses. For Alternative Class A in Gifted, applicants must have an academic major in a discipline that is approved in the Alabama Course of Study.
- **Fingerprinting/background clearance** - Applicants to state-approved teacher education programs shall be required to be fingerprinted for a criminal history background check through the Alabama State Department of Education to the Alabama Bureau of Investigation (ABI) and the Federal Bureau of Investigation (FBI) pursuant to ACT 2002-457. This includes all students (traditional, alternative, out-of-state, and distance learners) enrolled in MA programs that lead to Alabama certification, regardless of whether or not they are pursuing Alabama certification. The background check is completed at the student's expense, and suitability must be documented in the Office of Student Services & Certification before the student is assigned placement in a clinical setting. A candidate whose suitability determination precludes admission to a state-approved teacher education program has the right to due process procedures in accordance with the current Educator Certification Chapter of the Alabama Administrative Code (Revocation and Suspension of Certificates and Unsuitability Determinations).

Non-Certification Overseas Program for Special Education, MA

Admission requirements for the Graduate School and the College of Education are detailed elsewhere in this catalog.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Autism, Class A (Innovative)

This course listing applies to candidates having appropriate prior certification in an area of special education. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C. Passing scores on the appropriate Praxis subject assessment(s) are required if changing areas of certification.

CRD 511	Begin Rding Pre-K-Prim Grades	
CRD 512	Impr Read Second Schools	
Total Hours		30

Transfer Credit

For Traditional Class A programs, credits used for previous Class B certification(s) may not be used for the Class A program.

Graduate School information on Transfer Credit (p.).

Comprehensive Exam

Students complete a comprehensive examination during their last semester of coursework. Dates for comprehensive examinations are announced at the beginning of each semester. Students must be registered for at least one hour in order to take comprehensive examinations per graduate school policy. The student's advisor/chair will write the comprehensive examination questions in view of each student's course of study. The comprehensive examination will be delivered via Blackboard, and students will have 10 consecutive days to complete their questions. Comprehensive examination responses are subject to evaluation for plagiarism and other forms of academic dishonesty as outlined in the code of student conduct. Two graders will grade the comprehensive examinations. A third reviewer will be added if there is not agreement of pass/fail among the original two readers.

Graduate School information on Comprehensive Exams (p.).

Fieldwork/Practicum/Internship Requirements

Clinical Placements

All Class A and Alternative Class A programs require extensive field experiences in diverse settings. The majority of field experiences must occur in P-12 schools, and at least half of the field experiences shall be in the candidate's teaching field. For Alternative Class A programs, these placements are in the greater Tuscaloosa area in order to facilitate

supervision of students. For Early Childhood Special Education and Early Childhood programs, field experiences shall include placements in at least two of the three main types of early education settings: P-3 classrooms, child care centers and homes, and Office of School Readiness programs. On-campus practicum experiences may include the Children's Program, the Rural Infant Stimulation Environment (RISE) Program, and Early Intervention at The University of Alabama (EI@UA). These programs provide opportunities for students to work with infants, toddlers, pre-K children, and their families. With approval, individuals who are employed in positions appropriate to the area of their current program may complete field experiences on the job, but those experiences must be planned with specific purposes and assessment. All clinical placements in the College of Education relating to educator preparation are coordinated through the Office of Clinical Experiences.

Professional Liability

Students enrolled in College of Education courses that require a clinical placement should have professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA).

Internships for Certification Programs

Alternative Class A Programs

The teaching internship (formerly called student teaching) is one of the most important experiences College of Education students have. It is generally regarded as the culminating activity of one's preparation to become a teacher. At The University of Alabama, the internship is a full-semester, full-time assignment and must be taken in residence.

Alternative Class A students must file internship applications with the Office of Clinical Experiences in 105 Autherine Lucy Hall during the semester preceding the semester of the planned internship. The application process begins by attending a mandatory application session, which is held the first Wednesday in October for spring-semester interns and the first Wednesday in March for fall-semester interns. The time, date, and place of the application session are announced at the beginning of each semester. The deadline for filing applications for a spring-semester internship is October 31; for a fall-semester internship the deadline is March 31.

Alternative Class A students may apply to enroll for an internship if they meet the following criteria:

- The student must have completed all courses in the major or majors, or must secure written permission to enroll for an internship from the appropriate department head.
- The student must show proof of a passing score on the appropriate Praxis assessments.
- The student must have achieved a minimum grade point average of 3.0, both for all University of Alabama courses attempted and for all University of Alabama courses and transfer courses combined.
- The student must have achieved a minimum grade point average of 2.75 in each major, both for University of Alabama courses in each major and for combined University of Alabama courses and transfer courses in each major.
- The student must have achieved a minimum grade point average of 2.75 for professional education coursework.
- The student must have completed all methods courses and appropriate professional coursework with grades of "C" or better.

- The student must have removed from the transcript any grade of incomplete ("I") recorded in required courses; grades of incomplete are treated as grades of "F."

Registration for Internship Credit Hours

Students are required to register for the number of internship credit hours specified by their program. In some programs, graduate students may be allowed to choose a 6-hour registration or a 9-hour registration; course requirements are the same whether 6 hours or 9 hours are taken. Graduate students whose program requires two internship placements should register for two sections of internship (3 hours per section or 4.5 hours per section). Students enrolled for internship must not expect to be enrolled in other courses while interning.

Policy on Internship Placements

All internship placements are coordinated by the College of Education Office of Clinical Experiences. Placement sites are selected to ensure the quality of the internship experience and of the supervision provided by the cooperating teacher. For Alternative Class A programs, internship placements are in the greater Tuscaloosa area in order to facilitate supervision of students by University of Alabama faculty or other designees of the department heads. Placements outside the greater Tuscaloosa area are made only if the director of clinical experiences and/or the department head determines that an appropriate local placement is unavailable.

With approval, a candidate admitted to a traditional Class A or an Alternative Class A program who is employed in an Alabama school may complete the internship in the candidate's classroom if the candidate holds a valid Interim Employment Certificate (IEC) for the appropriate teaching field and assignment.

Students may apply for overseas internships if they meet certain criteria and if appropriate placements can be coordinated by the Consortium for Overseas Student Teaching (COST) and/or The University of Alabama. Applications for overseas internships are taken during January for placements for the next fall semester, and in May for placements the succeeding spring semester. Contact the Office of Clinical Experiences in 101 Autherine Lucy Hall for additional information.

Internship Assignments

- Special education-Collaborative (K-6 or 6-12) interns will receive a split internship assignment: half in a severe and profound setting and half in a mild to moderate setting. The placements will be divided according to their certification grade levels. For candidates seeking certification in BOTH Collaborative K-6 and Collaborative (6-12), the internship shall be divided between early childhood/elementary and middle/secondary grades.
- Special education-early childhood (P-3) interns will receive split placements in pre-K and K-3 in both general education and special education.
- For Traditional Class A Gifted, total internship hours of at least 300 clock hours at the P-12 level are required.

Summer Internships

Summer internships are rarely available and then only to persons who hold an undergraduate degree and certification and have one or two years of successful teaching experience at the level and in the subject for which they are seeking certification (with approval from the department head). In addition, summer internship assignments are allowed only if an appropriate placement can be secured in the Tuscaloosa area and appropriate supervision can be provided. These conditions also apply to those seeking to update or renew their certification or add an additional

endorsement to a current certificate. To apply for a summer internship, students should file an appropriate application with the Office of Clinical Experiences in 105 Autherine Lucy Hall by March 31 of that year.

Time Limit for Degree Completion Requirements

Graduate School information on Time Limits (p.).

Student Progress Requirement

For Alternative Class A programs, students must be formally admitted to the Alternative Certification Teacher Education Program during their program. Students must meet the minimum qualifications that are expected of candidates entering and completing undergraduate (Class B) certification in the same discipline. This usually means minimum GPA requirements in the core curriculum as well as minimum GPA requirements within the disciplines in which the applicant is seeking certification. Other requirements, such as completion of a writing assessment and other screening associated with undergraduate certification must be completed before formal admission to the alternative teacher education program.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 219).

Scholastic Requirements

As required for traditional Class A and Alternative Class A certification, students must earn a GPA of at least 3.25 on all courses in the program, with no grade below a C.

A student completing requirements for a master's degree during a semester or summer session who does not need a full class load to meet those requirements may, with approval of the advisor and department head, register for additional courses toward a Class AA professional educator certificate, not to exceed the maximum prescribed class load.

Graduate School information on Scholastic Requirements (p. 204).

Application for Graduation Information

Information on the Application for Graduation (p.).

Certification

The Alabama State Department of Education grants Class A professional educator certification in special education (autism; collaborative, K-6; collaborative, 6-12; early childhood special education, P-3; gifted, P-12; or severe disabilities, P-12). The Associate Dean for Student Services in the College of Education has been designated as the teacher certification officer for The University. Students who need information about or assistance with certification should consult the associate dean for student services.

To be eligible for Class A certification, candidates must hold appropriate prerequisite certification OR complete an Alternative Class A program and must successfully complete all requirements for the MA degree in the chosen program as described in this catalog, including a comprehensive assessment, state assessments (if applicable), and the *Praxis* subject assessment(s). It is important to remember that the awarding of a master's or higher degree does not necessarily imply that the student is eligible for Class A certification.

To be awarded Alabama Class A certification, students must:

- maintain a GPA of at least 3.25 on all courses with no grade below a C,
- receive a passing score on a comprehensive assessment documenting mastery of the curriculum,
- earn a passing score on the required *Praxis* subject assessment(s), if applicable.

Students must complete the proper application form(s) for Alabama certification. Forms are available online through the Alabama State Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. An individual who completes an Alabama State-approved program must submit an application for Alabama certification within 60 calendar months of the program completion date. A student who does not apply for professional licensure within 60 months after completing the state-approved program will be required to meet the current program. The Class A certificate is valid for five years and may be renewed according to regulations of the Alabama State Department of Education. Individuals are responsible for meeting renewal requirements and submitting the application for renewal.

Students who plan to teach in other states must secure the proper professional licensure application forms from those states' departments of education. Students planning to teach outside the state of Alabama are held personally responsible for knowledge of professional licensure requirements in those states.

According to Alabama regulations, individuals admitted to a Class A program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class A (master's level) certification.

The certification programs of the department have been designed to fulfill current requirements of the Alabama State Department of Education. The state requirements change from time to time and, accordingly, the department's requirements and programs are subject to change.

Special Education, Ph.D.

The Ph.D. program in the Department of Special Education and Multiple Abilities (SPEMA) is designed around the interests of the student and the expertise of the faculty, and aims to produce a top researcher seeking an appointment in a university or research setting. Before acceptance into the program, the department evaluates whether a student's interest area matches with an area of faculty expertise. Once accepted, students work with the Plan of Study committee (POS) to shape their course of study. The POS is made up of faculty, including the student's advisor. Many interests related to special education field can be accommodated, including subfields related to autism spectrum disorders, behavior disorders and prevention, early childhood special education, early intervention, gifted and talented, non-categorical special education, severe disabilities, and transitions.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A recent (within the last five years) GRE score of 300 or higher.
- An earned MA degree in special education (or a related area) with an accomplished scholarly record at the master's level
- Three years of appropriate experience (defined as three years of work in agencies serving children and youth, one year of which must have been spent in direct, full-time interaction with exceptional children)
- A demonstrated commitment to a scholarly career in special education
- A successful presentation to the department
- A successful interview process with faculty members.

Graduate faculty members individually evaluate and collectively discuss admission applications.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

A minimum of 72 semester credit hours beyond the master's degree is required for completion of the Ph.D. program, but highly recommended additional research courses would extend the hours to 78. These 72 hours consist of the following courses: 24 hours of special education courses; 12 hours of educational foundations courses; 12 hours of research courses; and 24 dissertation hours.

Code and Title		Hours
Educational Foundations courses		12
Educational Research courses		12
Special Education courses (24 hours)		
SPE 600	Doctoral Seminar Spe (usually taken in the first semester)	3
SPE 601	Sem Col Teachg In Spe	3
The remaining Special Education coursework may come from the following SPE courses or other courses on campus closely linked to special education.		18
SPE 606	Topical Seminar In Spe (Behavior Management)	
SPE 606	Topical Seminar In Spe (Special Topics)	
SPE 609	Practicum In Spe (teaching a course, with faculty guidance, or other field experience; can be taken more than once)	
SPE 611	Ind Study In Spe (may be taken up to four times)	
SPE 612	Readg Research In Spe (Pre-Dissertation Study; e.g., pilot study; practice data collection; IRB submission)	
SPE 616	Adv. Professional Development (deliver PD, with faculty guidance, such as training early intervention or special education personnel in practices and models)	
SPE 617	SPE Leadership	
SPE 621, SPE 623, or SPE 681: Issues in Exceptionality for ECSE, collaborative/non-categorical, gifted		
SPE 622, SPE 624, or SPE 682: Advanced Curriculum Workshop for ECSE, collaborative/non-categorical, gifted		
Dissertation Research		24
Total Hours		72

Most of the doctoral seminars are taught every 2 years, to ensure sufficient enrollment.

College of Engineering

Department of Aerospace Engineering and Mechanics (p. 613)

Department of Chemical and Biological Engineering (p. 617)

Department of Civil, Construction and Environmental Engineering (p. 627)

Department of Computer Science (p. 645)

Department of Electrical and Computer Engineering (p. 658)

Department of Mechanical Engineering (p. 666)

Department of Metallurgical and Materials Engineering (p. 673)

General Engineering Studies Courses

Graduate courses are offered on a regular basis in some departments, as indicated in the course listings. However, all graduate courses are taught only upon sufficient demand. In the following course listing, each description contains a set of parentheses immediately preceding the semester hours. The first number within the parentheses indicates the number of contact hours per week in lecture, recitation, or seminar. The second number indicates the number of contact hours per week in laboratory.

The College of Engineering requires that a grade of "C" or better be earned in all prerequisite courses.

Additional information is in the Admission Criteria (p. 7) section and the Degree Requirements (p. 18) section of this catalog.

GES courses are interdisciplinary and may be taken to meet individual program requirements.¹

GES500 Engineering Statistics

Hours 3

Probability and basic statistical concepts. Discrete and continuous distributions; the central limit theorem; sampling distributions; point and interval estimation; hypothesis testing; regression and correlation analysis; analysis of variance.

GES551 Matrix And Vector Analysis

Hours 3

This course provides a graduate level overview of linear algebra and vector analysis. Topics covered include; linear simultaneous equations, eigenvalues and eigenvectors, matrix functions, computer techniques, and transformations, vector calculus, the Laplacian, and integral theorems such as the theorems of Green and Stokes.

GES554 Partial Diff Equations

Hours 3

This course examines the solution of partial differential equations by focusing on three specific equations: (1) the heat equation, (2) the wave equation, and (3) Laplace's equation. Topics covered include: Fourier transforms, Sturm-Liouville problems, classification of partial differential equations, Bessel functions, and numerical methods for solving partial differential equations.

GES555 Nonlinear Partial Differential Equations

Hours 3

An introduction to nonlinear partial differential equations. Exact solutions, approximate solutions, and numerical solutions will all be considered. The course content is supported by numerous applications.

Prerequisite(s): GES 554

Master's students may, with permission of the department and prior approval by the Graduate School, receive credit for six (6) hours of 400-level credit. The Graduate School Policy on 400-level credit may be found here (p. 7).

AEM500 Intermediate Fluid Mechanics

Hours 3

Development and use of the integral and differential forms of the equations of continuity, momentum, and energy with ideal fluids, viscous fluids and compressible fluids. Advanced topics in fluid mechanics, including potential flow, viscous flow and compressible flow.

AEM508 Propulsion Systems

Hours 3

Basic propulsion dynamics, thermodynamics of fluid flow, combustion kinetics, air-breathing engines, rockets, design criteria, performance, and advanced propulsion systems.

Aerospace Engineering and Mechanics, MS

The Department of Aerospace Engineering and Mechanics offers a Master of Science in aerospace engineering and mechanics degree via an on-campus program and an off-campus (distance learning) program through the College of Continuing Studies. An MSAEM can be earned by coursework only or by a combination of coursework and an approved thesis. Most distance learning students elect to complete the coursework only degree option. On-campus students supported by assistantships are expected to complete an approved thesis.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three letters of recommendation (only two letters for Accelerated Masters Program applicants)
- GRE (optional)

Aerospace Engineering and Mechanics standards are higher than the graduate school minimums, and all application materials are carefully considered. Meeting minimum graduate school requirements does not guarantee admission into the Aerospace Engineering and Mechanics MSAEM program.

Students applying to the Aerospace Engineering and Mechanics MSAEM program without a bachelor's degree in aerospace, mechanical, or civil engineering are required to complete the following coursework from an accredited university (if not already completed) prior to applying:

- Calculus (12 credit hours)
- Ordinary Differential Equations
- 12 credit hours of calculus-based engineering mechanics - Statics, Dynamics, Mechanics of Materials and Fluid Mechanics.

Students have the opportunity to enroll in the mechanics courses through the UA College of Continuing Studies as a non-degree seeking (NDS) applicant.

The Aerospace Engineering and Mechanics MSAEM distance program is open to US students as well as international students residing in the US with appropriate visas.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The MSAEM degree can be earned by 30 hours of coursework (non-thesis option) or by a combination of 24 hours of coursework, 6 hours of thesis research, and a committee approved thesis that includes an oral defense and written document (thesis option). A 3.0 GPA for coursework is required. Most distance learning students elect to complete the coursework only degree option. On-campus students supported by assistantships are expected to complete an approved thesis.

For both degree options, students must complete two core courses, one from each core designation.

AEM Core Courses		Hours
Aerospace Core:		
AEM 569	Orbital Mechanics	3
AEM 582	Space Systems	3
AEM 614	Airfoil And Wing Theory	3
AEM 668	Adv. Flight Dynamics & Control	3
Mechanics Core:		
AEM 500	Intermediate Fluid Mechanics	3
AEM 530	Continuum Mechanics	3
AEM 562	Intermediate Dynamics	3
AEM 637	Theory Of Elasticity	3

Students must also complete six hours of mathematics coursework. Consult with your Research Advisor or the Graduate Program Coordinator regarding approved math courses. Four commonly taken and approved courses are listed in the table.

Common Mathematics Course Options		Hours
GES 551	Matrix And Vector Analysis	3
GES 554	Partial Diff Equations	3
ME 501	Mech Engr Analysis I	3
ST 560	Statistical Methods	3

Elective, thesis and culminating experience requirements are outlined in the Thesis and Non-Thesis links. At least 18 hours must be AEM designation.

Plan I: Thesis Option Curriculum		Hours
Core Coursework		6
Mathematics Coursework		6
Elective Coursework		12
AEM 599	Thesis Research	6
Total Hours		30

Plan II: Non-Thesis Option Curriculum		Hours
Core Coursework		6
Mathematics Coursework		6
Elective Coursework		18
Total Hours		30

Transfer Credit

Transfer credit requests are evaluated by the Graduate School and the AEM department and follow Graduate School policy.

Accelerated Master's Program

The Accelerated Masters Program (AMP) is designed specifically for outstanding UA students to complete the requirements for both their bachelor's degree and a master's degree in aerospace engineering in an accelerated five year period. A BSAE student in the AEM AMP can earn up to 12 hours of dual-credit toward their bachelor's and master's degrees. Following successful completion of all requirements for their BSAE, students in AMP are awarded their undergraduate degree. Students then continue taking graduate courses until the requirements for the master's degree are met. In addition to the BSAE/MSAEM AMP, there is a BSME/MSAEM AMP that allows 9 hours of dual credit and a BSAE/MSME AMP that allows 6 hours of dual credit.

Students in AMP are classified as undergraduates until they complete all of the requirements for the undergraduate degree. They cannot hold graduate assistantships until they are classified as graduate students; however, in some cases can use remaining UG scholarship funds for graduate coursework (consult with the Undergraduate Scholarship office).

Students interested in these programs should contact the AEM Graduate Program Coordinator, Dr. James P. Hubner (phubner@eng.ua.edu).

Eligibility

Students normally apply to the AMP at the end of their junior year prior to the start of their senior year of the BSAE flow chart. To be considered for admission, BSAE or BSME students must:

1. have at least a 3.3 GPA;
2. have completed 90 hours toward their BSAE or BSME degree including at least two AEM or ME 300-level courses in the junior year of the flow chart; and
3. complete an on-line application to the graduate school (two letters of recommendation and a statement of purpose are required by the department).

Students apply for the program online. Applications are evaluated by the Graduate School and the AEM department. Meeting minimum eligibility requirements does not guarantee admission.

Comprehensive Examination/Capstone

Students pursuing the MSAEM Plan II degree option have the choice of completing one of the following options to satisfy the requirement of a culminating experience:

1. Complete a capstone project and receive faculty advisor approval for the written report detailing the culminating experience: The research project is an in-depth study of a topic that must be approved by the student's research advisor, an AEM faculty member in which the student selects based on mutual research interests. The project is not as comprehensive as a thesis. The project must integrate knowledge and concepts from more than one of the program courses. MSAEM Plan II students may, but are not required to, enroll in three hours of AEM 594 Special Projects and submit the written reports detailing the culminating experience as part of the AEM 594 course requirements. The approved written report for the culminating experience must be submitted to their advisor providing sufficient time to evaluate and potentially require edits prior to the end of the semester, usually two to three weeks before final exam week.

2. Pass the PhD qualifying examination: The qualifying exam is offered each fall and spring during the middle of the semester. The exam is three hours, written, and covers topics related to your core AEM courses and your research area. If the student fails the qualifying exam, then they may pursue option 1.

The student must complete at least 18 hours prior to starting the culminating experience.

Plan I: Thesis Option

The MSAEM Thesis option degree requires 24 hours of coursework, 6 hours of thesis research (AEM 599), and an approved thesis. Additional requirements to those outlined under Curricular Requirements include:

- 18 hours of the 30 required must have AEM designation or transferred under AEM designation
- Non AEM electives must be approved by the student's Research Advisor or the Graduate Program Coordinator
- Thesis committee requirements follow Graduate School policy. The thesis committee should be formed at least the semester prior to the thesis defense.
- Thesis submission deadlines, document formatting, and graduating semester enrollment requirements follow the Graduate School calendar and policy.

Plan II: Non-Thesis Option

The MSAEM Non-Thesis option degree requires 30 hours of coursework and the completion of a Capstone Project or Comprehensive Exam. Additional requirements to those outlined under Curricular Requirements include:

- 18 hours of the 30 required must have AEM designation or transferred under AEM designation
- Non AEM electives must be approved by the student's Research Advisor or the Graduate Program Coordinator

Aerospace Engineering and Mechanics, Ph.D.

Doctor of Philosophy in Aerospace Engineering and Mechanics

The Department of Aerospace Engineering and Mechanics offers a Doctor of Philosophy degree on campus and through an alternative residency (distance learning). In a research-based degree, students are required to propose, complete and defend an approved dissertation on a research topic that contributes to the field of aerospace engineering and/or engineering science and mechanics.

Admission Requirements

See the Admission Criteria section of this catalog for more information.

Degree Requirements

Departmental requirements for the PhD are listed below. Graduate School and College of Engineering requirements are presented in the graduate catalog.

Credit Hours

A total of 72 semester credit hours is required for a Ph.D. degree. These credit hours consist of:

Code and Title	Hours
Core coursework	6
Mathematics coursework	6
Elective coursework	36
Dissertation Research (AEM 699)	24
Total Hours	72

Elective coursework must be approved by the student's advisor. Of the 48 coursework credit hours, at least 24 must have an AEM designation.

Core Course Requirements

All students must complete a minimum of one (1) class from the Aerospace Core listing of classes and one (1) class from the Mechanics Core listing of classes.

Common Mathematics Course Options		Hours
Aerospace Core		
AEM 569	Orbital Mechanics	3
AEM 582	Space Systems	3
AEM 614	Airfoil And Wing Theory	3
AEM 668	Adv. Flight Dynamics & Control	3
Mechanics Core		
AEM 500	Intermediate Fluid Mechanics	3
AEM 530	Continuum Mechanics	3
AEM 562	Intermediate Dynamics	3
AEM 637	Theory Of Elasticity	3
Common Mathematics Course Options		
GES 551	Matrix And Vector Analysis	3
GES 554	Partial Diff Equations	3
ME 501	Mech Engr Analysis I	3

ST 560 Statistical Methods 3

Consult with your research advisor or Graduate Program Coordinator regarding other possible math credit options

Mathematics Requirement

A total of six credit hours of mathematics is required. Consult with your advisor regarding approved math courses.

Elective Coursework Requirement

A student must complete at least 36 hours of elective coursework. These courses are typically AEM courses, but other approved courses are acceptable. The specific courses must be approved by the student's adviser, in consultation with student's graduate advisory committee.

Ph.D. Qualifying Examinations

Students in the PhD program are required to successfully complete the qualifying examination based on the student's core coursework. The qualifying examination may only be taken twice. A student should pass the qualifying examination within 18 months after completing 24 credit hours of AEM coursework and at least twelve months prior to graduation. The written examination is offered twice a year, usually in early October and early March. The Graduate Program Coordinator coordinates the PhD qualifying examinations.

CHE512 Polymer Materials Engineering

Hours 3

Introduction to the manufacture, processing, and applications of organic polymeric materials. This course covers the chemistry of polymer manufacture, the molecular structures of polymers, and the structure-property relationships for thermoplastic and thermosetting polymers.

CHE514 Computer Methods in Chemical Engineering

Hours 3

A survey of common software, data processing, and statistical analysis tools applied to chemical engineering, science, and general interest topics. This course covers the fundamentals of computer programming (coding) and problem solving for chemical engineering students. Offered primarily in the fall semester.

Chemical Engineering, MS

Our Master's program offers a streamlined educational experience that bolsters knowledge and professional skills in chemical engineering.

The program covers basic subjects important to all chemical engineers, including thermodynamics, transport phenomena, kinetics and applied mathematics, along with coursework tailored to student interest.

All students in the thesis-based track (Plan I) conduct innovative, original research in faculty-run labs. All students in the non-thesis track (Plan II) complete specialized coursework in chemical engineering and a capstone experience.

The Master's degree typically requires one to two years to complete, depending on the intensity of study and whether a thesis is produced.

We welcome students with undergraduate degrees in chemical engineering, as well as in other related STEM fields such as chemistry, biology, and materials science and engineering. Students entering

with a degree other than a BS ChemE, however, may require additional coursework, thereby adding time to the degree.

Admissions

Admission is contingent upon recommendation by the graduate faculty of the Department of Chemical and Biological Engineering. Special opportunities are available for students with undergraduate degrees in fields other than chemical engineering.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Master of Science-Thesis Option (Plan I): 30 Credit hours

Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework and write a thesis (a minimum of six semester hours of thesis research required).

- A minimum of 24 credit hours of coursework is required.
- A minimum of six hours of thesis research is required.
- A student's curriculum and thesis must be approved by the student's graduate advisory committee. The student must pass a final comprehensive examination, which is typically a presentation and defense of the thesis. In addition, the student must satisfy all University requirements defined in the current edition of The University of Alabama Graduate Catalog.

All graduate students in chemical engineering are required to pass the following core graduate courses:

Code and Title	Hours
Required Core Course	
CHE 551 Adv Thermodynamics I	3
CHE 552 Transport Phenomena	3
CHE 553 Computation In Chem Engr	3
CHE 554 Chemical Reaction Engr	3
Elective Courses Options	12
CHE 512 Polymer Materials Engineering	
CHE 518 Tissue Engineering	
CHE 540 Health Safety Chem Process Ind	
CHE 545 Introduction to Biochemical Engineering	
CHE 592 Special Problems	
Additional elective course options available upon approval of Advisor	
Thesis Research	
CHE 599 Thesis Research	6
Total Hours	30

Master of Science-Non-Thesis Option (Plan II): 30 Credit hours

Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of credit and complete a culminating or "Capstone experience" as described below.

- A minimum of 30 credit hours of coursework is required.
- A student's curriculum must be approved by the student's graduate advisory committee. The graduate advisory committee must also approve the submission of a manuscript, a conference proceeding or a graduate seminar presentation. This activity shall constitute

The University of Alabama Graduate School culminating experience requirement for a MS Plan II degree in chemical engineering.

- The "Capstone Experience" consists of two required components:
 - a. First, a research presentation must be delivered to the faculty. The research presentation can be based on a literature review of a chemical engineering topic or a presentation of hands-on research results. The student must register for 1 hour of CHE 595 Seminar during the semester of the presentation (this 1 hour counts towards the total of 30 credit hours of coursework).
 - b. The second component is a mentored grading experience, CHE 591 Special Problems (1-4 hr.), and this will count towards the 30 credit hours of coursework. The student will gain first-hand experience with several aspects of the chemical engineering educational process (homework design, grading, test preparation, etc.).

Code and Title	Hours
Required Core Courses	
CHE 551 Adv Thermodynamics I	3
CHE 552 Transport Phenomena	3
CHE 553 Computation In Chem Engr	3
CHE 554 Chemical Reaction Engr	3
Elective Courses Options	14
CHE 512 Polymer Materials Engineering	
CHE 518 Tissue Engineering	
CHE 540 Health Safety Chem Process Ind	
CHE 545 Introduction to Biochemical Engineering	
CHE 592 Special Problems	
Additional elective course options available upon approval of Advisor	
Capstone Experience Courses	
CHE 595 Seminar	1
CHE 591 Special Problems	3
Total Hours	30

Comprehensive Exam/Capstone

- The "Capstone Experience" consists of two required components:
 - a. First, a research presentation must be delivered to the faculty. The research presentation can be based on a literature review of a chemical engineering topic or a presentation of hands-on research results. The student must register for 1 hour of CHE 595 Seminar during the semester of the presentation (this 1 hour counts towards the total of 30 credit hours of coursework).
 - b. The second component is a mentored grading experience, CHE 591 Special Problems (1-4 hr.), and this will count towards the 30 credit hours of coursework. The student will gain first-hand experience with several aspects of the chemical engineering educational process (homework design, grading, test preparation, etc.).

Plan I – Thesis Process Requirements

Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework and write a thesis (a minimum of six semester hours of thesis research required).

- A minimum of 24 credit hours of coursework is required.
- A minimum of six hours of thesis research is required.
- A student's curriculum and thesis must be approved by the student's graduate advisory committee. The student must pass a final comprehensive examination, which is typically a presentation and defense of the thesis. In addition, the student must satisfy all University requirements defined in the current edition of The University of Alabama Graduate Catalog.

Plan II – Non-Thesis Process Requirements

Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of credit and complete a culminating or "Capstone experience" as described below.

- A minimum of 30 credit hours of coursework is required.
- A student's curriculum must be approved by the student's graduate advisory committee. The graduate advisory committee must also approve the submission of a manuscript, a conference proceeding or a graduate seminar presentation. This activity shall constitute The University of Alabama Graduate School culminating experience requirement for a MS Plan II degree in chemical engineering.

Chemical Engineering, Ph.D.

Admission Requirements

Specific admission requirements for the programs in chemical and biological engineering coincide with those of the Graduate School and the College of Engineering (p. 613) as detailed earlier in this catalog. Admission is also contingent upon approval by the graduate faculty

of the Department of Chemical and Biological Engineering. Special opportunities are available for students with undergraduate degrees in fields other than chemical engineering.

See the Admission Criteria section of this catalog for more information.

Admissions

Admission is contingent upon recommendation by the graduate faculty of the Department of Chemical and Biological Engineering. Admission opportunities are available for students with undergraduate degrees in fields other than chemical engineering (e.g., chemistry, biomedical engineering, and other related fields).

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The minimum coursework for the Ph.D. degree is 72 hours, which includes 48 hours of coursework and 24 hours of dissertation research.

An overview of the curriculum is shown in the curricular table below, followed by a summary of the mandatory course requirements (core courses and seminar) and options for electives.

Curriculum Overview		Hours
Core Courses		
CHE 551	Adv Thermodynamics I	3
CHE 552	Transport Phenomena	3
CHE 554	Chemical Reaction Engr	3
Mathematics Core Elective		3
Electives		34
Seminar Courses		2
Dissertation Research		24
Total Hours		72

Core Course Requirements

The department requires four "core" graduate courses, plus two seminar courses. The core courses must be taken at UA, unless the equivalent course credit is transferred from another domestic institution (with a grade of A- or higher). The four core courses are comprised of the three required CHE courses, plus one mathematical elective course, as well as the seminar requirement.

Electives

34 Hours of electives may be any of the following:

Code and Title	Hours
CHE 551 Adv Thermodynamics I	3
CHE 552 Transport Phenomena	3
CHE 553 Computation In Chem Engr	3
CHE 554 Chemical Reaction Engr	3
CHE 598 Non-Thesis Research	6
CHE 595 Seminar	1
CHE 698 Non-Dissertation Research	6
CHE 695 Seminar	1
CHE 591 Special Problems	3
CHE 545 Introduction to Biochemical Engineering	3
CHE 512 Polymer Materials Engineering	3
CHE 540 Health Safety Chem Process Ind	3
CHE 699 Dissertation Research	12

CHE 699	Dissertation Research	10
Total Hours		60

Mathematics Core Elective

Three hours may be any of the following:

Mathematical Core Course Elective Options		Hours
CHE 553	Computation In Chem Engr	3
GES 500	Engineering Statistics	3
GES 554	Partial Diff Equations	3
ST 560	Statistical Methods	3
MATH 509	Data Analysis: Sec Teachers	3
MATH 510	Numerical Linear Algebra	3
MATH 541	Boundary Value Problems	3
MATH 551	Math Stats W/Applictn I	3

Graduate Seminar Requirements

The department requires that students take and pass the Graduate Seminar, CHE 595 Seminar or CHE 695 Seminar, during the first part of the doctoral program of study (normally during the send semester of enrollment) and CHE 596 Seminar or CHE 696 Seminar in the latter part of the program (normally during the final semester of enrollment). These two hours of seminar count towards the coursework hours needed for graduation.

Seminar Course Requirement	Hours
CHE 595 or Seminar	1
CHE 695 Seminar	
CHE 596 or Seminar	1
CHE 696 Seminar	

Transfer Credit

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study Requirement

Graduate School information on the Doctoral Plan of Study (p. 23).

Comprehensive Exams

Doctoral Qualifier Exam

Once a student has completed all of the four core required graduate courses, the student is expected to take the doctoral qualifier ("qualifier") exam as a first evaluation stage in the doctoral program. This qualifier exam is offered twice per year, immediately following the end of the spring semester (during the month of May) and immediately following the end of the fall semester (Dec/Jan).

The nature of the qualifier exam is an assignment to independently write (and defend in front of a faculty committee) a research proposal in a field related to (but not directly overlapping) the student's dissertation topic. The faculty committee will be composed of the major advisor plus two other departmental faculty members. The proposal topic and the committee composition will be the responsibility of the student/advisor to determine. The student will provide a written copy of the proposal to the committee, and the student will defend the proposal in front of the committee during an oral presentation. The student will typically be given 2-3 weeks to complete the assignment. There are three different possible outcomes from the qualifier exam:

a) **Pass** – Students take a "bypass" Plan II MS degree (after completing 30 hours) and continue in the doctoral program.

b) **Conditional** - Students perform extra work based on the deficiencies identified by the committee. After reevaluation (within 2-3 months) by the committee, the student will pass or fail. No other extensions or reevaluations will be provided.

c) **Fail** - The student may not continue as a doctoral student. The student is expected to work with the advisor to make a plan to finish any ongoing projects. Financial support beyond this point should not be expected by the student.

Preliminary Defense Exam

The preliminary defense ("prelim") exam should be take after two full years of graduate study are completed, but at least nine months before degree completion. The exact date should be coordinated between a student and his/her Ph.D. advisor. The prelim exam is a formal presentation to the dissertation committee that provides a summary of progress to date (research accomplishments, scholarly publications, conference presentations, etc.). The exam consists of a written document (normally 15-20 pages in length, plus references), as well as a presentation (normally 30-45 minutes in duration, followed by a period of questions from the committee). Representative examples of the prelim exam (format, expectations, etc.) can be obtained from the Graduate Program Director upon request. A copy of the written document must be provided to the committee a minimum of two weeks before the scheduled prelim exam. There are three different possible outcomes from the prelim exam:

a) **Pass** – Students continue in the doctoral program and continue their research and dissertation progress.

b) **Conditional** - Students perform extra work based on the deficiencies identified by the committee. After reevaluation (within 2-3 months) by the committee, the student will pass or fail. No other extensions or reevaluations will be provided.

c) **Fail** - The student may not continue as a doctoral student. The student is expected to work with the advisor to make a plan to finish any ongoing projects. Financial support beyond this point should not be expected by the student.

Admission to Candidacy Requirements

The candidacy exam normally occurs at the end of the second year of study in the Ph.D. program. The candidacy exam is structured according to the following:

- The student will deliver a 30 minute presentation to his/her dissertation committee to provide an update on research progress, along with a summary of completed course work, presentations, publications, etc. There is no written component of the exam. A detailed research plan for future work must also be included.
- A pass/fail grade will be given. A student who fails the candidacy exam will be provided with written feedback on areas for improvement, and the student will have only one additional attempt to pass, which must be attempted during the following semester. A student that ultimately does not pass the exam will not be able to continue in the Ph.D. program, but the student will still have the option to complete an M.S. degree if desired.

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment Policy (p. 23).

Dissertation Requirements

Dissertation Committee Formation

Students should identify their committee and immediately after completing their qualifier exam. Since this exam is normally taken after the second semester in the program, the dissertation committee formation should be completed no later than the end of the third semester.

Dissertation Format

Dissertation format and submission procedures should follow Graduate School policies.

Graduate School information on Dissertation Requirements (p. 23).

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 23).

Student Progress Requirement

Once the doctoral qualifier (comprehensive) exam is passed, doctoral students are required to schedule an annual update and review with their dissertation committee. It is the *student's responsibility* to schedule and coordinate this review. It should be a formal presentation lasting approximately 20-30 minutes (a written document is not required).

If a preliminary dissertation (prelim) exam is scheduled to occur within the same timeframe as the annual report, the prelim exam can serve as a surrogate for the annual report. However, no more than 12 months should transpire between meetings that a student has with his/her dissertation committee. Satisfactory progress, as judged by the dissertation committee is required for continued participation in the doctoral program. In certain cases, the committee will provide a probationary period with specific deliverables/outcomes identified, in order for the student to continue in the doctoral program.

Graduate School information on the Application for Graduation.

Doctoral Degrees

The University offers several types of doctorates, each of which is described below.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants

(GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

Doctor of Philosophy Degree

The Doctor of Philosophy (PhD) degree is regarded as the researcher's degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The Doctor of Philosophy (PhD) degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

Field of Specialization - A defined field of specialization as outlined in the student's Plan of Study is required of all candidates for the Doctor of Philosophy degree. A minimum of 36 semester hours of non-dissertation course credit is required. Departments or programs may require more than this minimum. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 18 hours of dissertation research.

Research skill/language requirements - There is no university wide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments.

Interdisciplinary Studies

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 765) at the Graduate School's website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

Doctor of Education Degree

The Doctor of Education (EdD) requires a minimum of two years of graduate study beyond the master's degree for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate coursework research beyond the master's degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 488) section of the Graduate Catalog, there are specific regulations governing the EdD program.

Doctor of Musical Arts Degree

The Doctor of Musical Arts (DMA) degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 356) section of the Graduate Catalog.

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) (p. 730) is a practice-focused degree that is detailed in the Nursing section of this Catalog.

Doctor of Social Work

A Doctor of Social Work (DSW) degree is a practice doctorate degree in social work. It provides coursework on theory and skills in social work practice that are more advanced than what one would typically experience in an MSW program for social work.

Admission to Doctoral Degree Programs

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master's degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student's doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

Residency Requirements

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student's doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog's Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence

study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a "B" grade or better may be transferred. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.
2. PhD Programs Only: A student holding an earned, in-field master's degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. When exercising this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School. The requested transfer credit hours must be listed on the PhD Plan of Study as MSC501 under the transfer credit section. If the in-field master's degree was awarded *more than six years prior to admission to the current doctoral degree program*, the graduate program director or department head/chair must also submit to the Graduate School for evaluation, a Field-Related Employment Since Earning Master's Degree form with the student's CV must be submitted by the department through the UA DocuSign system in myBama. In addition, the department is asked to provide the following, attached to the approved Plan of Study :
 - a. An annotated work history from the student. This history should include job titles and major duties for all positions since earning a master's degree.
 - b. A brief paragraph from the corresponding faculty member, attesting that he/she has reviewed the work history and how that work applies to the current Ph.D. degree program.

The Graduate School will make the final determination about whether up to 24 prior master's hours can be applied to the Ph.D. requirements.

PhD awarding departments that want to participate in offering Option 2 to their doctoral students, need to "opt in" by informing the graduate dean in writing that they wish to be among the approved departments.

Consideration of transfer of credit or the acceptance of an earned master's degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy. Dissertation Research (699) may not be transferred in from an outside institution.

Time Limits

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master's, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time

limit, as specified in the Graduate Catalog at the time of the student's re-admission.

The Continuous Dissertation or Document Registration requirement for 699 and 799 enrollment will be waived for the intervening years between the student's cessation of doctoral work and re-admission.

Plan of Study

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School by the time the student has completed 30 coursework hours.

The PhD, DMA, and DSW Plans of Study are submitted by the department through the UA DocuSign system in myBama. The Plan of Study for other doctoral programs (Ed.D., DNP) are available from the student's department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

A copy of the approved Plan of Study must be submitted to the Graduate School when the department submits the Admission to Candidacy for Doctoral Degree form through the UA DocuSign system in myBama.

Preliminary or Comprehensive Examination

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student's supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student's research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy

The designation of candidacy reflects the student's demonstration of foundational knowledge and readiness to conduct independent research, in the discipline. The requirement for advancing to candidacy is determined by the faculty of the degree program and delineated in the program's section of the Graduate School Catalog and the program's Graduate Student Handbook.

Advancement to candidacy should involve either:

- passing the qualifying (major or preliminary) examination
- completing of all required coursework as listed on the approved program of study
- presenting or defending a dissertation prospectus or proposal
- or some combination of these milestones.

Students are not eligible to register for 699 or 799 credit hours until they have been advanced to candidacy. The Department Chair or Department Director of Graduate Studies, or their designee, shall submit

the Admission to Candidacy for the Doctoral Degree form to the Graduate School during the semester that the student meets the program's candidacy requirements.

Continuous Doctoral Research Hours Registration

Once a student meets their program's requirement for admission to candidacy and the designated Department administrator submits the Application for Admission to Candidacy form to the Graduate School, the student may enroll in 699 (dissertation/document research) or 799 (document/project research).

Once initiated, the student must pursue completion of the dissertation/document/project without interruption by enrolling in 699/799 each fall and spring semester of the academic year.

The only time summer registration is required for dissertation/document/project research is when a doctoral student is graduating in August or defending the dissertation/document/project during the summer semester.

Ph.D. students must complete a minimum of 18 hours of dissertation research credits (699). Ph.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.

Ed.D. students must complete a minimum of 12 dissertation research credits (699). Ed.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.

DMA students must complete a minimum of 4 hours of document research (MUS 699). DMA students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in MUS 699 until degree completion.

DNP Students must complete project research hours in NUR 795-798. DNP students must maintain continuous enrollment for a minimum of 1 hour in a department-specified course until degree completion.

DSW Students must complete a minimum of 9 hours of project research (SW 799). DSW students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in SW 799 until degree completion.

The amount of dissertation/document/project research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

Dissertation Committee

The dissertation committee may be formed early in the dissertation research process, or shortly before the dissertation proposal is approved. It is expected that the committee will be formed and approved before significant progress is made on the dissertation. The committee must be formally established via a process initiated by the student and requiring the consent of each committee member, followed by Graduate School review for compliance with the regulations outlined below. [Click here for instructions on the process of establishing the committee.](#)

The committee must consist of at least five members. It may have additional (voting or nonvoting) members if deemed appropriate. At least one of the committee members must be from outside the student's

major department. These external members may be from another academic department at UA, from other universities, or from industry or the professional field. In all cases, these members external to the department/program must be appointed to UA's Graduate Faculty by the dean of the Graduate School, and must have significant professional qualifications that directly contribute to the depth and rigor of the dissertation.

All members of the dissertation committee must hold Graduate Faculty status at The University of Alabama. The chair of the committee must hold Full Graduate Faculty status; others may be Full, Associate, or Affiliate members of the Graduate Faculty. A majority of the Dissertation Committee members must be full-time regular University of Alabama faculty (that is, full-time instructor, assistant professor, associate professor, or professor).

Dissertation Proposal

The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction that provides an overview and states the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal's format with respect to specifics such as the length of the introduction and level of detail of the literature review. Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. The dissertation must be based upon research completed while the student is enrolled at The University of Alabama.

The subject of the dissertation must be approved by the student's dissertation committee and by the dean of the Graduate School. The final dissertation may take the form of a traditional, chapter-based document or a series of full-length publication-ready manuscripts which are part of a larger, cohesive body of work. The format (traditional vs. article-style) must be approved by the committee in accordance with the standards for the program and the discipline.

For article-style dissertations, the document must contain a minimum of three articles, in addition to introductory and concluding materials. A single abstract must accompany the document. In addition to an introduction presenting the unifying framework that supports the research, the document must include a concluding section that summarizes the importance of the work, integrates the major findings, and discusses the implications for the overall body of work.

Individual departments may have policies or guidelines related to whether sections of the dissertation may be included if they have been previously published elsewhere. Copyright issues also may arise if sections of the dissertation have been previously published. Therefore, students who are considering the submission of dissertation chapters/articles for publication prior to their dissertation defense should consult with their advisor, and also with potential publication outlets, before submitting any dissertation-related manuscript for publication.

All parts of the dissertation must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline's style manual require deviation. Students should email gradschool@ua.edu before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

The Dean of the Graduate School must approve the dissertation before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Virtual Participation in Committee-Based Exams/Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.
7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Final-Semester Minimum Doctoral Research Hours Registration

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research until reaching their department's minimum requirement, and at least 1 hour for each semester thereafter until degree completion and graduation. If certain conditions are met for the student's final semester, the student may qualify to enroll for fewer hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester#. This exception applies only to students who registered for at least 1-3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

When was the *completed electronic dissertation submitted to ProQuest/the Graduate School?	Minimum hours of 699 registration required in the final semester
By 11:59pm on the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	0
After the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	1

*"Completed" means submitted to ProQuest after being successfully defended and carefully edited following the defense meeting. The dissertation chair or department designee must submit the Committee Acceptance Form (CAF) through the UA DocuSign system. The CAF must be signed by all committee members, department chairperson, and graduate dean. The CAF is submitted by the department through the UA DocuSign system in myBama. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

Footnotes

- 1 International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see "USCIS" section under "Minimum Hours—Other Policies and Regulatory Bodies" on page 3 of this policy.
- 2 The University Calendar is available at the Academics tab of the website of the University Registrar.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection

of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University's IRB approval form is available at the IRB website.

Dissertation Defense

The dissertation defense is the culminating experience in the doctoral program. The Dissertation Chair and the student will coordinate with all committee members to choose a time, date, and location for the dissertation defense. All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the defense date. The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

The dissertation defense is comprised of four parts.

- 1. Public Advance Notice.** A minimum of two weeks prior to the scheduled defense date, the candidate must submit the *Public Notice of a Dissertation Defense* form. This form includes the name of the candidate, the department or program, the title of the dissertation, an abstract of 200 words or less, and the date, time, and location of the dissertation defense. The candidate should consult with the Dissertation Chair prior to initiating this form. The form will be initiated by the candidate and signed by the Dissertation Chair, Graduate Program Director, and the Graduate School. Upon receipt of the completed form, the Graduate Program Director will ensure the scheduled defense is disseminated within the department. The Graduate School will post the scheduled defense on the Graduate School website.
- 2. Oral Presentation.** An oral presentation of the dissertation is required and shall be public. The content and duration of the oral presentation are at the discretion of the Dissertation Chair, in consultation with the Committee, based on departmental norms, disciplinary standards, and traditions.
- 3. Oral Defense.** This examination phase of the dissertation defense is required and may be public or private. Each department or program shall establish a policy for whether the oral defense is public, private, or both (i.e., has a public portion and a private portion).
- 4. Committee Deliberation.** Committee deliberation is required and shall be private. Upon completion of the oral defense, everyone other than the committee members shall leave the defense location while the committee discusses, deliberates, and votes. For a defense to be successful, the majority of the committee must approve the dissertation and the defense.

The results of the dissertation defense must be reported to the Office of the Graduate School by submitting the Committee Acceptance Form at least six weeks before the Fall/Spring commencement, or five weeks before the Summer commencement, at which the degree is to be conferred. The Committee Acceptance Form, submitted by the department through the UA DocuSign system and found in myBama, confirms that a majority of the dissertation committee has approved the written dissertation and oral defense.

Any changes made to the manuscript after the defense must be approved by the Dissertation Chair. The student must submit the final dissertation to the Graduate School, and the Dean of the Graduate School

must approve the dissertation, before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Final Dissertation Submission and Approval

Following a successful dissertation defense (see "Dissertation Defense" for details), any edits agreed upon during the defense must be incorporated into the manuscript, and the Dissertation Chair must approve the final manuscript. After a careful review to ensure that the manuscript adheres to the Graduate School's formatting guidelines, the candidate must submit the approved manuscript to the Graduate School for final approval, address any remaining edits, and initiate the upload process for archiving the manuscript in the national dissertation repository, ProQuest.

The dissertation, in its final form, must be received in the Graduate School within 60 days of the dissertation defense. If this deadline is not met, the Dissertation Chair may require the candidate to schedule a second dissertation defense. Note that this 60-day deadline is separate from the deadlines for degree conferral and participation in Commencement ceremonies.

Graduate School deadlines for each semester, including deadlines for submitting the final manuscript to the Graduate School to graduate at the end of the semester, are available on the Graduate School's homepage. Consult the Graduate School's dissertation site for additional details of the electronic submission process, including information on exactly what needs to be submitted to the Graduate School. At the stage of the Graduate School review of the manuscript, additional revisions may be required, to ensure that the final manuscript conforms to all formatting and editing standards. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Application for Graduation

Each candidate for a doctoral degree must submit an Application for Degree via myBama no later than the last day to register or add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Withholding or Withdrawing an Advanced Degree

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

Department of Civil, Construction and Environmental Engineering

- Graduate Degrees
 - Civil Engineering, MS (p. 628)
 - Environmental Engineering, MS (p. 640)
 - Civil Engineering, PhD (p. 634)

 -
 -

Dual MS in Civil Engineering and Juris Doctorate

Dual MS in Civil Engineering and Master of Business Administration

Dual MS/PhD

Master's students may, with permission of the department and approval by the Graduate School, receive credit for six hours of 400-level credit. No 400-level courses can be approved for application to a PhD degree, other than the maximum of 6 hours already completed as part of a master's degree. A master's student may, with approval of a petition, meet prerequisites with a combination of related coursework and experience.

CE501 Masters Capstone Project-Plan II

Hours 3

Development of a research paper, professional practice or policy paper, or other equivalent report. Topic to be approved in advance by the student's graduate advisor.

Prerequisite(s): MS Plan II students only

CE514 Information Systems Design

Hours 3

An overview of management information systems (MIS). The course will focus on the practical aspects, applications, and methodology of MIS, particularly from the construction engineer's perspective. Information design methodology and building information modeling (BIM) will be covered in detail.

Civil Engineering, MS

The department offers programs leading to the Master of Science in civil engineering, Master of Science in engineering (environmental engineering) and Doctor of Philosophy degrees in civil engineering. Research programs in the department include environmental quality and water resources; management and safety of transportation systems; structural engineering including assessment, renewal, and protection of infrastructure; and construction engineering and management. Laboratory facilities are provided for graduate research and instruction in these and other areas.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an applicant should have earned a baccalaureate degree from an institution accredited by the Engineering Accreditation Council (EAC) of ABET Inc. Applications who are graduates of a non EAC/ABET-accredited program will be considered.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The basic requirements for both the master of science in civil engineering and master of science in engineering (environmental engineering) are identical. A total of 30 hours is required for a master's degree, consisting of at least 24 regular course hours and 6 or more thesis research hours

for Plan I students. The student's adviser and supervisory committee work with the student to define an appropriate plan of study that meets all degree requirements, including any prerequisite or preparatory work and a core set of courses as required and specified by each specialty area. Plan II students must pass CE 501 MS Capstone Proj. Plan II.

Total Hours

30

- Students on graduate assistantships must register for a minimum of 1 credit hour of CE 593 Practicum each semester they are supported.
- Only 400-level courses without 500-level counterparts are allowed and must be approved prior to taking the class.
- Students are responsible for all forms and must route all forms through the Department prior to submission to UA's Graduate School.

See the Master's Degrees Graduate School requirement section of this catalog for additional information.

Transfer Credit

12 hours maximum of approved transfer credit. Additional information on Transfer Credit (p. 18).

Accelerated Master's Program

AMP (BS/MS) students are allowed 9 credit hours of coursework to double count between the BS and MS degrees. Additional information on the Accelerated Master's Program (p. 13).

Comprehensive Examination/Capstone

The paper/report, or non-thesis, option requires a research paper, a policy and practice paper, or equivalent culminating experience, which is graded by the student's graduate advisor:

- Taken with permission under the direction of the student's graduate advisor
- The graduate advisor must be a full member of the department's graduate faculty
- Requires completion a research paper, a policy and practice paper, or equivalent report with the topic, scope, and format pre-approved by the student's advisor
- Must be taken the semester the student plans to graduate

Plan I - Thesis Process Requirements

The thesis option is a research-focused program that includes conducting original research, writing a research thesis and defending the thesis to the student's graduate supervisory committee. The research thesis option degree requirements are as follows:

A minimum of 30 credit hours, including

- 21 credit hours of approved coursework, including
 - 9 credit hours of core graduate coursework
 - A maximum of 6 hours of approved 400-level courses

(Use Graduate School's "Approval of 400-Level Course for Master's Credit" form.)

- A minimum of 15 hours of CE-prefix courses
- 3 hours of CE 593 Practicum or CE 693 Practicum
 - Taken with permission under the supervision of the student's graduate advisor
- 6 hours of CE 599 Thesis Research
 - Taken with permission under the supervision of the student's graduate advisor
 - The graduate advisor must be a full member of the department's graduate faculty
 - Once taken, CE 599 Thesis Research must be taken every term until graduation

Additional Requirements:

- 6 hours maximum of approved 400-level courses
- 15 hours minimum of CE courses
- Thesis Committee and Defense
 - Minimum of three graduate faculty, with the majority from the department and at least one member from outside the department
 - Maximum of two attempts to pass defense
 - The Committee may require additional prerequisite courses (not allowed as part of the Plan of Study) for those students without an ABET/EAC-accredited degree

Plan II - Non-thesis Process Requirements

The paper/report option requirements are as follows:

A minimum of 30 credit hours, including

- 27 credit hours of approved coursework
 - 9 credit hours of core graduate coursework
 - A maximum of 6 hours of approved 400-level courses (Use Graduate School's "Approval of 400-Level Course for Master's Credit" form.)
 - A maximum of 3 hours of CE 593 Practicum or CE 693 Practicum
 - A minimum of 18 hours of CE-prefix courses
- 3 credit hours of CE 501 MS Capstone Proj. Plan II

Application for Graduation Information

Application for Graduation (p. 18).

Master's Degrees

The primary purpose of master's degree programs is to provide students with subject matter at an advanced level in their fields of study. Master's degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master's programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master's degree:

Plan I. Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or "capstone experience" as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject.

With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student's program at the master's level must provide sufficient association with the resident faculty to permit individual evaluation of the student's capabilities and achievements.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Courses of full graduate-level credit earned in a *regionally* accredited institution where a student was enrolled in the graduate school, may be submitted for review for inclusion in a master's degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student's advisory committee and the dean of the Graduate School.

A student initiates the Request for Transfer of Graduate Credit form and must ensure that the Graduate School receives an official transcript from the outside institution. This should be done well in advance of the final semester, otherwise it may delay graduation and awarding of the degree.

With the approval of the student's department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from an outside institution. Some master's degree programs allow fewer hours to be transferred. Be sure to check with your department's graduate program director regarding your department's transfer policy. Eligible coursework will have been earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA master's program. Only courses in which a student earned a "B" grade or better may be transferred. Thesis Research (599) may not be transferred in from an outside institution. If approved, such coursework can be counted toward the minimum hours and coursework requirements for the master's degree.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

400-Level Courses

A maximum of 6 semester hours of 400-level course credit may be accepted for graduate credit and used toward a master's degree. The department needs to submit the Approval of 400-Level Course Work for Master's Credit form through the UA DocuSign system in myBama. This form must be submitted for approval to the Graduate School by the last day to add a course for the semester in which the course will be taken.

Time Limit

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. Previously approved transferred coursework that falls within six years of *admission* to the master's degree program can be counted toward the minimum hours requirement. There is no provision for an extension of the time limit beyond six years for master's students.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it

is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

Thesis

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. Students set up their committee through the Graduate Academic Activities portal on the Graduate School website. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. The majority of the thesis committee must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the student's thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. All members must agree that the student is ready for the final oral thesis defense. A final oral thesis defense is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral thesis defense unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected

to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In circumstances where virtual participation is necessary, all participants must follow the Virtual Participation guidelines found below.

Virtual Participation in Committee-Based Exams/Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.
7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the

primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Article Style vs. Journal Format for Master's Theses

Article Style.

At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.

Journal Format.

A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

All theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research.

In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

Final Thesis Defense

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. The thesis must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

"Completed" means submitted to ProQuest after being successfully defended, carefully edited following the defense meeting, and having the Committee Acceptance Form (CAF) signed by all committee

members, department chairperson, and graduate dean. A majority of the thesis committee must approve the written thesis and defense before submission to the Graduate School. Following the thesis defense, the Committee Acceptance Form is submitted by the thesis chair through the UA DocuSign system in myBama.

Graduate School deadlines, including each semester's thesis deadline, are available at the Graduate School's homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the thesis before the student can be cleared for graduation.

Comprehensive Examinations

In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all candidates for the master's degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School.

The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. The final report is submitted by the department through the UA DocuSign system in myBama. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation

Each candidate for a master's degree must submit an Application for Degree via myBama no later than the last day to add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Second Master's Degree

Six (6) semester hours of eligible credit from one master's degree at The University of Alabama may be applied to the requirements for a second master's degree, but only if the department of the second master's agrees to the courses in the plan of study. Any hours from the previous master's

degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master's degrees, no hours may double count toward any additional master's degrees.

Civil Engineering, Ph.D.

While pursuing a Doctor of Philosophy (PhD) degree in civil engineering, the student will take graduate-level courses and conduct research with a faculty advisor and observe how these studies will lead to key engineering innovations and societal impacts in the field of civil engineering. Equipped with complementary and state-of-the-art computational and experimental facilities, the Civil, Construction and Environmental Engineering (CCEE) Department has active research programs in the following four disciplinary groups; Construction Engineering and Management, Structural Engineering and Materials, Environmental and Water Resources, and Transportation Systems Engineering. Faculty teach graduate-level courses and conduct research in these areas. Graduate courses in these same areas, in addition to the general core graduate courses, provide the foundation for earning a PhD degree in civil engineering. Additionally, the student demonstrates mastery of the selected study area through qualifying exams, the proposal of a research topic, and the defense of a research-based dissertation.

Many full-time PhD students seek some form of financial assistance in the form of a graduate assistantship or fellowship. Assistantships generally include a monthly stipend, tuition, and health insurance. Graduate Research Assistantships (GRAs) are awarded by individual professors with funded research. Applicants should communicate directly with a faculty member in the applicant's area of study interest concerning the availability of GRA positions and a potential match. The CCEE Department offers Graduate Teaching Assistantships (GTAs) for students assisting faculty members with undergraduate courses and laboratories. GTA awards are determined by the CCEE Graduate Coordinator, with preference being given to PhD students. There are a very limited number of GTA positions each semester. There are also both internal and external fellowship opportunities available to applicants including, but not limited to, the Graduate Council Fellowships (GCF)

Qualified students in the Department's undergraduate programs at The University of Alabama are eligible for early admission into the PhD program through the Accelerated Masters Program (AMP). This program allows students to double-count up to 9 hours of graduate credit toward their undergraduate degree.

Admission Requirements

The requirements for admission to the Graduate School are detailed below. The Department of Civil, Construction, and Environmental Engineering also embraces the requirements of the College of Engineering, summarized as follows:

1. An applicant should have earned a baccalaureate degree from an institution accredited by the Engineering Accreditation Council (EAC) of ABET, inc. and have a GPA of at least 3.0 on a 4.0 scale, or at least 3.0 for the last 60 hours completed. Applicants must also have Graduate Record Examination test scores of 300 or higher.
2. Applications may be considered from graduates of non EAC/ABET-accredited programs. The same GPA and Graduate Record Examination criteria will apply.

See the Admission Criteria section of this catalog for more information.

Doctor of Philosophy Degree Requirements

A total of 72 hours is required for the degree, including a minimum of 48 hours of coursework beyond the baccalaureate and 24 hours of dissertation research. A maximum of 24 hours of approved transfer credit is allowed, with approval of the Graduate School on the form for Request for Transfer of Graduate Credit. The link to the Request for Transfer of Graduate Credit is <https://graduate.ua.edu/current-students/forms-students/>. Students initiate this form.

The student's adviser and supervisory committee will work with the student to define an appropriate plan of study that meets all degree requirements, including any prerequisite or preparatory work and a core set of courses as required and specified by each specialty area. After approval by the department the PhD Plan of Study is submitted to the Graduate School for final approval. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree. Otherwise, a "hold" may be placed on future registration.

Students are required to pass a preliminary examination that includes both written and oral components, a proposal defense, and a final dissertation defense administered by the student's supervisory committee.

After passing the comprehensive (preliminary) examination, the student should complete and submit an Admission to Candidacy for the Doctoral Degree to the department for approval. A department-approved candidacy form will be forwarded to the Graduate School for final approval.

Students need to contact the department office for the submission of the Plan of Study and Candidacy forms. These Graduate School forms go through the UA DocuSign system.

Requirements

Code and Title	Hours
Core Coursework	9
Construction Engineering and Management	
CE 573 Statistical Applications	
CE 567 Constr. Accounting & Finance	
CE 568 Construction Scheduling	
Structural Engineering and Materials	
CE 573 Statistical Applications	
CE 534 Advanced Structural Mechanics	
CE 531 Structural Dynamics	
Environmental and Water Resources Engineering	
CE 573 Statistical Applications	
CE 575 Hydrology	
Transportation Systems Engineering	
CE 573 Statistical Applications	
CE 591 Special Problems	
CE 559 Pavement Design and Rehab	

Elective Coursework

These are commonly taken elective courses. More elective options are available upon consultation with faculty advisor.

Construction Engineering and Management

CE 517	Advanced Project Management	3
CE 518	Engineering Mangement	3
CE 561	Horizontal Construction Method	3
CE 563	Construction Cost Estimating	3
CE 564	Safety Engineering	3
CE 581	Legal Asp. of Eng and Const.	3
Structural Engineering and Materials		
CE 530	NDT of Structures	3
CE 532	Matrix Analysis of Structures	3
CE 535	Concrete Materials	0 or 3
CE 537	Reinforced Concrete Struct II	3
CE 538	Struct Steel Design II	3
CE 543	Prestressed Concrete Design	3
CE 544	Foundation Engineering	3
CE 591	Special Problems	1 to 4
CE 631	Exper. Mthds in Struc Dynamics	0 or 3
CE 632	Structural Reliability	3
CE 636	Adv. Infrastructure Materials	3
CE 641	Wind Engineering	3
Environmental and Water Resources		
CE 526	Groundwater Mechanics	3
CE 529	EWR Proposal Writing	3
CE 576	Process Hydrology	3
CE 585	Constructn Site Erosion Contrl	3
Transportation Systems Engineering		
CE 551	Roadway/Intersection Design	3
CE 552	Traffic Safety and Security	3
CE 553	Intelligent Transportation Sys	3
CE 554	Urban Transportation Planning	3
CE 555	Traffic Flow Theory	3
CE 558	Traffic Engineering	3

Doctoral Degrees

The University offers several types of doctorates, each of which is described below.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

Doctor of Philosophy Degree

The Doctor of Philosophy (PhD) degree is regarded as the researcher's degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The Doctor of Philosophy (PhD) degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

Field of Specialization - A defined field of specialization as outlined in the student's Plan of Study is required of all candidates for the Doctor of Philosophy degree. A minimum of 36 semester hours of non-dissertation course credit is required. Departments or programs may require more than this minimum. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 18 hours of dissertation research.

Research skill/language requirements - There is no university wide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments.

Interdisciplinary Studies

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 765) at the Graduate School's website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

Doctor of Education Degree

The Doctor of Education (EdD) requires a minimum of two years of graduate study beyond the master's degree for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate coursework research beyond the master's degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 488) section of the Graduate Catalog, there are specific regulations governing the EdD program.

Doctor of Musical Arts Degree

The Doctor of Musical Arts (DMA) degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 356) section of the Graduate Catalog.

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) (p. 730) is a practice-focused degree that is detailed in the Nursing section of this Catalog.

Doctor of Social Work

A Doctor of Social Work (DSW) degree is a practice doctorate degree in social work. It provides coursework on theory and skills in social work practice that are more advanced than what one would typically experience in an MSW program for social work.

Admission to Doctoral Degree Programs

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master's degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student's doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

Residency Requirements

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student's doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog's Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials

from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a "B" grade or better may be transferred. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.
2. PhD Programs Only: A student holding an earned, in-field master's degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. When exercising this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School. The requested transfer credit hours must be listed on the PhD Plan of Study as MSC501 under the transfer credit section. If the in-field master's degree was awarded *more than six years prior to admission to the current doctoral degree program*, the graduate program director or department head/chair must also submit to the Graduate School for evaluation, a Field-Related Employment Since Earning Master's Degree form with the student's CV must be submitted by the department through the UA DocuSign system in myBama. In addition, the department is asked to provide the following, attached to the approved Plan of Study :
 - a. An annotated work history from the student. This history should include job titles and major duties for all positions since earning a master's degree.
 - b. A brief paragraph from the corresponding faculty member, attesting that he/she has reviewed the work history and how that work applies to the current Ph.D. degree program.

The Graduate School will make the final determination about whether up to 24 prior master's hours can be applied to the Ph.D. requirements.

PhD awarding departments that want to participate in offering Option 2 to their doctoral students, need to "opt in" by informing the graduate dean in writing that they wish to be among the approved departments.

Consideration of transfer of credit or the acceptance of an earned master's degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy.

Dissertation Research (699) may not be transferred in from an outside institution.

Time Limits

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master's, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

The Continuous Dissertation or Document Registration requirement for 699 and 799 enrollment will be waived for the intervening years between the student's cessation of doctoral work and re-admission.

Plan of Study

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School by the time the student has completed 30 coursework hours.

The PhD, DMA, and DSW Plans of Study are submitted by the department through the UA DocuSign system in myBama. The Plan of Study for

other doctoral programs (Ed.D., DNP) are available from the student's department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

A copy of the approved Plan of Study must be submitted to the Graduate School when the department submits the Admission to Candidacy for Doctoral Degree form through the UA DocuSign system in myBama.

Preliminary or Comprehensive Examination

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student's supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student's research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy

The designation of candidacy reflects the student's demonstration of foundational knowledge and readiness to conduct independent research, in the discipline. The requirement for advancing to candidacy is determined by the faculty of the degree program and delineated in the program's section of the Graduate School Catalog and the program's Graduate Student Handbook.

Advancement to candidacy should involve either:

- passing the qualifying (major or preliminary) examination
- completing of all required coursework as listed on the approved program of study
- presenting or defending a dissertation prospectus or proposal
- or some combination of these milestones.

Students are not eligible to register for 699 or 799 credit hours until they have been advanced to candidacy. The Department Chair or Department Director of Graduate Studies, or their designee, shall submit the Admission to Candidacy for the Doctoral Degree form to the Graduate School during the semester that the student meets the program's candidacy requirements.

Continuous Doctoral Research Hours Registration

Once a student meets their program's requirement for admission to candidacy and the designated Department administrator submits the Application for Admission to Candidacy form to the Graduate School, the student may enroll in 699 (dissertation/document research) or 799 (document/project research).

Once initiated, the student must pursue completion of the dissertation/document/project without interruption by enrolling in 699/799 each fall and spring semester of the academic year.

The only time summer registration is required for dissertation/document/project research is when a doctoral student is graduating in August

or defending the dissertation/document/project during the summer semester.

Ph.D. students must complete a minimum of 18 hours of dissertation research credits (699). Ph.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.

Ed.D. students must complete a minimum of 12 dissertation research credits (699). Ed.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.

DMA students must complete a minimum of 4 hours of document research (MUS 699). DMA students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in MUS 699 until degree completion.

DNP Students must complete project research hours in NUR 795-798. DNP students must maintain continuous enrollment for a minimum of 1 hour in a department-specified course until degree completion.

DSW Students must complete a minimum of 9 hours of project research (SW 799). DSW students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in SW 799 until degree completion.

The amount of dissertation/document/project research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

Dissertation Committee

The dissertation committee may be formed early in the dissertation research process, or shortly before the dissertation proposal is approved. It is expected that the committee will be formed and approved before significant progress is made on the dissertation. The committee must be formally established via a process initiated by the student and requiring the consent of each committee member, followed by Graduate School review for compliance with the regulations outlined below. [Click here for instructions on the process of establishing the committee.](#)

The committee must consist of at least five members. It may have additional (voting or nonvoting) members if deemed appropriate. At least one of the committee members must be from outside the student's major department. These external members may be from another academic department at UA, from other universities, or from industry or the professional field. In all cases, these members external to the department/program must be appointed to UA's Graduate Faculty by the dean of the Graduate School, and must have significant professional qualifications that directly contribute to the depth and rigor of the dissertation.

All members of the dissertation committee must hold Graduate Faculty status at The University of Alabama. The chair of the committee must hold Full Graduate Faculty status; others may be Full, Associate, or Affiliate members of the Graduate Faculty. A majority of the Dissertation Committee members must be full-time regular University of Alabama faculty (that is, full-time instructor, assistant professor, associate professor, or professor).

Dissertation Proposal

The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction that provides an overview and states the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal's format with respect to specifics such as the length of the introduction and level of detail of the literature review. Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. The dissertation must be based upon research completed while the student is enrolled at The University of Alabama.

The subject of the dissertation must be approved by the student's dissertation committee and by the dean of the Graduate School. The final dissertation may take the form of a traditional, chapter-based document or a series of full-length publication-ready manuscripts which are part of a larger, cohesive body of work. The format (traditional vs. article-style) must be approved by the committee in accordance with the standards for the program and the discipline.

For article-style dissertations, the document must contain a minimum of three articles, in addition to introductory and concluding materials. A single abstract must accompany the document. In addition to an introduction presenting the unifying framework that supports the research, the document must include a concluding section that summarizes the importance of the work, integrates the major findings, and discusses the implications for the overall body of work.

Individual departments may have policies or guidelines related to whether sections of the dissertation may be included if they have been previously published elsewhere. Copyright issues also may arise if sections of the dissertation have been previously published. Therefore, students who are considering the submission of dissertation chapters/articles for publication prior to their dissertation defense should consult with their advisor, and also with potential publication outlets, before submitting any dissertation-related manuscript for publication.

All parts of the dissertation must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline's style manual require deviation. Students should email gradschool@ua.edu before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

The Dean of the Graduate School must approve the dissertation before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Virtual Participation in Committee-Based Exams/Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program.

Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.
7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Final-Semester Minimum Doctoral Research Hours Registration

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the

student must enroll each semester for at least 3 hours of dissertation (699) research until reaching their department's minimum requirement, and at least 1 hour for each semester thereafter until degree completion and graduation. If certain conditions are met for the student's final semester, the student may qualify to enroll for fewer hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester#. This exception applies only to students who registered for at least 1-3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

When was the *completed electronic dissertation submitted to ProQuest/the Graduate School?	Minimum hours of 699 registration required in the final semester
By 11:59pm on the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	0
After the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	1

*"Completed" means submitted to ProQuest after being successfully defended and carefully edited following the defense meeting. The dissertation chair or department designee must submit the Committee Acceptance Form (CAF) through the UA DocuSign system. The CAF must be signed by all committee members, department chairperson, and graduate dean. The CAF is submitted by the department through the UA DocuSign system in myBama. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

Footnotes

- 1 International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see "USCIS" section under "Minimum Hours—Other Policies and Regulatory Bodies" on page 3 of this policy.
- 2 The University Calendar is available at the Academics tab of the website of the University Registrar.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University's IRB approval form is available at the IRB website.

Dissertation Defense

The dissertation defense is the culminating experience in the doctoral program. The Dissertation Chair and the student will coordinate with all committee members to choose a time, date, and location for the dissertation defense. All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the defense date. The dissertation must comply with

the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

The dissertation defense is comprised of four parts.

- 1. Public Advance Notice.** A minimum of two weeks prior to the scheduled defense date, the candidate must submit the *Public Notice of a Dissertation Defense* form. This form includes the name of the candidate, the department or program, the title of the dissertation, an abstract of 200 words or less, and the date, time, and location of the dissertation defense. The candidate should consult with the Dissertation Chair prior to initiating this form. The form will be initiated by the candidate and signed by the Dissertation Chair, Graduate Program Director, and the Graduate School. Upon receipt of the completed form, the Graduate Program Director will ensure the scheduled defense is disseminated within the department. The Graduate School will post the scheduled defense on the Graduate School website.
- 2. Oral Presentation.** An oral presentation of the dissertation is required and shall be public. The content and duration of the oral presentation are at the discretion of the Dissertation Chair, in consultation with the Committee, based on departmental norms, disciplinary standards, and traditions.
- 3. Oral Defense.** This examination phase of the dissertation defense is required and may be public or private. Each department or program shall establish a policy for whether the oral defense is public, private, or both (i.e., has a public portion and a private portion).
- 4. Committee Deliberation.** Committee deliberation is required and shall be private. Upon completion of the oral defense, everyone other than the committee members shall leave the defense location while the committee discusses, deliberates, and votes. For a defense to be successful, the majority of the committee must approve the dissertation and the defense.

The results of the dissertation defense must be reported to the Office of the Graduate School by submitting the Committee Acceptance Form at least six weeks before the Fall/Spring commencement, or five weeks before the Summer commencement, at which the degree is to be conferred. The Committee Acceptance Form, submitted by the department through the UA DocuSign system and found in myBama, confirms that a majority of the dissertation committee has approved the written dissertation and oral defense.

Any changes made to the manuscript after the defense must be approved by the Dissertation Chair. The student must submit the final dissertation to the Graduate School, and the Dean of the Graduate School must approve the dissertation, before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Final Dissertation Submission and Approval

Following a successful dissertation defense (see "Dissertation Defense" for details), any edits agreed upon during the defense must be incorporated into the manuscript, and the Dissertation Chair must approve the final manuscript. After a careful review to ensure that the manuscript adheres to the Graduate School's formatting guidelines, the candidate must submit the approved manuscript to the Graduate School for final approval, address any remaining edits, and initiate the upload process for archiving the manuscript in the national dissertation repository, ProQuest.

The dissertation, in its final form, must be received in the Graduate School within 60 days of the dissertation defense. If this deadline is not met, the Dissertation Chair may require the candidate to schedule a second dissertation defense. Note that this 60-day deadline is separate from

the deadlines for degree conferral and participation in Commencement ceremonies.

Graduate School deadlines for each semester, including deadlines for submitting the final manuscript to the Graduate School to graduate at the end of the semester, are available on the Graduate School's homepage. Consult the Graduate School's dissertation site for additional details of the electronic submission process, including information on exactly what needs to be submitted to the Graduate School. At the stage of the Graduate School review of the manuscript, additional revisions may be required, to ensure that the final manuscript conforms to all formatting and editing standards. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Application for Graduation

Each candidate for a doctoral degree must submit an Application for Degree via myBama no later than the last day to register or add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Withholding or Withdrawing an Advanced Degree

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

Environmental Engineering, MS

The department offers programs leading to the Master of Science in civil engineering, Master of Science in engineering (environmental engineering) and Doctor of Philosophy degrees in civil engineering. Research programs in the department include environmental quality and water resources; management and safety of transportation systems; structural engineering including assessment, renewal, and protection of infrastructure; and construction engineering and management. Laboratory facilities are provided for graduate research and instruction in these and other areas.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an applicant should have earned a baccalaureate degree from an institution accredited by the Engineering Accreditation Council (EAC) of ABET Inc. Applications who are graduates of a non EAC/ABET-accredited program will be considered.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The basic requirements for both the master of science in civil engineering and master of science in engineering (environmental engineering) are identical. A total of 30 hours is required for a master's degree, consisting of at least 24 regular course hours and 6 or more thesis research hours for Plan I students. The student's adviser and supervisory committee work with the student to define an appropriate plan of study that meets all degree requirements, including any prerequisite or preparatory work and a core set of courses as required and specified by each specialty area. Plan II students must pass [CE 501](#) MS Capstone Proj. Plan II.

RESEARCH THESIS OPTION (PLAN I)

The thesis option is a research-focused program, which includes conducting original research, writing a research thesis, and defending the thesis to the student's graduate supervisory committee. The research thesis option degree requirements are as follows:

Code and Title	Hours
Core Courses	9
CE 524 Water & Wastewater Treatment	
CE 573 Statistical Applications	
CE 575 Hydrology	
CE Coursework¹	15
Commonly taken courses include:	
CE 521 Environ Eng Microbiology	
CE 522 Solid Hazardous Waste Managmnt	
CE 525 Air Pollution	
CE 526 Groundwater Mechanics	
CE 529 EWR Proposal Writing	
CE 570 Open Channel Flow	
CE 576 Process Hydrology	
CE 586 GIS for Civil Engineers	
CE 591 Special Problems	
And other Approved Courses	
Practicum Course²	
CE 593 Practicum	
Thesis Course³	6
CE 599 Thesis Research	
Total Hours	30

PAPER/REPORT OPTION (PLAN II)

The paper/report, or non-thesis, option requires a research paper, a policy and practice paper, or equivalent culminating experience, which is graded by the student's graduate advisor. The paper/report option requirements are as follows:

Code and Title	Hours
Core Courses	9
CE 524 Water & Wastewater Treatment	
CE 573 Statistical Applications	
CE 575 Hydrology	
CE Coursework¹	18
Commonly taken courses include:	
CE 521 Environ Eng Microbiology	
CE 522 Solid Hazardous Waste Managmnt	
CE 525 Air Pollution	
CE 526 Groundwater Mechanics	
CE 529 EWR Proposal Writing	
CE 570 Open Channel Flow	
CE 576 Process Hydrology	
CE 586 GIS for Civil Engineers	
CE 591 Special Problems	
And other Approved Courses	
Practicum Course²	
CE 593 Practicum	
Capstone Course³	3
CE 501 MS Capstone Proj. Plan II	
Total Hours	30

Additional Course Requirements for Students Without an ABET/EAC-Accredited Degree include:

AEM 201 Statics, AEM 264 Dynamics, AEM 250 Mechanics Of Materials I, AEM 311 Fluid Mechanics

Additional Information:

- Students on graduate assistantships must register for a minimum of 1 credit hour of CE 593 Practicum each semester they are supported.
- Only 400-level courses without 500-level counterparts are allowed and must be pre-approved prior to taking the class. Six hour maximum.
- Students are responsible for all forms and must route all forms through the Department prior to submission to UA's Graduate School.

See the Master's Degrees Graduate School requirement section of this catalog for additional information.

Transfer Credit

12 hours maximum of approved transfer credit. Additional information on Transfer Credit (p. 18).

Accelerated Master's Program

AMP (BS/MS) students are allowed 9 credit hours of coursework to double count between the BS and MS degrees. Additional information on the Accelerated Master's Program (p. 13).

Comprehensive Examination/Capstone Project

The paper/report, or non-thesis, option requires a research paper, a policy and practice paper, or equivalent culminating experience, which is graded by the student's graduate advisor:

- Taken with permission under the direction of the student's graduate advisor
- The graduate advisor must be a full member of the department's graduate faculty
- Requires completion a research paper, a policy and practice paper, or equivalent report with the topic, scope, and format pre-approved by the student's advisor
- Must be taken the semester the student plans to graduate

Plan I - Thesis Process

The thesis option is a research-focused program that includes conducting original research, writing a research thesis and defending the thesis to the student's graduate supervisory committee. The research thesis option degree requirements are as follows:

A minimum of 30 credit hours, including

- 21 credit hours of approved coursework, including
 - 9 credit hours of core graduate coursework
 - A maximum of 6 hours of approved 400-level courses (Use Graduate School's "Approval of 400-Level Course for Master's Credit" form.)
 - A minimum of 15 hours of CE-prefix courses
- 3 hours of CE 593 Practicum or CE 693 Practicum
 - Taken with permission under the supervision of the student's graduate advisor
- 6 hours of CE 599 Thesis Research
 - Taken with permission under the supervision of the student's graduate advisor

- The graduate advisor must be a full member of the department's graduate faculty
- Once taken, CE 599 Thesis Research must be taken every term until graduation

Additional Requirements:

- 6 hours maximum of approved 400-level courses
- 15 hours minimum of CE courses
- Thesis Committee and Defense
 - Minimum of three graduate faculty, with the majority from the department and at least one member from outside the department
 - Maximum of two attempts to pass defense
 - The Committee may require additional prerequisite courses (not allowed as part of the Plan of Study) for those students without an ABET/EAC-accredited degree

Plan II - Non-thesis Process

The paper/report option requirements are as follows:

A minimum of 30 credit hours, including

- 27 credit hours of approved coursework
 - 9 credit hours of core graduate coursework
 - A maximum of 6 hours of approved 400-level courses (Use Graduate School's "Approval of 400-Level Course for Master's Credit" form.)
 - A maximum of 3 hours of CE 593 Practicum or CE 693 Practicum
 - A minimum of 18 hours of CE-prefix courses
- 3 credit hours of CE 501 MS Capstone Proj. Plan II

Additional Requirements:

- 6 hours maximum of approved 400-level courses
- 18 hours minimum of CE courses

Time Limits for Degree Completion Requirements

Maximum of 6 years to complete degree requirements. Graduate School information on Time Limits (p. 18).

Student Progress Requirement

Application for Graduation Information

Application for Graduation (p. 18).

Master's Degrees

The primary purpose of master's degree programs is to provide students with subject matter at an advanced level in their fields of study. Master's degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master's programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master's degree:

Plan I. Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or "capstone experience" as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject.

With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student's program at the master's level must provide sufficient association with the resident faculty to permit individual evaluation of the student's capabilities and achievements.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Courses of full graduate-level credit earned in a *regionally* accredited institution where a student was enrolled in the graduate school, may be submitted for review for inclusion in a master's degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

Acceptance of credit requires the approval of the student's advisory committee and the dean of the Graduate School.

A student initiates the Request for Transfer of Graduate Credit form and must ensure that the Graduate School receives an official transcript from the outside institution. This should be done well in advance of the final semester, otherwise it may delay graduation and awarding of the degree.

With the approval of the student's department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from an outside institution. Some master's degree programs allow fewer hours to be transferred. Be sure to check with your department's graduate program director regarding your department's transfer policy. Eligible coursework will have been earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA master's program. Only courses in which a student earned a "B" grade or better may be transferred. Thesis Research (599) may not be transferred in from an outside institution. If approved, such coursework can be counted toward the minimum hours and coursework requirements for the master's degree.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

400-Level Courses

A maximum of 6 semester hours of 400-level course credit may be accepted for graduate credit and used toward a master's degree. The department needs to submit the Approval of 400-Level Course Work for Master's Credit form through the UA DocuSign system in myBama. This form must be submitted for approval to the Graduate School by the last day to add a course for the semester in which the course will be taken.

Time Limit

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. Previously approved transferred coursework that falls within six years of *admission* to the master's degree program can be counted toward the minimum hours requirement. There is no provision for an extension of the time limit beyond six years for master's students.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the

comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

Thesis

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. Students set up their committee through the Graduate Academic Activities portal on the Graduate School website. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. The majority of the thesis committee must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the student's thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. All members must agree that the student is ready for the final oral thesis defense. A final oral thesis defense is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral thesis defense unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In circumstances where virtual participation is necessary, all participants must follow the Virtual Participation guidelines found below.

Virtual Participation in Committee-Based Exams/Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus.

However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.
7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Article Style vs. Journal Format for Master's Theses

Article Style.

At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity,

each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.

Journal Format.

A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

All theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research.

In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

Final Thesis Defense

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. The thesis must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

"Completed" means submitted to ProQuest after being successfully defended, carefully edited following the defense meeting, and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. A majority of the thesis committee must approve the written thesis and defense before submission to the Graduate School. Following the thesis defense, the Committee Acceptance Form is submitted by the thesis chair through the UA DocuSign system in myBama.

Graduate School deadlines, including each semester's thesis deadline, are available at the Graduate School's homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the thesis before the student can be cleared for graduation.

Comprehensive Examinations

In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all candidates for the master's degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School.

The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. The final report is submitted by the department through the UA DocuSign system in myBama. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation

Each candidate for a master's degree must submit an Application for Degree via myBama no later than the last day to add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Second Master's Degree

Six (6) semester hours of eligible credit from one master's degree at The University of Alabama may be applied to the requirements for a second master's degree, but only if the department of the second master's agrees to the courses in the plan of study. Any hours from the previous master's degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master's degrees, no hours may double count toward any additional master's degrees.

CS503 Programming Languages

Hours 3

This course provides a graduate level presentation of Programming Languages. Formal student of programming language specification, analysis, implementation, and run-time support structures; organization of programming languages with emphasis on language constructs and mechanisms; and study of non-programming paradigms. Students who have successfully completed CS 403 may not also receive credit for CS 503.

CS504 CS Curriculum for Math Education

Hours 3

Building upon the concepts from CS 104, students will explore in-depth how computer science education is presented in the secondary education setting. Students will get the opportunity to explore current computer science curriculum and develop resources for future teaching, with a specific emphasis on the College Board's AP CS Principles (AP CSP) curriculum.

Prerequisite(s): CS 104 or permission by instructor.

Computer Science, MS

The University of Alabama's Computer Science Department offers interdisciplinary graduate programs leading to master's and doctoral degrees.

Students in the master's degree program may pursue either a thesis or non-thesis option.

Research activity in the department includes active investigations in software engineering, cyber security, big data analytics, distributed autonomy and human-computer interaction, networking and its applications, and computer science education.

Admissions

In addition to meeting the admission requirements established by the Graduate School, students applying for graduate study in the department must also meet the following general requirements:

- Demonstrated competence in programming
- Completion of the equivalent of the department's undergraduate core computer science curriculum
- Applicants who present most but not all of these qualifications may be considered for Admission with Permission to Continue.
- It is strongly recommended that students who wish to be considered for funding opportunities submit a score from the GRE general exam.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Master of Science

Departmental degree requirements for the MS degree, which are in addition to those established by the College and by the Graduate School, are as follows for Plan I and Plan II students:

- Each Plan I candidate must earn a minimum of 24 semester hours of credit for coursework, plus a six-hour thesis under the direction of a faculty member.
- Each Plan II candidate must earn a minimum of 30 semester hours of credit for coursework, which may include a three-hour non-thesis project under the direction of a faculty member.
- Unlike the general College of Engineering requirements, graduate credit may not be obtained for courses at the 400-level.

Master of Science - Thesis Option (Plan I)

Code and Title	Hours
Core Course Requirements	
Select One Course from each of the Three Areas	
Software Courses:	3
CS 503 Programming Languages	
CS 507 Software Interface Design	
CS 515 Software Design & Development	
CS 516 Testing and Quality Assurance	
CS 520 Software Evolution

Transfer Credit

Information on transfer credit can be found here. (p. 18)

Accelerated Master's Program

Computer Science and Cyber Security students in the AMP program are allowed to count a maximum of 12 hours towards both the bachelor's and graduate degrees. Students are required to have a GPA of at least 3.3 in their major (CS) courses for admission.

The Graduate School AMP Program page can be accessed here (p. 13).

Comprehensive Exam

The student will complete a comprehensive exam. This exam is scheduled with the Graduate Program Director in the semester in which the student intends to graduate.

Plan I - Thesis Process Requirements

- The student must select a thesis advisor and a thesis committee. The committee must contain at least four members, including the thesis advisor. At least two members are faculty of the Computer Science department, and at least one member must be from outside the Department of Computer Science.
- The student must develop a written research proposal that contains an introduction to the research area, a review of relevant literature in the area, a description of problems to be investigated, an identification of basic goals and objectives of the research, a methodology and timetable for approaching the research, and an extensive bibliography.
- The student must deliver an oral presentation of the research proposal, which is followed by a question-and-answer session that is open to all faculty members and which covers topics related directly or indirectly to the research area. The student's committee will determine whether the proposal is acceptable based upon both the written and oral presentations.
- The student must develop a written thesis that demonstrates that the student has performed original research that makes a definite contribution to current knowledge. Its format and content must be acceptable to both the student's committee and the Graduate School.
- The student must defend the written thesis. The defense includes an oral presentation of the thesis research, followed by a question-and-answer session. The student's committee will determine whether the defense is acceptable.

Plan II - Non-Thesis Process Requirements

- The student may elect to replace 3 hours of course work with 3 hours of CS 598 Non-Thesis Research.
- The non-thesis research should be proposed in writing in advance, approved by the instructor, and a copy placed in the student's file.
- The non-thesis proposal should specify both the course content and the specific deliverables that will be evaluated to determine the course grade.

Time Limits for Degree Completion Requirements

Information on time limits for degree completion can be found here.

Student Progress Requirement

Student progress requirements are located here (p. 204).

Academic Misconduct Information

Academic Misconduct information can be found here. (p. 7)

Withdrawals and Leave of Absence Information

Information regarding withdrawals and leave of absences is located here (p. 206).

Scholastic Grievances information is located here (p. 219).

Scholastic Requirements

Scholastic Requirements information is located here (p. 204).

Graduate School Deadlines Information

Graduate School deadlines can be found on the Graduate School website.

Application for Graduation Information

Master's degree application information can be found here. (p.)

Master's Degrees

The primary purpose of master's degree programs is to provide students with subject matter at an advanced level in their fields of study. Master's degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master's programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master's degree:

Plan I. Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or "capstone experience" as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject.

With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student's program at the master's level must provide sufficient association with the resident faculty to permit individual evaluation of the student's capabilities and achievements.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Courses of full graduate-level credit earned in a *regionally* accredited institution where a student was enrolled in the graduate school, may be submitted for review for inclusion in a master's degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student's advisory committee and the dean of the Graduate School.

A student initiates the Request for Transfer of Graduate Credit form and must ensure that the Graduate School receives an official transcript from the outside institution. This should be done well in advance of the final semester, otherwise it may delay graduation and awarding of the degree.

With the approval of the student's department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from an outside institution. Some master's degree programs allow fewer hours to be transferred. Be sure to check with your department's graduate program director regarding your department's transfer policy. Eligible coursework will have been earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA master's program. Only courses in which a student earned a "B" grade or better may be transferred. Thesis Research (599) may not be transferred in from an outside institution. If approved, such coursework can be counted toward the minimum hours and coursework requirements for the master's degree.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

400-Level Courses

A maximum of 6 semester hours of 400-level course credit may be accepted for graduate credit and used toward a master's degree. The department needs to submit the Approval of 400-Level Course Work for Master's Credit form through the UA DocuSign system in myBama. This form must be submitted for approval to the Graduate School by the last day to add a course for the semester in which the course will be taken.

Time Limit

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. Previously approved transferred coursework that falls within six years of *admission* to the master's degree program can be counted toward the minimum hours requirement. There is no provision for an extension of the time limit beyond six years for master's students.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty

members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

Thesis

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. Students set up their committee through the Graduate Academic Activities portal on the Graduate School website. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. The majority of the thesis committee must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the student's thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. All members must agree that the student is ready for the final oral thesis defense. A final oral thesis defense is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral thesis defense unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual

attendance. In circumstances where virtual participation is necessary, all participants must follow the Virtual Participation guidelines found below.

Virtual Participation in Committee-Based Exams/Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.
7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-

audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Article Style vs. Journal Format for Master's Theses

Article Style.

At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.

Journal Format.

A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

All theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research.

In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

Final Thesis Defense

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. The thesis must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

"Completed" means submitted to ProQuest after being successfully defended, carefully edited following the defense meeting, and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. A majority of the thesis committee must approve the written thesis and defense before submission to the Graduate School. Following the thesis defense, the

Committee Acceptance Form is submitted by the thesis chair through the UA DocuSign system in myBama.

Graduate School deadlines, including each semester's thesis deadline, are available at the Graduate School's homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the thesis before the student can be cleared for graduation.

Comprehensive Examinations

In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all candidates for the master's degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School.

The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. The final report is submitted by the department through the UA DocuSign system in myBama. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation

Each candidate for a master's degree must submit an Application for Degree via myBama no later than the last day to add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Second Master's Degree

Six (6) semester hours of eligible credit from one master's degree at The University of Alabama may be applied to the requirements for a second master's degree, but only if the department of the second master's agrees to the courses in the plan of study. Any hours from the previous master's degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts

six hours between two master's degrees, no hours may double count toward any additional master's degrees.

Computer Science, Ph.D.

The doctor of philosophy degree is regarded as a research degree and is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and the capacity for independent, original investigation.

Admissions

In addition to meeting the admission requirements established by the Graduate School, students applying for graduate study in the department must also meet the following general requirements:

- Demonstrated competence in programming
- Completion of the equivalent of the department's undergraduate core computer science curriculum
- Applicants who present most but not all of these qualifications may be considered for conditional admission.
- It is strongly recommended that students who wish to be considered for funding opportunities submit a score from the GRE general exam.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Core Course Requirements	Hours
Core CS Courses:	12
Select at least one course from each of the following three areas	
Software Courses	
CS 503	Programming Languages
CS 507	Software Interface Design
CS 515	Software Design & Development
CS 516	Testing and Quality Assurance
CS 520	Software Evolution
CS 534	Compiler Construction
CS 544	Software Security
CS 545	Software Reverse Engineering
CS 603	Organz Program Languages
CS 630	Empirical Software Engineering
Systems Courses	
CS 526	Intro Operating Systems
CS 538	Computer Comm & Networks
CS 548	Network Security
CS 567	Computer Systems Architecture
CS 581	High Performance Computing
CS 606	Analys Operating Systems
CS 613	Adv Computer Comm & Networks
CS 618	Wireless Mbile Netwrk Protocl
Theory Courses	
CS 570	Computer Algorithms
CS 575	Formal Languages & Machines
CS 602	Adv Formal Lang & Machin
CS 612	Advanced Data Structures
Elective Graduate CS Courses:	18
Students may not count CS 592, CS 598, CS 599, CS 692 or CS 699 courses towards this total.	

Courses outside of CS can count towards this total, if proposed by a faculty member and approved by a vote of the CS Faculty.

At least 9 hours total of the Core CS Courses and the Elective Graduate CS Courses must be taken at the 600 level

Other coursework:	18
CS 592 or	Independent Study
CS 692	Independent Study
Additional graduate CS courses	
Courses taken outside of CS, subject to the approval of the Graduate Program Director and the student's advisor (where applicable). Students should contact the Graduate Program Director and their Advisor (where applicable) prior to registering for courses outside of CS.	
Dissertation Credit Hours:	18
CS 699	Dissertation Research
Total Hours	66

Transfer Credit

Graduate coursework can be transferred from other institutions with departmental approval under the following conditions:

- No more than 6 hours can count towards the Core CS Courses
- No more than 12 hours total can count toward the Core CS Courses and the Elective Graduate CS Courses
- Any additional approved transfer hours will count towards Other Coursework
- Graduate School information on Transfer Credit.

Doctoral Plan of Study Requirement

- Graduate School information for the Doctoral Plan of Study.

Comprehensive Exams

- The student must pass the Ph.D. Qualifying Exam.
- The student must select an advisor for their Ph.D. Qualifying Exam and choose three additional Computer Science faculty members to complete their Ph.D. Qualifying Exam committee.
- The Ph.D. Qualifying Exam is composed of a Qualifying Exam Written Document and an Oral Presentation. The student must pass both portions.
 - The Written Document either describes original research (Track 1) or is a review and synthesis of core papers in a particular research area (Track 2).
 - Written Document Track 2: The document must pass an initial editorial review, after which the written document is rated by the student's Ph.D. Qualifying Exam committee as either (1) Pass, (2) Needs Modification or (3) Fail. For documents rated as Needs Modification, students will have two weeks to modify the document to be reviewed by the committee and rated as either Pass or Fail.
 - Oral Presentation: the student must deliver a conference-style presentation of the research contained in the paper. The committee members and faculty members present will then question the student regarding the contents of the written document and the presentation. The student's committee and other members of the faculty who are present will rate the Oral Presentation as either a Pass or a Fail.
- Students are allowed two attempts to successfully complete the Ph.D. Qualifying Exam. Students who do not pass their first attempt

must retake the exam at the next offering of the Ph.D. Qualifying Exam.

- Deadlines for taking the Ph.D. Qualifying Exam
 - For students with an M.S. in CS, the first attempt at the qualifying exam must occur at the beginning of the third semester in the PhD program.
 - For students with only a B.S. in CS, the first attempt at the qualifying exam must occur at the beginning of the fourth semester in the PhD program.
 - For students who do not have a B.S. in CS, the first attempt at the qualifying exam must occur at the beginning of the fifth semester in the PhD program.
 - The student may withdraw from the process before the due date of the Ph.D. Qualifying Exam Written Document if the advisor feels the student attempt at the qualifying exam is not sufficient. However, a withdrawal will be counted as a fail on the Ph.D. Qualifying Exam.

Continuous Enrollment Policy

- Graduate School Policy on Continuous Enrollment.

Dissertation Requirements

- The student must select a dissertation advisor and a dissertation committee. At least four members, including the dissertation advisor, must be from the faculty of the Department of Computer Science, and at least one member must be from outside the department.
- The student must develop a dissertation proposal composed of both a written document and an oral presentation. A student is admitted to candidacy after the successful completion of both portions of the dissertation proposal.
 - The written document should contain an introduction to the research area, a review of relevant literature in the area, a description of problems to be investigated, an identification of basic goals and objectives of the research, a methodology and timetable for approaching the research, and an extensive bibliography.
 - The student must deliver an oral presentation of the dissertation proposal, which is followed by a question-and-answer session that is open to all faculty and which covers topics related directly or indirectly to the research area. The student's committee will then examine the proposal privately with the student.
- The student must develop a written dissertation that demonstrates that the student has performed original research that makes a definite contribution to current knowledge. Its format and content must be acceptable to both the student's committee and the Graduate School.
- The student must defend the written dissertation. The defense includes an oral presentation of the dissertation research, followed by a question-and-answer session. The student's committee will determine whether the defense is acceptable.
- Graduate School information on Dissertation Requirements (p. 23).

Time Limits for Degree Completion Requirements

- Graduate School information on Time Limits (p. 23).

Students Progress Requirement

- Students must complete the Qualifying Exam by the specified deadlines
- Graduate School information on Student Progress (p. 23).

Withdrawals and Leave of Absence Information

- Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances Information

- Graduate School information Academic Grievances (p. 219).

Graduate School Deadlines Information

- Information on Graduate School Deadlines.

Application for Graduation Information

- Information on the Application for Graduation (p. 23).

Doctoral Degrees

The University offers several types of doctorates, each of which is described below.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

Doctor of Philosophy Degree

The Doctor of Philosophy (PhD) degree is regarded as the researcher's degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The Doctor of Philosophy (PhD) degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

Field of Specialization - A defined field of specialization as outlined in the student's Plan of Study is required of all candidates for the Doctor of Philosophy degree. A minimum of 36 semester hours of non-dissertation

course credit is required. Departments or programs may require more than this minimum. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 18 hours of dissertation research.

Research skill/language requirements - There is no university wide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments.

Interdisciplinary Studies

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 765) at the Graduate School's website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

Doctor of Education Degree

The Doctor of Education (EdD) requires a minimum of two years of graduate study beyond the master's degree for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate coursework research beyond the master's degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 488) section of the Graduate Catalog, there are specific regulations governing the EdD program.

Doctor of Musical Arts Degree

The Doctor of Musical Arts (DMA) degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 356) section of the Graduate Catalog.

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) (p. 730) is a practice-focused degree that is detailed in the Nursing section of this Catalog.

Doctor of Social Work

A Doctor of Social Work (DSW) degree is a practice doctorate degree in social work. It provides coursework on theory and skills in social work practice that are more advanced than what one would typically experience in an MSW program for social work.

Admission to Doctoral Degree Programs

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master's degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral

programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student's doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

Residency Requirements

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student's doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog's Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a "B" grade or better may be transferred. Under this option, a Request for Transfer

of Graduate Credit form must be submitted to and approved by the Graduate School.

2. PhD Programs Only: A student holding an earned, in-field master's degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. When exercising this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School. The requested transfer credit hours must be listed on the PhD Plan of Study as MSC501 under the transfer credit section. If the in-field master's degree was awarded *more than six years prior to admission to the current doctoral degree program*, the graduate program director or department head/chair must also submit to the Graduate School for evaluation, a Field-Related Employment Since Earning Master's Degree form with the student's CV must be submitted by the department through the UA DocuSign system in myBama. In addition, the department is asked to provide the following, attached to the approved Plan of Study :
 - a. An annotated work history from the student. This history should include job titles and major duties for all positions since earning a master's degree.
 - b. A brief paragraph from the corresponding faculty member, attesting that he/she has reviewed the work history and how that work applies to the current Ph.D. degree program.

The Graduate School will make the final determination about whether up to 24 prior master's hours can be applied to the Ph.D. requirements.

PhD awarding departments that want to participate in offering Option 2 to their doctoral students, need to "opt in" by informing the graduate dean in writing that they wish to be among the approved departments.

Consideration of transfer of credit or the acceptance of an earned master's degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy. Dissertation Research (699) may not be transferred in from an outside institution.

Time Limits

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master's, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

The Continuous Dissertation or Document Registration requirement for 699 and 799 enrollment will be waived for the intervening years between the student's cessation of doctoral work and re-admission.

Plan of Study

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School by the time the student has completed 30 coursework hours.

The PhD, DMA, and DSW Plans of Study are submitted by the department through the UA DocuSign system in myBama. The Plan of Study for other doctoral programs (Ed.D., DNP) are available from the student's department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

A copy of the approved Plan of Study must be submitted to the Graduate School when the department submits the Admission to Candidacy for Doctoral Degree form through the UA DocuSign system in myBama.

Preliminary or Comprehensive Examination

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and

- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student's supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student's research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy

The designation of candidacy reflects the student's demonstration of foundational knowledge and readiness to conduct independent research, in the discipline. The requirement for advancing to candidacy is determined by the faculty of the degree program and delineated in the program's section of the Graduate School Catalog and the program's Graduate Student Handbook.

Advancement to candidacy should involve either:

- passing the qualifying (major or preliminary) examination
- completing of all required coursework as listed on the approved program of study
- presenting or defending a dissertation prospectus or proposal
- or some combination of these milestones.

Students are not eligible to register for 699 or 799 credit hours until they have been advanced to candidacy. The Department Chair or Department Director of Graduate Studies, or their designee, shall submit the Admission to Candidacy for the Doctoral Degree form to the Graduate School during the semester that the student meets the program's candidacy requirements.

Continuous Doctoral Research Hours Registration

Once a student meets their program's requirement for admission to candidacy and the designated Department administrator submits the Application for Admission to Candidacy form to the Graduate School, the student may enroll in 699 (dissertation/document research) or 799 (document/project research).

Once initiated, the student must pursue completion of the dissertation/document/project without interruption by enrolling in 699/799 each fall and spring semester of the academic year.

The only time summer registration is required for dissertation/document/project research is when a doctoral student is graduating in August or defending the dissertation/document/project during the summer semester.

Ph.D. students must complete a minimum of 18 hours of dissertation research credits (699). Ph.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.

Ed.D. students must complete a minimum of 12 dissertation research credits (699). Ed.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.

DMA students must complete a minimum of 4 hours of document research (MUS 699). DMA students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in MUS 699 until degree completion.

DNP Students must complete project research hours in NUR 795-798. DNP students must maintain continuous enrollment for a minimum of 1 hour in a department-specified course until degree completion.

DSW Students must complete a minimum of 9 hours of project research (SW 799). DSW students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in SW 799 until degree completion.

The amount of dissertation/document/project research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

Dissertation Committee

The dissertation committee may be formed early in the dissertation research process, or shortly before the dissertation proposal is approved. It is expected that the committee will be formed and approved before significant progress is made on the dissertation. The committee must be formally established via a process initiated by the student and requiring the consent of each committee member, followed by Graduate School review for compliance with the regulations outlined below. Click here for instructions on the process of establishing the committee.

The committee must consist of at least five members. It may have additional (voting or nonvoting) members if deemed appropriate. At least one of the committee members must be from outside the student's major department. These external members may be from another academic department at UA, from other universities, or from industry or the professional field. In all cases, these members external to the department/program must be appointed to UA's Graduate Faculty by the dean of the Graduate School, and must have significant professional qualifications that directly contribute to the depth and rigor of the dissertation.

All members of the dissertation committee must hold Graduate Faculty status at The University of Alabama. The chair of the committee must hold Full Graduate Faculty status; others may be Full, Associate, or Affiliate members of the Graduate Faculty. A majority of the Dissertation Committee members must be full-time regular University of Alabama faculty (that is, full-time instructor, assistant professor, associate professor, or professor).

Dissertation Proposal

The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction that provides an overview and states the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal's format with respect to specifics such as the length of the introduction and level of detail of the literature review. Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. The dissertation must be based upon research completed while the student is enrolled at The University of Alabama.

The subject of the dissertation must be approved by the student's dissertation committee and by the dean of the Graduate School. The final dissertation may take the form of a traditional, chapter-based document or a series of full-length publication-ready manuscripts which are part of a larger, cohesive body of work. The format (traditional vs. article-style) must be approved by the committee in accordance with the standards for the program and the discipline.

For article-style dissertations, the document must contain a minimum of three articles, in addition to introductory and concluding materials. A single abstract must accompany the document. In addition to an introduction presenting the unifying framework that supports the research, the document must include a concluding section that summarizes the importance of the work, integrates the major findings, and discusses the implications for the overall body of work.

Individual departments may have policies or guidelines related to whether sections of the dissertation may be included if they have been previously published elsewhere. Copyright issues also may arise if sections of the dissertation have been previously published. Therefore, students who are considering the submission of dissertation chapters/articles for publication prior to their dissertation defense should consult with their advisor, and also with potential publication outlets, before submitting any dissertation-related manuscript for publication.

All parts of the dissertation must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline's style manual require deviation. Students should email gradschool@ua.edu before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

The Dean of the Graduate School must approve the dissertation before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Virtual Participation in Committee-Based Exams/Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.
7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Final-Semester Minimum Doctoral Research Hours Registration

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research until reaching their department's minimum requirement, and at least 1 hour for each semester thereafter until degree completion and graduation. If certain conditions are met for the student's final semester, the student may qualify to enroll for fewer hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester#. This exception applies only to students who registered for at least 1-3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

When was the *completed electronic dissertation submitted to ProQuest/the Graduate School?	Minimum hours of 699 registration required in the final semester
By 11:59pm on the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	0
After the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	1

*"Completed" means submitted to ProQuest after being successfully defended and carefully edited following the defense meeting. The dissertation chair or department designee must submit the Committee Acceptance Form (CAF) through the UA DocuSign system. The CAF must be signed by all committee members, department chairperson, and graduate dean. The CAF is submitted by the department through the UA DocuSign system in myBama. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

Footnotes

¹ International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see "USCIS" section under "Minimum Hours—Other Policies and Regulatory Bodies" on page 3 of this policy.

² The University Calendar is available at the Academics tab of the website of the University Registrar.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University's IRB approval form is available at the IRB website.

Dissertation Defense

The dissertation defense is the culminating experience in the doctoral program. The Dissertation Chair and the student will coordinate with all committee members to choose a time, date, and location for the dissertation defense. All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the defense date. The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

The dissertation defense is comprised of four parts.

1. Public Advance Notice. A minimum of two weeks prior to the scheduled defense date, the candidate must submit the *Public Notice of a Dissertation Defense* form. This form includes the name of the candidate, the department or program, the title of the dissertation, an abstract of 200 words or less, and the date, time, and location of the dissertation defense. The candidate should consult with the Dissertation Chair prior to

initiating this form. The form will be initiated by the candidate and signed by the Dissertation Chair, Graduate Program Director, and the Graduate School. Upon receipt of the completed form, the Graduate Program Director will ensure the scheduled defense is disseminated within the department. The Graduate School will post the scheduled defense on the Graduate School website.

2. Oral Presentation. An oral presentation of the dissertation is required and shall be public. The content and duration of the oral presentation are at the discretion of the Dissertation Chair, in consultation with the Committee, based on departmental norms, disciplinary standards, and traditions.

3. Oral Defense. This examination phase of the dissertation defense is required and may be public or private. Each department or program shall establish a policy for whether the oral defense is public, private, or both (i.e., has a public portion and a private portion).

4. Committee Deliberation. Committee deliberation is required and shall be private. Upon completion of the oral defense, everyone other than the committee members shall leave the defense location while the committee discusses, deliberates, and votes. For a defense to be successful, the majority of the committee must approve the dissertation and the defense.

The results of the dissertation defense must be reported to the Office of the Graduate School by submitting the Committee Acceptance Form at least six weeks before the Fall/Spring commencement, or five weeks before the Summer commencement, at which the degree is to be conferred. The Committee Acceptance Form, submitted by the department through the UA DocuSign system and found in myBama, confirms that a majority of the dissertation committee has approved the written dissertation and oral defense.

Any changes made to the manuscript after the defense must be approved by the Dissertation Chair. The student must submit the final dissertation to the Graduate School, and the Dean of the Graduate School must approve the dissertation, before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Final Dissertation Submission and Approval

Following a successful dissertation defense (see "Dissertation Defense" for details), any edits agreed upon during the defense must be incorporated into the manuscript, and the Dissertation Chair must approve the final manuscript. After a careful review to ensure that the manuscript adheres to the Graduate School's formatting guidelines, the candidate must submit the approved manuscript to the Graduate School for final approval, address any remaining edits, and initiate the upload process for archiving the manuscript in the national dissertation repository, ProQuest.

The dissertation, in its final form, must be received in the Graduate School within 60 days of the dissertation defense. If this deadline is not met, the Dissertation Chair may require the candidate to schedule a second dissertation defense. Note that this 60-day deadline is separate from the deadlines for degree conferral and participation in Commencement ceremonies.

Graduate School deadlines for each semester, including deadlines for submitting the final manuscript to the Graduate School to graduate at the end of the semester, are available on the Graduate School's homepage. Consult the Graduate School's dissertation site for additional details of the electronic submission process, including information on exactly what needs to be submitted to the Graduate School. At the stage of the Graduate School review of the manuscript, additional revisions may be required, to ensure that the final manuscript conforms to all formatting

and editing standards. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Application for Graduation

Each candidate for a doctoral degree must submit an Application for Degree via myBama no later than the last day to register or add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Withholding or Withdrawing an Advanced Degree

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

Department of Electrical and Computer Engineering

- Majors
 - Electrical Engineering, MS (p. 658)
 - Electrical Engineering, PhD (p. 663)

Chair

- Tim Haskew

Professor

- Tim Haskew

Master's degree students may earn graduate credit for a maximum of 6 semester hours of 400-level course credit but only if a form for Approval of 400-Level Course Work for Master's Credit (p. 7) is approved by the department and Graduate School prior to the semester in which the 400-level coursework will be taken.

ECE508 Communications

Hours 3

Analog and digital communication systems, random signals, sampling, filtering, analog-to-digital encoding, advanced digital modulation/demodulation, source encoding/decoding, channel encoding/decoding, multiplexing, system performance analysis.

Prerequisite(s): ECE 370 and MATH 355

ECE509 Communications Lab

Hours 1

Modeling and design of communication systems. Familiarization with specialized communications equipment and techniques. Proper use of laboratory instruments.

Prerequisite(s): ECE 370 and MATH 355

Prerequisite(s) with concurrency: ECE 508

Professor

Tim Haskew

Electrical Engineering, MS

Graduate students are vital to the Department of Electrical and Computer Engineering's research efforts.

Faculty and their students are conducting research in three core electrical and computer engineering areas: devices and materials, electromechanical systems, and embedded systems. The department offers masters and doctorate degrees in electrical and computer engineering.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. A Bachelor's degree in electrical or computer engineering or related field from an ABET-accredited program. Applications who are graduates of a non EAC/ABET-accredited program will be considered.
2. A short Statement of Purpose describing possible research/study interests.
3. Resume.
4. Applicants who are not current University of Alabama students should submit three letters of recommendation.

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue."

Applicants Without an Electrical Engineering or Computer Engineering Bachelor's Degree

Applicants without an electrical engineering or computer engineering bachelor's degree may be admitted with Permission to Continue. Such students will be required to complete successfully three 400-level electrical engineering courses, each in a different sequence area. Successful completion requires a "B" or better in the course. Slash-listed (400/500) courses taken to satisfy this policy cannot be counted toward the graduate degree. Equivalent undergraduate or graduate courses in related fields (for example, electromagnetics in physics, computer architecture in computer science, or control in mechanical engineering) may be counted as a course in the corresponding electrical engineering area upon approval by the Electrical and Computer Engineering Graduate Program Director.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Master of Science in Electrical Engineering (MSEE) degree may be obtained through either of two plans. Students may also enroll in the Dual MSEE/MBA Degree Program, which includes a slightly reduced number of hours for both degrees.

MSEE – Thesis Option (Plan 1)

Code and Title	Hours
Area of Concentration	
A minimum of 12 hours of closely related Electrical and Computer Engineering (ECE) designated courses in the student's area of concentration, as defined by the advisory committee	12
Elective Area of Study	
A minimum of 9 hours of courses in an elective area approved by the advisory committee	9
Mathematics or Science	
A minimum of 3 hours of Mathematics (MATH or GES) or Science (Physics, Chemistry, or Biology) courses at the 500 level or above	3

Graduate Research Seminar

A minimum of 1 hour of seminar (ECE 695 Graduate Research Seminar). This can be part of the Area of Concentration or the Elective Area of Study.

Total Coursework Hours 24

Thesis Course

ECE 599 Thesis Research 6

Total Hours 30

Additional Requirements:

- A minimum of 3 hours of closely related Electrical and Computer Engineering (ECE) designated courses in the student's Area of Concentration at 600 level.
- No more than 6 hours may be from courses at the 400 level. In order to receive degree credit, 400-level courses require written application and approval by the Graduate School prior to the semester in which any 400-level course is to be taken.
- The Graduate Research Seminar can be considered as part of the student's Area of Concentration or Elective Area of Study with approval from the student's advisory committee.
- A student's curriculum and thesis must be approved by the student's graduate advisory committee. The student must pass a final comprehensive examination, which is typically a presentation and defense of the thesis. In addition, the student must satisfy all University requirements defined in the current edition of The University of Alabama Graduate Catalog.

The MSEE Plan I candidate's committee will consist of three department faculty who have each taught the candidate at least one graduate course.

The MSEE Plan I candidate's committee is responsible for administering the thesis defense.

MSEE – Non-Thesis Option (Plan II):

Code and Title	Hours
Area of Concentration	
A minimum of 12 hours of closely related Electrical and Computer Engineering (ECE) designated courses in the student's area of concentration, as defined by the adviser	12
Elective Area of Study	
A minimum of 12 hours of courses in an elective area approved by the adviser	12
Mathematics or Science	
A minimum of 3 hours of Mathematics (MATH or GES) or Science (Physics, Chemistry, or Biology) courses at the 500 level or above	3
Graduate Research Seminar	
A minimum of 1 hour of seminar (ECE 695 Graduate Research Seminar). This can be part of the Area of Concentration or the Elective Area of Study.	
Culminating Experience	
ECE 598 Non-Thesis Research	3
Total Hours	30

Additional requirements:

- A minimum of 3 hours of closely related Electrical and Computer Engineering (ECE) designated courses in the student's Area of Concentration at 600 level.
- No more than six (6) hours may be courses at the 400 level. In order to receive degree credit, 400-level courses require written application

and approval by the Graduate School prior to the semester in which any 400-level course is to be taken.

- The Graduate Research Seminar can be considered as part of the student's Area of Concentration or Elective Area of Study with approval from the student's advisory committee.
- A student's curriculum must be approved by the student's graduate adviser, which must be chosen during the first semester of the degree program.
- The graduate adviser must also approve either of the following to satisfy University of Alabama Graduate School culminating experience requirement for an MS Plan II degree:
 - a. submission of a manuscript, authored or co-authored by the candidate, to a refereed journal or conference proceeding;
 - b. a written research report submitted to the adviser.

During the first semester in the MSEE Plan II program, the candidate must select an adviser from the department faculty who will be responsible for administering the culminating experience.

Transfer Credit

Please see the Graduate School information on Transfer Credit (p. 18).

Accelerated Master's Program

Current Electrical Engineering and Computer Engineering undergraduate students at The University of Alabama with a 3.3 or higher GPA and 90 or more hours of undergraduate course credit are eligible to apply for the Accelerated Masters Program (AMP). AMP allows undergraduate students to simultaneously count up to 6 hours of graduate coursework toward both the undergraduate and graduate degrees. The GRE admissions test and recommendation letters requirements are automatically waived for AMP applicants.

Please see the Graduate School catalog page for the Accelerated Master's Program (p. 13).

Comprehensive Exam/Capstone

A final comprehensive examination is required of all Master's candidates. The content of this exam depends on the candidate's degree program.

Every MSEE candidate (Plan I) is responsible for working with their advisor to select a faculty committee to oversee the candidate's progress toward earning the MSEE degree. The MSEE Plan I candidate's committee will consist of at least three members of the faculty. At least two of the members must be from the ECE Department faculty. Up to one member may be from outside the department. The MSEE Plan I committee will work with the advisor to approve the candidate's plan of study, evaluate the candidate's thesis and thesis defense, and help the candidate with any problems that may arise in the course of obtaining the MSEE degree.

The MSEE Plan II candidate does not have to form a committee, but instead select an adviser from the members of the ECE Department's faculty. The adviser will be responsible for administering the culminating experience.

Plan I – Thesis Process Requirements**Thesis**

The thesis is a formal research document and must be prepared following the Graduate School's thesis and electronic submission guidelines (<http://services.graduate.ua.edu/etd/>). Your thesis will be reviewed by your thesis advisor and your committee. Once they are satisfied with the

thesis, you and your thesis advisor will schedule your Comprehensive Exam/Thesis Defense. After successfully defending your thesis, you may have final corrections and revisions to your thesis before the committee gives their final approval. Such conditions should be considered in scheduling the presentation/defense relative to the graduate school submission deadlines.

Thesis Defense

The final step in the pursuit of the M.S. degree (Plan I) is a formal defense of the completed thesis before the student's graduate advisory committee. The thesis defense consists of two major components.

The first component is a technical presentation that summarizes the major findings of the thesis. This presentation should include a survey of the available literature and a summary of the major technical achievements of the research. The technical presentation is followed by a question and answer session, during which audience members may ask the student specific questions about his or her thesis research. This portion of the defense must be open to the public.

The second component of the thesis defense is a closed question & answer session that is restricted to the defending student and the graduate advisory committee. This portion of the defense is not open to the public. The graduate advisory committee will typically ask a series of detailed questions about the student's research. After the committee has concluded asking questions, the student will be asked to leave the room so that the committee may deliberate and render a decision on whether the student has passed or failed the defense. After a decision has been reached, the student will be called back into the room and notified of this decision.

The thesis defense must be announced publicly. The procedure for public announcement is as follows. No less than four weeks before the scheduled defense date, the student must complete a thesis announcement document, which includes the following elements: the student's name, the student's email address, the advisor's name, the thesis title, and abstract of no more than 300 words, and the scheduled date and time of the defense. A template of this announcement form is available from the ECE office staff.

When the thesis announcement document is complete, it should be sent to the ECE office staff for distribution. This will generally be done at the same time that the room reservation for the defense is scheduled. To ensure that this policy is enforced, ECE office staff will not schedule a room for a thesis defense without first receiving the completed thesis announcement document. After receiving this document, the ECE office staff will add the confirmed room location, and will then send this document to the department email distribution list. The document will also be posted to the ECE department website and sent to the office of the dean for further distribution within the college of engineering.

Plan II – Non-Thesis Process Requirements

Plan II Master's candidates can satisfy the comprehensive exam via one of the following:

- Pass a formal defense of a conference or journal paper in which the student is an author. The student must meet with the adviser and report on their portion of the work described in the paper. The specific format of this exam is at the discretion of the adviser.
- Submit a written research report on the topic defined by the academic adviser, taken as 3 hours of ECE 598 Non-Thesis Research.

Time Limits for Degree Completion Requirements

Please see the Graduate School catalog page for information on Time Limits (p. 18).

Student Progress Requirement

Please see the Graduate School Website.

Application for Graduation Information

Please see the Graduate School catalog page for information on the Application for Graduation (p. 18).

Master's Degrees

The primary purpose of master's degree programs is to provide students with subject matter at an advanced level in their fields of study. Master's degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master's programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master's degree:

Plan I. Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or "capstone experience" as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of

research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student's program at the master's level must provide sufficient association with the resident faculty to permit individual evaluation of the student's capabilities and achievements.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Courses of full graduate-level credit earned in a *regionally* accredited institution where a student was enrolled in the graduate school, may be submitted for review for inclusion in a master's degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student's advisory committee and the dean of the Graduate School.

A student initiates the Request for Transfer of Graduate Credit form and must ensure that the Graduate School receives an official transcript from the outside institution. This should be done well in advance of the final semester, otherwise it may delay graduation and awarding of the degree.

With the approval of the student's department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from an outside institution. Some master's degree programs allow fewer hours to be transferred. Be sure to check with your department's graduate program director regarding your department's transfer policy. Eligible coursework will have been earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA master's program. Only courses in which a student earned a "B" grade or better may be transferred. Thesis Research (599) may not be transferred in from an outside institution. If approved, such coursework can be counted toward the minimum hours and coursework requirements for the master's degree.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

400-Level Courses

A maximum of 6 semester hours of 400-level course credit may be accepted for graduate credit and used toward a master's degree. The department needs to submit the Approval of 400-Level Course Work for Master's Credit form through the UA DocuSign system in myBama. This form must be submitted for approval to the Graduate School by the last day to add a course for the semester in which the course will be taken.

Time Limit

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. Previously approved transferred coursework that falls within six years of *admission* to the master's degree program can be counted toward the minimum hours requirement. There is no provision for an extension of the time limit beyond six years for master's students.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

Thesis

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. Students set up their committee through the Graduate Academic Activities portal on the Graduate School website. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. The majority of the thesis committee must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the student's thesis

committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. All members must agree that the student is ready for the final oral thesis defense. A final oral thesis defense is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral thesis defense unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In circumstances where virtual participation is necessary, all participants must follow the Virtual Participation guidelines found below.

Virtual Participation in Committee-Based Exams/Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must

also ensure that appropriate security precautions are taken to prevent the interruption of the event.

7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Article Style vs. Journal Format for Master's Theses

Article Style.

At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.

Journal Format.

A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

All theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research.

In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the

college Human Research Review Committee to obtain approval for the planned research.

Final Thesis Defense

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. The thesis must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

"Completed" means submitted to ProQuest after being successfully defended, carefully edited following the defense meeting, and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. A majority of the thesis committee must approve the written thesis and defense before submission to the Graduate School. Following the thesis defense, the Committee Acceptance Form is submitted by the thesis chair through the UA DocuSign system in myBama.

Graduate School deadlines, including each semester's thesis deadline, are available at the Graduate School's homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the thesis before the student can be cleared for graduation.

Comprehensive Examinations

In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all candidates for the master's degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School.

The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. The final report is submitted by the department through the UA DocuSign system in myBama. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only

twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation

Each candidate for a master's degree must submit an Application for Degree via myBama no later than the last day to add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Second Master's Degree

Six (6) semester hours of eligible credit from one master's degree at The University of Alabama may be applied to the requirements for a second master's degree, but only if the department of the second master's agrees to the courses in the plan of study. Any hours from the previous master's degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master's degrees, no hours may double count toward any additional master's degrees.

Electrical Engineering, Ph.D.

PhD in Electrical Engineering

The Department of Electrical and Computer Engineering offers a Doctor of Philosophy degree in Electrical Engineering. This is a research-based degree where students are required to propose, complete, and defend an approved dissertation on a research topic that contributes to the field.

The PhD program in Electrical Engineering provides students with the opportunity to work with leading, world-renowned faculty members in four focus research areas:

- **Devices and Materials**

This research area is focused on fundamental and applied research on materials and devices. Active research includes magnetic materials for electromagnetic devices in electric machines; synthesis of nanomaterials for electronic and photonic nanodevices; oxide materials for MEMS piezoelectric and multiferroic sensors/actuators. A group of ECE faculty work on a broad spectrum of solid-state devices, including solar cells, sensors, and terahertz (THz) biomedical imaging.

- **Electromechanical and Energy Systems**

This research area focuses on the design, development, and control of electrical systems and combined electrical and mechanical systems. On the electrical system side, research activities include Electric Power and Energy Systems and Power Electronics with modern applications covering renewable energy systems, microgrids, vehicle grid integration, smart grid, energy internet, etc. Within the sub-discipline of power electronics, several faculty are involved in design and optimization of high-performance converters utilizing emerging wide-bandgap semiconductor technology including Silicon Carbide (SiC) and Gallium Nitride (GaN) devices. Management and mitigation of electromagnetic interference (EMI) in high-frequency SiC and GaN converter systems is also an active area of research within the department. On the integrated electrical and mechanical system side, research activities include Electric Machines, Energy Conversion, and Motion Control Systems with modern applications covering electric vehicles, wind energy conversion, smart homes and buildings, process automation, robotics, etc.

- **Embedded Systems**

This research area is focused on computing systems in all aspects and applications. Active research by the UA ECE faculty includes robotics, intelligent sensors, computer vision, machine learning and deep learning, wearable sensors, security and privacy in computing systems, intelligent wireless communications and networks, big data, tele-healthcare, systems-on-chip, virtual reality, IoT devices, biosensors, implantable devices, and autonomous driving, flying, and underwater vehicles. The research area also covers embedded system hardware (microcontrollers and FPGAs), digital signal/image processing, real-time systems, and biomedical applications of computing devices.

• **Electromagnetics.**

Electromagnetics involves solving Maxwell's four equations and is the underpinning of the electromagnetic device and system design. Maxwell's equations describe the law of electricity and magnetism. Electromagnetics applies the four equations to electromagnetic device performance analysis. Microwave communications, radio propagation in antennas, microwave millimeter engineering, remote sensing, and object imaging are based on electromagnetics' dynamic field.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. A Bachelor's degree in electrical or computer engineering or related field from an ABET-accredited program. Applications who are graduates of a non EAC/ABET-accredited program will be considered.
2. A short Statement of Purpose describing possible research/study interests
3. A Resume
4. Applicants who are not current University of Alabama students should submit three letters of recommendation

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue."

Applicants Without an Electrical Engineering or Computer Engineering Bachelor's Degree

Applicants without an electrical engineering or computer engineering bachelor's degree may be admitted with Permission to Continue. Such students will be required to complete successfully three 400-level electrical engineering courses, each in a different sequence area. Successful completion requires a "B" or better in the course. Slash-listed (400/500) courses taken to satisfy this policy cannot be counted toward the graduate degree. Equivalent undergraduate or graduate courses in related fields (for example, electromagnetics in physics, computer architecture in computer science, or control in mechanical engineering) may be counted as a course in the corresponding electrical engineering area upon approval by the Electrical and Computer Engineering Graduate Program Director.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Code and Title	Hours
Major Area of Concentration	
A minimum of 24 hours of closely related coursework in the student's area of concentration, as defined by the advisory committee, with at least 15 of these hours at the 500-level or above. At least 9 hours should be at the 600 level. Courses at the 400-level will only be applied to this hour requirement if they were completed as part of the student's master's degree requirements.	24
Minor Area of Concentration	
A minimum of 15 hours of courses in a minor in Electrical and Computer Engineering or other approved area, as defined by the advisory committee, all of which are to be at the 500-level or above	15
Mathematics or Science	
A minimum of 6 hours of Mathematics (MATH, STAT or GES) or Science (Physics, Chemistry, or Biology) courses at the 500-level or above	6
Graduate Research Seminar	
A minimum of 3 hours of seminar (ECE 695 Graduate Research Seminar). This can be part of the Major Area of Concentration or the Minor Area of Concentration.	3
Total Coursework Hours	48
Dissertation Research	
A minimum of 18 hours of dissertation research (ECE 699 Dissertation Research) are required	18
Total Hours	66

Additional Requirements:

- A maximum of 24 credit hours earned for coursework taken to complete a master's degree can be applied to the doctoral coursework requirement.
- The Graduate Research Seminar can be considered as part of the student's Major Area of Concentration or Minor Area of Concentration with approval from the student's advisory committee. However, the minimum of 48 coursework hours must still be met.
- A student's curriculum and dissertation must be approved by the student's graduate advisory committee. All candidates must pass a written and oral qualifying examination, administered by the graduate advisory committee, at such a time as the candidate's adviser deems appropriate and in accordance with departmental policy. The oral portion of the qualifying examination is typically as the presentation of a dissertation proposal. Furthermore, all candidates must pass a final examination, which generally consists of a presentation and defense of the dissertation.
- A doctoral student must fulfill the residency requirements set forth by The University of Alabama Graduate School.

Transfer Credit

Please see the Graduate School website (p. 23).

Committee

Every Ph.D. candidate is responsible for working with his/her advisor to select a committee of five or more members. The candidate's committee will consist of the advisor plus at least three members of the department's faculty plus at least one faculty member from outside the department. The committee will work with the advisor to approve the candidate's plan of study, to evaluate the candidate's dissertation and

plan the dissertation defense, as well as to help the candidate with any problems that may arise in the course of obtaining the Ph.D. degree.

Doctoral Plan of Study Requirement

Soon after admission to the Ph.D. program, you should work with your advisor and committee to complete the Outline of Doctoral Program for the Ph.D. Consult the graduate course schedule for help with choosing the coursework that will be listed in this 3-year plan of study. Courses listed in the plan of study may be modified during your course of study with the approval of your advisor. It is the student's responsibility to keep the graduate school informed of revisions to the Plan of Study, as this document is used to audit the student's courses prior to admission to candidacy and graduation.

Comprehensive Exams

The Ph.D. qualifying examination is a formal process used to evaluate a student's capacity for successfully completing the Ph.D. program.

Successful completion of the qualifying examination is required of all Ph.D. students prior to admission to candidacy. The qualifying examination consists of both an oral and a written component, which may be administered at different times. However, both portions of the qualifying exam must be completed at least nine months before graduation. It is also noted that the qualifying exam and the dissertation defense cannot occur within the same semester.

Written Component

The content, nature, and format of the written component of the qualifying examination is determined by the student's graduate advisory committee. This portion of the qualifying examination may be taken when the advisory committee determines that sufficient coursework has been completed, but no later than the semester immediately after all coursework has been completed. Prior to issuing the written component to the student, the chair of the graduate advisory committee will submit a written statement defining the content, duration, and nature of the exam to the Department Head, each member of the committee, and the student.

The written examination will be based upon graduate-level coursework in the student's major area of concentration. The examination provides a vehicle for the student to demonstrate the capability to apply independent thinking by bringing together material from a number of different courses.

There is no specific requirement for the content or format of the written portion of the qualifying examination. However, graduate advisory chairs often request that members of the graduate advisory committee contribute a suitable set of questions or a project, which collectively represent a comprehensive qualifying examination for the student. External graduate advisory committee members may also contribute questions if desired, at the discretion of the graduate advisory chair.

In this model, the questions or projects contributed by the members of the graduate advisory committee may be open-ended (requiring literature review, etc.) or they may be taken from graduate coursework. Regardless of approach, it is generally recommended that the scope of each committee member's questions be constrained such that the student can complete them in 1-2 weeks of concentrated effort.

The graduate advisory committee will decide whether the student passed or failed the written exam. The chair of the graduate advisory committee will inform the student and the Department Head in writing of this result within two weeks of the completion of the written exam. Students may take this written exam only twice. The graded exam will become part of the student's academic file. The written portion of the qualifying

examination must be successfully completed prior to undertaking the oral portion of the qualifying exam.

Oral Component

The oral component of the qualifying examination will include a formal presentation of the dissertation proposal to the graduate advisory committee. At least two weeks prior to this presentation, the student must submit a written draft of the proposal to the graduate advisory committee, who approves the formal proposal defense.

Admission to Candidacy Requirements

When the student has presented a satisfactory proposal, the chair of the graduate advisory committee will inform the Department Head that the student passed both the written and oral portions of the Qualifying Exam and has been admitted to candidacy. The completed candidacy form with attached Plan of Study is submitted to the Graduate School well in advance of the final semester.

Continuous Enrollment Policy

Please see the Graduate School website (p. 17).

Dissertation Requirements

The dissertation research and dissertation are the defining elements of the PhD degree. The dissertation must demonstrate independent, original scholarship within the field.

The dissertation is a formal research document and must be prepared following the Graduate Schools guidelines. Your dissertation will be reviewed by your advisor and your dissertation committee. Your advisor will help in scheduling your Final Exam/Dissertation Defense. After a successful defense, you may still have final dissertation corrections and revisions required by the committee. Such conditions should be considered in scheduling the presentation/defense relative to the graduate school submission deadlines.

The article-style dissertation can be used as an alternate to the traditional dissertation format. This format is beneficial for publication of the dissertation research. Additional information concerning the article-style dissertation may be found at the site listed above.

Dissertation Defense

The final step in the pursuit of the Ph.D. degree is a formal defense of the completed dissertation before the student's graduate advisory committee. The dissertation defense consists of two major components.

The first component is a technical presentation that summarizes the major findings of the dissertation. This presentation should include a survey of the available literature, a summary of the major technical achievements of the research described in the dissertation, and a synopsis of the contributions of the research to the broader engineering community. The technical presentation is followed by a question and answer session, during which audience members may ask the student specific questions about his or her dissertation research. This portion of the defense must be open to the public.

The second component of the dissertation defense is a closed question & answer session that is restricted to the defending student and the graduate advisory committee. This portion of the defense is not open to the public. The graduate advisory committee will typically ask a series of detailed questions about the student's dissertation research. After the committee has concluded asking questions, the student will be asked to leave the room so that the committee may deliberate and render a decision on whether the student has passed or failed the dissertation

defense. After a decision has been reached, the student will be called back into the room and notified of this decision.

The dissertation defense must be announced publicly. The procedure for public announcement is as follows. No less than four weeks before the scheduled defense date, the student must complete a dissertation announcement document, which includes the following elements: the student's name, the student's email address, the advisor's name, the dissertation title, and abstract of no more than 300 words, and the scheduled date and time of the defense. A template of this announcement form is available from the ECE office staff.

When the dissertation announcement document is complete, it should be sent to the ECE office staff for distribution. This will generally be done at the same time that the room reservation for the defense is scheduled.

To ensure that this policy is enforced, ECE office staff will not schedule a room for a dissertation defense without first receiving the completed dissertation announcement document. After receiving this document, the ECE office staff will add the confirmed room location, and will then send this document to the department email distribution list. The document will also be posted to the ECE department website and sent to the office of the dean for further distribution within the College of Engineering.

Department of Mechanical Engineering

The MSME degree is offered in two basic plans. One plan is based on both coursework and research and the presentation and submission of a thesis (Plan I). The other plan is based on coursework and the completion of a comprehensive exam (Plan II). The Plan II option is available via distance to off-campus students residing within the borders of the United States or serving on a U.S. military installation. For more information on online Master of Science in Mechanical Engineering see UA Online Degree Programs. We are confident that distance education

students will have a great opportunity to obtain their degrees with minimal travel or job disruption.

The PhD degree is based on coursework as well as a heavy research component. This degree provides graduates with the background needed to become experts in their selected area of specialization. This program is also offered via the distance option. For more information on online PhD in Mechanical Engineering see UA Online Degree Programs. We are confident that distance education students will have a great opportunity to obtain their degrees with minimal travel or job disruption. Applicants interested in the distance approach are encouraged to contact faculty members in the area of research interest to inquire about the formulation of a research project that is suitable for completion via distance. Note that the distance option is restricted to students residing within the borders of the United States or serving on a U.S. military installation.

During the first semester, a student enrolled in any graduate program should identify a primary faculty advisor and become familiar with all the required forms and deadlines associated with their respective program.

- Majors
 - Mechanical Engineering, MS (p. 668)
 - Mechanical Engineering, PhD (p. 671)

The department has active research programs in the areas of Dynamic Systems & Control (DSC), ThermoFluids Science (TFS), and Materials Processing & Manufacturing (MPM). Faculty conduct research in thrust areas that include, but are not limited to: automotive systems, robotics and human systems, automation and mechatronic systems, energy and building efficiency, internal combustion engines, manufacturing systems, additive manufacturing, and materials processing and modeling. Individual faculty members and their research interests are described on the ME Research and Faculty Directory.

Students and faculty in the Department of Mechanical Engineering have access to state of the art computational facilities and capabilities. On-campus assets include numerous commercially available computational modeling software packages through the College of Engineering server.

In addition, high performance computing capabilities are accessible through the University of Alabama's Office of Information Technology. High performance computing facilities are also available to UA students and faculty through the Alabama Supercomputer Authority.

The department maintains well-equipped laboratories in large modern buildings. Graduate students conduct their research in these laboratories and students are typically provided dedicated office space. The department also maintains a modularized research area capable of supporting many separate projects, as well as a student machine shop.

ME501 Mech Engr Analysis I

Hours 3

This course is designed to provide the graduate students with fundamental concepts of advanced mathematical analysis of continuous and discrete mechanical engineering systems. The course includes intensive discussion of ordinary differential equations, Fourier analysis, and advanced vector calculus with applications to dynamic systems, heat transfer as well as fluid and solid mechanics.

ME506 Found Thermal Power Gen

Hours 3

Thermal power systems; components, process analysis and modeling, fuels, combustion, environmental aspects, and availability analysis in steam and gas turbine plants. Examination of recent trends such as cogeneration and combined cycles.

Mechanical Engineering, MS

While pursuing a Master of Science in Mechanical Engineering (MSME), the student will take graduate-level courses and may conduct research with a faculty advisor and observe how these studies will lead to key engineering innovations and societal impacts in the field of mechanical engineering. Equipped with complementary and state-of-the-art computational and experimental facilities, the Mechanical Engineering Department has active research programs in the following three disciplinary groups; Dynamic Systems & Control (DSC), ThermoFluids Science (TFS), and Materials Processing & Manufacturing (MPM). Faculty teach graduate-level courses and conduct research in cross-disciplinary thrust areas that include: automotive systems, robotics and human systems, automation and mechatronic systems, energy and building efficiency, internal combustion engines, manufacturing systems, additive manufacturing, and materials processing and modeling. Graduate courses in these areas, in addition to the general core graduate courses, provide the foundation for earning an MSME degree. In addition to offering a thesis and non-thesis master's degree for the traditional on-campus student, the non-thesis master's degree is available as a distance degree. For more information on online Master of Science in Mechanical Engineering, see UA Online Degree Programs. We are confident that distance education students will have a great opportunity to obtain their degrees with minimal travel or job disruption.

Students and faculty in the Department of Mechanical Engineering have access to state-of-the-art computational facilities and capabilities. On-campus assets include numerous commercially available computational modeling software packages. In addition, high performance computing capabilities are accessible through the University of Alabama's Office of Information Technology.

Qualified students in the Mechanical Engineering undergraduate program at The University of Alabama are eligible for early admission into the MSME program through the Accelerated Master's Program (AMP). This program allows students to double-count up to 9 hours of graduate credit toward their undergraduate degree.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission to the Main Campus (MA) or Distance Learning (DL) program should have:

- A Bachelor's degree in mechanical engineering or related field (see below)
- A combined verbal and quantitative GRE requirement of 300 or greater (see below for exceptions). The GRE score is waived for graduates of ABET-Accredited engineering programs. Applicants with five or more years of field-related work experience may contact the ME Graduate Program Director to inquire about a GRE waiver request. There is no minimum score on the writing section of the GRE for admission to the MSME Program
- A current resume
- A concise statement of purpose describing graduate study interests
- Three letters from recommenders (waived for University of Alabama graduates)
- A residence within the borders of the US or serving on a US military installation (DL applicants only)
- A TOEFL score of at least 92 or an IELTS score of at least 7.0 for non-native English speakers who are required to submit an English Language test score (see admissions criteria link below)

Note that there are specific admissions requirements for UA undergraduates interested in the Accelerated Master's Program as well as graduates interested in the Dual MSME/MBA Program. See the appropriate section of this catalog for additional information.

Non-BSME Applicants

Applicants who hold a Bachelor of Science degree in a discipline other than Mechanical Engineering may apply for a graduate degree in Mechanical Engineering. However, there is a basic level of undergraduate understanding that students are expected to have upon entering the program in order to be successful. The following prerequisite undergraduate courses or acceptable equivalents, which do not count toward the graduate degree, are expected for entering students:

- Mathematics: Calculus (usually 12 semester credit hours) and Ordinary Differential Equations
- Chemistry: General Chemistry (usually 4 semester credit hours)
- Physics: Calculus-Based Physics (usually 8 semester credit hours)
- Mechanical Engineering, depending on your emphasis area (see below) in graduate school

DSC: Dynamic Systems & Control emphasis		Hours
AEM 250	Mechanics Of Materials I	3
ME 350	Static Machine Components	3
ME 372	Dynamic Systems	3

or

TFS: ThermoFluids Science emphasis		Hours
ME 215	Thermodynamics I	3
AEM 311	Fluid Mechanics	3
ME 309	Heat Transfer	3

or

MPM: Materials Processing & Manufacturing emphasis		Hours
AEM 250	Mechanics Of Materials I	3
ME 350	Static Machine Components	3
ME 372	Dynamic Systems	3

The engineering courses listed above may have prerequisite courses as listed in the Catalog. Students with Bachelor of Science degrees in physical sciences are likely to have the background needed to start directly in the listed Mechanical Engineering courses. Depending on the number of courses needed from the list above, it may be possible to take one or more of these courses simultaneously with graduate-level coursework. Applicants are encouraged to consult with faculty in the area of study emphasis to inquire about any modifications to the above list that they feel is appropriate. Recall that undergraduate courses (400-level and below) cannot count toward a graduate degree in Mechanical Engineering.

Application Deadlines

There are no formal deadlines for graduate applications to the Department of Mechanical Engineering. Once an application is complete, the internal review process typically only takes a couple of weeks. International applicants should consider the time required to obtain any necessary travel documents. Only after the student has been accepted and The University has provided the appropriate paperwork can an applicant apply for appropriate travel documents. This process can take between two and six months, depending on the country of origin. Students must complete this process and arrive on campus prior to the first day of class. All of these steps should be considered by international students when planning to apply.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

MSME Curriculum Overview

The MSME program is offered with both a thesis option as well as a non-thesis option. Designation of the selected program is not required at the time of application. All MSME students on teaching or research assistantships in the department are expected to pursue this thesis degree option.

MSME Curriculum Requirements

All MSME students must complete the 30-hour curriculum requirement through the following three areas:

1. MSME Core Area Course Requirements		Hours
The first two courses are chosen based on the student's area of study interest. That is, select one of the following Major Core Areas and then complete at least two courses from that list.		6
Dynamic Systems and Control (DSC) Core		
ME 556	Mechatronics	3
ME 562	Intermediate Dynamics	3
ME 575	Control Systems Analysis	3
ME 577	Advanced Linear Control	3
Materials Processing and Manufacturing (MOM) Core		
ME 540	Failure of Engr Materials	3
ME 542	Multiscale Material Design	3
ME 546	Atomistic Mod of Materials	3
ME 591	Special Problems	3
ThermoFluids Science (TFS) Core		
ME 509	Intermed Heat Transfer	3

ME 511	Cmp Heat Transfer & Fluid Flow	3
ME 560	Thermal Fluid Meas. & Analysis	3
ME 605	Classical Thermodynamics	3
AEM 500	Intermediate Fluid Mechanics	3

2. MSME Mathematics Core Requirements

The second two courses are selected to satisfy the mathematics area core requirement. That is, complete at least two courses from the following list.

ME 501	Mech Engr Analysis I	3
ME 591	Special Problems (Linear algebra for engineering computations)	3
GES 500	Engineering Statistics	3
GES 551	Matrix And Vector Analysis	3
GES 554	Partial Diff Equations	3
ST 560	Statistical Methods	3

3. MSME Research and/or Elective Course Requirements

The final courses and/or research hours will depend on the MSME plan being pursued. Options include:

ME 599	Thesis Research (Up to 6 hours)	6
ME 500-level, and/or		
ME 600-level, and/or		
MTE 500-level, and/or		
AEM 500-level, and/or		
CS 500-level, and/or		
CHE 500-level, and/or		
GES 500-level, and/or		
ECE 500-level		

Note that no more than 50% of these hours may be from outside Mechanical Engineering (ME) without advisor approval. Courses not contained by the parameters of this list must have advisor approval.

Transfer Credit

For information on transfer credit (p. 18), refer to the UA graduate catalog or click on the highlighted text.

Accelerated Master's Program

Current Mechanical Engineering (ME) and Aerospace Engineering and Mechanics (AEM) undergraduate students at The University of Alabama with a 3.3 or higher GPA and 90 or more hours of undergraduate course credit are eligible to apply for the Accelerated Master's Program (AMP). AMP allows currently enrolled undergraduate students to simultaneously count up to 9 hours of graduate coursework toward both the undergraduate and graduate degrees. The **GRE test requirements are automatically waived for AMP applicants**. For additional information on Accelerated Master's Program (p. 13), pls. refer to UA graduate catalog or click on the highlighted text. AMP is also available to distance students currently enrolled in our undergraduate program as well as students in the dual MSME/MBA Program.

Dual MSME/MBA Program

Students may be simultaneously enrolled in the MSME and MBA Programs at The University of Alabama (including STEM path to MBA).

This dual program provides an overall reduced course credit hour requirement for both degrees through the double-counting of various courses. Both degrees must be earned at the same time to take

advantage of this program. Students interested in the Dual MSME/MBA Program must apply to each degree program separately and the two applications are reviewed for admission separately by each respective program. Please contact the Mechanical Engineering Department for more information on the Dual MSME/MBA Program.

Plan 1 - Thesis Requirements

The Master of Science in Mechanical Engineering (MSME) degree Thesis-Option (Plan I) is obtained by successfully completing the following requirements:

- Complete 24 hours of graduate-level course work (500-level and above) approved by the committee, where:
 - 12 semester course hours are in the major area, with six hours taken from the approved major core area. Major area courses are ME and ME cross-listed courses. Three hours of approved coursework in a closely allied area may be used with additional hours requiring advisor approval.
 - 6 hours are in the mathematics core area.
 - Any transfer credit request is submitted electronically within the first year.
- Pass 6 hours of ME 599 Thesis Research (does not impact GPA),
- Complete and present a thesis (see additional information in the section below), and
- Submit a course portfolio to the MSME Committee and have the committee chair provide the forms evaluating that portfolio to the ME Graduate Program Director. This information is not submitted to the graduate school.

Plan 2 - Non-Thesis Requirements

Non-Thesis Option (Plan II): 30 Credit Hours (On-Campus and Distance):

The Master of Science in Mechanical Engineering (MSME) degree Non-Thesis Option (Plan II) is obtained by successfully completing the following requirements:

- Complete 30 hours of graduate-level course work (500-level and above) approved by the committee, where:
 - 18 semester course hours are in the major area, with six hours being selected from the approved major core area. Major area courses are ME and ME cross-listed courses. Three hours of approved coursework in a closely allied area may be used with additional hours requiring advisor approval.
 - 6 hours are in the mathematics core area.
 - Any transfer credit request is submitted electronically within the first year.
 - This program differs slightly for students in the dual MSME/MBA program. A chart outlining this program is available upon request.
- Pass a comprehensive exam, and
- Submit a course portfolio to the MSME Committee and have the committee chair provide the forms evaluating that portfolio to the ME Graduate Program Director. This information is not submitted to the graduate school.

Comprehensive Exams

Students in the MSME non-thesis (Plan II) program must complete a comprehensive exam, typically taken during the final semester of study, and have the MSME Committee submit the electronic Master's Exam Form prior to the graduate school deadline for the intended semester of

graduation (see below). As agreed upon by the student and the three committee members, this exam may consist of:

- an oral examination based on course content in the major (or minor) field,
- a written examination based on course content in the major (or minor) field,
- a dissertation research proposal presentation approved by three dissertation committee members (for en route MSME or a second MSME degree), or
- an alternate form agreed upon by the student and committee.

Thesis Process Requirements

Students in the MSME thesis (Plan I) program must describe their completed research in a thesis document that is presented to the committee. To accomplish this, students must:

- Complete the electronic thesis committee formation form,
- Submit the completed thesis to the MSME Committee two weeks prior to the presentation,
- Present the research described in the thesis to the MSME Committee, which satisfies UA's comprehensive exam requirement, and
- Upload the revised (if necessary) final approved thesis and the *required electronic forms* to the graduate school web site prior to the deadline for the intended semester of graduation (see below).

Note that students are expected to give thesis presentations, proposal presentations, exam presentations, and dissertation defenses in person with the full committee in attendance. In the case of time conflicts, students are furthermore expected to reschedule a presentation to minimize the need for virtual participation. In the event it is not possible for all members to attend in person even with rescheduling, a presentation may occur with the student and at least a majority of the committee participating in person and the remainder of the committee participating virtually in accordance with The University's policy on virtual participation. Under extenuating circumstances, when the student and a majority of the committee cannot attend in person, the committee chair may petition the Graduate Program Coordinator or the Department Head for an exception by providing details as to why rescheduling the event will not enable one of the two acceptable formats to be used.

Time Limits for Degree Completion

For information on time limits for degree completion (p. 18), refer to UA graduate catalog or click on the highlighted text.

Academic Misconduct

The Mechanical Engineering Department expects all students to adhere to The University's policy on academic conduct (p. 7). Pls. refer to UA graduate catalog or click on the highlighted text for more information.

Withdrawals and Leave of Absence

The ME department adheres to The University's policies on withdrawals and leaves of absence (p. 206).

Academic Grievances

For information on academic grievances (p. 219), refer to the UA graduate catalog or click on the highlighted text.

Scholastic Requirements

The ME department expects all graduate students to remain in good academic standing. Graduate school policies on scholastic requirements

(p. 204) can be accessed on UA graduate catalog page or by clicking on the highlighted text.

Graduate School Deadlines

Important information regarding deadlines for graduation, including thesis submission and comprehensive exam deadlines can be found in UA graduate catalog page or by clicking on the highlighted text.

Application for Graduation

Information regarding the application for graduation (p. 18) can be found in UA graduate catalog page or by clicking on the highlighted text.

Mechanical Engineering, Ph.D.

While pursuing a Doctor of Philosophy (PhD) degree in mechanical engineering, the student will take graduate-level courses and conduct research with a faculty advisor and observe how these studies will lead to key engineering innovations and societal impacts in the field of mechanical engineering. Equipped with complementary and state-of-the-art computational and experimental facilities, the Mechanical Engineering Department has active research programs in the following three disciplinary groups; Dynamic Systems & Control (DSC), ThermoFluids Science (TFS), and Materials Processing & Manufacturing (MPM). Faculty teach graduate-level courses and conduct research in cross-disciplinary research thrust areas that include: automotive systems, robotics and human systems, automation and mechatronic systems, energy and building efficiency, internal combustion engines, manufacturing systems, additive manufacturing, and materials processing and modeling. Graduate courses in these areas, in addition to the general core graduate courses, provide the foundation for earning a PhD degree in mechanical engineering. Additionally, the student demonstrates mastery of the selected study area through qualifying exams, the proposal of a research topic, and the defense of a research-based dissertation.

In addition to traditional on-campus degree offering, our PhD program is also offered via the distance option. For more information on online PhD in Mechanical Engineering see UA Online Degree Programs. We are confident that distance education students will have a great opportunity to obtain their degrees with minimal travel or job disruption. Applicants interested in the distance approach are encouraged to contact faculty members in the area of research interest to inquire about the formulation of a research project that is suitable for completion via distance. Note that the distance option is restricted to students residing within the borders of the United States or serving on a U.S. military installation.

Students and faculty in the Department of Mechanical Engineering have access to state-of-the-art computational facilities and experimental capabilities. On-campus assets include numerous commercially available computational modeling software packages. In addition, high performance computing capabilities are accessible through The University of Alabama's Office of Information Technology. The department also has many state-of-the-art experimental facilities available for daily use by graduate students.

Qualified students in the Mechanical Engineering undergraduate program at The University of Alabama are eligible for early admission into the PhD program through the Accelerated Masters Program (AMP). This program allows students to double-count up to 9 hours of graduate credit toward their undergraduate degree.

Admission Requirements

For admission to the PhD Program, a prospective graduate student should have:

- a Master's degree in Mechanical Engineering,
- a grade point average of at least 3.0 on a 4.0 scale

or

- a Bachelor's degree in Mechanical Engineering or related area (see below),
- a grade point average of at least 3.3 on a 4.0 scale, and
- a combined verbal and quantitative GRE requirement of 300 or greater.

There is no minimum score on the writing section of the GRE for admission to the PhD Program. The GRE requirement is automatically waived for those applicants holding an MSME degree from an accredited program. BSME applicants with 5 or more years of field-related work experience may contact the ME Graduate Program Director to inquire about a GRE waiver request. A short Statement of Purpose describing possible research/study interests and a Resume are required for each application. Applicants should also submit three letters of recommendation.

Current MSME students with a grade point average of at least 3.5 on 4.0 scale and 9 or more graduate credit hours may also apply for admission to the PhD program with the recommendation of his or her major advisor.

Applicants in related areas such as science and mathematics are encouraged to apply; however, prerequisite undergraduate courses will be required that will not apply for graduate credit.

International applicants whose first language is not English may be required to submit TOEFL scores of 92 or higher.

Accelerated Masters Program (AMP) – PhD Direct Admit

Current Mechanical Engineering (ME) undergraduate students at The University of Alabama with a 3.3 or higher GPA and 90 or more hours of undergraduate course credit are eligible to apply for the PhD direct admit program via the Accelerated Masters Program (AMP). AMP allows undergraduate students to earn admission to the PhD program and to simultaneously count up to 9 hours of graduate coursework toward both the undergraduate and graduate degrees. The **GRE test requirements are automatically waived for AMP applicants.**

Application Deadlines

There are no formal deadlines for graduate applications. Once an application is complete, the internal review process typically only takes a couple of weeks. However, **international applicants** should consider the time required to obtain any necessary travel documents. Only after the student has been accepted and the University has provided the appropriate paperwork can an applicant apply for appropriate travel documents. This process can take between two and six months, depending on the country of origin. Students must complete this process and arrive on campus prior to the first day of class. All of these steps should be considered by international students when planning to apply.

Degree Requirements

Graduate School Degree Requirements and College of Engineering PhD degree requirements are detailed below. Also refer to the online Graduate Handbook on the departmental homepage.

Doctor of Philosophy

The doctorate requires 48 credit hours of coursework beyond the Bachelor's degree, a comprehensive qualifying exam, and a dissertation. Students with a Master's degree will usually receive credit for 24 hours of course work. The dissertation must sufficiently document original research that makes a significant contribution to the profession. Note that additional requirements may be stipulated by the UA Graduate School.

- A minimum of 48 semester hours (excluding ME 699 Dissertation Research) of approved courses that together satisfy all other course requirements for the degree
- A minimum of 24 semester hours of coursework in the major technical area, of which 9 hours may be in closely related supporting areas and of which 3 hours may be graduate research seminar
- A minimum of 12 semester hours in any minor technical areas included in the student's program of study
- The student must pass a qualifying examination and present a research proposal.
- An approved dissertation and a minimum of 24 semester hours of ME 699. Note that once ME 699 hours are started, there is a continuous registration requirement as described elsewhere in the graduate catalog.
- The student must provide a course portfolio to the dissertation committee. Refer to the online Graduate Handbook on the departmental web page for additional details.

Early in the graduate program, each student confers with a faculty adviser to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study is prepared and submitted to the Graduate School. The PhD Plan of Study is available at the Graduate School website under the forms section. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree. Otherwise, a "hold" may be placed on future registration. If later there are changes in the Plan of Study, the student simply submits an amended PhD Plan of Study to the Graduate School at the time that the form for Admission to Candidacy for Doctoral Degree is submitted. A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the comprehensive (preliminary) examination.

See the online Graduate Catalog (p. 6) for details on Plan of Study, Admission to Candidacy, and all other Degree Requirements.

MTE519 Solidificatn Science

Hours 3

Overview of the principles of solidification processing, the evolution of solidification microstructure, segregation, defects and the use of analytical and computational tools for the design, understanding and use of solidification processes.

MTE539 Metallurgy Of Welding

Hours 3

Thermal, chemical, and mechanical aspects of welding using the fusion welding process. The metallurgical aspects of welding, including microstructure and properties of the weld, are also covered. Various topics on recent trends in welding research.

Prerequisite(s): MTE 380

Materials/Metallurgical Engineering, Ph.D.

The Department of Metallurgical & Materials Engineering (MTE) offers a bachelors and masters of science along with a Ph.D. In addition, many of the MTE faculty are members of the UA Tri-campus Materials Science PhD program giving materials orientated graduate students a range of academic opportunities.

Degree Requirements

The program for the PhD in the area of materials/metallurgical engineering is conducted jointly with The University of Alabama at Birmingham (UAB). This arrangement permits sharing of facilities, exchange of faculty, joint seminars, and a wide choice of dissertation advisers. The PhD degree in the area of materials science is also offered, in collaboration with UAB and The University of Alabama in Huntsville. Full details of this interdisciplinary program (p. 771) may be found in this catalog.

For additional information, see the Graduate School's general requirements for advanced degrees below.

Metallurgical Engineering, MS

The MTE department is one of only eight accredited metallurgical degree granting institutions in the United States. Its core emphasis in metallurgy and materials provides students depth in structure-processing-property relationships.

Admission Requirements

Prospective students will need to provide a statement of purpose, official academic transcript, references and submission of an official GRE score. International applicants (non-native English speakers) will also be required to complete a provisional language exam (TOEFL or IELTS or PTE.) Regular admission requirements are >3.0 GPA; >300 revised GRE (>1000 general GRE); and > 550 pBT or 79iBT TOEFL, >6.5 IELTS, >59 PTE. These scores do not necessarily grant admission to the department. Competitive MTE entering graduate applications have scores exceeding these minimums.

See the Admission Criteria section of this catalog for more information.

Degree Requirements

Plan I (thesis) is the standard MS degree plan. However, in exceptional cases, a student who has the approval of his or her supervisory committee may follow Plan II (non-thesis). A student who believes there are valid reasons for using Plan II must submit a written request detailing these reasons to the department head no later than midterm of the first semester in residence.

Plan I - Thesis	Hours
Metallurgical and Materials Engineering Courses	18
Related Fields or Major	6
With the approval of the major department, the remainder of the coursework may be completed in either the major or related fields.	
Thesis Course	
MTE 599 Thesis Research	6
Total Hours	30

However, in exceptional cases, a student who has the approval of his or her supervisory committee may follow Plan II (non-thesis). A student who believes there are valid reasons for using Plan II must submit a written request detailing these reasons to the department head no later than midterm of the first semester in residence.

College of Human Environmental Sciences

Department of Clothing, Textiles, and Interior Design (p. 676)

Department of Consumer Sciences (p. 676)

Department of Health Science (p. 679)

Department of Human Development and Family Studies (p. 704)

Department of Human Nutrition and Hospitality Management (p. 707)

Human Environmental Sciences, M.S. (p. 720)

General Degree Requirements

The following is a brief summary of requirements; students should confer with their department heads for additional information. A program plan for completing course requirements for the master's degree must be approved by the student's major advisor and committee and filed in the office of the dean of the College of Human Environmental Sciences no later than the beginning of the second semester of graduate study. Program plans are based on undergraduate preparation, previous experiences, and expressed objectives for graduate study. Students pursuing the Master of Science in Human Environmental Sciences can specialize in one of the following areas: clothing, textile, and interior design; consumer sciences; and human environmental sciences. Students may complete degree requirements following Plan I (thesis) or Plan II (nonthesis).

Plan I (thesis)

All Plan I students must earn a minimum of 24 semester hours of credit, including HES 509 Research Methods, one course in statistics, and 18 hours in courses in the area of specialization and in areas supporting the specialization. In addition, all Plan I students must complete at least six semester hours of thesis research and write a thesis. The format of the thesis may vary, depending on the advice and consent of the thesis committee. A final oral examination is required upon completion of the thesis, and a manuscript of publishable quality based on the thesis research is expected of each Plan I degree candidate.

Plan II (nonthesis)

Students pursuing the Master of Science in Human Environmental Sciences degree under Plan II complete 30 hours of coursework, including HES 509, and a final evaluation as determined by departmental guidelines.

Information on all other degree requirements is in the Degree Requirements (p. 18) section of this catalog.

Repeating Courses in Selected Programs

Students majoring in Human Nutrition, Consumer Sciences, or Human Development and Family Studies are permitted to repeat a course in which a grade of "C" was earned. The option to repeat a course is not available to HES students in any program other than these three. Both grades earned will be recorded on the transcript and will be included in the computation of the GPA. Only one attempt will count in the Plan of Study, and the second attempt will not reduce the minimum number of hours required for the degree.

The Graduate Council approved the above policy as a waiver to the usual policy on not being able to repeat a course in which a "C" was earned. The policy's effective date was September 25, 2007.

Admission Requirements

The Master of Science degree offered through the College of Human Environmental Sciences reflects a diverse range of missions and objectives. Enrollment in all specializations is limited and competitive. Admissions are supervised by committees of the graduate faculty in each of the specializations. General application and admission requirements are outlined in the Admission Criteria and Application (p. 16) sections of this catalog. Students with deficiencies in undergraduate preparation may be required to complete designated undergraduate requirements before admission to the program.

See the Admission Criteria section of this catalog for more information.

HES509 Research Methods

Hours 3

This course is an introduction to scientific methods appropriate for human sciences. It is designed to acquaint students with types of research, methods, and materials necessary for scientific inquiry and to provide students with practical steps to conduct and understand scientific research. Emphasis will be placed on quantitative, qualitative, and mixed methods designs appropriate for research in human sciences.

HES554 Management and Administration in Sports Business Management

Hours 3

This course is designed for sport professionals desiring to increase their knowledge and understanding of management and administration issues in the sport industry.

Prerequisite(s): Graduate student in Human Environmental Sciences

HES565 Legal and Ethical Issues in Sports Business Management

Hours 3

This course is designed for student/prospective sport industry professional desiring to increase their knowledge and understanding of current legal and ethical issues in sports business management and the sport industry. This class (HES 565) uses Blended (Hybrid) Delivery Methods of readings, classroom presentations and online and residential exams to present critical topics.

Prerequisite(s): Graduate student in Human Environmental Sciences

HES570 Fellowship in Sports Business Management

Hours 3

Under the supervision of an approved and qualified sports business management professional, the graduate student will experience activities related to job specific tasks in sports business management. This full-time work experience/fellowship in the sport industry must take place in a professional organization, in which the student has been selected and offered a fellowship.

Prerequisite(s): Graduate student in Human Environmental Sciences

HES590 Special Problems in Human Environmental Sciences

Hours 3-6

A detailed examination of a discipline-specific issue, topic or problem that impacts the lives of individuals, families or communities.

HES591 Special Problems in Human Sciences

Hours 3

This course is open to qualified graduate students who will study special problems in human sciences.

HES592 Special Problems in Sports Business Management

Hours 3

Under the supervision of an approved and qualified sport management professional, the graduate student will experience activities related to job specific tasks in sport management. This full-time work experience/fellowship in the sport industry must take place in a professional organization, in which the student has been selected and offered a fellowship.

Prerequisite(s): Graduate student in Human Environmental Sciences

HES598 Non-Thesis Research

Hours 1-6

Development of a professional paper on a topic selected by the student and approved by the graduate committee.

Prerequisite(s) with concurrency: CSM 562 and HES 509 and CSM 564 and CSM 572

HES650 Special Topics In Hes

Hours 3

Critical analysis of current issues in selected areas of human environmental sciences. May be taken up to a total of four times.

Conflict Resolution Certificate

This 15-credit hour certificate program teaches ways to manage consumer, workplace, and personal conflict through effective communication, emotional intelligence skills, and cooperative problem solving. From a foundation in conflict theory, students learn strategies to prevent, reduce, and resolve conflict with the goal of preserving, and in many cases improving, relationships. All 15 hours required for the certificate are offered online.

Consumer Sciences, MS

The Master of Science in Consumer Sciences is a 30-credit-hour degree program that offers advanced study in two complementary concentration areas.

Consumer Economics Concentration

The Consumer Economics concentration offers an applied microeconomics approach to understanding consumers in home, policy, and market environments. This concentration prepares students to continue study in a doctoral program or employment in a research-oriented setting investigating consumer decision-making, personal finance, and related family and consumer policy. This research-oriented concentration requires the successful completion of a thesis.

Family Financial Planning and Counseling Concentration

The Family Financial Planning and Counseling concentration focuses on the knowledge and skills necessary for a career in financial planning and related careers. The curriculum fulfills the educational requirements to sit for the CFP® certification exam that leads to the CERTIFIED FINANCIAL PLANNER™ certification registered with the Certified Financial Planner Board of Standards, Inc. Students who successfully complete the concentration may sit for the CFP® certification exam that leads to the CERTIFIED FINANCIAL PLANNER™ certification. The concentration also fulfills the educational requirements to sit for the Accredited Financial Counselor® exam offered by the Association for Financial Counseling and Planning Education®. Successful completion of a capstone project, practicum, or portfolio is required.

Plan I: Thesis

The Consumer Economics Concentration requires completion of a thesis (Plan I). Upon admission to the M.S. program in Consumer Sciences, students are assigned an interim advisor (i.e., program coordinator or program director). The interim advisor will assist the student in the evaluation of previous work and selection of coursework. Students

identify a permanent master's program advisor no later than the end of the first year of study for Consumer Economics concentration and end of the first semester of study for FFPC concentration. Advisors help students plan a course of study and research or professional internship experiences. Students should consult their advisor at least once per semester to review their progress. Students pursuing the Consumer Economics Concentration will select a thesis advisor who will assist in the formulation of the thesis committee. A student's advisor may also serve as their thesis advisor.

See the Master's Degree Academic Policies section of this catalog for more information.

Plan II: Non-Thesis

The Family Financial Planning and Counseling Concentration is a Plan II program. As such, no thesis is required. Instead, Plan II students complete a supervised practicum or a capstone project.

See the Master's Degree Academic Policies section of this catalog for more information.

Athletic Training, MSAT

Athletic trainers (ATs) are highly qualified, multi-skilled health care professionals who provide preventive services, emergency care, clinical diagnosis, therapeutic intervention, and rehabilitation of injuries and medical conditions. The University of Alabama Athletic Training Program is a limited-selection, two-year professional master's degree program.

Our mission is to prepare students for the Board of Certification (BOC) examination and successful careers in athletic training. To this end, we will provide quality graduate coursework with innovative and hands-on learning experiences in didactic, laboratory, and clinical education that emphasizes evidence-based practice, interprofessional collaboration in health care, and equitable patient-centered care.

Our program is housed in Capital Hall, a new facility that delivers ingenuity in the use of classroom lecture and lab spaces. All classrooms, offices, and laboratories are located under the same roof, providing more engagement between faculty and students, further developing mentorship that lasts beyond graduation.

The Master of Science in Athletic Training is a 46-credit hour master's program that includes in-person, hybrid, and online classes paired with a clinical education and experience. Students that choose the thesis track will have an additional four hours of research coursework for a total of 50 credit hours. This program requires simultaneous didactic and clinical preparation.

Each semester of the program includes clinical education experiences that parallel the professional coursework. Students are assigned to a different preceptor each semester to strengthen weaknesses, develop confidence, and push boundaries.

On campus, students will work with athletes of the highest caliber through our partnership with Alabama Athletics. Each student will experience either pre-season or post-season in addition to two immersive experiences, complete with travel, as a part of a team's support system across 16 different clinical sites within UA's intercollegiate athletics.

Designed to ensure your exposure to diverse educational experiences, clinical education continues off campus with rotations in local high schools, physical therapy clinics, colleges, physician offices, and the UA Student Recreation Center.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission to the Master of Science in Athletic Training (MSAT) program an application must include:

1. Have a minimum of a 3.0 cumulative grade point average (GPA), and a grade of C or better on all prerequisite courses. Students must complete all prerequisite courses listed prior to successfully matriculating to the MSAT program.
2. Have Basic Life Support and First Aid Certification from the American Heart Association or American Red Cross.
3. Have documentation of at least 60 hours of athletic training observation experience with a certified athletic trainer.

Prerequisite Courses

Prerequisite courses include: 3 credit hours each of Psychology, Care and Prevention, Personal Health, Statistics, Kinesiology/Biomechanics, and

Exercise Physiology; 4 credit hours of Biology with lab, Chemistry with lab, and Physics with lab; and 8 credit hours of Anatomy and Physiology with lab (combined or separate).

Admissions Procedures

- Apply to the MSAT Program through The University of Alabama Graduate School.
- Submit the following documents with your application:
 1. A resume or curriculum vitae.
 2. A personal statement of professional and education goals.
 3. Three letters of recommendation from educators, employers, or healthcare professionals.
 4. Evidence of 60 hours of observational experience with a certified athletic trainer using UA's Observational Experience Form.*
- Participate in a virtual interview with the UA AT Program Selection Committee, if offered. An interview is not a guarantee of admission.

Written Technical Standards

The Athletic Training Program (AT Program) at The University of Alabama is a rigorous and intense program that places specific requirements and demands on its enrolled students. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of physically active individuals. The technical standards set forth by the AT Program establish the essential qualifications considered necessary for admitted students to achieve the knowledge, skills, and competencies of an entry-level certified athletic trainer. These standards are also necessary for meeting the expectations of the program's accrediting agency, the Commission on Accreditation of Athletic Training Education (CAATE). All students admitted to the AT Program must meet the following abilities and expectations. In the event a student is unable to fulfill these technical standards, with or without reasonable accommodation, the student will not be admitted into the professional program. Compliance with the program's technical standards does not guarantee a student's eligibility for the Board of Certification (BOC) examination.

Candidates for selection to the Athletic Training Program must demonstrate:

- 1) The ability to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm.
- 2) The ability to perform appropriate physical examinations using accepted techniques; this includes, but is not limited to, the ability to observe, position, lift and carry or otherwise transport patients. Some tasks require the ability to lift the equivalent of an adult human's body weight and students must also possess sufficient physical stamina to complete long periods of standing, sitting and moving in a variety of clinical settings. Students must also be able to accurately, safely and efficiently use equipment and materials during the assessment and treatment of patients.
- 3) The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice.

4) The ability to record physical examination results and a treatment plan clearly and accurately.

5) The ability to maintain composure and continue to exercise good judgment and to function appropriately during periods of high stress.

6) Flexibility and the ability to adjust to changing situations and uncertainty in clinical settings.

7) Affective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Candidates for selection to the AT Program will be required to verify they understand and meet these technical standards or that they believe that, with certain accommodations, they can meet the standards. The Office of Disability Services will review the documentation of a student who states he/she could meet the program's technical standards with accommodation and confirm that the stated condition substantially limits the student. If a student states he/she can meet the technical standards with accommodation, then the University will determine whether it agrees that the student can meet the technical standards with reasonable accommodation. This includes a review of whether the accommodations requested are reasonable, taking into account whether accommodation would jeopardize clinician/patient safety, or the educational process of the student or the institution, including all coursework, clinical experiences and internships deemed essential to graduation.

Injury, illness or other situations may temporarily impact a student's ability to meet our Written Technical Standards. This, in turn, would impact a clinical placement and/or ability to participate in some lab activities. In the event of injury or illness, the Medical Director will work with the Office of Disability Services to determine the potential and appropriateness of any accommodations. The student will be required to complete an amended technical standards form for the duration of the accommodation period and a new document following full clearance for return.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Capstone/Non-Thesis Option		Hours
ATR 500	Professional Practice	3
ATR 503	Patient-Centered Care	2
ATR 505	Examination and Diagnosis I	3

ATR 550	Culminating Experience II	2
ATR 599	Thesis Research (Students will take ATR 599 in 2 semesters for 6 total hours)	6
Total Hours		50

Students will take 3 clinical integration courses during which they will complete clinical experiences at affiliated clinical settings. In addition, the curriculum includes 2 immersive clinical experiences with one lasting a minimum of 4 weeks (ATR 530) & the other lasting 8 weeks (ATR 550). All of these courses have assigned academic credit and are included in the list above.

Students will complete a non-thesis capstone project (ATR 598) or a thesis (ATR 599). Both of these options have assigned academic credit and are included in the list above.

Transfer Credit

Due to specialty accreditation standards, students cannot transfer any courses into the MSAT program.

Capstone Requirement

Students will complete a culminating experience in ATR 550 Culminating Experience II to meet the Capstone Requirement.

Clinical Requirements

Each semester of the program includes clinical education experiences linked directly to the professional coursework through the Clinical Skills courses. Students are assigned to a different preceptor each semester of program enrollment. In accordance with accreditation guidelines and program philosophy, students complete exposures to a variety of patients. Each student will complete a clinical rotation requiring either pre-season or post-season experience and travel. Clinical education

assignments are designed to ensure the student exposure to diverse educational experiences through work with a variety of Preceptors, patients and allied medical and medical professionals in many different settings. In addition to the 16 clinical sites within the UA Department of Intercollegiate Athletics, a range of local high schools, physical therapy clinics, colleges, physician offices and the UA Student Recreation Center serve as affiliated clinical settings within the AT Program.

While in clinical education experiences, students must be directly supervised by your preceptor. Students are expected to comply with all facility and organizational rules that are outlined by the assigned preceptor and all patient care decisions should be discussed with a preceptor prior to providing care.

In order to be allowed to participate in clinical education experiences through The University of Alabama Athletic Training Program, students must maintain clearance through Castlebranch. In order to receive and maintain clearance, students must submit the following requirements by the assigned dates (varies each year). Students that do not meet the requirements will not be allowed to begin his/her clinical experiences and students that fail to maintain clinical experience will be removed from his/her clinic site. Failure to participate in clinical experience will result in earning a grade of F in clinical courses and will delay progress through the AT Program.

- Background Check
- 10-panel Drug Screen
- CPR certification
- Physical Examination
- Influenza (vaccine or signed declination)
- Varicella (chicken pox) - 2 vaccinations or positive antibody titer
- Measles, Mumps, & Rubella (MMR) - 2 vaccinations or positive antibody titer
- Tetanus, Diphtheria, and Acellular Pertussis (TDaP) - TDaP vaccination within the past 10 years
- Tuberculosis (TB) - 1 step TB skin test OR QuantiFERON-TB Gold Plus test
- Child Protection Training
- Confidentiality Statement

At the time of publishing, the COVID vaccine is not required for students at The University of Alabama or within the Athletic Training Program; however, some clinical sites have vaccine requirements and students that do not have the COVID vaccine will not be allowed to complete clinical experiences at sites that have site-specific vaccination requirements. Further, policies regarding COVID vaccination continue to evolve. University-wide requirements will be followed.

Students are required to pass a 10-panel drug screen for clinical clearance. Students are required to undergo additional screening for drugs, alcohol or other controlled substances if:

- injury occurs at clinical site.
- there is a medication or handling discrepancy at clinical site.
- medication may have been stolen or improperly used at clinical site (by anyone associated with site).
- the student appears unfit for duty as a result of use reasonable cause or suspicion to believe student is under the influence or is otherwise impaired & unable to perform 1 or more essential functions of the placement with or without reasonable accommodation.
- the student poses a direct threat to health or safety of self or others specifically because of use.

A positive result from a required additional screening will result in your removal from the clinical setting, which will impact your grade in the associated clinical class. You will undergo a 10-panel urinalysis on a weekly basis until your test is negative. You will be cleared to return to your clinical setting following that negative test. Athletic Training Students are responsible for all costs associated with drug testing. Repeated positive tests may result in your release from the AT Program.

Confidentiality Requirements

In collecting, maintaining, and disclosing personnel information, the University and the AT Program affiliated settings make every effort to protect employee and patient privacy rights and interests and prevent inappropriate or unnecessary disclosures of information from any patient's file or record.

While complying with governmental reporting and record keeping requirements, the clinical settings associated with the AT Program strive to ensure that it handles all personal and job-related information about patients in a secure, confidential, and appropriate fashion. Therefore, athletic training students should prevent and not participate in the unauthorized access, use, review, disclosure, dissemination, alteration, or destruction of confidential information regarding patients, students, or employees. Such confidential information includes, but is not limited to:

- Information from student records in violation of the institution's policy on confidentiality of student records and/or the Family Educational Rights and Privacy Act (FERPA);
- Information from employee records in violation of the institution's personnel privacy policy or state or federal laws;
- Information from internal discrimination/ harassment investigations when such information is required to be kept confidential and shared only on a need to know basis;
- Any personally identifiable health information relating to the past, present, or future physical or mental health condition of an individual, the provision of health care to an individual, or the past, present, or future payment for the provision of health care to an individual, in violation of state or federal laws (including but not limited to: HIPAA, ADA, Section 504 of the Rehabilitation Act, or FMLA)

Violation of the Confidentiality Policy will result in release from the AT Program.

Professional Appearance and Relationships Guidelines

There will be program-wide and site-specific professional appearance and relationship guidelines. Failure to comply with these guidelines may limit clinical access and result in dismissal from the MSAT Program. Students will be provided with these guidelines at the start of each academic year and will sign an attestation form to indicate their understanding and agreement to comply with the guidelines.

Gambling

Students enrolled in MSAT Program shall not knowingly:

- Provide information to individuals involved in organized gambling activities concerning intercollegiate athletics competition;
- Solicit a bet on any intercollegiate or professional team;
- Accept a bet on any team representing the institution;
- Solicit or accept a bet on any intercollegiate competition for any item (e.g. cash, shirt, dinner) that has tangible value; or

- Participate in any gambling activity that involves intercollegiate athletics or professional athletics, through a bookmaker, a parlay card or any other method employed by organized gambling.

Athletic training students shall not participate in any gambling activity that involves intercollegiate or professional athletics, through a bookmaker, a parlay card or any other method employed by organized gambling (e.g. sports "pools", internet gambling, "800" numbers, etc.). This includes other methods not run through organized gambling (e.g. pools, fantasy leagues, etc.), even if the bet or value of the prize is a "friendly" wager. Violation of the Gambling Policy will result in your release from the AT Program.

Plan I - Thesis Process Requirements

The MSAT Program is a thesis-optional program. Students that are interested in the thesis option should discuss this with the AT Program Director as early as possible. There are specific deadlines that need to be met for the thesis process and failure to meet this deadlines may result in a delay in graduation and AT certification. A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be directly related to Athletic Training and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. Students set up their committee through the Graduate Academic Activities portal on the Graduate School website. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. The majority of the thesis committee must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the student's thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. All members must agree that the student is ready for the final oral thesis defense. A final oral thesis defense is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral thesis defense unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In circumstances where virtual participation is necessary, all participants must follow the Virtual Participation guidelines found below.

Plan II- Non-Thesis Process Requirements

The non-thesis option is the plan that best fits the professional goals of most MSAT students. In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all MSAT students. The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. The capstone experience will be completed as part of ATR 598 Non-Thesis Research in the final semester of the MSAT Program.

Time Limits for Degree Completion Requirements

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master's students. More information on the Graduate School policy on Time Limits for Degree completion can be found [here](#).

Student Progress Requirement

Students admitted to the MSAT Program must meet the following criteria for retention:

- earn a grade of C or higher in all MSAT courses
- uphold The University of Alabama Code of Student Conduct and the NATA Code of Ethics
- meet all clinical clearance deadlines (through CastleBranch) without delay
- follow all AT Program policies and procedures
- comply with all clinical education site- specific policies and procedures during assignment to the corresponding clinical site
- show commitment to the AT Program through demonstration of academic, organizational and financial ability to participate in all program requirements

Students that do not earn a C or higher in their coursework will have to repeat the course in the next semester that it is offered before continuing on through the course sequence. This will delay graduation approximately 1 academic year.

Academic Misconduct Information

According to the Code of Academic Conduct, academic misconduct by students includes all acts of dishonesty in any academically related matter and any knowing or intentional help or attempt to help, or conspiracy to help, another student commit an act of academic dishonesty.

Any suspected violation of the Academic Honor Code will be sent to the Academic Misconduct Monitor (in HES: Assistant Dean). Except in divisions that have alternate academic misconduct policies that have been approved by the academic vice president, academic misconduct cases shall be resolved by the divisional academic misconduct monitor or the academic dean of the division in which the alleged action took place after consultation with the academic dean or monitor in the division where the student is enrolled. However, with the concurrence of both deans, the responsibility for resolving an academic misconduct case can be transferred to the dean of the division in which the student is enrolled. Appeals from the monitor's decisions may be made to the academic

dean; appeals from the academic dean's decisions may be made to the Office for Academic Affairs.

The Graduate School Academic Misconduct policy can be found [here](#).

Withdrawals and Leave of Absence Information

All courses within the MSAT Program are in a required sequence and must be completed in this order. Withdrawing from an individual course cannot be done as each semester class is a co-requisite for each other.

A graduate student may withdraw from the university (i.e., withdraw from all courses in the semester), either for non-medical or medical reasons, in accordance with deadlines. The first thing a student considering withdrawal should do is to consult with his or her academic advisor.

It is the student's responsibility to initiate a withdrawal through myBama and provide the information necessary to complete the withdrawal process. Academic Bankruptcy (described in the Undergraduate Catalog) is not available to graduate students.

Withdrawing from a semester will delay graduation. MSAT students can re-take the course sequence in the next semester that the courses are offered. Students should contact student accounting for information about the financial effects of withdrawing, including information on how federal financial aid, loans, and scholarships may be affected.

Under compelling circumstances beyond the student's control, a graduate student may request that the department petition the Graduate School with the rationale for granting a leave of absence. If granted by the Graduate School, a leave of absence will cover one or more upcoming semesters rather than any prior semester(s). A leave of absence is not a method of avoiding continuous registration requirements, and it does not lengthen the time limit. When a student returns from a leave of absence, the Graduate School must be notified and will work with the department and student to determine the number of semesters remaining on the time limit and the degree requirements that remain.

The Graduate School Withdrawals and Leave of Absence information can be found [here](#).

Academic Grievances Information

Students should attempt to resolve academic grievances with the course instructor. If the issue cannot be resolved, the student should contact the AT Program Director and/or Health Science Department Chair. If the grievance still cannot be resolved, the Internal Complaint Process for Students can be found [here](#).

The Graduate School Academic Grievances information can be found [here](#).

Scholastic Requirements

In addition to the requirements for MSAT Program Retention, The Graduate School scholastic requirements will have to be met. The Graduate School scholastic requirements can be found [here](#) (p. 204).

Graduate School Deadlines Information

Graduate School deadlines can be found [here](#).

Application for Graduation Information

Application for Graduation information can be found [here](#) (p. 18).

Health Education & Promotion, MPH

The Department of Health Science offers a Master's of Public Health (MPH) degree program in Health Education & Promotion. The program is offered both on campus and through a distance education format (online). The 42-credit-hour MPH program provides a high quality, student-oriented, and health-equity-focused curriculum developed to deliver core public health competencies that emphasize the application of health education and promotion. Designed for eventual Council on Education for Public Health (CEPH) accreditation, the curriculum offers education in the foundational areas of public health (health behavior, environmental health, epidemiology, biostatistics, and health services administration) and is tailored to train health promotion professionals to plan, implement, and evaluate programs to promote individual and population-based health. Upon program completion, students are eligible to take two national exams for professional certification: Certified Health Education Specialist (CHES) exam and the Certified in Public Health (CPH) exam.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. At least 3 letters of recommendation.
 - Applicants should seek out 3 recommenders who are familiar with their skills and abilities.
 - It is not ideal to have letters written by family or friends.
 - Quality letters of recommendation are typically at least one page in length.
 - Applicants should reach out to the MPH Program Director if more guidance on selecting recommenders is needed.
2. A Résumé or Curriculum Vita (CV)
3. A Statement of Purpose that details:
 - Interests in the field of Health Promotion and related fields
 - Any skills, abilities, or experience applicants may have that would support enrollment in the selected program
 - Professional goals and aspirations
 - How the selected program aligns with the applicant's goals and aspirations
 - Any other information applicants would like to share regarding their qualifications to study at the graduate level at UA

The Statement of Purpose should be approximately 2 pages in length, double-spaced, and the writing should be representative of a potential graduate student. Please be sure to proofread and edit your statement before submitting it with a completed application.

Please note that no academic credit, course waivers, or credit shall be granted for life experience or previous work experience. Also, a student cannot earn both the MA in Health Studies and the MPH degrees. Courses completed can only be used to earn one degree from the Department of Health Science.

All applicants who receive an offer of admission must accept that offer by submitting their intent to enroll. The link to accept an offer of admission is in the official notice of communication sent by the UA Graduate School. Once a student has accepted admission, they will be required to have an initial advising appointment with the MPH Program Director.

See the Admission Criteria section of this catalog for more information.

Total Hours **42**

*Under the guidance of a department faculty advisor, students will work with a preceptor in a practice-based setting (e.g., community or volunteer organization, health department, etc.) and produce two high-quality work products (e.g., needs assessments, tool kits, trainings) that benefit the organization and advance public health practice. The work products produced must demonstrate student attainment of at least five MPH competencies (3 foundational and 2 program). By the end of the Applied Practice Experience (APE), all students must produce a high-quality written report and deliver an oral presentation (e.g., PowerPoint or poster) to complete their Integrative Learning Experience (ILE) project.

Transfer Credit

Applicants interested in transferring graduate credit to the MPH program from an outside institution should reach out to an MPH Program Coordinator. *Please note the Department of Health Science allows a maximum of 6 hours of transfer credit as approved by a Program Coordinator. All transfer credit must have been completed with a B or higher from a regionally accredited school within 6 years of the date of admission to the program.* See also the UA Graduate School's information on Transfer Credit (p. 18).

Accelerated Master's Program (AMP)

Information on the AMP is listed in AMP section of this catalog

Specialized Degree Programs

The Department of Health Science offers some specialized degree programs with other academic programs.

Accelerated Master's Program (AMP) for current BSPH undergraduate students

MA in Anthropology/MPH

PhD in Anthropology/MPH

Dual Graduate Programs - MA in Anthropology/MPH and PhD in Anthropology/MPH

The dual degree programs blend excellent graduate training in biocultural medical anthropology with rigorous, applied preparation in public health education and promotion (MPH in health education and promotion).

The aim is to produce graduates versed in the assessment of and engagement with health as a biological, cultural and structural phenomenon, and trained to engage multiple levels of the social ecology of health.

Application and Admission - MA in Anthropology/MPH Program

Applicants must meet the admission criteria for each program

Applicants will indicate interest in the dual degree program in the notes section of the application and in their Statement of Purpose.

- Applicants will identify a departmental 'home' (anthropology or health science) in their Statement of Purpose.

- Departments will review applications separately. If the review decisions are the same (accept or reject):
 - The 'home' department will notify applicants of their status
- If the review decisions are not the same, the departments will convene a meeting (virtual or in person) to review files of applicants whose status is in dispute.
 - If the parties cannot agree on applicant status, the departments will notify applicants separately of their decisions.
 - Departments will track the number of disputed applications and will use this tracking as a basis for periodic review of admissions decisions and student performance in the program.

PhD in Anthropology/MPH Program

Applicants must meet the admission criteria for each program

Each department's admission committee will thoroughly review applicant transcripts to ensure that undergraduate course content and performance indicate the potential to pursue two advanced degrees successfully in a compressed time frame.

- Applicants will indicate interest in the dual degree program in the notes section of the application and in their Statement of Purpose. Students who develop an interest in the dual degree program after matriculation will need to formally apply and go through the admissions process for the second department.
- Applicants will identify a departmental 'home' (anthropology or health science) in their Statement of Purpose.
- Applicants will identify a faculty mentor, who must then agree to take the student on as a mentee.
- Departments will review applications separately. If the review decisions are the same (accept or reject):
 - The 'home' department will notify the applicant of her/his status
- If the review decisions are not the same, the departments will convene a meeting (virtual or in person) to review files of applicants whose status is in dispute
 - If the parties cannot agree on applicant status, the departments will notify the applicant separately of their decision.
 - Departments will track the number of disputed applications and will use this tracking as a basis for periodic review of admissions decisions and subsequent student performance.

MA/MPH Dual-degree completion requirements:

Students enrolled in the dual degree program must complete the minimum required credit hours for both programs. After review of the curricula and syllabi, the partner departments have identified 12 hours of course work in anthropology that may count toward both degrees, given the equivalent content and rigor.

- ANT 600 Research Design (3 hr.) may substitute for HHE 506 Tech Research In Health (3 hr.).
- ANT 502 Health Inequities (3 hr.) may substitute for HHE 587 Health Disparities (3 hr.).

The Anthropology Department reciprocates this acceptance. The Health Science courses named above (HHE 506 and HHE 587) may substitute for their identified anthropology counterparts (ANT 600 and ANT 502, respectively) in the curricular plans of public health students pursuing a master's degree in anthropology. Additionally:

- Two of the following ANT Electives may substitute for two HHE Electives. These electives supply theoretical, methodological, or content expertise beneficial to either discipline. All have a health focus.

- ANT 505 Culture, Mind, and Behavior
- ANT 511 Culture Health & Healing
- ANT 550 Probs In Anthropology: Legal Anthropology
- ANT 574 Neuroanthropology

All courses are 3 credit hours.

Completion of the capstone experiences required by both degree programs must be met to receive the dual degrees.

PhD in Anthropology/MPH Dual-Degree Completion Requirements:

Students enrolled in the dual degree program must complete the minimum required credit hours for both programs. After review of the curricula and syllabi, the partner departments have identified 12 hours of course work in anthropology that may count toward both degrees, given their equivalent content and rigor:

- ANT 600 Research Design (3 hr.) may substitute for HHE 506 Tech Research In Health (3 hr.).
- ANT 502 Health Inequities (3 hr.) may substitute for HHE 587 Health Disparities (3 hr.).

The Anthropology Department reciprocates this acceptance. The Health Science courses named above (HHE 506 and HHE 587) may substitute for their identified anthropology counterparts (ANT 600 and ANT 502, respectively) in the curricular plans of public health students pursuing a master's degree in anthropology. Additionally:

- Two of the following ANT Electives may substitute for two HHE Electives. These electives supply theoretical, methodological, or content expertise beneficial to either discipline. All have a health focus.
 - ANT 505 Culture, Mind, and Behavior
 - ANT 511 Culture Health & Healing
 - ANT 550 Probs In Anthropology: Legal Anthropology
 - ANT 574 Neuroanthropology

All courses are 3 credit hours.

Successful completion of all coursework and a capstone experience for both programs must be met to receive the dual degrees.

Pursuit of dual degree terminated:

For both dual degree programs (MA/MPH and PhD/MPH), if a student decides to discontinue work towards one degree but to continue pursuit of the other, he/she must meet all customary requirements for the continued program, with no double counting of courses, to receive a degree.

Capstone- Applied Practice Experience

All students in the MPH program must complete a capstone requirement in the form of an Applied Practice Experience or APE. The APE requires students to complete at least 90 hands-on hours at a health-related site under the guidance of a qualified Preceptor. The student must also complete two products for their site by the end of their experience, write a comprehensive Integrative Learning Experience (ILE) Report, and give a final presentation on their experience.

The APE should be completed towards the end of a student's enrollment. The APE is two courses which will be taken consecutively. Students will enroll in HHE 580 Applied Practice Experience I (1 hr.) to locate and confirm the site of their experience. Students will then enroll in HHE 581

Applied Practice Experience II (2 hr.) in the subsequent semester to complete the experience.

Registration into HHE 580 Applied Practice Experience I (1 hr.) is by permit only and this course is a required pre-requisite for HHE 581 Applied Practice Experience II (2 hr.). Students should speak with their MPH Faculty Advisor regarding when they will be expected to enroll in the APE sequence.

Time Limits for Degree Completion Requirements

The MPH program adheres to the time limits set forth by the UA Graduate School. Students have six years or 18 semesters immediately preceding the date on which the degree is to be awarded to complete all degree requirements and graduate. For details, see Graduate School information on Time Limits (p. 18).

Student Progress Requirement

All students will need to remain in good academic standing and make progress towards graduation by completing at least one course per semester. Students have six years or 18 semesters immediately preceding the date on which the degree is to be awarded to complete all degree requirements and graduate. Graduate students are expected to maintain a cumulative GPA of 3.0 or higher throughout their enrollment. Students whose cumulative GPA drops below a 3.0 will be placed on Academic Warning. Details about Academic Warning and other scholastic standing information is available at <https://catalog.ua.edu/graduate/about/academic-policies/scholastic-requirements/>.

The MPH program follows the criteria and guidelines set forth by the UA Graduate School for student progress.

Academic Misconduct Information

The MPH program follows the criteria and guidelines set forth by the Graduate School on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Students are encouraged to follow University policies and processes if seeking a withdrawal from a course, a withdrawal from all courses, or a leave of absence (p. 206).

Academic Grievance Information

The MPH program adheres to the academic grievance procedures (p. 219) as outlined by the Graduate School.

Scholastic Requirements

The MPH program adheres to the scholastic requirements (p. 204) set forth by the Graduate School, except for the transfer credit limit for the program is set to 6 hours. All students will need to remain in good academic standing and make progress towards graduation by completing at least one course per semester. Students have six years or 18 semesters immediately preceding the date on which the degree is to be awarded to complete all degree requirements and graduate. Graduate students are expected to maintain a cumulative GPA of 3.0 or higher throughout their enrollment. Students whose cumulative GPA drops below a 3.0 will be placed on Academic Warning. Details about Academic Warning and other scholastic standing information is available at <https://catalog.ua.edu/graduate/about/academic-policies/scholastic-requirements/>.

Graduate School Deadlines Information

Information on Graduate School Deadlines.

Application for Graduation Information

Information about the application to graduate (p. 18).

Health Education & Promotion, Ph.D.

The PhD program in Health Education & Promotion is designed to provide students with coursework and practical experiences needed to become leading faculty, researchers, and practitioners in health education and health promotion. By the conclusion of the program, students will be able to do the following: clearly conceptualize the theoretical and philosophical basis of health education and health promotion; effectively plan, implement, and evaluate health education and health promotion programs; elucidate the psychological and sociological influences on health education and promotion; and conduct their own independent research projects. For more information, please contact the Department of Health Science at (205) 348-9087 or Box 870311, Tuscaloosa, AL 35487-0313. Additional information is also available on the Department's website.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Completion of a master's degree program;
- Minimum score of 300 (verbal + quantitative) on the Graduate Record Exam (GRE). Students who do not meet this requirement, but who excel in other areas, may be considered for Admission with Permission to Continue;
- A personal statement of applicable experiences, specific research interests that align with faculty member(s) who the applicant would like to work with, and career goals;
- Evidence of adequate fit within the research agendas of Health Science PhD Program faculty;
- Three letters of recommendation from faculty or other professionals capable of judging the applicant's ability to complete doctoral work in the program. At least one letter of recommendation must come from a faculty member; and
- An interview with select PhD Program Faculty and the PhD Program Coordinator.

Meeting the requirements above does not guarantee admission into the program. Applicants who are accepted into the PhD program must pursue their programs as main campus students until they graduate with a PhD degree.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Code and Title	Hours
Health Education and Promotion Core Courses	12
HHE 604 Seminar In Health	
HHE 605 Theor Sci Basis Hlth Edu	
HHE 606 Plan Admin Hlth Ed Prog	
HHE 667 Ad Eval Health Ed & Hlth Promo	
Advanced Research and Statistical Methods	12
Courses may include the following:	
HHE 626 Adv Biostatistics in Hlth	

HHE 627	Multivariate Meth in Hlth	
HHE 628	Qual Research Meth in Hlth	
NHM 648	Secondary Analysis Survey Data	
Other Courses with Approval		
Social and Behavioral Science Coursework		12
Courses may include the following:		
HHE 530	Health Promotion Techniques	
HHE 586	Environmental Health Promotion	
HHE 587	Health Disparities	
HHE 588	Sex Ed: Theory & Practice	
HHE 589	Women and Health	
Other Courses with Approval		
Directed Research		12
Courses may include the following:		
HHE 596	Independent Study	
HHE 602	Readings In Health	
HHE 603	Spec Projects In Healt	
HHE 685	Field & Lab Experience	
HHE 698	Research	
Other Courses with Approval		
Dissertation Research HHE699		18
Total Hours		66

The PhD program in Health Education & Promotion has two additional graduation requirements: a comprehensive examination and dissertation.

Dissertation: Students are required to complete an acceptable dissertation that shows their ability to conduct independent research. The dissertation should also demonstrate skills in organization, writing, and presentation on a particular topic in the field. It should make an original contribution to knowledge and be approved by the dissertation committee and Dean of the Graduate School. A final oral dissertation defense is the culminating experience. A minimum of 18 hours of HHE 699 Dissertation Research hours must be completed.

Transfer Credit

The PhD Program in Health Education and Promotion allows students to transfer up to 6 semester hours of elective graduate courses completed previously into the program (no more than six years old). Only graduate lecture coursework with grades of B or higher may be considered for transfer. Transfer decisions are based on (1) equivalence of a previous course to a similar course offered here and (2) how the transfer course would support the student's program of study. However, students must complete a total of 66 credit hours of Doctoral work above the Master's level. In addition, students may not transfer graduate coursework to satisfy the health education/health promotion core or research and statistical methods requirements.

Transfer of elective courses occurs on a case-by-case basis, assuming that the course has some relationship to the student's overall career goals. Transfer credits often go toward the research focus or social and behavioral sciences. The Department accepts transfer courses they consider equivalent in rigor and content to similar courses offered in the department. The PhD Program Coordinator may request that students provide syllabi, course outlines, textbooks, and catalog descriptions for any courses they request to transfer.

See the Graduate School link below for more information about the UA Graduate School-wide transfer policies (p. 23).

Doctoral Plan of Study Requirement

Early in the graduate program, each student must confer with their Faculty Advisor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then, a Plan of Study must be prepared by the PhD Program coordinator and submitted to the Graduate School. The department submits the PhD Plan of Study through the UA DocuSign system in myBama. *Employees only may access these forms under the Employee tab in myBama.* The completed Plan of Study shows the Graduate School which courses the student has taken and which remaining courses will be taken to fulfill the degree requirements. The Plan of Study form does not allow the student/program to show in which order the courses were or will be taken. All doctoral students must have a completed Plan of Study approved by the Graduate School. Otherwise, a "hold" may be placed on future registrations.

Such credit must be identified clearly on the draft Outline of PhD Program (Plan of Study), which requires Health Science Department and Graduate School approval. All students must forward their completed Outline of PhD Program (Plan of Study) draft to the Ph.D. Program Coordinator for processing. The Ph.D. Program Coordinator will route the completed and signed Plan of Study to the Graduate School. A minimum of 48 hours of graduate coursework must be listed, including transfer credit if applicable. A Transfer Credit Evaluation Form must be submitted to the Graduate School. A minimum of 18 hours of continuous dissertation research (699) is required. A copy of the approved Plan of Study must be submitted to the Graduate School when the department submits the Admission to Candidacy for Doctoral Degree form through the UA DocuSign system in myBama. Any changes to the Plan of Study need to be resubmitted and on file with the Graduate School. If there is a course on a doctoral student's Plan of Study that they do not take, then the student will be denied Admission to Candidacy for the Doctoral Degree.

Comprehensive Exams

The PhD Program Coordinator conducts the comprehensive examination in conjunction with a committee of PhD program faculty. One purpose of the preliminary examination is to determine the student's research competence to begin work on a dissertation. The examination should be completed at least nine months before the degree is to be awarded. Therefore, a student may take the written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School. The comprehensive exam is offered on the first Thursday of the Fall semester and the last Thursday of the Spring semester each year. This exam should be prepared for by individual study expanding on the content covered in the four core courses listed below:

- **HHE 604:** Doctoral Seminar;
- **HHE 605:** Advanced Theoretical and Scientific Basis of Health Education and Health Promotion;
- **HHE 606:** Planning and Administration of Health Education and Health Promotion Programs; and
- **HHE 667:** Advanced Evaluation in Health Education and Health Promotion.

The exam must be passed unconditionally before the student can submit their dissertation prospectus and defend their dissertation proposal. Prior to taking the exam, students must have completed their core course requirements. Two weeks prior to the exam, each student will receive a list of scenarios describing health problems and intended audiences; students will select one option to focus on during their exam.

Students should NOT assume that "A" level performance in their coursework is adequate preparation for the comprehensive exam. Students must be registered for at least one semester hour of graduate work during the semester(s) the comprehensive exams are taken. To prepare, students should review all materials from listed coursework as well as other related courses and supplementary material. **Each student must demonstrate the highest levels of learning including application, synthesis, analysis, and evaluation of material covered throughout the program.**

Students who receive a grade of INCOMPLETE will be asked to schedule a meeting with the PhD Program Coordinator to discuss their results. After this meeting, the student will have one week to revise their answers in a "take-home" format. The revised version will be distributed to graduate faculty graders to determine if it is a PASS or FAIL (i.e., a second score of 79 or less). If the student's revised exam fails, the student will have one more opportunity to re-take the comprehensive exam at a subsequent regularly scheduled examination testing date.

Failed comprehensive examinations can only be retaken once. A student who fails their comprehensive exam must re-take the exam at the next regularly scheduled comprehensive examination testing date. Failing the comprehensive exam twice results in dismissal from both the PhD program and the Graduate School.

Once a student has passed the comprehensive exam, the Doctoral Qualifying Exam Form must be submitted to the UA graduate school.

Admission to Candidacy Requirements

The requirements for advancing to candidacy include passing the comprehensive examination; completion of all coursework as listed on the approved program of study; receiving dissertation committee approval of the dissertation prospectus during a mandatory meeting of all committee members, and having the committee recommend the student for Admission to Candidacy for the Doctoral Degree. The completed candidacy form is submitted to the Graduate School well in advance of the final semester.

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

Prospectus Document

Students are required to complete an acceptable dissertation that shows their ability to conduct independent research. The dissertation should also demonstrate skills in organization, writing, and presentation on a particular topic in the field. It should make an original contribution to knowledge and be approved by the dissertation committee and Dean of the Graduate School. A final oral dissertation defense is the culminating experience. A minimum of 18 hours of dissertation credit must be completed.

A prospectus (6-8 doubled-spaced pages, with one-inch margins and 12-point font) is written by the student that describes the plan for the dissertation (e.g., brief background, potential theory, sample, methods, etc.). After the pre-proposal is written and approved by the Dissertation Chair, the student shares the form with prospective committee members to assess their interest and willingness to serve on the project. After the committee has been composed, the Dissertation Chair is required to set a **pre-proposal meeting to discuss the student's dissertation idea further, ensure everyone is on the same page about what will potentially be done, and provide guidance and direction as needed.** This meeting helps the student avoid writing the dissertation proposal (the first 3

chapters of the traditional dissertation – it will look different for article-style dissertations) without meeting with the committee and getting their early, important feedback about its direction. The Dissertation Chair must email the PhD Program Coordinator following the meeting to report the outcome (i.e., prospectus approved OR prospectus not approved). If the prospectus is not approved by all committee members during the first pre-proposal meeting, then another pre-proposal meeting must be scheduled for a later date. Doctoral students will not be admitted into candidacy until all of their committee members have approved their dissertation prospectus during this required meeting.

Prospectus Outline

The prospectus should be of sufficient length to provide a scholarly outline of the proposed research. A length of 6-8 doubled-spaced pages, with one-inch margins and 12-point font, would be appropriate in most situations. The prospectus is a presentation of the intended research.

Traditional Dissertation Format for Prospectus

I. Abstract

A brief (200 to 300 words) presentation of the background and rationale for the proposed research, including a brief presentation of the methods and study population.

II. Background and Significance

Brief background description and literature relevant to the research problem. The significance of the study and the research problems should be stated.

III. Literature Review

Include relevant literature published to date on the research topic, including statistics with subsections when needed. Include the theoretical basis or framework for the proposed and a strong rationale for why the theory/model was selected among various alternatives. List definitions and explanations of terminology when needed.

IV. Hypothesis and/or Research Question(s)

One central research hypothesis would usually be suitable with potentially one or more secondary hypotheses. When appropriate, research questions might be presented in place of hypotheses.

V. Methods and Materials

As appropriate, include basic research design, subjects or participants, limitations of the research, sampling plan, pilot testing, laboratory techniques, reagents, instruments, data collection procedures, evaluation theory and/or strategy, statistical analysis, tentative plan of analysis, power calculations, timeline, delineation of research variables, the test of validity and reliability of data collection instruments.

Article-Style Dissertation Format for Prospectus

1. **Description of the problem to be examined and how it is related to previous theoretical and empirical literature in the area.** Include all relevant literature published to date on the research topic, including statistics with subsections when needed. Include the theoretical basis or framework for the proposed and a strong rationale for why the theory/model was selected among various alternatives. You may also include the background and significance and literature review. A list of references should be included that reflects a thorough review of the extant literature. This section should lead to the formation of the research questions that form the basis of the papers to be included in the written dissertation.

2. **Description of the individual papers (at least 2) that will form the core of the written dissertation, including for each:**

- Research questions and, if appropriate, hypotheses can also be stated
- Research design and methods that will be utilized
- Expected problems and limitations can be included as appropriate
- Sources of data
- Time schedule (can be tentative)

Appointment/Change in Doctoral Dissertation Committee

Around the same time that your Dissertation Committee Chair submits the Doctoral Candidacy Form, you, as the student, should submit the "Appointment/Change in Doctoral Dissertation Committee Form." The process for setting up or changing your dissertation committee is an electronic process. This paperless process will generate emails to each committee member so that they can accept or reject the invitation to serve on your committee. Members of the committee should be selected along with your Dissertation Committee Chair.

Please click [HERE](#) to link to the Graduate Academic Activities to set up or change your dissertation committee. Please click [HERE](#) for **instructions** on initiating the committee formation process. This online form officially establishes the student's doctoral committee.

Dissertation Committee Membership

All dissertation committee members must hold Graduate Faculty status at UA and represent at least two academic departments. The chair of the committee must be a full member of the Graduate Faculty. Our Department requires that the Dissertation Committee Chair (or its lead Co-chair) is a PhD Program Faculty member in our department. The doctoral dissertation committee must include a minimum of five (5) faculty members. We also require a minimum of three (3) individuals from our Departments' PhD Program faculty serve on the dissertation committee. There should be at least one committee member from outside of our department. These individuals should be selected along with your dissertation committee chairperson. You and your Dissertation Chairperson should ensure that they have (or will have) Graduate Faculty Membership. Students should try to form a dissertation committee by the end of their second semester of doctoral study. Dissertation committees are formed in the Graduate Academic Activities page.

Dissertation Proposal

Having received guidance from the dissertation committee, the formal dissertation proposal can be developed and generally completed after all or most of the course work is completed, and the comprehensive examination has been successfully completed. The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The department defines a dissertation proposal as the first three chapters of the traditional dissertation (note: the format will look different for an article-style dissertation). The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction giving an overview and stating the proposed research's significance, literature review, and methodology. Each student will work closely with their Dissertation Chair and committee to develop a dissertation proposal.

Once the student and dissertation chair have developed a proposal and the graduate Dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee

members. **The student cannot propose a dissertation and have its final defense in the same semester.**

Proposal presentations typically last about 30 minutes. They often include a brief handout of the presentation outline and main points and electronic presentation formats such as PowerPoint presentations. Dissertation Chairs help students decide on an appropriate presentation package. The Dissertation Chair invites all PhD students and department faculty to attend the public portion of dissertation proposal meetings.

An email announcement about a student's dissertation proposal should be sent to Jenny Goddard (jgoddard@ches.ua.edu) for inclusion in the CHES Newsletter. Posting for the Dissertation Proposal must be made public two weeks prior to the proposal.

In preparing for dissertation proposal meetings, PhD students will work closely with their dissertation committee at all stages in developing a dissertation proposal. The dissertation proposal format will be distinct depending on the dissertation style selected by the student.

Students who elect to pursue the **Traditional Dissertation Format** option will prepare a dissertation proposal that includes three (3) fully developed chapters consisting of the:

1. Introduction,
2. Comprehensive Literature Review, and
3. Proposed Methodology

Students who elect to pursue the **Article-Style Dissertation Format** option will prepare a dissertation proposal that includes:

1. An introduction with:
 - a. Theoretical foundations,
 - b. Comprehensive literature review,
 - c. Statement of the problem, and
 - d. Proposed methods for each of the planned papers that will be written as part of the dissertation.

The proposal should be presented to the Dissertation Committee no later than 2 weeks (10-15 workdays) before the proposal meeting. Electronic copies can also be provided to other department PhD students and other faculty members, specifically as follows:

- *Dissertation Committee* – 1 electronic copy (by email) as MS Word file.
- *Other PhD Students* – 1 electronic copy (delivered by email) as a PDF file.
- *Other Department Faculty* (on request) – 1 electronic copy (by email) as a PDF file.

After conferring with their Dissertation Chair, students traditionally take responsibility for contacting committee members and arranging a date, time, and location for proposal meetings. During the period of doctoral study, the faculty expects PhD students to attend the public portion of dissertation proposal meetings of other PhD students.

The initial proposal of the dissertation to the student's committee should be a formal presentation. A polished and professional quality proposal should be the standard. Students will be expected to present their formal research proposal to the graduate faculty, graduate students, and other auxiliary faculty and guests. Directly following the proposal, the student's dissertation committee will convene to approve the proposal or recommend that a student resubmit a modified proposal later. After the successful proposal, the Dissertation Committee Acceptance Form must be completed and submitted to the UA grad school.

Dissertation

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in health education and promotion. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee and by the Dean of the Graduate School. The doctoral dissertation is designed to provide students with a significant research experience. Students may choose from 2 formats to conduct a dissertation: the typical 5-chapter format and the article-style dissertation format. Refer to the following documents contained in this policy guide: *Guidelines for the Article-Style Dissertation Format*. The Dissertation Chair and committee members will assist the student in selecting a format.

Article-Style Dissertations

At the doctoral level, "article-style" dissertations are unified works that include several distinct but closely related research or creative activity studies, each of which is of publishable quality. This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. This option is available to students enrolled in the PhD Program in Health Education and Promotion.

Article-style dissertations must be based upon research completed while the student is enrolled at The University of Alabama. The student must be the first author, or equivalent, as defined by the discipline for each article used. As with traditional dissertations, the article-style dissertation must be the student's original idea. It must be a unified work and include a sequence of articles of publishable quality around a cohesive theme, with a comprehensive review of literature demonstrating an in-depth understanding of the unifying framework.

In Article-style dissertations, there will be:

- introductory material to describe the studies, show how they are related, and explain their significance;
- connecting language to bridge each study to the next; and
- a summary clarifies the importance of the studies, integrates the major findings, and discusses the implications for the overall topic.

These components do not have to be separate sections or chapters. They may be parts of the manuscripts or may be accomplished in an abstract. The manuscript will be one of the sets of tables, figures, and reference lists for the document.

All parts of article-style dissertations must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline's style manual require deviation. Doctoral students who choose the article-style dissertation will write a final, completed dissertation that will consist of a number of journal-style manuscripts or articles. At UA, the official minimum number of manuscripts in the article-style dissertation is two (2). Students considering the article-style approach should contact the Graduate School before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

Authorship Guidelines for Article-Style Dissertations

The student should be the primary author on all of the published or publishable works. Committee members are typically included on the papers produced by the dissertation work since they are working in a collaborative relationship with the graduate student. The decision regarding authorship should be based on the degree to which a given committee member contributed to each paper. Serving on the committee does not guarantee authorship.

If an article(s) is multi-authored, you should justify or clarify the contributions of the other authors in relation to the research project. Issues of clarification should include the origins of the conceptualization and design, data collection, analysis and interpretation of the data, and other significant areas of contribution. The student will be involved with every aspect of the dissertation.

General requirements for assigning authorship credit to the manuscripts generated during the dissertation process include:

- Substantial contributions to the conception or design of the work; or the acquisition, analysis, or interpretation of data for the work; AND
- Drafting the work or revising it critically for important intellectual content; AND
- Final approval of the version to be published; AND
- Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

For more details on peer-reviewed journal article authorship expectations.

The doctoral student will consult with the committee members to decide on the fate of unpublished papers at the time of graduation. Time limits should be established, so that publication of papers is not held up if the graduate does not submit papers following graduation.

Traditional Dissertation

A dissertation consists of three main parts: the preliminary pages, the text, and the reference matter. Each part contains several sections. Some sections may be omitted, but the order of the following outlines must be observed.

Preliminary Pages

- Title page includes Committee Chair and list of committee members (required; see Appendix A. Do not number this page)
- Copyright page (required; see Appendix A. Do not number this page)
- Abstract (required; number this page ii) - **must not exceed 350 words**
- Dedication page (Optional)
- List of abbreviations or symbols (required when symbols used are not self-explanatory)
- Acknowledgments (required)
- Table of contents (required; titles of each section listed must concur exactly with body of the paper. Do not list this page among the contents)
- List of tables (required when tables are used)
- List of figures (required when figures are used)
- List of illustrations (required when illustrations are used)

Main Manuscript

- Body of paper (with 5 chapters or sections formatted following the template available by clicking Template in the ETD website's index of topics)
- Bibliography or References (choose one, depends on accepted practice within the discipline)
- Appendices
- IRB Certificate (where applicable)

Illustrative Materials

- Drawings, graphs and colored images may be included only if they are of high quality. All materials must conform to the margin requirements outlined in this manual.

- Photographs, charts, maps, drawings, and similar items can be included.

Supplementary Files

- Supplementary materials, e.g. audio, video, and Spreadsheet, may be included as supplementary files as part of your electronic submission, however, you **MUST** follow the formatting and submission requirements set out in ProQuest's instructions for supplementary files.

IRB Certification

- A copy of the Institutional Review Board (IRB) certification must be included in the appendix where a dissertation involves human subjects.

Dissertation Defense

When the student and the committee consider the dissertation to be complete, the committee will conduct the final oral examination of the dissertation. The final oral dissertation defense is the culminating experience in the doctoral program. Once the dissertation committee has agreed that the student is prepared for the final oral dissertation defense, the student and committee members will set the defense date. All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the date of the required final oral examination.

Final defense presentations typically last about 30 minutes. They often include a brief handout of the presentation outline and main points and electronic presentation formats. Dissertation chairs help students decide on an appropriate presentation package. During the period of doctoral study, the faculty expects PhD students to attend the public portion of dissertation final defense meetings of other PhD students.

After conferring with their Dissertation Chair, students traditionally take responsibility for contacting committee members and arranging a date, time, and location for dissertation final defense meetings. Refreshments are not required at the final defense. Dissertation Chairs announce the dissertation's final defense date, time, and the location at Department and College levels. Faculty Advisors invite all graduate students and department faculty to attend the public portion of dissertation final defense meetings. An email announcement should be sent to Jenny Goddard (jgoddard@ches.ua.edu) for inclusion in the CHES Newsletter.

In preparing for dissertation final defense meetings, PhD candidates will:

Work closely with the Dissertation Chair and Committee at all stages in completing the dissertation.

Provide Committee members with one electronic copy (delivered by email) as an MS Word file of the final version of the dissertation.

All members of a student's dissertation committee are expected to attend and participate in real-time, usually in person, in any oral examination as part of the student's graduate degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and UA Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In addition, the dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

When the dissertation has been completed, the candidate will be given a final oral examination by a committee of not fewer than five members,

one of whom must be from outside the student's major department and appointed by the dean of the Graduate School. This examination will focus primarily on the candidate's research work, as embodied in the dissertation and the dissertation's field, but it may encompass the complete program for the degree. The majority of the committee must approve that the student successfully defended the dissertation. The results of the examination must be reported to the Office of the Graduate School at least six weeks before the commencement at which the degree is to be conferred.

Graduate School deadlines, including each semester's dissertation deadline, are available at the Graduate School's homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

All Committee members must be present and sign the appropriate paperwork following successful defense of the dissertation. Most dissertations, even in the final form for the meeting, require some follow-up work. The Doctoral Final Defense Form must be completed and submitted to the UA Graduate School once a student has passed their dissertation defense.

After the successful defense, the Dissertation Committee Acceptance Form for Electronic Dissertation must be completed and submitted to the UA graduate school once the dissertation committee is ready to sign off on the final version of the dissertation. In other words, a student can pass their defense, but the committee may want them to make changes before the dissertation is submitted to the Graduate School. In this case, only the Doctoral Final Defense Form would be submitted to acknowledge that the defense has taken place and the outcome of the defense, but the Dissertation Committee Acceptance Form for Electronic Dissertation would be held student has made the changes required by the dissertation committee. Thus, the PhD candidate's program effectively concludes when all Committee members accept the dissertation and sign the appropriate paperwork.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 23).

Student Progress Requirement

Annual Evaluation of Progress Toward Degree Completion by PhD Students

Faculty have a responsibility to evaluate students' competence across multiple aspects of performance, development, and functioning. Students should know that their faculty and department administrators will evaluate student competence in areas other than, and in addition to, their coursework, comprehensive examinations, and related program requirements. Students are expected to meet all academic requirements, possess discipline-specific knowledge, display professional competency, and engage in scholarship activities that are fitting of a PhD program.

Students will be evaluated in the following areas:

ACADEMIC STANDARDS/REQUIREMENTS

1. Grades in Courses and Overall GPA:

Throughout the doctoral program, the student must maintain a minimum overall grade point average (GPA) of 3.00 in all coursework. Additionally, students must achieve a grade of "B" or higher on all courses listed in their Plan of Study (unless the class is for pass/fail credit, in which case the student must receive a "pass"

grade). The student must re-take any course that does not meet this grade requirement.

EVALUATION STANDARDS

1. Engagement in Scholarly Activities (e.g., research, manuscripts, conference presentations, teaching, professional development):

Each year, students will be assessed on their engagement in scholarly activities. Sample activities that doctoral students might do to meet the annual scholarly engagement requirements are presented below.

- Actively participate in a faculty-supervised independent research project.
- Engage in collaborative research and development activity with core program faculty and other faculty on campus.
- Present at a state, regional, national, or international conference (e.g., SOPHE, APHA).
- Collaborate with the research mentor or department professor as author or co-author of a scholarly manuscript for publication consideration to a peer-review journal.
- Complete HHE 596 (Independent Study) and/or HHE 602 (Readings in Health) with at least one written product (e.g., a literature review, secondary analysis, thematic paper) that could serve as the basis for a published article/research project, grant proposal, or dissertation topic.

***Note. Prior to Enrolling in Dissertation Credit Hours, Students Must Have:**

1. Conducted a minimum of two research or other scholarly activities; and
2. Disseminated a minimum of two research or other scholarly activities via professional publication or presentation. The student must be the first author or primary presenter for at least one of these research projects.

Teaching

- For teaching assistants (TAs) or doctoral students those listed as instructor of a course(s), complete evaluations of teaching effectiveness in the classroom (e.g., SSOI results, student-initiated surveys to obtain student feedback on teaching).
- Attend a campus-wide teaching workshop (<https://teachinghub.as.ua.edu/>) to improve teaching strategies when in the classroom.
- Serve in a leadership role on a committee or hold an office in a professional organization related to health promotion.
- Review abstracts for a professional organization's annual meeting (e.g., APHA, SOPHE).

Professional Development

- Attend a campus-wide professional development research focused event (e.g., grant-writing workshop)
- Attend and/or volunteer to participate in Department/College/or UA research-related events (e.g., judge for URCA, attendance in Graduate Research Seminar).
- Attend a state, regional, national, or international conference (e.g., SOPHE, APHA).

1. NCHEC Competencies specified in the Eight Areas of Responsibility of a Health Education Specialist:

Students will self-assess their performance in profession-wide advanced competency areas, specifically, within NCHEC's eight areas of responsibility of a Health Education Specialist (<https://www.nchec.org/responsibilities-and-competencies>). The assessment process will include pre- and post-program self-assessments conducted by the student which are then reviewed and evaluated by the faculty. Results will be used to identify program strengths and weaknesses, and will inform discussions around program changes.

1. Assessment of Needs and Capacity
2. Planning
3. Implementation
4. Evaluation and Research
5. Advocacy
6. Communication
7. Leadership and Management
8. Ethics and Professionalism

Additional Professional Standards:

In addition to adherence to ethics and the honor code described above, other evaluative areas include, but are not limited to, demonstration of sufficient:

1. **interpersonal and professional competence** (e.g., the ways in which students relate to peers, faculty, other professionals, study participants, the public, and individuals from diverse backgrounds or histories);
2. **self-awareness, self-reflection, and self-evaluation** (e.g., knowledge of the potential impact of one's own beliefs and values on clients, peers, faculty, health education/promotion professionals, the public, and individuals from diverse backgrounds or histories);
3. **openness to processes of supervision** (e.g., the ability and willingness to explore issues that either interfere with or impede professional development or functioning); and
4. **resolution of issues or problems that interfere with student/professional development or functioning in a satisfactory manner** (e.g., responding constructively to critical feedback from supervisors or program faculty; the successful completion of remediation plans; participating in resolution of issues or problems).

The Code of Ethics for the Health Education Profession

Students are expected to adhere to rules, laws, and codes governing the academic training program and the field of health promotion, specifically the NCHEC Health Education Code of Ethics. Although students may not become Certified Health Education Specialists, doctoral students in this program are expected to adhere to the 2020 Code of Ethics, Articles I and II, for the Health Education profession (<https://www.nchec.org/code-of-ethics>).

The annual evaluation covers April 1 of the preceding year through March 15 of the current year. The Faculty Advisor or Dissertation Chair informs the student, PhD program coordinator, and department chair that the student passed the annual evaluation. If the Faculty Advisor or Dissertation Chair finds that the student is not making satisfactory progress, the Faculty Advisor works with the student and PhD program coordinator to resolve the problem. If the process does not resolve the problem, and the Faculty Advisor or Dissertation Chair exhausts all reasonable options to reach a solution, then the Faculty Advisor or Dissertation Chair refers the matter to the Department Chair for

resolution. Depending on the chair's assessment outcome, the Faculty Advisor/ Dissertation Chair may support the student (with a "pass"), ask the student to comply with corrective measures, or dismiss the student from the program.

Information on the Application for Graduation (p. 23).

Doctoral Degrees

The University offers several types of doctorates, each of which is described below.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

Doctor of Philosophy Degree

The Doctor of Philosophy (PhD) degree is regarded as the researcher's degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The Doctor of Philosophy (PhD) degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation

hours and higher level of complexity and independent thought in a PhD-level dissertation.

Field of Specialization - A defined field of specialization as outlined in the student's Plan of Study is required of all candidates for the Doctor of Philosophy degree. A minimum of 36 semester hours of non-dissertation course credit is required. Departments or programs may require more than this minimum. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements.

The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 18 hours of dissertation research.

Research skill/language requirements - There is no university wide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments.

Interdisciplinary Studies

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 765) at the Graduate School's website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

Doctor of Education Degree

The Doctor of Education (EdD) requires a minimum of two years of graduate study beyond the master's degree for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate coursework research beyond the master's degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 488) section of the Graduate Catalog, there are specific regulations governing the EdD program.

Doctor of Musical Arts Degree

The Doctor of Musical Arts (DMA) degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 356) section of the Graduate Catalog.

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) (p. 730) is a practice-focused degree that is detailed in the Nursing section of this Catalog.

Doctor of Social Work

A Doctor of Social Work (DSW) degree is a practice doctorate degree in social work. It provides coursework on theory and skills in social work practice that are more advanced than what one would typically experience in an MSW program for social work.

Admission to Doctoral Degree Programs

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master's degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student's doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

Residency Requirements

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student's doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog's Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and

summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a "B" grade or better may be transferred. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. PhD Programs Only: A student holding an earned, in-field master's degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. When exercising this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School. The requested transfer credit hours must be listed on the PhD Plan of Study as MSC501 under the transfer credit section. If the in-field master's degree was awarded *more than six years prior to admission to the current doctoral degree program*, the graduate program director or department head/chair must also submit to the Graduate School for evaluation, a Field-Related Employment Since Earning Master's Degree form with the student's CV must be submitted by the department through the UA DocuSign system in myBama. In addition, the department is asked to provide the following, attached to the approved Plan of Study :
 - a. An annotated work history from the student. This history should include job titles and major duties for all positions since earning a master's degree.
 - b. A brief paragraph from the corresponding faculty member, attesting that he/she has reviewed the work history and how that work applies to the current Ph.D. degree program.

The Graduate School will make the final determination about whether up to 24 prior master's hours can be applied to the Ph.D. requirements.

PhD awarding departments that want to participate in offering Option 2 to their doctoral students, need to "opt in" by informing the graduate dean in writing that they wish to be among the approved departments.

Consideration of transfer of credit or the acceptance of an earned master's degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy. Dissertation Research (699) may not be transferred in from an outside institution.

Time Limits

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master's, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period prior to admission to the

doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

The Continuous Dissertation or Document Registration requirement for 699 and 799 enrollment will be waived for the intervening years between the student's cessation of doctoral work and re-admission.

Plan of Study

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School by the time the student has completed 30 coursework hours.

The PhD, DMA, and DSW Plans of Study are submitted by the department through the UA DocuSign system in myBama. The Plan of Study for other doctoral programs (Ed.D., DNP) are available from the student's department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

A copy of the approved Plan of Study must be submitted to the Graduate School when the department submits the Admission to Candidacy for Doctoral Degree form through the UA DocuSign system in myBama.

Preliminary or Comprehensive Examination

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student's supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student's research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy

The designation of candidacy reflects the student's demonstration of foundational knowledge and readiness to conduct independent research, in the discipline. The requirement for advancing to candidacy is determined by the faculty of the degree program and delineated in the program's section of the Graduate School Catalog and the program's Graduate Student Handbook.

Advancement to candidacy should involve either:

- passing the qualifying (major or preliminary) examination
- completing of all required coursework as listed on the approved program of study
- presenting or defending a dissertation prospectus or proposal
- or some combination of these milestones.

Students are not eligible to register for 699 or 799 credit hours until they have been advanced to candidacy. The Department Chair or Department Director of Graduate Studies, or their designee, shall submit the Admission to Candidacy for the Doctoral Degree form to the Graduate School during the semester that the student meets the program's candidacy requirements.

Continuous Doctoral Research Hours Registration

Once a student meets their program's requirement for admission to candidacy and the designated Department administrator submits the Application for Admission to Candidacy form to the Graduate School, the student may enroll in 699 (dissertation/document research) or 799 (document/project research).

Once initiated, the student must pursue completion of the dissertation/document/project without interruption by enrolling in 699/799 each fall and spring semester of the academic year.

The only time summer registration is required for dissertation/document/project research is when a doctoral student is graduating in August or defending the dissertation/document/project during the summer semester.

Ph.D. students must complete a minimum of 18 hours of dissertation research credits (699). Ph.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.

Ed.D. students must complete a minimum of 12 dissertation research credits (699). Ed.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.

DMA students must complete a minimum of 4 hours of document research (MUS 699). DMA students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in MUS 699 until degree completion.

DNP Students must complete project research hours in NUR 795-798. DNP students must maintain continuous enrollment for a minimum of 1 hour in a department-specified course until degree completion.

DSW Students must complete a minimum of 9 hours of project research (SW 799). DSW students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in SW 799 until degree completion.

The amount of dissertation/document/project research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

Dissertation Committee

The dissertation committee may be formed early in the dissertation research process, or shortly before the dissertation proposal is approved. It is expected that the committee will be formed and approved before significant progress is made on the dissertation. The committee must be formally established via a process initiated by the student and requiring the consent of each committee member, followed by Graduate School review for compliance with the regulations outlined below. Click here for instructions on the process of establishing the committee.

The committee must consist of at least five members. It may have additional (voting or nonvoting) members if deemed appropriate. At least one of the committee members must be from outside the student's major department. These external members may be from another academic department at UA, from other universities, or from industry or the professional field. In all cases, these members external to the department/program must be appointed to UA's Graduate Faculty by the dean of the Graduate School, and must have significant professional qualifications that directly contribute to the depth and rigor of the dissertation.

All members of the dissertation committee must hold Graduate Faculty status at The University of Alabama. The chair of the committee must hold Full Graduate Faculty status; others may be Full, Associate, or Affiliate members of the Graduate Faculty. A majority of the Dissertation Committee members must be full-time regular University of Alabama faculty (that is, full-time instructor, assistant professor, associate professor, or professor).

Dissertation Proposal

The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction that provides an overview and states the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal's format with respect to specifics such as the length of the

introduction and level of detail of the literature review. Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. The dissertation must be based upon research completed while the student is enrolled at The University of Alabama.

The subject of the dissertation must be approved by the student's dissertation committee and by the dean of the Graduate School. The final dissertation may take the form of a traditional, chapter-based document or a series of full-length publication-ready manuscripts which are part of a larger, cohesive body of work. The format (traditional vs. article-style) must be approved by the committee in accordance with the standards for the program and the discipline.

For article-style dissertations, the document must contain a minimum of three articles, in addition to introductory and concluding materials. A single abstract must accompany the document. In addition to an introduction presenting the unifying framework that supports the research, the document must include a concluding section that summarizes the importance of the work, integrates the major findings, and discusses the implications for the overall body of work.

Individual departments may have policies or guidelines related to whether sections of the dissertation may be included if they have been previously published elsewhere. Copyright issues also may arise if sections of the dissertation have been previously published. Therefore, students who are considering the submission of dissertation chapters/articles for publication prior to their dissertation defense should consult with their advisor, and also with potential publication outlets, before submitting any dissertation-related manuscript for publication.

All parts of the dissertation must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline's style manual require deviation. Students should email gradschool@ua.edu before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

The Dean of the Graduate School must approve the dissertation before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Virtual Participation in Committee-Based Exams/Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.
7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Final-Semester Minimum Doctoral Research Hours Registration

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research until reaching their department's minimum requirement, and at least 1 hour for each semester thereafter until degree completion and graduation. If certain conditions are met for the student's final semester, the student may qualify to enroll for fewer hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester#. This exception applies only to students who registered for at least 1-3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

When was the *completed electronic dissertation submitted to ProQuest/the Graduate School?	Minimum hours of 699 registration required in the final semester
--	--

By 11:59pm on the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	0
--	---

After the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	1
--	---

*"Completed" means submitted to ProQuest after being successfully defended and carefully edited following the defense meeting. The dissertation chair or department designee must submit the Committee Acceptance Form (CAF) through the UA DocuSign system. The CAF must be signed by all committee members, department chairperson, and graduate dean. The CAF is submitted by the department through the UA DocuSign system in myBama. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

Footnotes

¹ International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see "USCIS" section under "Minimum Hours—Other Policies and Regulatory Bodies" on page 3 of this policy.

² The University Calendar is available at the Academics tab of the website of the University Registrar.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University's IRB approval form is available at the IRB website.

Dissertation Defense

The dissertation defense is the culminating experience in the doctoral program. The Dissertation Chair and the student will coordinate with all committee members to choose a time, date, and location for the dissertation defense. All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the defense date. The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

The dissertation defense is comprised of four parts.

1. Public Advance Notice. A minimum of two weeks prior to the scheduled defense date, the candidate must submit the *Public Notice of a Dissertation Defense* form. This form includes the name of the candidate, the department or program, the title of the dissertation, an abstract of 200 words or less, and the date, time, and location of the dissertation defense. The candidate should consult with the Dissertation Chair prior to

initiating this form. The form will be initiated by the candidate and signed by the Dissertation Chair, Graduate Program Director, and the Graduate School. Upon receipt of the completed form, the Graduate Program Director will ensure the scheduled defense is disseminated within the department. The Graduate School will post the scheduled defense on the Graduate School website.

2. Oral Presentation. An oral presentation of the dissertation is required and shall be public. The content and duration of the oral presentation are at the discretion of the Dissertation Chair, in consultation with the Committee, based on departmental norms, disciplinary standards, and traditions.

3. Oral Defense. This examination phase of the dissertation defense is required and may be public or private. Each department or program shall establish a policy for whether the oral defense is public, private, or both (i.e., has a public portion and a private portion).

4. Committee Deliberation. Committee deliberation is required and shall be private. Upon completion of the oral defense, everyone other than the committee members shall leave the defense location while the committee discusses, deliberates, and votes. For a defense to be successful, the majority of the committee must approve the dissertation and the defense.

The results of the dissertation defense must be reported to the Office of the Graduate School by submitting the Committee Acceptance Form at least six weeks before the Fall/Spring commencement, or five weeks before the Summer commencement, at which the degree is to be conferred. The Committee Acceptance Form, submitted by the department through the UA DocuSign system and found in myBama, confirms that a majority of the dissertation committee has approved the written dissertation and oral defense.

Any changes made to the manuscript after the defense must be approved by the Dissertation Chair. The student must submit the final dissertation to the Graduate School, and the Dean of the Graduate School must approve the dissertation, before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Final Dissertation Submission and Approval

Following a successful dissertation defense (see "Dissertation Defense" for details), any edits agreed upon during the defense must be incorporated into the manuscript, and the Dissertation Chair must approve the final manuscript. After a careful review to ensure that the manuscript adheres to the Graduate School's formatting guidelines, the candidate must submit the approved manuscript to the Graduate School for final approval, address any remaining edits, and initiate the upload process for archiving the manuscript in the national dissertation repository, ProQuest.

The dissertation, in its final form, must be received in the Graduate School within 60 days of the dissertation defense. If this deadline is not met, the Dissertation Chair may require the candidate to schedule a second dissertation defense. Note that this 60-day deadline is separate from the deadlines for degree conferral and participation in Commencement ceremonies.

Graduate School deadlines for each semester, including deadlines for submitting the final manuscript to the Graduate School to graduate at the end of the semester, are available on the Graduate School's homepage. Consult the Graduate School's dissertation site for additional details of the electronic submission process, including information on exactly what needs to be submitted to the Graduate School. At the stage of the Graduate School review of the manuscript, additional revisions may be required, to ensure that the final manuscript conforms to all formatting

and editing standards. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Application for Graduation

Each candidate for a doctoral degree must submit an Application for Degree via myBama no later than the last day to register or add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Withholding or Withdrawing an Advanced Degree

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

Health Studies, MA

The Department of Health Science offers the program in health studies leading to the Master of Arts degree. The program courses address areas including the foundations of health education and promotion, program planning, implementation, and evaluation. Students are prepared to practice in community medical care and work-site settings. The degree may be pursued under Plan I (thesis) or Plan II (nonthesis).

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- At least 3 letters of recommendation.
 - Applicants should seek out 3 recommenders who are familiar with their skills and abilities.
 - It is not ideal to have letters written by family or friends.
 - Applicants should reach out to the Health Studies MA Program Director if more guidance is needed on selecting recommenders.
 - Quality letters of recommendation are typically at least one page in length.
- A Résumé or Curriculum Vita (CV)
- A Statement of Purpose that details:
 - Interests in the field of Health Promotion and related fields
 - Any skills, abilities, or experience applicants may have that would support enrollment in your selected program
 - Professional goals and aspirations
 - How the program to which the applicant is applying aligns with the applicant's goals and aspirations
 - Any other information the applicants would like to share regarding their qualifications to study at the graduate level at UA

Statements should be approximately 2 pages in length, double-spaced, and the writing should be representative of a potential graduate student. Please be sure to proofread and edit the statement before submitting with the complete application.

Please note no academic credit, course waivers, or credit shall be granted for life experience or previous work experience. Also, no student can earn both the MA in Health Studies and the MPH degrees. Courses completed can only be used to earn one degree from the Department of Health Science.

Requirements for After Admission

All applicants who receive an offer of admission must accept that offer by indicating their intent to enroll. The link to accept admission is in the official offer of admission letter sent by the UA Graduate School. Once a

student has accepted admission, they will be required to have an initial advising appointment with the MA in Health Studies Program Director.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

**This program is only offered online through distance education.*

The Master of Arts in Health Studies degree will be awarded to the student who has met the following requirements:

- Successful completion of 30 hours of approved courses including 12 hours of electives.
- Evidence of the capacity to perform academically at the graduate level and to make satisfactory academic progress by maintaining an overall GPA of 3.0 or higher throughout the program.
- Students are expected to demonstrate writing proficiency at a graduate level.

The MA in Health Studies program does not offer a thesis option. All students will complete 12 hours of electives and a culminating experience to complete the degree requirements.

HHE 596 Independent Study	
Completion of the Comprehensive Exam	
Total Hours	30

Transfer Credit

Applicants interested in transferring graduate credit to the MA program from an outside institution should reach out to the MA Program Coordinator. *Please note the Department of Health Science allows a maximum of 6 hours of transfer credit as approved by the MA Program Coordinator. To be counted toward the MA, all transferred hours must have been completed with a B or higher from a regionally accredited school and taken during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA master's program. See also the UA Graduate School's transfer policies (p. 18).*

Comprehensive Exam

All students in the MA in Health Studies program must complete and pass a culminating experience in order to graduate from the program. As of Fall 2022, students will have two options to complete the culminating experience. Students must confirm their culminating experience

requirement during the semester they are enrolled in their final required course.

Option 1 – Comprehensive Exam

The Comprehensive Exam is the default option for all MA in Health Studies students. Students in the program will be expected to complete the Comprehensive Exam unless they opt into Option 2: CHES Exam. The Comprehensive Exam is based on the 6 required courses. Students must earn a B or higher in all 6 required courses to attempt the Comprehensive Exam. Comprehensive Exam details will be shared with students as the semester in which they are scheduled to attempt the Comprehensive Exam approaches.

The Comprehensive Exam must be taken in the semester immediately after the final required course is completed and passed. The Comprehensive Exam is offered in Fall (September), Spring (February), and Summer (June). Students taking the Comprehensive Exam will be notified of the Comprehensive Exam timeframe at least one month before the Comprehensive Exam is to be offered in the semester in which they are taking it. Each Comprehensive Exam is reviewed by two graduate faculty members who use a rubric for scoring. A copy of the rubric and Comprehensive Exam scoring details are provided to students on the day their Comprehensive Exam is scheduled to begin.

Option 2 – Certified Health Education Specialist (CHES) Exam

The CHES Exam is offered by the National Center for Health Education Credentialing (NCHEC). NCHEC is a national health education organization that certifies health education specialists, promotes professional development, and strengthens the professional preparation and practice of health educators. The CHES Exam tests students on the same concepts and domains as the Comprehensive Exam.

The CHES Exam is administered twice a year during (each April and each October) for a period of 10 days in both months. CHES Exam dates are provided on the NCHEC website. The CHES Exam is computer-based assessment offered at over 400 registered sites. The CHES Exam consists of 150 scored items and includes 15 additional, unscored pilot items. Examinees are provided three hours to complete the multiple-choice exam.

Students who opt to take the CHES Exam as their culminating experience must cover the CHES Exam fee and any other costs associated with the exam. Exam fee details and the registration information for current students are provided on the NCHEC website.

Students who opt into taking the CHES Exam as their culminating experience must complete and pass the exam in order to have the exam count as the culminating experience. Students must submit evidence of their passing grade to the MA Program Coordinator before the deadline set for their semester of graduation.

Students who attempt the exam and do not pass the exam must then attempt and pass the Comprehensive Exam in order to fulfill the culminating experience. The MA Program Coordinator will provide advising and updated deadlines to students who are in this situation.

Time Limits for Degree Completion Requirements

The MA in Health Studies program adheres to the time limits set forth by the UA Graduate School (p. 18). Students have six years or 18 semesters immediately preceding the date on which the degree is to be awarded to complete all degree requirements and graduate.

Student Progress Requirement

The MA in Health Studies program adheres to the Student Progress Requirements set forth by the UA Graduate School.

Academic Misconduct Information

The MA in Health Studies program follows the criteria and guidelines set forth by the Graduate School on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Students are encouraged to follow university policies and processes if seeking a withdrawal from a course, a withdrawal from all courses, or a leave of absence (p. 206).

Academic Grievances Information

The MA in Health Studies program adheres to the academic grievance procedures (p. 219) as outlined by the Graduate School.

Scholastic Requirements

The MA in Health Studies program adheres to the scholastic requirements (p. 204) set forth by the Graduate School, except for the transfer credit limit for the program is set to 6 hours.

Graduate School Deadlines Information

Information on Graduate School Deadlines.

Application for Graduation Information

Please visit this link for information about application to graduate.

Master's Degrees

The primary purpose of master's degree programs is to provide students with subject matter at an advanced level in their fields of study. Master's degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master's programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master's degree:

Plan I. Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or "capstone experience" as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student's program at the master's level must provide sufficient association with the resident faculty to permit individual evaluation of the student's capabilities and achievements.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Courses of full graduate-level credit earned in a *regionally* accredited institution where a student was enrolled in the graduate school, may be submitted for review for inclusion in a master's degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student's advisory committee and the dean of the Graduate School.

A student initiates the Request for Transfer of Graduate Credit form and must ensure that the Graduate School receives an official transcript from the outside institution. This should be done well in advance of the final semester, otherwise it may delay graduation and awarding of the degree.

With the approval of the student's department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from an outside institution. Some master's degree programs allow fewer hours to be transferred. Be sure to check with your department's graduate program director regarding your department's transfer policy. Eligible coursework will have been earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA master's program. Only courses in which a student earned a "B" grade or better may be transferred. Thesis Research (599) may not be transferred in from an outside institution. If approved, such coursework can be counted toward the minimum hours and coursework requirements for the master's degree.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

400-Level Courses

A maximum of 6 semester hours of 400-level course credit may be accepted for graduate credit and used toward a master's degree. The department needs to submit the Approval of 400-Level Course Work for Master's Credit form through the UA DocuSign system in myBama. This form must be submitted for approval to the Graduate School by the last day to add a course for the semester in which the course will be taken.

Time Limit

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. Previously approved transferred coursework that falls within six years of *admission* to the master's degree program can be counted toward the minimum hours requirement. There is no provision for an extension of the time limit beyond six years for master's students.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

Thesis

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. Students set up their committee through the Graduate Academic Activities portal on the Graduate School website. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. The majority of the thesis committee must be full-time regular University of Alabama faculty. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Affiliate Graduate Faculty status for the specific purpose of serving on the student's thesis

committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. All members must agree that the student is ready for the final oral thesis defense. A final oral thesis defense is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral thesis defense unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but the student and Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. In circumstances where virtual participation is necessary, all participants must follow the Virtual Participation guidelines found below.

Virtual Participation in Committee-Based Exams/Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.
7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Article Style vs. Journal Format for Master's Theses

Article Style.

At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.

Journal Format.

A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

All theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research.

In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the

college Human Research Review Committee to obtain approval for the planned research.

Final Thesis Defense

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance. The thesis must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

"Completed" means submitted to ProQuest after being successfully defended, carefully edited following the defense meeting, and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. A majority of the thesis committee must approve the written thesis and defense before submission to the Graduate School. Following the thesis defense, the Committee Acceptance Form is submitted by the thesis chair through the UA DocuSign system in myBama.

Graduate School deadlines, including each semester's thesis deadline, are available at the Graduate School's homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the thesis before the student can be cleared for graduation.

Comprehensive Examinations

In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all candidates for the master's degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School.

The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. The final report is submitted by the department through the UA DocuSign system in myBama. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only

twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation

Each candidate for a master's degree must submit an Application for Degree via myBama no later than the last day to add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Second Master's Degree

Six (6) semester hours of eligible credit from one master's degree at The University of Alabama may be applied to the requirements for a second master's degree, but only if the department of the second master's agrees to the courses in the plan of study. Any hours from the previous master's degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master's degrees, no hours may double count toward any additional master's degrees.

HD500 Lifespan Human Development

Hours 3

This course will advance students' knowledge of the theories and research in human development across the lifespan. Major areas of study include: developmental theory and physical, cognitive, social and emotional development.

HD512 Adult Development

Hours 3

Theories of and research on development throughout adulthood; young adulthood, middle years and aging are presented.

Human Development and Family Studies, MS

Human Development and Family Studies (HDFS) focuses on helping children, families, and relationships thrive. Our students and faculty work from a lifespan ecological perspective on development and families, recognizing and supporting the many forms of diversity in

individuals, families, developmental pathways, and contexts. We focus on discovering and applying new knowledge to strengthen individuals, families, relationships, and communities, and on preparing the next generation of professionals to serve and lead.

Human Development and Family Studies' (HDFS) students seek advanced employment or leadership positions in occupations serving children, adults, and families, or admission to PhD programs. All students complete coursework in lifespan human development, family science, research methods, statistics, and select additional courses aligned with their interest and career goals. Faculty research laboratories, The Children's Program, and collaborations with various agencies serving children and families across the state of Alabama provide opportunities for research and experiential learning.

Concentrations

Marriage and Family Therapy (MFT) provides graduate students with high quality training in the theory, skills, and professional identity essential to competent practice in the field of marriage and family therapy. Students graduate equipped to treat a wide variety of individual, couple, and family mental health issues with diverse populations.

Child Life (CL) is for students who wish to pursue the healthcare career of a Certified Child Life Specialist (CCLS). Specialists support children and their families in the healthcare setting by providing education about diagnoses, support through procedures, and by promoting development. Through personalized advising and a flexible curriculum, the program accommodates students trained in other areas who wish to pursue a career in Child Life, as well as Child Life Specialists seeking advanced training.

Admissions

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

HDFS M.S.		Hours
HD 500	Lifespan Human Development	3
HD 562	Dynamics Of Family Reltn	3
HES 509	Research Methods	3
BER 540	Statistical Methods In Educ	3
Credit Hours Subtotal:		12
Students must also complete a thesis or comprehensive exam.		
Thesis Requirements		
HD 599	Thesis Research	6
Advisor Approved Statistics Class		3
Total Hours		21

In addition to the 12 credit hour Program Core, students opting for a thesis will complete 9 credit hours (plus the 9 credit hours of thesis requirements), whereas students opting for the comprehensive exam will complete 18 credit hours.

Concentrations

Students may complete the HDFS M.S. with no concentration, a concentration in Child Life, or with a concentration in Marriage and Family Therapy. After being admitted into a specific concentration, any request to switch concentrations must be approved by the HDFS Graduate Faculty Committee. Students should consult with their advisor or the Department Chair before requesting to switch concentrations.

HDFS M.S. with No Concentration

The HDFS M.S. with no concentration prepares students for advanced employment and leadership roles and/or for admission to PhD programs.

HDFS M.S. with no concentration	Hours
Choose 9-18 credits from the following:	9-18
Must include one Family Studies Course	
HD 561 Theories Family Studies	
HD 535 Parent/Child Relationship	
Must include one Developmental Course	
HD 512 Adult Development	
HD 602 Adv Infant Development	
HD 601 Advanced Child Development	
HD 603 Adv Adol Development	
Advisor Approved Electives	
Total Hours	9-18

Marriage and Family Therapy Concentration

The Marriage and Family Therapy (MFT) concentration which prepares students to take the licensure examination leading to Clinical Membership in the American Association for Marriage and Family Therapy. In addition to the 12 credit hour Program Core, students pursuing the MFT program of study will complete 39 credit hours (24 didactic + 15 practica and internship) of concentration courses. Clinical opportunities are provided in the College's Capstone Family Therapy Clinic.

Curricular Requirements

HDFS M.S. with MFT Concentration	Hours
HD 640 Couple and Sex Therapy	3
HD 641 MFT Ethics (MFT Ethics)	3
HD 642 Assess Psychopathology MFT	3
HD 645 Cultural Diversity in Marriage and Family Therapy	3
HD 664 Family Therapy	3
HD 665 Advanced Family Therapy	3
HD 567 Pract Marriage Family Therapy	3
HD 568 Pract I Marriage Family Thery	3
HD 667 Pract II Marriage Family Ther	3
HD 668 Intern Marriage Family Therapy	6
Choose 6 credits from the following:	6
HD 535 Parent/Child Relationship	
HD 561 Theories Family Studies	
HD 631 Readings Human Developmt	
Advisor Approved Electives	
Total Hours	39

Concentration in Child Life

The concentration in Child Life prepares students to take the Child Life Professional Certification Exam to become a Certified Child Life Specialist. In addition to the 12 credit hour program core, students pursuing the Child Life concentration will complete 24 credit hours.

Curricular Requirements

HDFS M.S. with Child Life Concentration	Hours
HD 550 Hospitalzd Child & Youth	3
HD 551 Loss And Bereavement	3
HD 591 Sp Prob Hum Dev Fam Stdy	3

Total Hours	24

Transfer Credit

Graduate School information on Transfer Credit. (p. 18)

Accelerated Masters Program

Graduate School information on the Accelerated Masters Program (p. 13).

Comprehensive Examination/Capstone

Students must complete a thesis, PILOT, or comprehensive exam. The comprehensive exam is a take-home essay exam normally completed in the student's final semester. Students will have two attempts to pass the comprehensive exam.

Internship Requirements

Each student completing the Marriage and Family Therapy, or the Child Life concentration will be required to complete an internship. The internship does not satisfy the capstone requirement. Students must also complete a thesis, PILOT, or comprehensive exam.

To be eligible to sit for the Child Life Professional Certification Examination, child life students must complete a 600 hour clinical internship under the supervision of a Certified Child Life Specialist. Child life internships are unique in that students apply and compete for an internship in child life programs of their choice. During an internship, child life students further their knowledge and skills and practice implementing child life services with patients and families in order to become job ready. Child life internships are very competitive, and child life students are encouraged to meet with their advisor to learn about and prepare for the process.

Plan I - Thesis Process Requirements

Students must complete a thesis, PILOT, or comprehensive exam. A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all Master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved first by the student's major professor and then by the graduate committee of the major department or school and by the head of the student's major department or division. The thesis committee must consist of at least three members approved by the Dean of the Graduate School. A student and his or her major professor will select the thesis committee. All members of a thesis committee must be members of the Graduate Faculty. Two members must be from the student's major department and one member must be from outside the student's major department. The student's major professor will serve as the committee chair.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis

in absentia, the student must, before leaving the University, submit a satisfactory outline and timeline for the completion of the thesis project, as well as evidence that adequate facilities are available where the work will be done, to the head of the major department or school. Students are strongly encouraged to complete the thesis while in residence.

Note that students completing a thesis must also take an additional statistics class and at least 6 credit hours of HD 599 Thesis Research.

Plan II - Non-Thesis Process Requirements (PILOT)

Students must complete a thesis, PILOT, or comprehensive exam. Students may be able to complete a project-in-lieu-of-thesis (PILOT) at the discretion of the student's Major Professor. A PILOT (Plan II) is not always available, or feasible. Students should not assume that they will be able to conduct a PILOT. The major difference between a traditional thesis and a PILOT is that in the former, the student originates the idea for the study and fully develops the research question and the design of the study. In contrast, a PILOT is likely to be an idea that the major professor has already fully developed, or is in the process of developing, or is a study or project already in the process of being conducted.

After consulting with their Major Professor about the possibility of completing a PILOT, and receiving approval to complete a PILOT, a written agreement should be developed between the student and the Major Professor as to what will comprise the PILOT, including a timeline to complete the PILOT. The Major Professor and student must sign the agreement for it to be valid. Prior to starting on the PILOT, students must also propose their project to a committee of three faculty members. All three committee members may come from within the Department of Human Development and Family Studies. The student's major professor will chair the student's committee and will be one member on the PILOT Committee. Only two of the three committee members must be members of the Graduate Faculty.

The student must produce a written document that describes the planning and implementation of the project, including a literature review, (or similar acceptable document, such as an IRB protocol) to present to the PILOT committee. No date will be set for the committee to meet until the committee reads and provides feedback to the Major Professor and/or student about the PILOT. The student is responsible for scheduling a proposal meeting with the PILOT committee, presenting the proposal and receiving approval from the committee to conduct the PILOT. Once the project is completed, the student submits the written document to the committee, and presents the results of the project at a final defense before the committee members. The PILOT committee unanimously must approve the student's defense of the project and sign-off on the PILOT Defense Form. PILOT Defense Forms can be obtained from the Program Assistant in the Department of Human Development and Family Studies. If the PILOT is part of a study already being conducted, the IRB must be amended to include the student's name after the PILOT committee has approved the PILOT. The student is expected to write different sections of the PILOT, including assisting with the writing of the PILOT (e.g., literature review), collecting and working with data (e.g., administering assessments, coding videotapes, scoring and entering assessments into a database, etc.), assisting with the data analyses and interpretation and write up of the results and discussion sections.

Students who complete a PILOT must enroll for at least 6 credit hours of HD 598 Research Practicum - Non Thesis Research.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 18).

Student Progress Requirements

Each student pursuing the MFT concentration will meet with program faculty, at least annually, to review the student's progress and discuss steps for continued growth in the program. The meeting will address progress on coursework, clinical skills, professional competencies, ethical and legal competencies, and adherence to the non-discrimination, diversity, and inclusion code of conduct.

Faculty will provide three levels of support for student development. The first level encompasses the typical day-to-day professional interactions and practices that occur during coursework and clinical supervision. The second level comes into play when a student struggles to make progress on one or more competencies through typical coursework and supervision procedures. Such "minor deficiencies" will be addressed through the collaborative development and implementation of an improvement plan. The third level typically occurs when a student fails to make progress toward overcoming a "minor deficiency," but there may be occasions when a "severe deficiency" appears suddenly (e.g., a student commits a significant ethical violation). "Severe deficiencies" are addressed through the collaborative development and implementation of a remediation plan. Failure to adequately address a "severe deficiency" will result in dismissal from the program.

NHM509 Research Methods in Nutrition

Hours 3

This course is an introduction to scientific methods appropriate for nutrition research. Approaches to designing, conducting, and evaluating nutrition research are discussed along with strategies for applying research into practice.

NHM530 Advanced Nutrition Counseling

Hours 3

Focuses on advanced skills in nutrition counseling that incorporates behavioral theory and motivational interviewing.

RHM521 Hospitality Law and Risk Management

Hours 3

Exploration of legal problems facing the hospitality industry. Legal cases related to restaurants, hotels, and meeting facilities are examined. Concerns and problem-solving for issues of risk management are explored.

RHM551 Sport Properties and Venue Management

Hours 3

This course is designed for the sport professional to increase their knowledge and understanding of principles and practices associated with managing a public assembly venue and the nature of the venue business.

Hospitality Management, MS

The Hospitality Management, MS degree program prepares students wishing to advance and to excel in leadership/executive positions in the hospitality, tourism, and sport industries. A thesis option within this program will prepare students who wish to extend their education by providing a robust research foundation to be successful in a doctoral program in Tourism Management, Hospitality Management, Sport and Entertainment Management, Business Management, and Law. The Sport Hospitality concentration prepares students for success in a wide variety of sport, hospitality, entertainment, and tourism careers along with the opportunity to meet and interact with experienced industry professionals. The hospitality, tourism, and sport industries touch the lives of all citizens and provide economic and social benefits to the State of Alabama and the United States.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three letters of recommendation
- Statement of Purpose (Include in the Header: Hospitality Management). Students should also include in their statement why they have chosen this area of study and how it will apply to their personal and/or professional goals.

See the Admission Criteria section of this catalog for more information.

Transfer Credit

Courses completed at other postsecondary institutions and accepted for UA graduate credit are given a grade of "P" and are not calculated in the overall graduate GPA.

Graduate School information on Transfer Credit (p. 204).

Accelerated Master's Program Information

The Hospitality Management program has an approved AMP program through the Graduate School. Undergraduate students in the Hospitality Management program may apply the semester they will earn 91 credit hours with a GPA of 3.3. AMP students can take up to 15 credit hours in graduate courses. If you are interested in the AMP program, please schedule a meeting with the program director.

Graduate School information on the AMP Program (p. 13).

Comprehensive Examination/ Capstone Project

All students must complete either a comprehensive exam or a capstone project (thesis or non-thesis project) to meet the graduation requirements. Students need to contact their graduate advisor and convey their decision regarding which option by the end of the second semester. Students selecting the thesis track need to contact their advisor during the first semester taking courses.

Comprehensive Examination

Students who choose the non-thesis Hospitality Management option will be required to take a comprehensive exam or complete a Capstone Project (see below). At the beginning of the final semester, you will receive an email from the Comprehensive Exam Coordinator with specific information about the exam along with important dates. You are required to confirm your graduation intent with the Comprehensive Exam Coordinator or your advisor within 2 weeks of the final semester. Upon confirmation, the student will be added to a Blackboard course where detailed exam information can be found along with the comprehensive exam guidelines. Students are required to take the comprehensive exam the last semester taking courses. The comprehensive exam is an essay exam that integrates prior learning. Students are provided with three questions and have 1 week to complete the exam.

Evaluation: Two HM graduate faculty members will independently answer to each exam question using a blind evaluation process. Each question will be scored as either pass, marginally pass, or fail. If a student fails any or all of the questions, they may retake the exam once during the current

semester. If the student chooses to take the exam the following semester, the student must register for another graduate course.

Notification of Passing/Failing: Students will be emailed the results of the examination within 2 weeks after the exam period.

Capstone Special Project

Students not completing a thesis or comprehensive exam must complete a special project under the supervision of a faculty advisor. This project will allow students to work with an industry professional on a topic or issue where the results will benefit the hospitality organization. Students must gain approval to complete the Capstone Special Project.

Plan 1 - Thesis Process

A student interested in a thesis option should contact their advisor by the end of the first semester of graduate studies. Students completing a thesis will need to sign up for a total of six hours of RHM 599 Thesis Research. These hours can count toward the required 18 hours in RHM designated courses needed for the degree. To complete the thesis option, students will need to:

- select a designated mentor (Chair) from the UA Hospitality/Sport faculty who is willing to serve as your chair
- select a thesis committee of at least three members including their mentor
- write a proposal that includes an extensive review of the literature and proposed methods that will be used in the study
- receive approval of the proposal from the designated mentor
- seek guidance from committee members prior to collecting data
- formally propose the research plan to the committee and respond to feedback
- receive IRB approval for the project in their own institution and UA
- collect data
- analyze data
- interpret the data and write up the results
- discuss implications of the study
- seek final approval from committee members and formally present the research to the committee members and other faculty
- and electronically publish the thesis according to The University of Alabama's guide for "Electronic Theses and Dissertations."

Students completing a thesis should ensure that they can meet the Graduate School's deadlines for students.

Plan II Non-Thesis Process

Students must complete 30 credit hours of coursework and successfully pass a comprehensive exam or complete a Capstone Project. Sport Hospitality students must schedule an appointment with their advisor to begin discussing their Capstone Project during their first semester in graduate school. Hospitality Management students must schedule an appointment with their advisor during the first semester in graduate school to confirm the non-thesis option. Students must also contact their advisor the semester prior to the last semester to schedule the comprehensive exam.

Time Limits for Degree Completion

Graduate School information on Time Limits (p. 18).

Academic Misconduct

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence

Under compelling circumstances beyond the student's control, a graduate student may request that the department petition the Graduate School with the rationale for granting a leave of absence. If granted by the Graduate School, a leave of absence will cover one or more upcoming semesters rather than any prior semester(s). A leave of absence is not a method of avoiding continuous registration requirements, and it *does not* lengthen the time limit. When a student returns from a leave of absence, the Graduate School must be notified and will work with the department and student to determine the number of semesters remaining on the time limit and the degree requirements that remain.

Human Nutrition, MS

The Master of Science in Human Nutrition is a 30 credit-hour program designed to prepare nutrition professionals to practice dietetics at an advanced level and/or to pursue doctoral study. The program develops research skills, stimulates independent thought, and provides up-to-date knowledge in food and nutrition. Applicants can choose to pursue the major without a concentration or can select the Community Nutrition or Clinical Nutrition concentrations to provide a more in-depth study of their chosen area. The program is designed for the registered dietitian but can be completed by a dietetic intern or student with a bachelor's degree in nutrition or another discipline who has met the listed prerequisites.

Campus Options

The master's degree is available on campus or through distance education. The degree requirements are the same, regardless of where it is completed.

Application Deadline

Applications are accepted on a continual basis.

Additional Information

Direct additional questions to the Director of the Master's Program in Human Nutrition, Dr. Tiffany Hylton at tmhylton@ches.ua.edu or 205-348-6973.

Students earning the Master of Science (MS) degree with a major in Human Nutrition must complete all University, College, and Departmental degree requirements. These include the following requirements to total a minimum of 30 applicable semester hours.

Admission Requirements to the MS in Human Nutrition

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Resume
- Three letters of recommendation (at least two should come from academic references)
- Prerequisite Courses: Students must have completed an ACEND accredited dietetic program or the following undergraduate prerequisite courses or their UA equivalent prior to admission into the program.

Code and Title	Hours
CH 104 Introductory Chemistry	
CH 105 Introductory Org Chem	
BSC 215 Human Anatomy & Physiology I	
BSC 216 Human Anatomy & Physiology II	
NHM 101 Intro Human Nutrition	
NHM 201 Nutrition In Life Cycle	
NHM 340 Community Nutrition	
NHM 361 Nutritional Biochemistry	
NHM 363 Applied Nutrition	
NHM 372 Intro Food Service Mgt	

Students who do not meet these requirements, but who excel in other areas, may be considered for "Admission with Permission to Continue." Their acceptance letter will specify the conditions of their admission. These students must meet the conditions listed in their acceptance letter and the following policy listed in the graduate catalog.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Graduate students in Human Nutrition will choose from one of the following: 1) Generalist Track (no concentration), 2) Clinical Concentration, or 3) Community Concentration. The required course work will differ by track/concentration. Students consider taking NHM 509 (Research Methods in Nutrition) and CHS 525 (Biostatistics) early in the program.

To complete the MS in Human Nutrition, students will need to complete the required courses designated in their track/concentration, a minimum of 18 hours in NHM designated courses (may include non-thesis and thesis research hours), a minimum of 30 credit hours at the graduate level (500 or greater), and a culminating project or exam entitled the Capstone Experience. Additionally, students need to earn a grade of B or better in all required coursework and any NHM designated course, and at least a 3.0 overall GPA to graduate.

Graduate students may develop their own plan of study unless they are coordinating their master's degree in Human Nutrition with a DPD verification statement for the MS + DPD program. Students should consult their advisor for a specific plan of study that includes both graduate and undergraduate courses. When selecting graduate electives, students should seek advice from their advisor. Some courses require a pre-requisite undergraduate course while others do not.

Note: The following pertains to the Generalist Track only. Additional information about the Clinical and Community Concentrations may be found below, near the end of the page.

Human Nutrition, MS - No Concentration (Generalist Track)		Hours
Major Requirements		
NHM 561	Adv. Vitamins and Minerals	3

NUR 510	Basic Conc Teaching Diabetes	
NHM 599	Thesis Research	
NHM 598	Non-Thesis Research	

Additional elective course options available upon approval of Advisor.

Total Hours **30**

Footnotes

* Students have the option to complete a thesis or non-thesis research project or a comprehensive exam for their Capstone Experience. If selecting the thesis option, a minimum of 6 hours of NHM599 - Thesis Research must be taken. If they chose the exam path then, rather than having 3-6 thesis/non-thesis research hours, 15 hours total would be required in elective courses with a minimum of 3 courses being from NHM-designated courses.

Total Hours**30****Transfer Requirements**

MS students can request the transfer of up to 12 credit hours of graduate courses taken at other institutions. The Program Director may request the student provide a copy of the course syllabus for evaluation.

Courses completed at other post-secondary institutions and accepted for UA graduate credit are given a grade of "P" and are not calculated in the overall GPA. ALL coursework must fall within six years from the date that this degree will be awarded. Thesis work, practicum hours, pass/fail courses and internship hours do not count towards the graduate credit hours that can be transferred into the program.

More information may be found on the Graduate School's catalog page.

Accelerated Master's Program

Current Food and Nutrition undergraduate students with a 3.3 or higher GPA, 90 or more hours of undergraduate course credit, and who have completed the required prerequisite courses are eligible to apply for the Accelerated Master's Program (AMP). AMP allows undergraduate students to simultaneously count up to 15 hours of graduate coursework toward both the undergraduate and graduate degrees.

Prerequisites courses:

- CH 104 Intro to Chemistry
- CH 105 Intro to Organic Chemistry
- BSC 215 Human Anatomy and Physiology I
- BSC 216 Human Anatomy and Physiology II
- NHM 101 Intro to Human Nutrition
- NHM 201 Nutrition in the Life Cycle
- NHM 340 Community Nutrition
- NHM 361 Nutritional Biochemistry
- NHM 363 Applied Nutrition
- NHM 372 Intro to Food Service Management

More information may be found on the Graduate School's catalog page.

Capstone Experience

All students must complete a Capstone Experience toward the end of their degree program. The Capstone Experience is a culminating project (thesis or non-thesis research project) or comprehensive exam that integrates prior learning. Main campus students can select either the thesis option (Plan I) or one of the non-thesis options (Plan II). Distance learning students may select from the available options in the non-thesis track (Plan II). Students need to contact their graduate advisor,

and convey their decision regarding their Capstone Experience at least two semesters prior to the semester they wish to graduate. Students selecting the thesis track need to contact their advisor earlier.

Plan I - Thesis Option:

Students interested in a thesis track should contact their advisor early in their studies. Thesis projects usually take two to three semesters to complete. Students completing a thesis will need to sign up for a total of six hours of NHM 599. These hours can count toward the required 18 hours in NHM designated courses needed for the degree. The thesis should focus on current nutritional concerns in which the student has a special interest. To complete the thesis option, students will need to:

- Select a designated mentor (Chair) from the UA Nutrition faculty who is willing to serve as your chair
- Select a thesis committee of at least three members including their mentor (one member must be from outside of the nutrition department)
- Write a proposal that includes an extensive review of the literature and proposed methods that will be used in the study
- Receive approval of the proposal from the designated mentor
- Seek guidance from committee members prior to collecting data
- Formally propose the research plan to the committee and respond to feedback
- Receive IRB approval for the project in their own institution and UA
- Collect data
- Analyze data
- Interpret the data and write up the results
- Discuss implications of the study
- Seek final approval from committee members and formally present the research to the committee members and other faculty
- Electronically publish the thesis according to The University of Alabama's guide for "Electronic Theses and Dissertations."

Students completing a thesis should ensure that they can meet the Graduate School's deadlines for students.

Plan II - Non-Thesis Option:

Students, who select the non-thesis option, will complete either a non-thesis research project (NHM 598) or the comprehensive exam. The majority of students prefer the comprehensive exams.

Non-thesis Research Project

The non-thesis research project will take at least two semesters to complete. The student should take NHM 598 (Non-Thesis Research) with a designated mentor (UA Nutrition faculty) as the instructor in the semester the student plans to complete the project and graduate. The course is worth 3 hours and can be applied to the 30 hours required for graduation and the required 18 hours in nutrition. Students will need to write a proposal and seek approval by a designated mentor, seek and obtain IRB approval in their own institution and UA, collect data, analyze the data, and write up results using the brief manuscript style used by the *Journal of the Academy of Nutrition and Dietetics*. If the student plans to complete research in their hospital or health care facility, then the project may require review by the medical IRB at UA. This group meets to review IRB proposals only once per month. Students must follow HIPPA guidelines when conducting medical research. Students should plan their project and seek IRB approval in the semester prior to registering for NHM 598.

Comprehensive Exam Option:

The master's program in Human Nutrition requires students who do not complete a thesis (6 hours of NHM 599) or a non-thesis research project (3 hours of NHM 598) to pass a written comprehensive exam prior to graduation. The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Students must inform the master's program Director of their intent to complete the comprehensive exam at least 1 semester prior to taking the exam. The comprehensive exam is taken in the student's last semester. The material covered in the exam will vary depending on the track the student selected. Students must be enrolled in at least one hour of graduate coursework in the semester they take the comprehensive exam. Students do not enroll in a comprehensive exam course. Students taking the exams will receive a study guide for the exam early in the semester they plan to take the exam. **This is typically the best option for distance learners**, as coordinating research projects by distance is difficult.

The master's comprehensive will be administered three times per year: once each fall, spring, and summer semester. The exact dates will be specified in the comprehensive exam guide. This exam guide will be provided to each student prior to the start of their final semester.

The exam will be divided into 3 parts.

- Students following the Generalist Track will answer questions from the following courses:
 - a. General Research Methods
 - b. Maternal and Infant Nutrition *OR* Clinical Applications
 - c. Nutrient Metabolism
- Students following the Clinical Concentration will complete:
 - a. General Research Methods
 - b. Nutrient Metabolism
 - c. Clinical Applications
- Students following the Community Concentration will complete:
 - a. General Research Methods
 - b. Community Nutrition
 - c. Maternal and Infant Nutrition

Students should independently prepare for the master's comprehensive exam. Students may not solicit any advice or request an instructor provide further details regarding any question on the exam. The best answers are those in which the student demonstrates in-depth understanding of the topic. To do so, students should incorporate course material and scientific literature into the foundation of each answer. Sufficient justification for each answer will be expected. Insufficient depth or detail or incorrect content will not result in a passing grade.

Evaluation

Two NHM graduate faculty members will independently read and evaluate the answers to each exam section. A four point scale will be used to record each evaluation of student responses (1=Emerging, 2=Progressing, 3=Proficient, 4=Mastery). Students must earn Proficient or Mastery on each section to pass. If a student fails 1 of the 3 parts (earning Emerging or Progressing), they may retake that part of the exam during the current semester. Students who fail 2 or more parts of the exam must wait until the following semester to retake the exam. The student must also register for another course during the semester they retake the comprehensive exam.

Notification of Passing/Failing

The master's program Director will email each student the results of the examination within 3-4 weeks after the end of the exam period.

Retake Policy

Only 1 retake is allowed. All retakes are proctored. Failure to successfully pass any part(s) of the examination retake will result in dismissal from the degree program and the Graduate School without confirmation of the degree.

Time Limits for Degree Completion Requirements

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master's students.

More information may be found on the Graduate School's catalog page.

Additional Academic Requirements

As a graduate student in the Department of Human Nutrition and Hospitality Management, you are responsible for your overall program of study and progress toward your degree. Progress toward degree includes adherence to all deadlines, milestones, and curriculum requirements. Your primary advisor and thesis/dissertation committee members will advise you throughout your time with us. However, it is incumbent on each student to be familiar with all requirements and take responsibility for your own education. Students should be familiar with the guidelines outlined in this handbook as well as those listed within the graduate catalog.

A graduate student is considered a professional student. Therefore, students should demonstrate professionalism in all aspects of course work and research. In addition, a graduate degree in Human Nutrition builds on foundational knowledge. As a new graduate student, you will notice a significant difference in expectations between undergraduate and graduate studies.

Onboarding:

- Newly admitted graduate students will have mandatory onboarding/orientation requirements.
- Failure to complete required activities and/or assignments may impact program progression and enrollment.
- The MS Program Director will provide additional details upon acceptance.

Academic Expectations:

- Graduate students should expect assignments that are complex and challenging. Graduate level courses usually require a research paper with critical analyses of multiple peer-reviewed research articles. Students who are not familiar with research designs should start their education by taking a graduate level research methods course.
- Students should review assignments early so they can schedule an appropriate amount of time to complete each assignment. Students should expect that graduate level assignments should take two to three times longer than undergraduate assignments.
- Graduate students should expect lectures with a greater level of detail than undergraduate courses. Instructors will expect the same level of detail in exam answers and assignments.
- Graduate students should expect that exam questions may ask the student to apply, analyze, or evaluate materials presented in class rather than simply list or describe.

- Students should not assume that every instructor has the same policies (ex. due dates, late assignments, etc.). Students should view the instructor's introduction to the course, syllabus, and any additional materials.
- Most instructors of graduate courses assume that the student has mastered English grammar and punctuation. Students needing additional help or reassurance should complete their writing assignments early and use the Writing Center to help improve these skills.
- In courses where Turnitin.com is used, students are expected to review matches, edit, and resubmit their edited work to Turnitin prior to submitting the paper for grading. Papers submitted to Turnitin.com should match the paper submitted to the instructor for grading.
- Main campus students are encouraged to participate in research activities.

Attendance:

- Distance learning students should set aside time to virtually attend class each week. Students are responsible for reviewing the course schedule and developing a plan to complete each unit in a timely manner. Additional time is needed to complete assignments and readings.
- Main campus students are expected to attend class and participate in discussion. Students should prepare for class by completing all assigned readings.

Academic Advising:

- Students should consult their academic advisor prior to registering for classes each term. Some graduate level courses may require specific undergraduate pre-requisite courses.
- Students attempting to complete a graduate level course in lieu of an undergraduate course should note that the course may require additional time to master both the undergraduate and advanced materials.
- Graduate courses are designated as either masters (5XX) or doctoral (6XX). Courses designated as 100-400 are undergraduate courses and cannot be counted toward graduate hours.

Course Load Restrictions:

The maximum course load for a semester is 15 credit hours. Students may register for a maximum of 6 semester hours in a summer term or 12 hours during an entire summer dual session. No more than 3 semester hours may be taken during the Interim session. Taking more than 12 semester hours in a summer dual term requires a petition from the department regarding the extraordinary circumstances for approval by the Graduate School. A student who is employed part-time should consider taking a reduced load. It is recommended that fully employed students should register in no more than one course.

Academic Warning and Dismissal:

Students may be dismissed from this program for failure to meet the scholastic requirements listed above. Departmental suspension (dismissal) from a degree program also results in suspension from the Graduate School.

A graduate student with good academic standing whose GPA drops below 3.0 at any time after earning 12 semester hours will have earned Academic Warning.

Academic Warning: A student placed on Academic Warning has the next 12 hours of graduate work to raise the overall GPA to 3.0 or better. The overall GPA after the next 12 hours following academic warning must be

at least 3.0 to avoid Academic Suspension (dismissal) from the Graduate School.

The department may dismiss a student from a degree program if there is unsatisfactory academic

or other progress toward completion of the degree. Departmental dismissal also results in suspension from the Graduate School. Students who are suspended may not attend class or enroll in any form of distance learning courses.

Students are encouraged to use the time of the suspension in ways that assist their academic progress. Students may study in order to finish courses in which they have earned an incomplete (I) or no grade (N) and may work with faculty members in this process. Students may also address other non-academic problems that have impeded their progress.

While on academic warning, the student is not eligible to apply for candidacy for a degree or hold a Graduate Assistantship. Warning status must be removed by raising the overall GPA to 3.0 or better and/or retaking all required courses with grades below "B" to achieve a grade of "B" or better, during the next 12 hours of graduate course work. Failure to remove either a warning or conditional status within the first attempted 12 hours of graduate course work will result in Academic Suspension (dismissal) from the Graduate School.

Assistantships:

Students must maintain a minimum of a 3.0 while holding any assistantship. If the GPA drops below a 3.0 overall, this will result in the loss of the assistantship.

Academic Misconduct Information

Students who are completing courses in the Department of Human Nutrition and Hospitality Management are expected to maintain high standards of honesty and integrity as befits those in or planning to enter the workforce in health care or human service professions. This includes, but is not limited to, adhering to The University of Alabama's Academic Misconduct Policy.

More information may be found on the Graduate School's catalog page.

Withdrawals and Leave of Absence Information

Information may be found on the Graduate School's catalog page.

Academic Grievances Information

If concerns arise, students are encouraged to communicate with the instructor or staff member who is directly involved with the concern. Usually, the concern can be resolved satisfactorily through honest and open communication with the faculty or staff member. Meeting with the instructor or staff member should be the first step in resolving the concern.

However, if informal discussions have not yielded a satisfactory resolution, or where the matter is more serious, the student may bring the concern to the Assistant Department Chair. Should the Assistant Department Chair not be able to come to a satisfactory resolution, they will direct the student on the next steps to move the concern to the next level.

More information may be found on the Graduate School's catalog page.

Scholastic Requirements

Students must earn a B or better in a required course. Students earning a C or lower in a required course will be allowed to repeat the course. Students must receive a B or better when repeating a required course. The first attempt will not be counted toward the degree but will be counted in the overall GPA. Additionally, students must earn a B or higher in a minimum of 18 credit hours taken within the nutrition department.

Seventy-five Percent Rule:

At least 75 percent of the hours taken must have been completed with grades of "A" or "B" at The University of Alabama. In applying this 75 percent rule, a maximum of 6 hours of thesis research may be counted, if appropriate.

Repeating Courses:

Regular courses (courses other than IDGR assistantship, thesis, dissertation, etc.) typically may not be repeated for graduate credit; this includes courses initially taken on an audit basis. However, a course that is required in a student's curriculum in which the student earned a "C," "D," or "F" may be repeated. Both grades contribute to the computation of the GPA. Only required courses where the student has received a B or better will be counted toward the degree requirements. Federal regulations limit the number of times a student may repeat a course and receive financial aid for that course.

DPD Verification Statement:

DPD requirements to receive a Verification Statements will apply to any graduate level DPD course. For more information, students should check with their advisor and DPD Program Director.

More information may be found on the Graduate School's catalog page.

Graduate School Deadlines Information

Information may be found on the Graduate School's website.

Application for Graduation Information

Information may be found on the Graduate School's catalog page.

Human Nutrition, Ph.D.

The PhD in human nutrition is a three-year, 74-credit-hour program designed to align with the goals and objectives of the National Institutes of Health's National Center for Advancing Translational Sciences (NCATS). As such, the program supports the training and development of researchers and leaders in the field of nutrition by focusing on developing the skills needed to perform bench-to-bedside-to-community research. Graduates of the PhD in human nutrition will be experts in nutrition research methodologies and translational nutrition, thereby efficiently advancing the field of nutrition through research to improve human health.

In accordance with the goals of the National Institutes of Health NCATS to implement and promote translational science approaches that foster collaborative bench-to-bedside-to-community approaches, a student who has completed this doctoral program in human nutrition will demonstrate mastery of:

- 1) Translational nutrition – Demonstrate proficiency in nutrition techniques that are integrated across discrete areas of nutrition research methodologies into a cohesive research agenda that moves nutrition research from the laboratory to the patient/community.

2) Communication - Effectively communicate nutrition information, evidencing the ability to evaluate and interpret current research for presentation to the academic, scientific, and/or the lay community.

3) Nutrition research practice – Demonstrate an understanding of relevant laboratory analyses methodologies, metabolic assessment techniques, and statistical research methodologies appropriate for developing strong, competitive research proposals.

4) Independent research – Demonstrate the ability to support an independent career in research by successfully developing and implementing a research protocol, gathering data to effectively test the hypothesis (or hypotheses), and analyzing and interpreting the data.

5) Effective educators - Demonstrate skills of effective classroom presentation of nutrition-related information.

Application Deadline: February 1. Admission decisions for Fall term will be made in mid-February.

Contact Information: Before applying, it is recommended that you contact the director of the PhD Program in Human Nutrition, Dr. Linda Knol, at lknol@ches.ua.edu or 205-348-8129.

For additional information, please visit the program webpage at <http://www.nhm.ches.ua.edu/phd-in-human-nutrition.html>

Admissions

Students may enter the program with either a bachelor's or master's degree in nutrition or a master's degree in a closely nutrition-related field.

Requirements for admission to the Ph.D. in Human Nutrition will be:

- A completed application, including a Statement of Purpose
- A current resume or curriculum vitae
- Three letters of recommendation from faculty or other health professionals capable of judging the applicant's ability to complete graduate work.
- Test Scores:
 - If a student has previously completed a Master's degree prior to beginning the Doctoral program and maintained a graduate GPA ≥ 3.5 , their application will be considered without the need to submit a GRE score.
 - Students who have previously completed a Master's degree prior to beginning the Doctoral program with a graduate GPA of 3.3-3.49 may be considered for admission providing they also have a GRE score of ≥ 300 . Upon admission, these students would need to receive permission to continue after the successful completion of 12 graduate hours.
 - Students with a Bachelor's degree will need to submit GRE scores. Minimum requirement for admission is a ≥ 300 on the GRE.
- If an applicant does not have a previous degree in nutrition, minimum prerequisite course work would include NHM 558 Nutr Prev Trtmt Chron Disease, NHM 561 Adv. Vitamins and Minerals, and NHM 562 Metabolism of Energy Nutrients. These would need to be completed in the first year of study. The sequencing of course offerings will be structured such that taking these prerequisites courses will not increase time to graduation nor will they require additional burden or heavier academic loads on the students in order to achieve a timely graduation.
- Additionally, if a student is admitted without having previously completed a Master's degree, they will need to complete NHM 509 Research Methods in Nutrition. The sequencing of course offerings

will be structured such that taking prerequisites course(s) will not increase time to graduation nor will they require additional burden or heavier academic loads on the students in order to achieve a timely graduation.

Please see the link below for general Graduate School admission criteria.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

The Ph.D. in Human Nutrition requires completion of 72 graduate hours, including 21 hours of nutrition core classes, 12 hours of statistics, 17 hours of nutrition electives including up to 12 hours of non-dissertation research, and 24 hours of dissertation research.

To complete the PhD in Human Nutrition, students will need to complete the required courses, obtain at least 72 credit hours (including non-dissertation and dissertation courses), pass both the written and oral preliminary exams, and complete the dissertation. Additionally, students need to earn a grade of B or better in all required coursework and any NHM designated course, and at least a 3.0 overall GPA to graduate.

Human Nutrition, Ph.D.		Hours
Required Courses		
NHM 635	Adv Prac. in Post Sec. Diet Ed	3
NHM 601	Contemp Research Nutrition Sci	3
NHM 602	Methods Integrat Nutr Assess	3
NHM 603	Nutrition Intervention	3
NHM 691	Grant Writing Nutrition Res	3
NHM 695	Interpret Nutrition Research	3
NHM 625	Nutritional Epidemiology	3
NHM 648	Secondary Analysis Survey Data	3
Statistics Elective (600 Level)		12

NHM 610	Nutr. and Health Disparities	
NHM 611	Nutritional Neuroscience	
NHM 698	Non-Dissertation Research	

Total Hours

72

Transfer Credit

With the approval of the student's PhD Advisor and the Dean of the Graduate School, up to 24 of the required course hours may be transferred from another institution. Submit the form, Request for Transfer of Graduate Credit, to the Graduate Office who will submit it to

the Graduate School during the first semester enrolled at the University of Alabama.

For students who have earned a master's degree at The University of Alabama, all applicable hours (i.e., course hours for which graduate credit has been received in the same department or in a closely affiliated department, but not including NHM 598 or NHM 599) may transfer to the PhD program. The number of hours that qualify for transfer is at the discretion of the Department, as recommended by the student's PhD Advisor and as approved by the Dean of the Graduate School. Subject to the approval of the student's PhD Advisor, graduate courses in allied departments may be taken to meet the remainder of the requirements. Transfer credits are considered Pass/Fail for calculation of grade point average, but are included in the course hours, provided they are from graded courses.

Doctoral Plan of Study Requirement

All doctoral students must have a completed Outline of Ph.D. Program (Plan of Study) approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree.

For more information, see the Plan of Study section of this catalog. (p. 23)

Comprehensive/Qualifying Examination

The purpose of the comprehensive examination is to determine the student's research competence to begin work on a dissertation. The written examination should be successfully completed at least nine months before the degree is to be awarded. Students should consult their academic advisor regarding the timing of the exam in the context of their academic plan. The comprehensive or preliminary qualifying examination is required of all doctoral candidates. This examination is administered after:

- foreign language/research skill requirements are met,
- completion of the required core nutrition courses, and
- the comprehensive exam committee deems the student to have adequate preparation in the major and minor fields of study.

To take the qualifying exam, students must be in good standing based on graduate school guidelines.

- Students may not have any incompletes "I."
- Students must have a current overall GPA of 3.0 or above.

Courses Covered: The written comprehensive examination is required of all candidates for the Ph.D. degree. The written exam will be offered in January and May of each year. This exam should be prepared for by individual study expanding on the content covered in five core courses: NHM 601 Contemp Research Nutrition Sci, NHM 602 Methods Integrat Nutr Assess, NHM 603 Nutrition Intervention, NHM 625 Nutritional Epidemiology, and NHM 648 Secondary Analysis of Survey Data. The exam must be passed unconditionally before the student can defend his/her proposal and be advanced to candidacy. Students should NOT assume that "A" level performance in their coursework is adequate preparation for the comprehensive exam. Students must be registered for at least one semester hour of graduate work during the semester(s) in which the comprehensive exams are taken.

Procedures: Four weeks prior to the scheduled exam due date, students will randomly select their nutrition topic from a list of clinical nutrition topics and receive the questions. The student will be asked to develop

a translational research agenda for the topic and develop three study protocols with the following designs:

- Section 1: Bench or Basic/Mechanistic Study
- Section 2: Epidemiological/Cross-Sectional Study
- Section 3: Efficacy and Pragmatic Studies

Academic Misconduct: Situations involving any suspected violation of the Academic Honor Code on the comprehensive exams for the doctoral degree will be sent to the Academic Misconduct Monitor (in HES: Assistant Dean). Any student found in violation of the Academic Honor Code will be subject to penalties imposed by the Academic Misconduct Monitor and may be as severe as dismissal from the University.

Grading: Each section of the exam will be graded by three nutrition professors for content, grammar, and organization of thought. Graders will be blinded to reduce bias. Answers within each section will be graded separately. Students may receive one of the following grades: pass (80% or better), contingency (70-80%), and fail. Insufficient depth or detail or incorrect content will not result in a passing grade.

- Students who pass all three sections of the written exam may move to the oral exam.
- Students who receive a contingency grade on any section of the exam will be allowed to rework that section of the exam for a better grade. Contingency grades will need to be resolved within one week after initial exam feedback. The rewrite will be graded as pass or fail. If the grade is a fail, then the student will need to retake that portion of the exam in the following semester with a new topic.
- Once any contingency grades are removed, the student may move to the oral exam.
- Student who fail one or more sections will be allowed to retake those sections during the next available testing opportunity. **Only 1 retake is allowed.**

Failure to successfully pass any part(s) of the examination retake will result in dismissal from the degree program and the Graduate School without confirmation of the degree. Students retaking a section of the exam will randomly receive a new topic to base their answer upon from the set of topics distributed during that testing period.

Admission to Candidacy Requirements

The requirements for advancing to candidacy include:

- passing the written qualifying examination;
- completion of all coursework as listed on the approved program of study;
- receiving approval of the dissertation subject;
- successfully defending the dissertation proposal, which includes the written proposal; and
- having the designated dissertation committee recommend the student for admission to candidacy for doctoral degree. The completed Admission to Candidacy for Doctoral Degree form must be submitted to the Graduate School well in advance of the final semester.

The oral exam will be completed at the dissertation proposal defense. To complete the oral exam, student will:

- Select a chair (or 2 co-chairs) as primary mentor(s) (see information on advisory committees),
- Select a total of 5 professors that will serve on the dissertation committee according to graduate school guidelines,

- Complete the Dissertation Research Proposal and the IRB/IACUC/IBC protocol,
- Schedule a formal proposal defense with an open invitation to all faculty and graduate students,
- Formally present the proposed project including background, research questions and hypotheses, methods, and projected timeline to the committee and other audience members, and
- Answer questions from both the general audience and the dissertation committee.

The PhD Dissertation Advisory Committee will assess the quality of the proposal. Evaluation of the proposal will be based on the following considerations:

1. **Scope of the proposal (10%).** Is the research topic novel and important? Is the proposed project appropriate for the timeline?
2. **Background (30%).** Is the literature review comprehensive and appropriate? Does the literature review identify a problem or series of problems that justifies the direction of the proposal?
3. **Experimental plan (40%).** Are there clearly stated hypotheses for each section, or at least clearly stated expectations of experimental outcomes? Are the proposed experiments/methods appropriate tests of the hypotheses? Does the author have realistic expectations of the experimental methods? Are alternate hypotheses and experimental approaches proposed to cover the possibilities that: (i) the primary approaches prove to be inappropriate, (ii) the primary approaches disprove the hypotheses?
4. **Presentation (20%).** Is the proposal well organized and clearly written?

Each of the above evaluation criteria will be assigned a score of 1-5 as follows:

- 1 – Outstanding
- 2 – Excellent
- 3 – Good/Average
- 4 – Fair
- 5 – Poor

An *average weighted cumulative score* of no greater than 3.0 must be earned in order to pass the proposal-based written exam.

Successful defense of the oral exam resulting in at least 80% favorable vote from the committee is required for students to be recommended for admission to candidacy. Committee members will sign the Admission to Candidacy for the Doctoral Degree form. At this point, the student will be considered a doctoral candidate and may register for dissertation hours.

Continuous Enrollment Policy

See Continuous Dissertation Registration section of this catalog. (p. 23)

Dissertation Requirements

Once the proposal and IRB/IUCC/IBC are approved, the student may begin research. The student should not be allowed to complete the research until they receive these approvals. The student cannot propose a dissertation and have its final defense in the same semester. The following procedures should be completed prior to submitting the final dissertation to the committee:

- Complete the research under the guidance of the chair,
- Ensure the document conforms to the guide for thesis and dissertation,
- Gain approval of the chair (co-chairs) to distribute the dissertation to all committee members allowing committee members two weeks to read the dissertation,
- Schedule a formal dissertation defense with an open invitation (including title, name, date, time and location) to all faculty and graduate students,
- Ensure all committee members can attend the defense,
- Formally present the final dissertation including background, gaps in the literature, research questions and hypotheses, methods, results, conclusions, and publication plan to the committee and other audience members on the scheduled day and time of the defense, and
- Answer questions from both the general audience and the dissertation committee.

All students must pass a final oral examination related to their dissertation. Final oral examination questions may also include other subjects beyond the student's research that the PhD Dissertation Committee or other faculty deem relevant. Final oral examinations and defense of the dissertation for the PhD must be taken not less than six weeks prior to the proposed graduation date. Each semester the graduate school posts dissertation due dates.

The outside member of the student's committee must attend and participate in the final defense; this may be a virtual presence if the member can see and hear the presentation and actively participate in questioning of the candidate. All departmental faculty have the right to attend the oral defense, and have the right to ask questions of the student that are relevant to the goals of the examination.

Only faculty on the student's committee may vote on whether the student has passed or failed the examination. Evaluation of the final defense will be completed using the procedures described in the proposal section of this document.

Upon successful defense of the dissertation, file the Doctoral Final Defense form with the Director and submit this form to the Graduate School. At the conclusion of the defense, it is common practice that committee members ask for changes in the final dissertation document. Substantive changes may require an additional committee meeting. Minor changes may require revisions to the document only. Prior to submission of the final dissertation to the online thesis/dissertation portal, students should have received approval to submit by all committee members.

It is the student's responsibility to submit the dissertation to the online thesis/dissertation portal. The student should be aware of all deadlines regarding the dissertation defense and adjust his/her timeline to meet these deadlines.

Changes to Approved Dissertation Proposals. In some rare instances, students may not be able to complete the proposed research approved by their committee. Examples of such instances include but are not limited to:

- changes in University policies that restrict or limit the proposed research,
- newly published research that may change the significance, scope or methods of the proposed work,
- early results that suggest the research should be discontinued due to adverse effects or severe adverse effects,

- recruiting problems that cannot be resolved,
- change in the health status of the student that limits their ability to complete the proposed work, and
- early results that suggest no therapeutic effect to be derived.

If any of these situations were to occur, the student should contact the committee chair. The committee chair will then contact the Director of the MS or PhD program and the department chair. The Committee chair, director, and department chair will meet to review the original proposal, description of the problem, and potential solutions. This group will decide to either continue the research as proposed, make significant changes to the proposed methods (example: change from a clinical trial to an online survey, change from a clinical trial with humans to a rodent model, etc), or propose an alternative dissertation. If changes are approved, these changes may lead to a delay of graduation. Students should refer to their offer letters for the term of their assistantship, if applicable.

If a student is allowed to make minor alterations to the methods only without changing the composition of the committee, then the student should:

- propose those changes in writing and submit to the committee members,
- schedule a meeting to discuss the proposed changes with the committee members,
- develop an alternative timeline approved by the committee, and
- obtain IRB/IACUC/IBC approval of modifications.

Once the committee and IRB/IACUC/IBC approve the new plan, the student can continue the research utilizing the new methods. The committee chair should notify their program director that the committee has approved the desired changes.

If a student is allowed to propose an alternative thesis or dissertation or substantially altered thesis or dissertation, then the student will need to:

- Work with the chair of the committee to alter the research plan.
- Create a project abstract that can be distributed to committee members.
- Assess the composition of the existing committee and add or eliminate committee members.
 - For existing committee members, the student should provide each committee member with a copy of the revised abstract, meet with the members to discuss changes in research questions and hypotheses, methods, and projected timelines, and discuss the member's willingness to continue to serve on the committee.
- For new committee members, the student should invite the new member to serve on the committee, provide the potential member with the abstract, meet with the potential committee member and the Committee Chair (in person or by phone, skype, etc), discuss the project with the potential member, and confirm whether the faculty member wants to serve on the committee.
- Committee members, whose expertise is no longer needed, should be contacted by the student to discuss the changes in the plan and committee.
- If committee member changes are made, the student is responsible for edits to the "Thesis/Dissertation Committee" form.
- Complete or modify the Thesis or Dissertation Research Proposal (See Guidelines for Writing the Dissertation Proposal) and the IRB/IACUC/IBC protocol.

- Revise the proposal document to the chair's satisfaction (a student cannot set a proposal meeting until the chair is satisfied with the document).
- Gain approval of the chair (co-chairs) to distribute the proposal to all committee members.
- Schedule a formal meeting to discuss the changes to the plan with the committee members only.
- Formally present the proposed revised or significantly altered project including rationale, any additional background needed, research questions and hypotheses, methods, and projected timeline to the committee.
- Answer questions from the dissertation committee.

Once the committee and IRB/IACUC/IBC approve the new plan, the student can continue the research utilizing the new methods. The committee chair will notify their program director that the committee has accepted the revised plan.

Note: While changes in the proposed research plan may extend time to graduation, they will NOT extend the time limit for the degree. Although a change in plan may be granted, the student should not expect to receive additional financial assistantship from the department. Please review your offer letter, if applicable.

See Dissertation section of this catalog. (p. 23)

Time Limits for Degree Completion Requirements

See Time Limits section of this catalog. (p. 23)

Student Progress Requirement

PhD students are encouraged to engage in research as soon as practical and may explore short-term projects before solidifying a dissertation project. All students must make continuous satisfactory research progress while enrolled in the PhD program. Student performance will be evaluated each semester by their mentor starting in their second semester of their first year. Each student will be evaluated for their continuation in the program and their eligibility of receiving financial support.

Each student is asked to complete the PhD Student in Human Nutrition Progress Report and submit this form to the mentor. At the beginning of each semester, the student will meet with the mentor to outline goals and objectives for the semester. The research mentor will meet with the student to evaluate progress toward meeting the stated goals and objectives at the end of each semester. The student will be rated by the mentor as either exceeds expectations, meets expectations, or fails to meet expectations. The major professor must complete the evaluation page of the Progress Report (see Appendix) and discuss the findings with the student. A copy of this report shall be sent to the Department Chair, the Director and the student.

Students who fail to meet expectations will be placed on probation and have one semester to improve their evaluation to a meets/exceeds expectations rating. All evaluations are reviewed by the Director and the Department Chair. If the student fails to improve his/her rating, the student may be dismissed from the program. Decisions regarding dismissal will be made by the mentor, Director, and Department Chair.

Evaluation Criteria:

- **Exceeds Expectations:** The student has an overall GPA of 3.0 or higher, met stated goals and objectives for the semester, made satisfactory research progress commensurate with time in the

program, completes all research tasks in an ethical manner, follows standard and established research protocols, and has accomplished two or more of the following:

- Presentation of research at a national or international meeting or submission of an abstract for a presentation.
 - Submission of a research proposal for funding external to the University.
 - Any honor or award reflecting outstanding achievement.
 - Submission/acceptance/publication of a research manuscript as a junior author.
- **Meets Expectations:** The student has an overall GPA of 3.0 or higher, met stated goals and objectives for the semester, made satisfactory research progress commensurate with time in the program, completes all research tasks in an ethical manner, follows standard and established research protocols, and has accomplished one or more of the following:
 - Presentation of research at a national or international meeting or submission of an abstract for a presentation.
 - Submission of a research proposal for funding external to the University.
 - Any honor or award reflecting outstanding achievement.
 - Submission/acceptance/publication of a research manuscript as a junior author.
 - **Fails to Meet Expectations:** The student has an overall GPA of 3.0 or higher, and is **NOT** meeting one of the following expectations:
 - Stated goals and objectives for the semester,
 - Satisfactory research progress commensurate with time in the program,
 - Completion of all research tasks in an ethical manner, or
 - Following standard and established research protocols.

Students who are not making appropriate progress toward the degree based on the Degree Time Line or students with an overall GPA below 3.0 must be rated fails to meet expectations.

Students on assistantships will receive a review of their progress from their supervisor. The student's progress toward degree completion, mentor's review, and the supervisor's review will be considered when making decisions for continuation of assistantship funding.

Academic Misconduct Information

Academic Misconduct: All students in attendance at the University of Alabama are expected to be honorable and to observe standards of conduct appropriate to a community of scholars. The University expects from its students a higher standard of conduct than the minimum required to avoid discipline. Academic misconduct includes all acts of dishonesty in any academically related matter and any knowing or intentional help or attempt to help, or conspiracy to help, another student.

The Academic Misconduct Disciplinary Policy will be followed in the event of academic misconduct.

Students and their mentors must adhere to the four key guidelines of scholarship, authorship, approval and agreement as well as the protocols of ensuring good publication ethics outlined by the National Institutes of Health (NIH) and the International Committee of Medical Journal Editors (ICMJE).

See Academic Misconduct section of this catalog. (p. 6)

Withdrawals and Leave of Absence Information

See Withdrawals and Leave of Absence policy section of this catalog. (p. 206)

Academic Grievances Information

If concerns arise, students are encouraged to communicate with the instructor or staff member who is directly involved with the concern. Usually the concern can be resolved satisfactorily through honest and open communication with the faculty or staff member. Meeting with the instructor or staff member should be the first step in resolving the concern.

However, if informal discussions have not yielded a satisfactory resolution, or where the matter is more serious, the student may bring the concern to the Assistant Department Chair. Should the Assistant Department Chair not be able to come to a satisfactory resolution, they will direct the student on the next steps to move the concern to the next level.

See Academic Grievances section of this catalog.

Scholastic Requirements

Each student must have an overall graduate grade point average of 3.0 or better for all graduate courses undertaken at The University of Alabama. Students may be dismissed from this program for failure to meet the scholastic requirements listed above. Departmental suspension (dismissal) from a degree program also results in suspension from the Graduate School.

See Scholastic Requirements section of this catalog. (p. 204)

Graduate School Deadlines Information

Students should be aware of graduate school deadlines.

Application for Graduation Information

Students will need to submit an Application to Graduate through mybama by the published deadlines.

Human Environmental Sciences, MS

The Master of Science in Human Environmental Sciences is designed for graduate students who seek to improve the lives of individuals, families and communities. Students complete 30 semester hours of coursework designed to prepare them for advancement in their professional discipline. A capstone project is required during the final term of enrollment. Areas of focus within this degree program include:

- Clothing and Textiles
- Conflict Resolution (stand-alone graduate certificate is also available)
- Consumer Quality Management
- Human Environmental Sciences

Admissions

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Students in the MSHES degree program complete 30 semester hours of coursework in disciplines offered by the College of Human Environmental Sciences. This includes HES 509, Research Methods; and HES 590,

Special Problems in Human Environmental Sciences; CSM 590, Special Problems in Consumer Affairs; or CTD 590, Special Problems in Clothing. The remaining 21-24 hours (7-8 classes) are drawn from graduate offerings in the area of focus. Within the Human Environmental Sciences area of focus, these may include courses from any discipline within the college which support the student's professional development goals and for which the student has completed the appropriate prerequisites.

Student will complete degree requirements following Plan II (non-thesis process). Each student must earn a cumulative GPA of 3.0 or better for all graduate work. Grades below a 'C' are computed in the GPA, but they do not carry credit toward a degree.

Required for All MSHES Graduate Students		Hours
HES 509	Research Methods	3
HES 590 or CSM 590 or CTD 590	Special Problems in HES Spec Prob Consmr Affairs Spec Prob Clothing	3 to 6
Graduate Courses within the College		21 to 24

Transfer Credit

Graduate School information on Transfer Credit (p. 18).

Comprehensive Exam/Capstone Project

Students in the MSHES degree program complete a Capstone Project during their final term through enrollment in the Special Topics class that aligns with their area of focus: HES 590 for Human Environmental Sciences, CSM for Conflict Resolution or Consumer Quality Management, or CTD 590 for Clothing and Textiles.

As part of the Special Topics class, the student will work with their faculty mentor to identify an issue, topic or problem in their discipline and then develop a comprehensive document that addresses that specific focus. The final product will draw on the coursework included in the student's specific plan of study and represent a synthesis of the major concepts from each one as they relate to the issue, topic or problem. It will include references using the citation style most often associated with the student's discipline.

The Capstone Project must be submitted no later than 2 weeks before the final day of classes for the term in which the student is enrolled, and results reported to the Graduate School 2 weeks before the date of commencement for that semester.

Time Limits for Degree Completion Requirements

Capstone College of Nursing

The Capstone College of Nursing offers the following:

- Master's of Science in Nursing (MSN) degree for Nurse Practitioners (e.g. Family Nurse Practitioner, Psychiatric Mental Health Nurse Practitioner, and dual Psychiatric Mental Health and Family Nurse Practitioner), and Nurse Administrators
- RN to BSN with a pathway to the MSN program (Nurse Administrator Concentration only)
- Post-graduate certificates with Family Nurse Practitioner and Psychiatric Mental Health Nurse Practitioner specialties
- Doctor of Nursing Practice (DNP) degree (Post-Baccalaureate and Post-Masters)
- Joint Nursing Science PhD
- Degree Programs
 - Nursing, MSN (p. 742)
 - Doctor of Nursing Practice, DNP (p. 730)
 - Joint Nursing Science, PhD (p. 737)
- Certificate Programs
 - Family Nurse Practitioner (p. 735)
 - Psychiatric Mental Health Nurse Practitioner (p. 746)

Nursing Courses

NUR500 Population Health

Hours 3

The purpose of this required core MSN course is to prepare students to evaluate health care needs at the population level with a particular focus on rural and medically underserved populations. An epidemiological approach will be utilized to explore relevant population based topics.

Prerequisite(s): Admission into MSN Program

NUR503 Nursing Informatics in Healthcare

Hours 3

This required course focuses on the ethical management of data, information, knowledge, and technology to communicate and deliver safe quality healthcare within and across various healthcare settings. This course incorporates the concepts of nursing science, computer science and information science with information technology tools commonly found in practice. Students are introduced to the nursing informatics specialty and the use of technology to augment nursing care delivery and patient safety.

NUR505 Advanced Health Assessment

Hours 3

This course will assist the graduate nursing student to further develop health assessment skills for obtaining and recording a systematic health history as well as advanced holistic health assessment of individuals across the life span.

NUR507 Organizational & Systems Leadership

W

Hours 3

The purpose of this required core MSN course is to prepare future nurse leaders for organizational and systems leadership in healthcare as it relates to producing quality patient outcomes in a safe and efficient manner. Writing proficiency is required for a passing grade in this course. A student who does not write with the skill normally required of a BSN student will not earn a passing grade, no matter how well the student performs in other areas of the course.

Writing

NUR510 Basic Concepts of Teaching Diabetes Self-Management Techniques

Hours 3

This online elective course is open to any graduate student in the health or social sciences. The course focuses on: Diabetes Self-Management Techniques (DSMT) and instructs the provider in what manner to impart information that has immediate application for people living with diabetes. The course focuses on application of clinical guidelines for exercise and fitness, nutrition and diet, and the techniques, products, and strategies that help patients learn diabetes self-management techniques that empower them to take charge of their well-being and live healthier lives.

Prerequisite(s): Permission by Instructor

NUR513 Special Topics

Hours 1-4

This course focuses on selected MSN topics under the sponsorship of a nursing faculty member with relevant expertise.

NUR514 Research and Evidence-Based Practice

Hours 3

The purpose of this required core MSN course is to prepare students to evaluate research methods, designs, instruments, research ethics, and statistics used in health research. The course will also provide students with models for evidence-based practice design and translation and quality improvement. Students will formulate clinical questions, identify, evaluate and critically appraise evidence, and translate the evidence into practice environments for safe, quality care.

NUR516 Advanced Diabetes Management: An Interdisciplinary Approach Across the Lifespan

Hours 3

This online elective course is open to any graduate student in the health or social sciences. The course focuses on the primary, secondary, and tertiary prevention and management of diabetes mellitus offering expanded content suitable to students pursuing graduate study in nursing, medicine, nutrition, and other social sciences. Building on the basic and advanced science and clinical management courses a multi-disciplinary approach is offered for the prevention of pre-diabetes, metabolic syndrome, type 2 diabetes, management of both types 1 and 2 diabetes mellitus across the lifespan. Special emphasis is placed on the prevention and management of the complications and co-morbid conditions potentially resulting from diabetes mellitus.

NUR517 Graduate Independent Study

Hours 1-4

*No description available***NUR518 Social Media for Healthcare**

Hours 3

This elective course focuses on the use of social media programs and applications within the healthcare setting. This course will equip healthcare providers with the knowledge and skills needed to effectively use social media within their professional settings. Students will be introduced to social media literacy, social media software, and health 2.0. Also, students will discuss guidelines related to social media use within the healthcare setting.

NUR519 Health Policy & Finance

Hours 3

The purpose of this required core MSN course is to introduce the student to relevant health care and governmental policies, regulatory standards, and financial management concepts to develop an understanding of how healthcare delivery systems are organized, financed, and most importantly, influence the delivery of patient care.

NUR521 Advanced Pharmacology

Hours 3

This course will assist the graduate nursing student to further develop knowledge of evidence-based clinical pharmacology. Course content will include basic principles of pharmacology as they apply to drug therapy across the lifespan. A prototype approach will be used to present content covering selected drugs affecting the peripheral nervous system, central nervous system, cardiovascular system, renal system, endocrine system, immune system, musculoskeletal system, respiratory system, gastrointestinal system, and chemotherapy for infection and cancer.

Prerequisite(s): Admission to MSN Program

NUR528 Sleep: How Much is Enough

Hours 3

Sleep is a basic physiologic requirement of all beings. Therefore, we can all benefit from learning about what sleep is, why it is important in our lives, and how it can be influenced (positively and negatively). This elective course will challenge students to explore the impact sleep patterns have on human physical and emotional health, behaviors, and performance abilities.

NUR529 Advanced Pathophysiology

Hours 3

This course will explore the biologic basis of disease at the cellular, organ and system level with an emphasis on applications for health professionals. It is a required course in the MSN curriculum of the Capstone College of Nursing and may be taken as an elective by graduate biology majors with an interest in health professions based on space available.

NUR531 Nursing Faculty Roles and Responsibilities

Hours 3

This online course will provide an introduction to the roles and responsibilities of nursing faculty. This course will prepare students to participate in the processes of designing, implementing, and evaluating a nursing curriculum. This course will include roles and responsibilities of faculty in teaching, scholarship, service, and practice.

NUR532 Instructional Media for Nursing Education

Hours 3

This course will provide students with an overview of instructional technology and media that can be used in undergraduate and graduate level instruction in nursing education programs. This course will provide students with skills to begin on site and online instruction. It will explore the use of computers, software, models, simulators, and other instructional media.

Prerequisite(s): AIL 600 and AIL 602

Prerequisite(s) with concurrency: AIL 600 and AIL 602

NUR549 Roles & Leadership in Nursing Administration

Hours 3

The purpose of this course is to provide the student with the tools and resources to embrace the role of the Nurse Administrator and successfully balance leadership and management cohesively. This course will comprehensively cover leadership concepts to include working collaboratively in interdisciplinary teams, professional roles and scopes of practice, human resource management, staffing, conflict resolution, sustainable change, and decision-making practices.

Prerequisite(s): Co-requisite: NUR 550

NUR550 Roles & Leadership in Nursing Administration Practicum

Hours 3

The purpose of this clinical course is to provide the student with the opportunity to apply concepts and theory from NUR 549 in an authentic clinical environment to narrow the theory practice gap through application and experiential learning. The focus is on application of leadership concepts to include working collaboratively in interdisciplinary teams, professional roles and scopes of practice, human resource management, staffing, conflict resolution, sustainable change, and decision-making practices.

Prerequisite(s): Co-requisite: NUR 549

NUR551 US Healthcare Systems and Quality & Safety

Hours 3

The purpose of this course is to prepare future nurse administrators for the complexities of healthcare management by giving them the tools and resources to understand and critically appraise the unique dynamics of the U.S. healthcare system. This course will include information related to healthcare delivery, quality improvement, public policy, laws, accrediting bodies, and regulatory statutes.

Prerequisite(s): Co-Requisites: NUR 552

NUR552 US Health Care Systems and Quality & Safety Practicum

Hours 3

The purpose of this clinical course is to provide the nursing administrator student with the opportunity to apply concepts and theory from NUR 551 in an authentic clinical environment to narrow the theory practice gap through application and experiential learning. The focus is on the application of public policy, laws, accrediting bodies, and regulatory statutes as they relate to the delivery of health care in the U.S.

Prerequisite(s): Co-Requisites: NUR 551

NUR553 Advanced Financing and Strategic Planning in Health Care

Hours 3

The purpose of this course is to prepare future nurse administrators to be highly effective and influential strategic planners and financial leaders within the organization. This course addresses principles of strategic planning and fiscal resource management to include SWOT analyses, business plans, reimbursement models, cost analysis, budgeting, contract development, financial aspects of program development and evaluation, and cost accounting and tracking.

Prerequisite(s): Co-Requisites: NUR 554

NUR554 Advanced Financing and Strategic Planning in Health Care Practicum

Hours 3

The purpose of this clinical course is to provide the student with the opportunity to apply concepts and theory from NUR 553 in an authentic clinical environment narrowing the theory practice gap through application and experiential learning. The focus is on the application of the principles of strategic planning and fiscal resource management to include SWOT analyses, business plans, reimbursement models, cost analysis, budgeting, contract development, financial aspects of program development and evaluation, and cost accounting and tracking.

Prerequisite(s): Co-Requisites: NUR 553

NUR567 Family Nurse Practitioner Role & Issues

Hours 3

This course includes the professional role of the Family Nurse Practitioner (FNP) serving diverse populations across the lifespan. Emphasis is on the influence of nurse practitioners on outcomes at the systems level. Students will assess complex demands; plan coordinated, multidisciplinary, evidence-based collaborative approaches to care; and appraise strategies for evaluation of outcomes.

Prerequisite(s): NUR 505, NUR 529 - with a grade of B or better

NUR569 Family Nurse Practitioner I

Hours 3

This course provides a theoretical and evidenced based foundation for advanced practice as a Family Nurse Practitioner (FNP). The focus is on identifying and managing common acute, episodic and multiple chronic conditions in the adult client. Health promotion and disease prevention strategies for the adult population are emphasized.

Prerequisite(s): NUR 505, NUR 529, NUR 521, NUR 567; Corequisite: NUR 570 With grade of B or better

NUR570 Family Nurse Practitioner Clinical I

Hours 3

This course provides an initial clinical experience for advanced practice as a Family Nurse Practitioner (FNP). The focus is on identifying and managing common acute, episodic and multiple chronic conditions based on current evidence. Health promotion and disease prevention strategies for the adult population are emphasized. FNP role responsibilities are demonstrated, within primary care settings, in order to meet the health care needs for diverse adult populations. Students must complete 180 clinical hours working with adults.

Prerequisite(s): NUR 567 Corequisite: NUR 569 with a grade of B or better

NUR571 Family Nurse Practitioner II

Hours 3

This course provides a theoretical and evidence-based foundation for advanced practice as a Family Nurse Practitioner (FNP). The focus is on identifying and managing common acute, episodic and multiple chronic conditions in both the Pediatric and Women's Health populations. Health promotion and disease prevention strategies for the Pediatric and Women's Health populations are emphasized.

Prerequisite(s): NUR 569, NUR 570; Corequisite: NUR 572

NUR572 Family Nurse Practitioner Clinical II

Hours 3

This course provides evidence-based clinical experiences for advanced practice as a Family Nurse Practitioner (FNP). The course focuses on identifying and managing common acute, episodic and multiple chronic conditions in both the Pediatric and Women's Health populations. Health promotion and disease prevention strategies for the specific populations are emphasized. FNP role responsibilities are demonstrated, within primary care settings, in order to meet the health care needs for diverse patient populations. Students must complete 180 clinical hours working with Pediatrics and Women's Health clients.

Prerequisite(s): NUR 569, NUR 570; Corequisite: NUR 571

NUR573 Family Nurse Practitioner III

Hours 3

This course provides a culmination of common health conditions and strategies for incorporating evidence-based practice for advanced practice as a Family Nurse Practitioner (FNP). The course focus is on identifying and managing common acute, episodic and chronic conditions across the lifespan and within a variety of vulnerable populations. As with the prior FNP courses, there will be a continued emphasis on health promotion and disease prevention in primary care populations. Strategies for FNP certification preparedness and extended role responsibilities will be explored.

Prerequisite(s): NUR 571, NUR 572; Corequisite: NUR 574

NUR574 Family Nurse Practitioner Clinical III

Hours 3

This course will provide the Family Nurse Practitioner (FNP) student with the opportunity to completely immerse in an autonomous advanced practice nursing role. Students will diagnose, manage, and treat common acute, episodic and chronic conditions across the lifespan, while maintaining an emphasis on health promotion and disease prevention. FNP students will engage in interdisciplinary collaboration for providing competent and evidence-based for all patients, including vulnerable populations, seeking care in primary care settings. There are 180 clinical hours needed for course completion.

Prerequisite(s): NUR 571, NUR 572 Corequisite: NUR 573

NUR591 Psychiatric Mental Health Nurse Practitioner Roles and Issues

Hours 3

The purpose of this course is to focus on concepts, theories and research underlying advanced practice psychiatric mental health nursing. The scope and standards of psychiatric-mental health nursing practice will be presented. Mental health treatment modalities across the lifespan including psychotherapy, psychopharmacological interventions, community interventions, case management and consult-liaison activities will be examined. Psychological, biological, social, and cultural influences on coping responses of individuals, families, groups, and communities of people/populations at risk are explored. Intervention models, including preventive care and health promotion are introduced.

Prerequisite(s): NUR 505, NUR 521 with a grade of B or better

NUR593 Psychiatric Mental Health Nurse Practitioner I

Hours 3

The purpose of this course is to focus on the study of Psychiatric Mental Health Nurse Practitioner (PMHNP) conceptual frameworks, theories, and research findings related to common psychiatric disorders among children and adolescent (birth to 17) patients in urban, suburban, and rural settings. Biological and pharmacologic theories, developmental issues of children and adolescent (birth to 17) patients, psychotherapeutic modalities, primary prevention, and evaluation of treatment will be emphasized.

Prerequisite(s): NUR 591; Corequisite: NUR 594

NUR594 Psychiatric Mental Health Nurse Practitioner Clinical I

Hours 3

The purpose of this clinical course is to provide the student with the ability to apply treatment of psychopathology. The role of the Psychiatric Mental Health Nurse Practitioner (PMHNP) in the assessment, diagnosis, and treatment of children, adolescents, young adults, and families in urban, suburban, and rural settings will be explored. This course will also provide students the opportunity to apply psychobiological information in conjunction with the use of psychopharmacological and psychotherapeutic interventions with patients. Students must complete 180 clinical hours working with children and adolescents from birth to 17.

Prerequisite(s): NUR 591 Corequisite: NUR 593

NUR595 Psychiatric Mental Health Nurse Practitioner II

Hours 3

The purpose of this course is for Psychiatric Mental Health Nurse Practitioner (PMHNP) students to learn how to critically appraise theoretical approaches for psychotherapeutic interventions with adult and elderly patients and families in urban, suburban, and rural areas. This course provides a theoretical basis for advanced practice of Psychiatric Mental Health Nursing. This course will also provide the student with an understanding of the dynamics, epidemiology, and treatment of selected psychopathology, specifically focused on adult and elderly patients. In addition, the role of the PMHNP in the assessment, diagnosis, and treatment of adult and elderly patients with mental disorders will be explored.

Prerequisite(s): NUR 593, NUR 594; Corequisite: NUR 596

NUR596 Psychiatric Mental Health Nurse Practitioner Clinical II

Hours 3

The purpose of this clinical course is for Psychiatric Mental Health Nurse Practitioner (PMHNP) students to critically appraise and apply theoretical approaches for psychotherapeutic interventions with adult and elderly patients and families in urban, suburban, and rural areas. This course will also provide the student with an opportunity to apply the dynamics, epidemiology, and treatment of selected psychopathology, specifically focused on adult and elderly patients. In addition, the role of the PMHNP in the assessment, diagnosis, and treatment of adult and elderly patients with mental disorders will be applied. Students must complete 180 clinical hours providing psychopharmacotherapeutic and psychotherapeutic interventions to adults, elderly and their families.

Prerequisite(s): NUR 593, NUR 594; Corequisite: NUR 595

NUR597 Psychiatric Mental Health Nurse Practitioner III

Hours 3

The purpose of this course is for Psychiatric Mental Health Nurse Practitioner (PMHNP) students to demonstrate comprehension of multiple theoretical approaches for psychotherapeutic interventions across the lifespan in urban, suburban, and rural areas. This course also covers the dynamics, epidemiology, assessment, diagnosis, and treatment of selected psychopathologies. Appropriate evidence-based psychopharmacological and psychotherapeutic (individual, family and group) interventions are examined.

Prerequisite(s): NUR 595, NUR 596; Corequisite: NUR 598

NUR598 Psychiatric Mental Health Nurse Practitioner Clinical III

Hours 3

The purpose of this clinical course is for Psychiatric Mental Health Nurse Practitioner (PMHNP) students to demonstrate application of multiple theoretical approaches for psychotherapeutic interventions across the lifespan in urban, suburban, and rural areas. This course provides PMHNP students an opportunity to apply clinical skills in the assessment, diagnosis, and treatment of selected psychopathologies. Students will apply appropriate evidence-based psychopharmacological and psychotherapeutic (individual, family and group) interventions in a wide range of clinical settings. Students must complete 180 clinical hours treating patients across the lifespan (with a minimum of 40 child and adolescent).

Prerequisite(s): NUR 595, NUR 596 Corequisite: NUR 597

NUR599 Master's Thesis

Hours 3-6

This course is designed to assist the student in selecting a foundational area of inquiry or phenomenon of interest, and creating original scholarship written under the direction of the faculty advisor. It is expected that the project will culminate in the production of a research product (thesis) that evidences originality, appropriate organization, clarity of purpose, critical analysis, and accuracy and completeness of documentation. The work shall involve an analysis or study related to a professional nursing phenomenon of interest such as, but not limited to: direct patient care concerns, systems level quality improvement, healthcare policy, or nursing administration.

NUR620 Curriculum Theory & Practice

Hours 3

This is primarily an online, web-based course. It critically examines historical and contemporary discourses necessary to understand curriculum as a synergetic field of study and an area of professional practice. Factors related to organizing curriculum will be considered based on analysis, interpretation and synthesis of contextual data. Students will determine directions, outcomes, and goals for curriculum and course design. Methods for curriculum evaluation and a dashboard for successful implementation will be emphasized. Students will demonstrate their ability to develop and critique curriculum in the context of instruction through reflection, observation, documentation, and descriptive analysis and to relate ethical, moral, and social justice concerns to curriculum practice.

Prerequisite(s): NUR 531

NUR621 Nurse Educator Practicum

Hours 4

This is an elective course for nurse educator students who have limited teaching experience or graduate nursing students who desire additional direct experience. The two didactic credits and two clinical credits (120 contact/clock hours) in this practicum provide opportunities to become embedded as a faculty member for one semester. Students implement classroom and clinical teaching and evaluation strategies grounded in education theory and evidence-based practice, and are devised for differing learner needs to produce desired learning outcomes. Students explore the scholarship of education and develop or refine a research trajectory. Then relate that trajectory to life-long professional development and targeted faculty, community, and professional service.

Prerequisite(s): NUR 531, NUR 532

NUR696 Doctoral Seminar in Research

Hours 3

Students are expected to utilize knowledge from quantitative methodology and statistics in this course. The seminar will provide students with opportunities to synthesize knowledge gained in this and other courses in order to address topics of for research in nursing education.

NUR700 Clinical Data Management and Analysis

Hours 3

This required course provides students with the knowledge base to understand, collect, manage, and measure clinical data. Students will explore data collection and management processes, levels of measurement, basic statistics, and measurement for improvement in order to effectively use clinical data. Data entry exercises employed through analytical tools and statistical software packages will allow the students practice and apply the basic data management and analysis skills needed for the evaluation of clinical data and evidence-based practice.

Prerequisite(s): Admission to DNP Program

NUR701 Writing for Publication

Hours 3

This course concerns the development of skills in writing, editing, and preparing manuscripts for publication from initial idea to submission of a publishable manuscript. The course emphasizes a writing process that encourages productivity and collegial peer review. Legal and ethical aspects of authorship prepare students for responsible practices expected of scholars. Students should have mastered basic writing skills, e.g., grammar, syntax, and computer skills, prior to enrolling in this course.

Prerequisite(s): Admission to DNP Program

NUR713 Special Topics

Hours 1-4

This course focuses on selected DNP topics under the sponsorship of a graduate nursing faculty member with relevant expertise.

NUR717 DNP Independent Study - Special Topics

Hours 1-4

The independent study option provides an opportunity for students to identify, structure, implement and evaluate learning experiences consistent with personal learning needs and career plans that are in addition to the current curriculum.

NUR729 Evidence-Based Practice Design and Translation

Hours 3

The purpose of this course is to provide students with models for evidence-based practice (EBP) design and improvement translation. Students learn to formulate clinical questions in answerable format, and search for and identify best research evidence. The focus of the course is to evaluate and critically appraise evidence for rigor and applicability to the clinical problem and is designed to improve clinical outcomes. Students will translate the evidence into practice environments for safe, quality care. Students will gain access to information that will support optimal clinical decision-making. Improvement translation sciences will also be introduced.

Prerequisite(s) with concurrency: NUR 701

NUR731 Philosophical, Theoretical, and Conceptual Foundations for Advanced Practice Nursing

Hours 3

This required core course for the Doctor of Nursing Practice program provides an understanding of the use of theory and conceptual foundations to guide the complexity of specialty nursing practice at the doctoral level. The content is derived from the philosophical and scientific underpinnings of nursing, natural, and psycho-social sciences.

NUR733 Informatics for Advanced Practice Nursing

Hours 3

This required course focuses on the collection, organization, analysis, and dissemination of information in nursing and health care. Students are introduced to the specialty of nursing informatics, the information system life-cycle, telemedicine, and the use of technology to enhance nursing care delivery and patient safety. Also, students learn how to design, use, and manipulate large and small patient databases for the analysis of patient outcomes.

Prerequisite(s): NUR 700

Prerequisite(s) with concurrency: NUR 700

NUR734 Advanced Experiential Clinical Course

Hours 1-7

This course is designed to validate Master's level competencies in clinical and organizational leadership. The course is required for post-master's DNP students who are graduates of programs in nursing with less than 500 clinical hours.

NUR735 Population Health in Advanced Practice Nursing

Hours 3

This required course for the Doctor of Nursing Practice program prepares the student to implement specialty population-based disease prevention and health promotion activities to achieve national and international goals of improving worldwide health status. The course focuses on a spectrum of issues affecting health, which include emerging infectious diseases, emergency preparedness, disparities in health and healthcare services, and the impact of behavior and lifestyle choices on health.

NUR737 Interdisciplinary Leadership and Role Development for Practice Excellence

Hours 3

This required course in the Doctor of Nursing Practice program prepares students for organizational and systems leadership and knowledge and skills critical to role development in independent and inter and intra-disciplinary practice. Content includes communication, conflict resolution, collaboration and negotiation, leadership, and team functioning to maximize success in the establishment of safe, effective patient-centered care in complex environments.

NUR740 Health Policy & Politics: Implications in Health Care

Hours 3

This required course in the Doctor of Nursing Practice program focuses on the basic principles of health policy and the influence of the political process as a systematic approach to health care in the United States and internationally. The course prepares students to assume complex leadership roles in order to advance specialty practice and health. This course focuses on the unique challenges of engaging and influencing health care policy in the U.S. and internationally. It is designed to develop skills, techniques, and approaches to the critical analysis of health policy proposals, health policies, and related issues from the perspective of consumers, nursing, other health professions, and other stakeholders in policy and public forums. The health policy framework is analyzed from a governmental, institutional, and organizational perspective.

NUR742 Project Evaluation and Methods

Hours 3

The purpose of this course is to synthesize knowledge related to translational/implementation science models and strategies to improve health outcomes. The emphasis in the course is the use of project evaluation as a strategic planning tool to achieve positive changes in health status, to initiate quality improvement, to engage in risk anticipation, management and to facilitate organizational and system level changes.

Prerequisite(s): NUR 729

NUR743 Evidence Based Practice Strategies

Hours 3

NUR 743 is a required core Doctor of Nursing Practice Program course, which expands on foundational evidence-based practice concepts to refine a problem statement and derive a searchable and answerable clinical question. Content includes identification and selection of methods, strategies, tools and metrics needed to complete a successful scholarly project. The course also addresses targeted strategies for disseminating evidence associated with scholarly projects.

Prerequisite(s): NUR 701 NUR 729

Prerequisite(s) with concurrency: NUR 742

NUR744 Curriculum and Evaluation Concepts

Hours 3

This course focuses on concepts important to nursing program curriculum development and evaluation. The course will introduce the learner to various curriculum-related concepts including higher education organizational structure, published curriculum guidelines, policy development and adoption, and accreditation. This course will also focus on evidence-based methods for program, course, and student evaluation.

Prerequisite(s): Students must be participants in the Nurse Faculty Loan Program

NUR745 Teaching Strategies for Clinical Learning

Hours 3

This course will assist the graduate nursing student to examine teaching theory and strategies which may be applied to clinical instruction and problem solving. Course content will include basic principles of adult learning, and learning preferences as applied to teaching multigenerational learners. Strategies useful for clinical supervision and the importance of development of clinical learning sites are identified. The necessity of crafting clinical assignments in order to promote optimal learner outcomes is presented. Illustration of multiple uses of clinical simulation in order to improve team building, interdisciplinary collaboration, and clinical reasoning are depicted. The use of debriefing models to enhance clinical judgement in both simulation and clinical practice will be examined. Resources and technology for clinical teaching will be evaluated.

Prerequisite(s): Students must be participants in the Nurse Faculty Loan Program

NUR795 DNP Project Seminar

Hours 1

This required course is designed to assist the student to develop professional competencies related to the DNP project. Students participating in the seminar will obtain guidance, be involved in discussion, and receive peer suggestions about the DNP project. Funding opportunities will be explored, presentation preparation will be initiated, and project dissemination will be reviewed. The student will start the development and design of the professional portfolio with current professional information and achievements.

Prerequisite(s): NUR 701, NUR 729, NUR 742, NUR 743

NUR796 DNP Project Immersion I

Hours 3

This required course is the first clinical course in the Doctor of Nursing Practice course of study. The practice residency is conducted in a specialty area of the student's choice and guided by the DNP Essentials. Students will participate in weekly online group discussions regarding their progress providing peer feedback. An organizational needs assessment is conducted while the final project is selected and planned by the student and the Faculty Advisor. IRB training and preparation is completed. The final project proposal is completed and approved by the Faculty Advisor in this course.

Prerequisite(s): NUR 701, NUR 729, NUR 742, NUR 743 A clinical facility contract and clinical advisor must be approved and in place prior to enrollment in this course.

NUR797 DNP Project Immersion II

Hours 3

This required course is the continuation of the clinical courses in the Doctor of Nursing Practice course of study. The practice residency is conducted in a specialty area of the student's choice and guided by the DNP Essentials. Students will participate in weekly online group discussions regarding their progress providing peer feedback. The DNP Project will be submitted for IRB review and revised until accepted by all required IRB entities. The DNP project will be implemented and evaluated by the student, with guidance from the Faculty Advisor.

Prerequisite(s): NUR 700, NUR 701, NUR 729, NUR 731, NUR 742, NUR 743, NUR 795, NUR 796 A clinical facility contract and clinical advisor must be approved and in place prior to enrollment in this course.

Prerequisite(s) with concurrency: NUR 795

NUR798 DNP Project Immersion III

Hours 3

This required course is the culmination of the clinical courses in the Doctor of Nursing Practice course of study. The practice residency is conducted in a specialty area of the student's choice and guided by the DNP Essentials. Students will participate in weekly online group discussions regarding their progress providing peer feedback. The final project is evaluated, analyzed, and disseminated by the student with Faculty and Clinical Advisor guidance in the form of a professional presentation. The final DNP Project report is completed and approved by the Faculty Advisor. Students are strongly encouraged to submit a completed manuscript for publication based on the DNP Project in collaboration with the Faculty Advisor when deemed ready by the Faculty Advisor.

Prerequisite(s): NUR 701, NUR 729, NUR 742, NUR 743, NUR 795, NUR 796, NUR 797

Nursing Science Courses

NUS741 BSN-PhD Research Seminar I

UAH

Hours 1

The purpose of this course is to prepare BSN-PHD students with the foundational skills of deep reading, comprehensive literature review and critique, critical thinking, and writing skills necessary for successful advancement in a doctoral program. This course will further help students by providing more individualized support and structure to facilitate successful progression through the PhD program.

Prerequisite(s): Admission to the Graduate Program

UA-Huntsville Course

NUS742 BSN-PhD Research Seminar II

Hours 1

The purpose of this course is to aid BSN-PHD students in developing skills to assess scientific rigor, develop an argument, critique published research, professionally present (verbally and written) critique findings, develop a manuscript for publication, and will provide an opportunity to obtain hands on research experience. This course will further help students by providing more individualized support and structure to facilitate successful progression through the PhD program.

Prerequisite(s): Admission to the Graduate Program

NUS743 BSN-PhD Research Seminar III

UAH

Hours 1

The purpose of this course is to prepare BSN-PHD students with the foundational skills of systematically appraising the literature to develop an appropriate and comprehensive significance section, analyzing health policy that directly relates to the students' research areas of interest, and evaluating research methodology and accompanying statistical analyses. These are important for successful advancement in a doctoral program. This course will further help students by providing more individualized support and structure to facilitate successful progression through the PhD program.

Prerequisite(s): Admission to the Graduate Program

UA-Huntsville Course

NUS750 Philosophy of Science

UAH

Hours 3

The purpose of this course is to explore the evolution of philosophy and science. Epistemology, knowledge generation, knowledge acquisition, and ways of knowing will be examined. Scientific inquiry will include reasoning, logic, and persuasive argument development.

Prerequisite(s): Admission to the Program

UA-Huntsville Course

NUS752 Informatics

Hours 3

The purpose of this course is to prepare nurse scientists to use informatics, electronic tools, and healthcare technologies for the purposes of nursing research. The course will focus on the use of informatics in the data management of individuals, groups, and organizations as the nurse scientist plans and executes a program of research.

Prerequisite(s): Admission in the Joint Nursing Science PhD Program

NUS754 Ethical Conduct and Legal Issues in Research

Hours 3

The purpose of this course is to introduce the student to doctoral scholarship in support of beginning a program of responsible conduct of research. This course explores current ethical and legal issues in the science of nursing research. The course will delve into best practices in research design with regard to ethics, authorship, data management and record keeping, intellectual property and ownership of data, and human subjects research. In addition, the course will cover conflicts of interest, mentoring, collaborations, peer review, research misconduct, and current ethical issues in research.

Prerequisite(s): Admission to the Joint Nursing Science PhD Program

NUS756 Application of Theoretical Models

UAH

Hours 3

The purpose of this course is to provide students a foundation for contributing to theory development processes, analyzing and critiquing theoretical foundations of research, and applying theoretical models to nursing research. This course addresses the relationship between theory and research and provides an understanding of the use of theoretical models and conceptual foundations to guide nursing research and practice.

Prerequisite(s): NUS 750

UA-Huntsville Course

NUS758 Quantitative Research Methods and Designs

Hours 3

The purpose of this course is to provide students with foundational knowledge related to quantitative research design and methods, and the skills to develop research proposals using these designs and methods. Students will progress from learning quantitative research approaches, to understanding the process and components of quantitative research. Students will end the course by integrating these new principles into a written, defensible, National Institutes of Health-style Research Strategy. Additional content will focus on the evolving role of nurses in quantitative research, the renewed focus on research rigor and reproducibility, and being a nurse scientist on interdisciplinary research teams. Special emphasis will be placed on clinical nursing designs including observational studies, quasi-experimental studies, and repeated-measures intervention studies.

Prerequisite(s): NUS 750

NUS760 Statistics I

UAH

Hours 3

The purpose of this course is to provide the student with the skills to conduct and interpret statistical data. Emphasis will be placed on describing types of variables, testing hypotheses, selecting appropriate parametric and nonparametric statistical tests, analyzing data, and interpreting results.

Prerequisite(s): NUS 758

UA-Huntsville Course

NUS762 Healthcare Policy for Rural and Medically Underserved Populations

Hours 3

The purpose of this course is to explore the policy environment that influences and shapes public health and health care service delivery, including rural and medically underserved communities. Students will develop skills, techniques, and approaches to identify gaps, critically analyze and research health related issues. Utilization and delivery of data to promote and impact healthcare policy changes will be an important measure of outcome. Students will develop the ability and confidence to critically assess current health policy issues in a thoughtful, comprehensive and rigorous manner and to engage in the policy process.

Prerequisite(s): Admission in the Joint Nursing Science PhD Program

NUS764 Scientific Writing

UAH

Hours 3

The purpose of this course is to develop writing skills to produce scientific writing that is clear, concise and logical. This course will also explore the publication to include abstract and manuscript development and the submission process. Additional pathways to dissemination of nursing content will be explored as well.

Prerequisite(s): Admission to the Joint Nursing Science PhD program

UA-Huntsville Course

NUS766 Epidemiology

Hours 3

The purpose of this course is to introduce epidemiological methods for measuring population health, designing and implementing observational and experimental studies, critically reading the public health literature, and applying research findings to global and community health.

Prerequisite(s): NUS 760

NUS768 Statistics II

Hours 3

The purpose of this course is to provide advanced coursework in applied statistical approaches to data management and analysis with an emphasis on multivariate statistical approaches. Students will develop improved skills in conceptualizing, executing, analyzing, and interpreting advanced analytic strategies and to enhance their ability to propose strong, tailored analytic approaches for specific study designs and research aims. Students will gain proficiency in using statistical software to enhance their knowledge of regression, ANCOVA, MANOVA/MANCOVA, discriminant analysis, exploratory and confirmatory factor analysis, structural equation modeling, multilevel modeling, and advanced categorical approaches. Emphasis will be placed on the understanding of the mathematics, logic, and application of these techniques.

Prerequisite(s): NUS 760

NUS770 Grant Writing

Hours 3

The purpose of this course is to prepare students in the foundations of writing grants for federal external funding. This course will help students identify a step-wise process to develop a grant proposal through federal funding sources. Strategies for successful grant writing include identifying funding sources for the topic, writing a competitive grant application, developing a collaborative team of researchers for the project, and understanding the review process.

Prerequisite(s): NUS 764

NUS772 Qualitative Research Methods

UAH

Hours 3

The purpose of this course is to assist the student in using selected qualitative research methods. Learning modules will explore qualitative approaches, sampling, data collection, data analysis and dissemination. The course will review and explore the use of technology to assist the qualitative researcher.

Prerequisite(s): NUS 750, NUS 756, NUS 758

UA-Huntsville Course

NUS776 Advanced Research Methods

UAH

Hours 3

The purpose of this course is to assist students in developing the knowledge and skills to design a mixed methods research (MMR) study. MMR is an advanced method for collecting, analyzing, and "mixing" both quantitative and qualitative data within a single study, to understand a research problem more completely.

Prerequisite(s): NUS 752, NUS 758, NUS 760, NUS 768, NUS 772

UA-Huntsville Course

NUS780 Introduction to Omics

UAH

Hours 3

The purpose of this course is to introduce the revolution of omics and discuss the role nurse scientists can play in precision health development. Nurse scientists are in a position to provide a unique contribution to person-centered health approaches by broadening their understanding of molecular advances to improve health outcomes. A variety of different omics will be explored and the practical advantages, limitations, and challenges in individualized health promotion will be discussed.

Prerequisite(s): Admission in the Joint Nursing Science PhD program

UA-Huntsville Course

NUS781 Omics in Nursing Research

Hours 3

The purpose of this course is to provide an overview of advanced concepts of omics research by utilizing a biobehavioral systems approach in nursing science. The National Institute of Nursing Research's strategic plan for Genomic Nursing Science is used as the framework for integrating omics and nursing research. Practical application in omics theories, methodologies, technology, bioinformatics, and responsible conduct of research is discussed. Additionally, resources in building capacity for the next generation of omics scientists are reviewed.

Prerequisite(s): NUS 780

NUS782 Curriculum Development and Program Evaluation for Nurse Educators

UAH

Hours 3

The purpose of this course is to examine the procedures for designing, implementing, and evaluating nursing education curriculum. The process will be examined beginning with the program mission. Educational theories, philosophy, concepts, and program evaluation will be explored. The nurse educator's role in curriculum design and program evaluation is assessed.

Prerequisite(s): Admission in the PhD program

UA-Huntsville Course

NUS783 Instructional Methods and Assessments in Nursing Education

Hours 3

The purpose of this course is to discover teaching styles and implement instructional technologies to promote learning in diverse populations of students. Throughout the semester, students will explore didactic and clinical learning activities and evaluation strategies to demonstrate transfer of learning.

Prerequisite(s): NUS 782

NUS784 Data Science and Emerging Technologies in Healthcare

Hours 3

The purpose of this course is to apply concepts associated with data analytic methods and the use of burgeoning technologies in healthcare. The course prepares the nurse scientist to engage with other researchers in the areas of data analytics, simulation, telehealth, and robotics. The appropriate integration of health care technologies to support nursing research will be emphasized.

Prerequisite(s): Admission to Joint Nursing Science PhD Program

NUS785 Research and Development (R&D) of Innovative Health Care Technology

UAH

Hours 3

The purpose of this course is to develop the scientific skills to move an idea from concept to product following a research and development (R&D) process. The course prepares the nurse scientist to engage with researchers inside and outside health care fields, solicit input from end-users early and often, create patentable intellectual property, and fund the development of products with federal grants or investors.

Prerequisite(s): NUS 784 or permission from professor

UA-Huntsville Course

NUS799 Dissertation Hours

Hours 1-12

The purpose of this course is initiation, continuation, or completion of the dissertation for the Doctor of Philosophy (PhD) in Nursing Science degree. This course must be repeated each semester consecutively up to 24 credit hours until successful defense of the dissertation.

Prerequisite(s): Successful completion of 45 hours of NUS courses

Doctor of Nursing Practice (DNP)

The DNP is a practice doctorate in nursing that prepares graduates to function at the highest level of nursing practice. Entry into the program is available in spring, summer, and fall. Graduates of the DNP program focus on providing care with an emphasis on improving quality and access to underserved and diverse populations. Graduates employ abilities and skills in these areas to (a) advocate for reasonable, rational, and data-driven health regulations, standards, and practices; (b) sustain collaborative and strategic relationships; (c) promote innovative, effective health care programs; and (d) form partnerships with diverse groups to address health disparities.

Two pathways to the DNP degree are available, post-baccalaureate to DNP (BSN to DNP) and post-masters to DNP (MSN to DNP). The BSN to DNP pathway admits BSN-prepared nurses. The MSN degree will be awarded en route at the start of the DNP project courses. The following MSN concentrations are available: Nurse Administration, Family Nurse Practitioner (FNP), Psychiatric Mental Health Nurse Practitioner (PMHNP), or dual nurse Psychiatric Mental Health and Family Nurse Practitioner. **The BSN to DNP pathway for Nurse**

Practitioner concentrations is currently available to Alabama, Arkansas, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Texas, and Virginia residents only.

The MSN to DNP pathway admits those with a minimum of a Master's in Nursing or Bachelor's in Nursing in Nursing or another relevant field.

Those with a Master's in a field other than nursing may be required to complete additional courses. The program of study offers the opportunity for a focus in education or executive administration through additional elective coursework if desired.

The DNP curriculum includes the development of a clinical practice DNP project. "The DNP project" is designed to synthesize scholarship in an advanced practice specialty or an area of health care leadership.

Practice immersion experiences provide the context within which the project is completed. Students develop the project under the direction of a team, including program faculty, the student, the clinical advisor, and the faculty advisor. All courses are offered in a distance accessible format, with one on-campus intensive conference attended during the DNP project courses.

Note: This program requires a **clinical component (post-baccalaureate range from 1080-1620 clinical hours depending on the concentration; post-master's clinical hours are 540)**. The student's responsibility is to identify a site and an appropriate clinical advisor. **No clinical practice will take place until the student has been notified by CCN of the site and clinical advisor approval.**

Admissions

Post-Baccalaureate to Doctor of Nursing Practice (BSN to DNP) Pathway

Applicants for the Post-Baccalaureate to Doctor of Nursing Practice (DNP) pathway will be considered on a competitive basis. In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. Baccalaureate degree in nursing from an accredited school of nursing.
2. Reside and hold a current unencumbered RN licensure in a state-approved for admission. **Currently only residents of Alabama, Arkansas, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Texas and Virginia are eligible for admission to the BSN to DNP pathway.**

Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate University officials.

Post-Master's to Doctor of Nursing Practice (MSN to DNP) Pathway

Applicants for the Post-Baccalaureate to Doctor of Nursing Practice (DNP) pathway will be considered on a competitive basis. In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. Master's degree in nursing from a CCNE or NLN accredited school of nursing or a Master's degree in another relevant field. Those with Master's in a field other than Nursing may be required to complete additional courses.
2. Reside and hold a current unencumbered RN licensure in a state approved for admission. [Click Here](#) to view the states from which the College of Nursing accepts applications for admission.

Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate University officials.

See the Admission Criteria section of this catalog for more information.

Transfer Credit

Graduate School information on Transfer Credit (p. 23).

Doctoral Plan of Study Requirement

Graduate School information on the Doctoral Plan of Study (p. 23).

Clinical Hours

A minimum of 1000 post-baccalaureate practice hours are required for completion of the DNP degree. Students who do not have sufficient clinical hours will be required to complete additional clinical hours as determined by the Assistant Dean of the Graduate Programs prior to the beginning of DNP courses. In such cases, 60 clinical hours are the equivalent of 1 semester credit hour.

Graduate Student Clinical Placements

1. The Capstone College of Nursing (CCN) will initiate a Letter of Agreement (LOA) or a Clinical Affiliation Agreement (CAA) for all clinical experiences involving direct or indirect patient care by graduate students.
2. Students will not be permitted to start clinical experiences involving direct or indirect patient care until either a CAA (along with a Letter of Notification [LON]) or LOA has been executed. (Nurse Practitioner students must have a CAA with LON. The LOA cannot be used.)
3. Faculty are responsible for sending written notification to the student that he/she is approved to begin the clinical experience.

Banking of Clinical Hours for the Doctor of Nursing Practice Student

The purpose of this policy is to outline the requirements for allowing Doctor of Nursing Practice students to utilize clinical hours from one

semester to the next for the DNP Project. "Banking" refers to the ability to accrue clinical hours during the time period between semesters and credit those hours toward their cumulative clinical hours or required hours in the term following the break between semesters. The policy only applies to the DNP Practice courses. All Nurse Practitioner clinical courses are excluded from this policy. The following requirements must be met to bank clinical hours:

1. Students will follow the policy for approval of clinical sites.
2. Students must be enrolled in the upcoming and applicable DNP project clinical course to bank clinical hours.
3. The student must successfully complete the applicable clinical course that following semester in order for the banked clinical hours to be applied.
4. The student must be an active student and in good standing (overall average GPA of 3.0) to progress.
5. All prior semester course work must be completed, and all Incompletes satisfied.
6. The assigned instructor for the upcoming and applicable course MUST approve in writing any requests for banking before the last day of the prior term.
7. Clinical hours must be entered in Typhon and verified by the DNP clinical advisor and approved by the DNP faculty advisor.

Admission to Candidacy Requirements

The Coordinator of Graduate Student Services will initiate the Admission to Candidacy when core coursework is completed.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 23).

Student Progression Requirement

Student progression is monitored and evaluated each semester. Please contact the Coordinator of Graduate Student Services for the Graduate Retention and Progression Policy.

Additional Academic Requirements

The Doctor of Nursing Practice will be awarded to the student who has met the following requirements:

- GPA of 3.0 or higher
- Good standing at the time of graduation
- Successful completion of the DNP project
- Successful completion of the required coursework and DNP project hours
- Recorded participation in DNP orientation
- Attendance at one (1) DNP Intensive during the DNP Project courses (last three semesters of the program)
- BSN to DNP students are required to attend the NP Clinical Intensive during the concentration unique clinical courses

Annual Graduate Student Background Checks and Drug Screening

1. Students accepted to the graduate nursing programs are required to have an annual background screen and drug screen.

- Students accepted to the graduate nursing programs are required to pass a background screen and have a negative drug screen.
- The College of Nursing must certify to clinical agencies where students practice that each student has had an acceptable background screen and negative drug screen.
- The background screen and drug testing screen will be conducted by a qualified agency using established methods and procedures. Confidentiality of the student will be protected. All costs associated with screenings are the responsibility of the student.
- Initial acceptance to graduate nursing courses will be withdrawn for students who have a positive drug screen.
- A student who has a positive drug screen while taking graduate nursing courses will follow the CCN Substance Abuse Policy/Drug/Alcohol Testing Policy. Any readmission consideration will be based on the CCN Substance Abuse Policy/Drug/Alcohol Testing Policy.
- Initial acceptance to graduate nursing courses will be withdrawn for students who have been convicted of or have pending a charge that would not be acceptable for clinical practice.
- A student whose acceptance to graduate nursing courses is withdrawn or is dismissed from the College of Nursing due to findings from a background screen will be considered for readmission on a case by case basis depending upon the situation.

HEALTH, IMMUNIZATION, AND REQUIRED DOCUMENTS FOR GRADUATE STUDENTS: POLICY AND PROCEDURE

Once admitted to a clinical graduate program, new students will receive instructions in their admission packets outlining health requirements and other required documents and verifications. **In addition**, each incoming student must complete a drug and background screening by the Capstone College of Nursing (CCN) specified provider. Those documents will be uploaded by the CCN directly from the website.

Proof of compliance must be submitted prior to removal of initial registration hold and during progression through the program. Failure to comply with updating required documents will result in a registration hold or an administrative block to course access.

Incoming students enrolling in MSN and DNP programs must upload the following into the document management system:

- Completion of BLS Provider (must be valid and updated prior to expiration as long as you are attending).
- Completion of program on OSHA Standards.
- Advanced Practice Certification (if applicable and must be valid or updated as long as attending).
- Proof of Health Insurance.
- Graduate Nursing Student Health & Physical Exam Form signed by Certified Registered Nurse Practitioner (CRNP), DO, or MD.
- Initial Graduate Nursing Student TB Test and Immunization Form. New students with a history of TB or a history of a positive TB skin test must submit documentation of a clear chest x-ray completed within the month immediately prior to document submission.
- Signed HIPAA statement (see Graduate Student Handbook).

All graduate students (e.g., MSN, DNP, EdD, and PhD) must upload the following into the document management system:

- Current unencumbered RN licensure for state of legal residence.

Annually, students continuing in the MSN and DNP programs must:

- Complete and upload the Continuing Graduate Nursing Student TB Status Form into the document management system verifying that the student has an up-to-date negative TB skin test.
 - Continuing students with a history of a positive TB skin test must submit an annual chest x-ray to document a negative standing or an annual Quantiferon laboratory test. No exceptions will be allowed.
 - Continuing students with a newly positive TB skin test must provide documentation of clearance to attend clinical learning experiences by an appropriate practitioner prior to enrolling in any clinical course or attending any clinical site.
- Upload into the document management system the Continuing Graduate Nursing Student Statement of Health Status Form indicating that no change in health status has occurred. If health status has changed, the student uploads an updated Graduate Student Health & Physical Exam Form signed by CRNP, DO, or MD.
- No later than October 31st of each year, upload into the document management system the Continuing Graduate Nursing Student Annual Influenza Vaccine Form. Exceptions for allergies only. This vaccine cannot be declined.
- Upload into the document management system a signed HIPAA statement (see Graduate Student Handbook)

Annually, all graduate students, EXCEPT EdD students, must complete a drug and background screening by the CCN specified provider. Those documents will be uploaded by the CCN directly from the provider website.

IMMUNIZATION REQUIREMENTS

Hepatitis B Vaccine

Upon admission, students must upload into the document management system proof of immunization for hepatitis B or a hepatitis B titer that shows adequate antibody protection as noted on the Initial Graduate Nursing Student TB Test and Immunization Form. In the event that a titer is performed, or after the first series of immunizations, antibodies are insufficient to offer immunity a repeat of the complete hepatitis B series is required. Students who have completed the hepatitis B series prior to enrolling in any graduate program must provide documentation to satisfy this requirement. If a student has not already completed the hepatitis B series, adherence to the following information is required. It is highly desirable that the series of 3 injections be completed prior to beginning courses. However, the minimum expectation, and proof of immunization injections for hepatitis B are as follows:

- Injections 1 and 2 – documented on the Graduate Student Health & Physical Exam form.
- Injection 3 – documented either on the Graduate Student Health & Physical Exam form or by official documentation from the healthcare provider who administered the vaccine. This documentation must be uploaded into the document management system by the date specified on the letter. **FAILURE TO SUBMIT DOCUMENTATION OF THE THIRD INJECTION WILL RESULT IN THE INABILITY TO CONTINUE ATTENDANCE AND/OR PROGRESSION COURSES IN THE COLLEGE OF NURSING.**

Hepatitis B injections are available at the UA Student Health Center (corner of University Blvd. and 5th Avenue), most County Health Departments in most states, private healthcare provider offices, and clinics such as the University Medical Center. A plan for all injections should be discussed with the healthcare provider. The usual time period for the 3 injections is designated as 1 month between the first and

second injections, and at least two months between the second and third injections.

IT IS THE STUDENT'S RESPONSIBILITY TO PLAN A TIME SCHEDULE WITH THE SELECTED HEALTHCARE PROVIDER TO ASSURE THE COMPLETION OF IMMUNIZATIONS TO COINCIDE WITH THE DATES SPECIFIED. Students are responsible for making all arrangements for receipt of and payment for vaccines.

Tetanus Vaccination

TD/Tdap booster or basic series within the past ten years is required, prior to entering graduate programs.

Influenza Vaccination

An influenza vaccine is required annually no later than October 31st, unless contraindicated by allergy or prior reaction. This must be demonstrated by official documentation by a healthcare provider.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Please contact the Coordinator of Graduate Student Services for assistance with the Leave of Absence process.

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Graduate School information on Academic Grievances (p. 219).

Scholastic Requirements

Graduate School information on Scholastic Requirements (p. 204).

Graduate School Deadlines Information

Information on Graduate School Deadlines.

Application for Graduation Information

Information on the Application for Graduation (p. 18).

Family Nurse Practitioner Certificate

Currently, only Alabama, Arkansas, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Texas, and Virginia residents are eligible for the Nurse Practitioner certificate.

The Nurse Practitioner (NP) Post-graduate Certificate program builds on the graduate level nursing competencies and knowledge base. Nurses who are already prepared at either the master's or doctorate level for other roles may apply for the post-graduate certificate program with advanced specialization as a Family Nurse Practitioner (FNP). The FNP concentration prepares students for certification as an FNP across the lifespan. Students in the Post-graduate Certificate program will enroll in existing FNP population-focused courses, but they will not be required to complete master's graduate nursing core courses.

Admissions

Applicants for the nurse practitioner post-graduate certificate will be considered on a competitive basis. Nurses who are interested in the nurse practitioner post-graduate certificate are encouraged to contact

the Capstone College of Nursing (CCN) Coordinator of Graduate Student Services.

Currently, only residents of Alabama, Arkansas, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Texas, and Virginia are eligible for the Nurse Practitioner certificate.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must:

- Have a Master's degree in nursing from an accredited graduate program in nursing or a master's degree in a health-related field with a baccalaureate degree in nursing from an accredited program.
- Reside and hold a current unencumbered RN licensure in a currently approved state.

Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate University officials.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Post-Graduate Certificate: Family Nurse Practitioner Sample Program of Study

Post-Graduate Certificate: Family Nurse Practitioner Sample Program of Study		Hours
NUR 567	FNP Role & Issues	3
NUR 569	Family Nurse Practitioner I	3
NUR 570	FNP Clinical I	3
NUR 571	Family Nurse Practitioner II	3
NUR 572	FNP Clinical II	3
NUR 573	Family Nurse Practitioner III	3
NUR 574	FNP Clinical III	3
Total Hours		21

The student's transcripts will be assessed for the following courses.

Code and Title	Hours
NUR 505 Advanced Health Assessment	3
NUR 521 Advanced Pharmacology	3
NUR 529 Advanced Pathophysiology	3

Transfer Requirements

Graduate School information on Transfer Credit (p. 18).

Time Limits for Degree Completion

Graduate School information on Time Limits (p. 18).

Clinical Hours

Clinical hours are completed under the supervision of advanced practice providers specific to each specialty concentration (FNP, PMHNP, or NA)

Graduate Student Clinical Placements

1. The Capstone College of Nursing (CCN) will initiate a Letter of Agreement (LOA) or a Clinical Affiliation Agreement (CAA) for all clinical experiences involving direct or indirect patient care by graduate students.
2. Students will not be permitted to start clinical experiences involving direct or indirect patient care until either a CAA (along with a Letter

of Notification [LON]) or LOA has been executed. (Nurse Practitioner students must have a CAA with LON. The LOA cannot be used.)

3. Faculty are responsible for sending written notification to the student that he/she is approved to begin the clinical experience.

Student Progression

Student progression is monitored and evaluated each semester.

Additional Academic Requirements

The MSN will be awarded to the student who has met the following requirements:

- GPA of 3.0 or higher
- Good standing at the time of graduation
- Successful completion of the required coursework
- Participate in orientation and on-campus intensive if required by concentration.

Annual Graduate Student Background Checks and Drug Screening

1. Students accepted to the graduate nursing programs are required to have an annual background screen and drug screen.
2. Students accepted to the graduate nursing programs are required to pass a background screen and have a negative drug screen.
3. The College of Nursing must certify to clinical agencies where students practice that each student has had an acceptable background screen and negative drug screen.
4. The background screen and drug testing screen will be conducted by a qualified agency using established methods and procedures. Confidentiality of the student will be protected. All costs associated with screenings are the responsibility of the student.
5. Initial acceptance to graduate nursing courses will be withdrawn for students who have a positive drug screen.
6. A student who has a positive drug screen while taking graduate nursing courses will follow the CCN Substance Abuse Policy/Drug/Alcohol Testing Policy. Any readmission consideration will be based on the CCN Substance Abuse Policy/Drug/Alcohol Testing Policy.
7. Initial acceptance to graduate nursing courses will be withdrawn for students who have been convicted of or have pending a charge that would not be acceptable for clinical practice.
8. A student whose acceptance to graduate nursing courses is withdrawn or is dismissed from the College of Nursing due to findings from a background screen will be considered for readmission on a case by case basis depending upon the situation.

HEALTH, IMMUNIZATION, AND REQUIRED DOCUMENTS FOR GRADUATE STUDENTS: POLICY AND PROCEDURE

Once admitted to a clinical graduate program, new students will receive instructions in their admission packets outlining health requirements and other required documents and verifications. **In addition**, each incoming student must complete a drug and background screening by the Capstone College of Nursing (CCN) specified provider. Those documents will be uploaded by the CCN directly from the website.

Proof of compliance must be submitted prior to removal of initial registration hold and during progression through the program. Failure to

comply with updating required documents will result in a registration hold or an administrative block to course access.

Incoming students enrolling in MSN and DNP programs must upload the following into the document management system:

1. Completion of BLS Provider (must be valid and updated prior to expiration as long as you are attending).
2. Completion of program on OSHA Standards.
3. Advanced Practice Certification (if applicable and must be valid or updated as long as attending).
4. Proof of Health Insurance.
5. Graduate Nursing Student Health & Physical Exam Form signed by Certified Registered Nurse Practitioner (CRNP), DO, or MD.
6. Initial Graduate Nursing Student TB Test and Immunization Form. New students with a history of TB or a history of a positive TB skin test must submit documentation of a clear chest x-ray completed within the month immediately prior to document submission.
7. Signed HIPAA statement (see Graduate Student Handbook).

All graduate students (e.g., MSN, DNP, EdD, and PhD) must upload the following into the document management system:

1. Current unencumbered RN licensure for state of legal residence.

Annually, students continuing in the MSN and DNP programs must:

1. Complete and upload the Continuing Graduate Nursing Student TB Status Form into the document management system verifying that the student has an up-to-date negative TB skin test.
 - a. Continuing students with a history of a positive TB skin test must submit an annual chest x-ray to document a negative standing or an annual Quantiferon laboratory test. No exceptions will be allowed.
 - b. Continuing students with a newly positive TB skin test must provide documentation of clearance to attend clinical learning experiences by an appropriate practitioner prior to enrolling in any clinical course or attending any clinical site.
2. Upload into the document management system the Continuing Graduate Nursing Student Statement of Health Status Form indicating that no change in health status has occurred. If health status has changed, the student uploads an updated Graduate Student Health & Physical Exam Form signed by CRNP, DO, or MD.
3. No later than October 31st of each year, upload into the document management system the Continuing Graduate Nursing Student Annual Influenza Vaccine Form. Exceptions for allergies only. This vaccine cannot be declined.
4. Upload into the document management system a signed HIPAA statement (see Graduate Student Handbook)

Annually, all graduate students, EXCEPT EdD students, must complete a drug and background screening by the CCN specified provider. Those documents will be uploaded by the CCN directly from the provider website.

IMMUNIZATION REQUIREMENTS

Hepatitis B Vaccine

Upon admission, students must upload into the document management system proof of immunization for hepatitis B or a hepatitis B titer that shows adequate antibody protection as noted on the Initial Graduate Nursing Student TB Test and Immunization Form. In the event that a titer is performed, or after the first series of immunizations, antibodies are

insufficient to offer immunity a repeat of the complete hepatitis B series is required. Students who have completed the hepatitis B series prior to enrolling in any graduate program must provide documentation to satisfy this requirement. If a student has not already completed the hepatitis B series, adherence to the following information is required. It is highly desirable that the series of 3 injections be completed prior to beginning courses. However, the minimum expectation, and proof of immunization injections for hepatitis B are as follows:

- Injections 1 and 2 – documented on the Graduate Student Health & Physical Exam form.
- Injection 3 – documented either on the Graduate Student Health & Physical Exam form or by official documentation from the healthcare provider who administered the vaccine. This documentation must be uploaded into the document management system by the date specified on the letter. FAILURE TO SUBMIT DOCUMENTATION OF THE THIRD INJECTION WILL RESULT IN THE INABILITY TO CONTINUE ATTENDANCE AND/OR PROGRESSION COURSES IN THE COLLEGE OF NURSING.

Hepatitis B injections are available at the UA Student Health Center (corner of University Blvd. and 5th Avenue), most County Health Departments in most states, private healthcare provider offices, and clinics such as the University Medical Center. A plan for all injections should be discussed with the healthcare provider. The usual time period for the 3 injections is designated as 1 month between the first and second injections, and at least two months between the second and third injections.

IT IS THE STUDENT'S RESPONSIBILITY TO PLAN A TIME SCHEDULE WITH THE SELECTED HEALTHCARE PROVIDER TO ASSURE THE COMPLETION OF IMMUNIZATIONS TO COINCIDE WITH THE DATES SPECIFIED. Students are responsible for making all arrangements for receipt of and payment for vaccines.

Tetanus Vaccination

TD/Tdap booster or basic series within the past ten years is required, prior to entering graduate programs.

Influenza Vaccination

An influenza vaccine is required annually no later than October 31st, unless contraindicated by allergy or prior reaction. This must be demonstrated by official documentation by a healthcare provider.

Nursing Science, Ph.D.

The PhD is a research doctorate in Nursing Science which prepares graduates to meet the critical need for nurse scientists, nursing faculty, and administrators in academic and health care settings. The program prepares graduates for scholarly roles by advancing their knowledge of theory and policy and increasing their skills in research methods. Graduates of the program focus on improving the health of individuals and communities through nursing science. Graduates will be equipped with the knowledge and skills necessary to conduct research that changes lives through improving patient outcomes and reducing health disparities.

Entry into the program is available every summer. Students admitted to the program are mentored and taught by faculty from both The University of Alabama Capstone College of Nursing and the University of Alabama in Huntsville College of Nursing.

Admissions

We accept BSN-prepared and MSN-prepared students into the Joint Ph.D. program. Admission requirements are the same except where noted below.

Admission to the Ph.D. program is determined by the Joint Ph.D. Oversight Committee who will assess the entire composite of information gained from a variety of sources. Each applicant must meet the following criteria and/or provide:

- An application to the Joint Ph.D. Graduate Program Apply onlineOpens in a new window.
- Official transcripts from each university or college attended sent to:
 - UAH Graduate Admissions
 - 301 Sparkman Drive
 - SSB, Suite 222
 - Huntsville, AL 35899
- BSN-prepared applicants must have evidence of successful completion of a bachelor of science in nursing degree at an accredited program.
- MSN-prepared applicants must have bachelor of science in nursing degree and a master's degree in nursing or a closely related health field from accredited programs.
- A minimum graduate Grade Point Average (GPA) of 3.0 on a 4.0 scale.
- Resume or curriculum vitae.
- Three (3) letters of reference from professionals or professors who can adequately evaluate the applicant and the applicant's previous work or potential for success. Two of the letters are strongly preferred from nurses with doctoral degrees.
- Scientific Writing Sample – This sample of your written work should demonstrate your intellectual ability (such as logic, critical thinking, analysis, or synthesis) and your technical writing skills (composition, grammar, references, or citations). For example, you could submit an academic paper, essay, published article, or a professional report written by you. If someone other than you contributed to

this document (including editing), explain your contribution and the contributions of others.

- Statement of Purpose – In four double-spaced pages respond to the following:
 - Why do you want to pursue a Ph.D. in Nursing Science?
 - What professional goals do you hope to achieve during and beyond your Ph.D. program?
 - Describe prior experiences that have prepared you for doctoral study (e.g. research, presentations, publications, leadership roles in practice, education, or professional organizations).
 - What are your research interests?
 - How might research in this area advance the science of nursing?
- RN Licensure Requirement –
 - Applicants must have an active, unencumbered license as a Registered Nurse in the United States. Applicants who hold an equivalent certification or licensure outside of the U.S. will be considered on a case-by-case basis.
 - Applicants who are not yet licensed will be considered for conditional admission, but proof of licensure must be submitted prior to completing 12 credit hours of Ph.D. coursework
- Transfer applicants – Evidence of good academic standing at the current institution. Determination of whether or not credits may be transferred will be based on evaluation of comparability of requested transfer course to Ph.D. course and university policy, and is completed after admission.

After the first review of the application and at the request of the Joint Ph.D. Oversight Committee, applicants will be asked to successfully complete personal interviews with Oversight Committee members. Research interests, professional involvement, and motivation for successful completion of doctoral study in the Ph.D. program will be assessed.

Completed applications are reviewed by the Oversight Committee throughout the year for summer enrollment. Applications (with GRE scores, transcripts, etc.) must be completed by March 1 if enrollment in the program is desired for that summer. Applicants must register for courses within two (2) years of acceptance into the Ph.D. program, or the acceptance is void.

Upon admission, you will receive written notification of admission from the Deans of the Joint Ph.D. Program. You will also receive a letter from the graduate advisors at both UA and UAH outlining requirements for entry into the Ph.D. program. Admission is contingent upon providing documentation of a background check and drug screen and results were acceptable to the admission committee.

Students who are enrolled in the Joint Nursing Science Ph.D. program will be divided evenly between UA and UAH for administrative purposes. Applicants who are employees of either UA or UAH will be enrolled in the University of their employment because of the restriction that employee tuition waivers can only be used on the campus of the individual's employment.

The Joint Ph.D. program requires students to visit campus for three days in the Summer each year they are in the program for an intensive experience. **This is a mandatory intensive experience and all students are expected to attend.**

Transfer Credit

Students enrolled in the Joint Nursing Science PhD will have the following requirements:

1. Three, one-week residencies to be hosted on alternating campuses, in the summer semesters. All residencies will be attended by faculty from both campuses
 - a. The initial residency is orientation to the program and to the first courses. This provides an opportunity to meet faculty and access student resources such as library, writing centers and financial aid.
 - b. Residency 2 is designed to integrate cohorts into the study of nursing science and provides opportunities for social support among faculty and students.
 - c. At the conclusion of coursework, this residency provides students and faculty mentors the opportunity to finalize plans for implementing the dissertation. The student will present a dissertation proposal defense.
2. Qualifying Examination. At the end of semester 6, students will be given a take home exam that will evaluate writing and critical thinking

skills and to assess synthesis of knowledge of the program's core concepts.

3. Final Dissertation Defense. At the conclusion of the 24 required dissertation hours, students will be required to present the findings and implications of their dissertation.

Graduate School information on Transfer Credit (p. 23).

Comprehensive Exams

Eligibility

- Completion of Ph.D. coursework with B or higher in all courses

Examination Schedule and Procedures*

- Students will be advised in Summer Intensive II about the comprehensive exam procedures and expectations.
- Written portion of the comprehensive exam will be sent to students the last week in April. Students will be given 2 weeks to complete the comprehensive exam. Written exam will be graded before the Summer Intensive III.
- Written comprehensive exam will consist of three questions with a maximum 21-page limit.
- The comprehensive exam will be graded as pass/fail for UA home students and satisfactory/unsatisfactory for UAH home students.
- Each exam will be graded by two members of the Comprehensive Exam Committee. If the two members disagree, a third member will grade the exam and be the deciding tie breaker.
- An oral portion will be given during the Summer Intensive III to students who did not pass the written exam.
- Students who did not pass the written portion will be given direction on which question or questions to prepare for the oral presentation.
- If a student fails both the oral exam the first time, the student will be given a second chance to take the written comprehensive exam. The oral portion will not be given a second time. If the student fails the second written exam, that student will be dismissed from the Joint Nursing Science Ph.D. program.

Re-Examination

The procedure for a second written Ph.D. Comprehensive Examination is the same as for the original comprehensive examination. The second examination date is planned to accommodate remediation recommendations. The procedure for administration and evaluation of the second comprehensive examination is the same as with the first attempt. The student who fails the second attempt of the examination is not eligible for progression in the Joint Nursing Science Ph.D. program and may not enroll in future Ph.D. course work in the program.

Notification of Results

Ph.D. Comprehensive Examination results are sent to the gradebook in Canvas. A copy of the results letter is placed in the student's academic file. Notification of individual students' examination performance is sent by the ADGP to the Dean of the Graduate School.

Graduation School information on Comprehensive Exams (p. 23).

Admission to Candidacy Requirements

Upon the successful defense of the dissertation proposal, an application for candidacy is submitted to the Graduate School of the student's home institution. The application for candidacy is initiated by the Coordinator of Graduate Student Services.

Continuous Enrollment Policy

Candidacy is retained by maintaining continuous enrollment in NUS 799 Dissertation Hours each fall and spring semester, up to and including the term in which the dissertation is defended. Failure to enroll continuously in NUS 799 until the Ph.D. degree is awarded terminates candidacy.

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

NUS 799, Dissertation Hours

Students are required to take dissertation credit (NUS 799) to begin the dissertation proposal and continue until graduation. Student and the chair (in consultation with the committee) must decide the number of hours per semester. The number of course hours is related to the objectives/student learning outcomes to be accomplished in a given semester. At the beginning of each semester, student objectives are to be determined. These objectives will be used for determining tasks and deadlines as well as the course grade. Failure to successfully complete the dissertation assignments according to the syllabus will result in a grade of fail/unsatisfactory for the course.

Dissertation Proposal

While registered in NUS 799, students have 12 months to complete the dissertation proposal from the date of the successful completion of the comprehensive exam. If the dissertation proposal is not completed in this time period, the Chair of the Dissertation Committee will meet with the student about her/his progress. The student is then responsible for developing a written plan for completion of the dissertation proposal and submitting this to the dissertation committee for approval within two weeks following the meeting with the Dissertation Committee Chair.

The proposal defense is graded on a Pass, Pass with revisions, or Fail basis by unanimous vote of the dissertation committee members. If revisions are requested in order to determine the status of the proposal, the Chair of the Dissertation Committee, in consultation with committee members, will monitor the completion of the revisions as requested by the dissertation committee members. After revisions are received, the committee determines whether a student passes with revisions or fails.

For a failure, a second proposal defense will be held within six (6) months from the date of the defense of the first proposal defense, and the Dissertation Committee Chair makes the required notifications about the second proposal defense. The candidate may re-attempt the proposal defense once.

Dissertation Proposal Format

Two formats for the dissertation are acceptable in the Joint Nursing Science Ph.D. Program: 1) a five-chapter dissertation (see page 16 for further description) or 2) a 3-article dissertation (see page 17 for further description, http://services.graduate.ua.edu/etd/article_style.html). Students must choose the format prior to the Dissertation Proposal Defense and the format is defended to and approved by the committee at the Dissertation Proposal Defense.

The student must submit for approval by the Dissertation Committee a written dissertation proposal for the doctoral dissertation research. For both styles of dissertation, the student will complete the dissertation proposal as outlined below.

The dissertation proposal includes:

- Title Page
- Chapter One: Background, Significance and Specific Aims. This section should: (1) provide an introduction, significance, and purpose

of the research and the specific aims of the project; (2) state the research questions to be addressed or hypotheses to be tested; and, (3) provide a conceptual/theoretical framework that is clearly described.

- Chapter Two: Review of literature. This section should: (1) provide a review of the literature leading to the research proposal, critically evaluate existing knowledge, and specifically identify the gap(s) which the proposal is intended to address.
- Chapter Three: Research Design and Methods. This section should: (1) describe the research design (design, sample, variables and measures) and the procedures to be used to accomplish the specific aims of the project; identify instruments to be used and describe procedures for addressing the specific aims. (2) include any pilot work or preliminary studies related to the proposal; and (3) include how the data were collected, analyzed, and interpreted.
- References in APA style
- Appendices as needed

With submission of the dissertation proposal, the student also submits the following in writing. These items are discussed and approved during the proposal defense:

- Dissertation Format. Identify the dissertation format. If the 3-article option is chosen, outline the subject of each article (manuscript) and the journal(s) chosen for submission.
- Projected Timeline. Identify a complete timeline for the research study from submission of the IRB application(s) to graduation. Included in this timeline will be how often the student will apprise the committee members of their progress.

For all students, detailed style guidelines for proposals and dissertations can be found at the following link <http://services.graduate.ua.edu/etd/>

Review Appendix E, Dissertation Guidelines carefully for additional assistance.

Process for the Dissertation Proposal Defense

The completed dissertation proposal must be submitted to the dissertation committee. There may be multiple drafts of the proposal necessary to achieve the quality expected to progress to the proposal defense. The student primarily works with the dissertation chair on the chapters that comprise the dissertation proposal. Committee members are consulted as needed and are kept apprised of the progress of the proposal according to the agreed upon timeline. Students may ask for committee members to read sections of the proposal during its development, in order to obtain direction based on the members' areas of expertise. Once the dissertation chair determines student readiness to defend the proposal, and after an agreed upon date among all committee members, a two weeks' notice to the Graduate School is required; see below for school specific paperwork that is required. All dissertation committee members are required to be in attendance. The defense may be scheduled virtually, but video presentation is required.

The proposal defense is a formal meeting in which the student presents the proposed research, and answers questions posed by the dissertation committee members. Areas to be included in the oral presentation will be specified by the student's Dissertation Committee. The dissertation proposal must be defended orally and approved by the Dissertation Committee before submission of the Institutional Review Board application(s), see below.

The approved dissertation proposal serves as a written agreement between the student and the dissertation committee regarding the expectations, limitations, and scope of the dissertation work.

Institutional Review Board

The student must gain Institutional Review Board (IRB) approval at the home institution following successful completion of the dissertation proposal defense and prior to implementation of the dissertation research. In some instances, one or more agencies may also require IRB approval. Appropriate forms and links are located: UA <http://ovpred.ua.edu/research-compliance/institutional-review-board-irb/>. For more information please contact the UAH IRB chair, Ann L. Bianchi Ph.D., ann.bianchi@uah.edu or the UA Member,

Dissertation

After the completion of work proposed in the dissertation proposal, the student is expected to submit the completed work as a dissertation.

The dissertation is the final milestone to be completed by a doctoral student to fulfill the objectives of the Ph.D. in Nursing Science degree. The goal of the dissertation is to engage the student in the research process. The purpose of the dissertation is to demonstrate the student's development as a scholar through implementation of the research process.

A student successfully completes the dissertation when the dissertation committee members confirm that he or she:

1. Articulates a theoretical framework that extends or advances knowledge and/or contributes to human/reality understanding of the patient care phenomenon selected for study.
2. Conducts an investigation of a research question relating to some aspect of nursing science and patient care.
3. Completes an investigation that lends itself, in part or in whole, to publication in a refereed journal.
4. Writes a scholarly dissertation and defends the dissertation.

Dissertation Format

For all students, detailed guidelines for dissertations can be found at the following link <http://services.graduate.ua.edu/etd/>.

Doctoral students, in consultation with their committee members, may choose a traditional dissertation format or the manuscript (article style) option format.

Traditional Dissertation Format

The traditional dissertation should be formatted in a standardized way, using APA (7th ed.) as a guideline. Please refer to information at the following link <http://services.graduate.ua.edu/etd/manual/parts.html#dis> to see a description of the contents of the three main parts to a dissertation - the preliminary pages, the text, and the reference matter. Within these three parts, the following are included:

- Abstract: An abstract of no more than 350 words (not counting title and author's name), with structure determined by the doctoral dissertation committee).
- Chapter One: Background, Significance and Specific Aims. This section should: (1) 17 Date Approved: Fall 2021 provide an introduction, significance, and purpose of the research and the specific aims of the project; (2) state the research questions to be addressed or hypotheses to be tested; and (3) provide a conceptual/theoretical framework that is clearly described.
- Chapter Two: Review of literature. This section should: (1) provide a review of the literature leading to the research proposal, critically evaluate existing knowledge, and specifically identify the gap(s) which the proposal is intended to address.

- Chapter Three: Research Design and Methods. This section should: (1) describe the research design (design, sample, variables and measures) and the procedures to be used to accomplish the specific aims of the project; (2) include any pilot work or preliminary studies related to the proposal; and (3) include how the data were collected, analyzed, and interpreted.
- Chapter Four: Results. Describe in detail the results of the completed data analysis. Include relevant tables and graphs to illustrate findings.
- Chapter Five: An integrative summary of findings, strengths, limitations and implications for research and practice, and recommendations for future exploration.

Manuscript (article style) Dissertation Format

The 3-manuscript (article-style) dissertation is formatted as described at the following link http://services.graduate.ua.edu/etd/article_style.html where, as with traditional dissertations, elements of the preliminary pages, the text, and the reference matter are described.

As with traditional dissertations, the article-style dissertation must be the student's original idea resulting from research conducted while enrolled in the doctoral program. Furthermore, the article-style dissertation must contain three articles of publishable quality centered around a single scholarly focus with a comprehensive review of literature demonstrating an in-depth understanding of the unifying framework and an explanation of the work's originality and significance to the field of nursing.

The main body (text) of the article-style dissertation must include:

- An introductory chapter containing a statement of purpose, background information, a description of the articles, a description of how the articles are related (theoretical/conceptual framework), and an explanation of the unified work's originality and significance to the field of nursing.
- First article
- Second article
- Third article
- A summarizing chapter that reiterates the importance of the unified work's significance to the field of nursing, synthesizes and integrates the major findings, connects study findings to the guiding theoretical/conceptual framework, outlines the implications of the findings, discusses limitations, and provides recommendations for future research.

NOTE: At least one of the three articles must be a data-based report of the dissertation research. A data-based manuscript should include a review of the literature and use an acceptable convention for data-based reports.

The dissertation committee will provide oversight and direction for the focus of non-data-based articles. Some examples of non-data-based manuscripts are concept analysis papers, scoping reviews, systematic reviews, policy papers, clinical guidelines, or a description of a unique research methodology.

Manuscripts/articles in this type of dissertation may be published, in press, or developed but not yet submitted for journal review. The student will be the lead or sole author on each of the three articles. The inclusion of any articles that are previously published or accepted for publication requires permission from the copyright holder. Please note that not all journals will allow copyright release. It is important to discuss any previously published articles with your dissertation chair and committee members early in the dissertation process, to determine if these will be accepted as part of your dissertation. If approved by your chair and

committee, it will also be important to check with the journal editor where the article was published before submitting a published manuscript in your dissertation.

Items that may be helpful to students during the dissertation phase of the Ph.D. program.

The first three chapters of the dissertation make up the proposal and are written for the proposal defense, regardless of whether proposing to complete a traditional or a 3-manuscript dissertation. However, it is expected that these three chapters may require revision prior to submission of the final dissertation.

It is important to consult with the committee chair and members throughout the dissertation process for discussion of ideas and for guidance.

Reviewing other dissertation products may be helpful as the plan develops and as the dissertation product(s) are written.

Coursework and textbooks from throughout the program can be useful in writing the chapters or papers comprising the dissertation.

The dissertation process involves independent work and can be a solitary experience. Maintaining regular contact with the committee chair and members and obtaining social support from peers in the program can help you to stay engaged and productively moving forward in the process.

Dissertation Defense: Final Oral Examination

In order to be awarded the Ph.D. degree, each student will successfully complete a final oral examination of the dissertation and submit a final version of the dissertation document, approved by the Dissertation Committee to the home institution Graduate School. The Dissertation Committee serves as the final oral examining committee.

A copy of the dissertation must be submitted to all members of the Committee at least three (3) weeks before the pre-defense meeting. The Committee then meets to decide if the document is acceptable and defensible. When accepted, the oral final examination is scheduled. Students also are required to submit an email announcement (including dissertation title and brief abstract) to their Dissertation Chair at least three weeks prior to the scheduled defense so that faculty and students can be invited to attend the oral dissertation defense. The defense is open to the public and members of the University community.

The Committee administers the examination. A 30 - 45-minute presentation is given by the student using presentation software. Anyone attending may ask questions. After the public presentation, the audience is dismissed, and the Dissertation Committee may further question the candidate. The success of the oral defense is determined by a vote of the official committee. The decision to award the degree must be unanimous. The Dissertation Committee may request changes to the final written document, and the Dissertation Committee Chair will be responsible for assuring that the student has made the changes before final approval. The Dissertation Committee Chair notifies the ADGP and Graduate School of the student's home campus of the outcome of the oral dissertation defense. The candidate will be informed of the outcome after the oral defense. If necessary, reexamination will be held within six (6) months from the date of the defense of the first examination, and the Dissertation Committee Chair makes the required notifications about the second oral dissertation defense. The candidate may re-attempt the final oral examination once.

Report of Completion of Requirements for Doctoral Degree

An Application for Degree/Graduation must be completed and submitted by the student according to the timeline of the home institution. If

students do not meet the requirements, they must reapply for the degree. The dissertation chair will report to the ADGP and the Graduate School of the student's home campus regarding the acceptance of the dissertation. Upon completion of a successful defense, faculty must complete and submit the appropriate forms, signed by all committee members and the ADGP of the student's home university.

Submission of Final Dissertation

UA home students will submit their dissertations electronically according to the instructions at <https://www.etsadmin.com/main/home?siteId=176>.

Graduate School information on Degree Requirements (p. 23).

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 23).

Student Progress Requirements

Student progression is monitored and evaluated each semester.

Additional Academic Requirements

Each summer, however, is devoted to intensives, a time when students are required to be in residence (physically present) on either The University of Alabama or University of Alabama in Huntsville campus. During this week, students meet with their major advisors and advisory committees, attend scheduled enrichment activities, and interact within and among student cohorts to form important bonds for social support. The schedule for intensives week is developed by the Ph.D. Program Oversight Committee with feedback from students and faculty. The schedule is sent to students at least 2 months in advance to allow students to make travel plans.

Academic Misconduct Information

Graduate School information on Academic Misconduct (p. 7).

Withdrawals and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Leave of Absence Policy

Under compelling circumstances beyond the student's control, a graduate student may request that the department petition the Graduate School with the rationale for granting a leave of absence. If granted by the Graduate School, a leave of absence will cover one or more upcoming semesters rather than any prior semester(s). A leave of absence is not a method of avoiding continuous registration requirements, and it does not lengthen the time limit for degree completion. When a student returns from a leave of absence, the Graduate School must be notified and will work with the department and student to determine the number of semesters remaining on the time limit and the degree requirements that remain.

Process for Requesting a Leave of Absence

- The student contacts the academic advisor at his/her home campus to request a leave of absence (LOA).
- The academic advisor discusses the LOA policy, time limits, and revised POS.

- The academic advisor informs the Ph.D. Coordinator or Associate Dean at home campus and joint campus.
- The academic advisor sends the LOA form to the student.
- The student returns the completed and signed form to the academic advisor; who forwards it to the Graduate school for a decision.
- Once a decision is received from the Graduate School, the academic advisor at the home campus informs the student, the advisor at the other campus and the coordinators of the decision and updates information in the database or tracking system.

Application for Graduation Information

Information on the Application for Graduation (p. 23).

Nursing, MSN

Since its inception, the graduate program has sought out excellent nurses in pursuit of advanced nursing education. Baccalaureate-prepared nurses have the option of multiple concentrations in the Master's of Science in Nursing (MSN) program: Nurse Administrator, Family Nurse Practitioner, Psychiatric Mental Health Nurse Practitioner, and Dual Psychiatric Mental Health and Family Nurse Practitioner. In addition, there is a postgraduate certificate program with Family Nurse Practitioner and Psychiatric Mental Health Nurse Practitioner options. For the registered nurse (RN) who holds an associate degree in nursing and meets the required admission criteria, we offer an RN to BSN program with a pathway to the MSN program.

Admissions

Nurse Practitioner Concentrations

Admission requirements are consistent with those of the Graduate School. Applicants for the MSN Program will be considered on a competitive basis. Nurses who are interested in the Nurse Practitioner Concentrations are encouraged to contact the Coordinator of Graduate Student Services.

Currently, only residents of Alabama, Arkansas, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Texas, and Virginia are eligible for the Nurse Practitioner concentrations.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Baccalaureate degree in nursing from a school of nursing that is both regionally and CCNE or CNEA accredited.
- Current unencumbered RN licensure in the United States.

Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate University officials.

Nurse Administrator Concentration

Admission requirements are consistent with those of the Graduate School. Applicants for the MSN Program will be considered on a competitive basis. Nurses who are interested in the Nurse Administrator

concentrations are encouraged to contact the Coordinator of Graduate Student Services.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Baccalaureate degree in nursing from a school of nursing that is both regionally and CCNE or CNEA accredited.
- Current unencumbered RN licensure in the United States.
- Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate University officials.

See the Admission Criteria section of this catalog for more information.

Master's of Science in Nursing Program: Nurse Practitioner Concentrations

NOTE: Currently, only baccalaureate-prepared registered nurses who are residents of Alabama, Arkansas, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Texas, and Virginia are eligible for admission to Nurse Practitioner (NP) concentrations.

The Capstone College of Nursing (CCN) offers the online Master of Science in Nursing (MSN) degree with specialization in the Dual Nurse Practitioner (NP) Concentration in Psychiatric Mental Health and Family Nurse Practitioner. This dual NP concentration prepares students to sit for both the Psychiatric-Mental Health Nurse Practitioner (PMHNP) – across the lifespan and the Family Nurse Practitioner (FNP) national board certification exams. Single role concentrations in these NP specialties are also offered. The FNP concentration prepares students for certification as an FNP, and the PMHNP concentration prepares students for certification as a PMHNP – across the lifespan. Students complete coursework online, attend a two-day on-campus orientation and a virtual clinical orientation. Students are expected to secure their own clinical sites and preceptors to complete their clinical courses. Once identified, CCN will assist students in securing a Clinical Affiliation Agreement (legal contract) with the clinical site.

Master's of Science in Nursing: Nurse Administrator

Click here [to view the states from which the Capstone College of Nursing currently accepts applications for admission.](#)

The Capstone College of Nursing (CCN) offers the distance-based Master of Science in Nursing (MSN) with all courses offered online. The Nurse

Administrator (NA) program incorporates the AACN MSN Essentials and the AONE Nurse Executive Competencies to provide a comprehensive educational experience for the student.

Nurse administrators are licensed Registered Nurses (RNs) who have formal administrative and managerial positions within health care organizations. They oversee day-to-day and long-term operations for the provision of nursing care. These responsibilities may include managing budgets and human resources, coordinating the distribution of material assets, managing and developing strategic plans, and providing professional leadership. Nursing administration (NA) and management covers a diverse field of formal leadership from those who supervise individual units within a medical facility as front-line managers to higher-level nurse administrators and executives who oversee nursing operations for an entire hospital or healthcare organization.

Front-line nurse managers typically hold a bachelor's degree in addition to an RN license. A Master of Science in Nursing (MSN) program and/or programs in business and healthcare administration may be necessary for career advancement in nursing management. The NA program uniquely prepares future nurse executives for the challenges of providing cost effective high quality patient care outcomes in a chaotic health care environment.

The MSN program of study for NA is offered as both full-time and part-time programs of study, with the part-time program being more suitable for working professionals. The NA program has a significant clinical/administrative component to support learning objectives. Overall, the program focuses on navigating the complexities of the American healthcare system, the challenges of personnel management, quality improvement, budgeting, and other resources in healthcare organizations, as well as professional political advocacy for nursing and quality patient care.

Note: This program requires a **clinical/administration immersion** component and it is the student's responsibility to identify a site with an appropriate clinical facilitator. Prior to the clinical/administrative immersion, the student will start the process of obtaining a CCN Letter of Agreement (LOA) or a Clinical Affiliation Contract with the agency. **No clinical practice will take place until the student has been notified by CCN of approval.**

Curricular Requirements

The MSN program with a Nurse Administrator concentration can be completed in one - two years.

Transfer Requirements

Graduate School information on Transfer Credit. (p. 18)

Clinical Hours

Clinical hours are completed under the supervision of advanced practice providers specific to each specialty concentration (FNP, PMHNP, or NA)

Graduate Student Clinical Placements

1. The Capstone College of Nursing (CCN) will initiate a Letter of Agreement (LOA) or a Clinical Affiliation Agreement (CAA) for all clinical experiences involving direct or indirect patient care by graduate students.
2. Students will not be permitted to start clinical experiences involving direct or indirect patient care until either a CAA (along with a Letter of Notification [LON]) or LOA has been executed. (Nurse Practitioner students must have a CAA with LON. The LOA cannot be used.)
3. Faculty are responsible for sending written notification to the student that he/she is approved to begin the clinical experience.

Thesis (Optional)

A thesis is an original research project conducted by one student and directed by a graduate committee. The student must register for a minimum of six semester hours of thesis credit and successfully complete the thesis to complete the program. An oral public defense of the thesis is required. The thesis must conform to the guidelines of the Graduate School.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 18).

Student Progression Requirement

Student progression is monitored and evaluated each semester.

Additional Academic Requirements

The MSN will be awarded to the student who has met the following requirements:

- GPA of 3.0 or higher
- Good standing at the time of graduation
- Successful completion of the required coursework
- NP Student must participate in orientation and on-campus intensive if required by concentration.

Annual Graduate Student Background Checks and Drug Screening

1. Students accepted to the graduate nursing programs are required to have an annual background screen and drug screen.
2. Students accepted to the graduate nursing programs are required to pass a background screen and have a negative drug screen.
3. The College of Nursing must certify to clinical agencies where students practice that each student has had an acceptable background screen and negative drug screen.
4. The background screen and drug testing screen will be conducted by a qualified agency using established methods and procedures. Confidentiality of the student will be protected. All costs associated with screenings are the responsibility of the student.

5. Initial acceptance to graduate nursing courses will be withdrawn for students who have a positive drug screen.
6. A student who has a positive drug screen while taking graduate nursing courses will follow the CCN Substance Abuse Policy/Drug/Alcohol Testing Policy. Any readmission consideration will be based on the CCN Substance Abuse Policy/Drug/Alcohol Testing Policy.
7. Initial acceptance to graduate nursing courses will be withdrawn for students who have been convicted of or have pending a charge that would not be acceptable for clinical practice.
8. A student whose acceptance to graduate nursing courses is withdrawn or is dismissed from the College of Nursing due to findings from a background screen will be considered for readmission on a case by case basis depending upon the situation.

experiences by an appropriate practitioner prior to enrolling in any clinical course or attending any clinical site.

2. Upload into the document management system the Continuing Graduate Nursing Student Statement of Health Status Form indicating that no change in health status has occurred. If health status has changed, the student uploads an updated Graduate Student Health & Physical Exam Form signed by CRNP, DO, or MD.
3. No later than October 31st of each year, upload into the document management system the Continuing Graduate Nursing Student Annual Influenza Vaccine Form. Exceptions for allergies only. This vaccine cannot be declined.
4. Upload into the document management system a signed HIPAA statement (see Graduate Student Handbook)

Annually, all graduate students, EXCEPT EdD students, must complete a drug and background screening by the CCN specified provider. Those documents will be uploaded by the CCN directly from the provider website.

IMMUNIZATION REQUIREMENTS

Hepatitis B Vaccine

Upon admission, students must upload into the document management system proof of immunization for hepatitis B or a hepatitis B titer that shows adequate antibody protection as noted on the Initial Graduate Nursing Student TB Test and Immunization Form. In the event that a titer is performed, or after the first series of immunizations, antibodies are insufficient to offer immunity a repeat of the complete hepatitis B series is required. Students who have completed the hepatitis B series prior to enrolling in any graduate program must provide documentation to satisfy this requirement. If a student has not already completed the hepatitis B series, adherence to the following information is required. It is highly desirable that the series of 3 injections be completed prior to beginning courses. However, the minimum expectation, and proof of immunization injections for hepatitis B are as follows:

- Injections 1 and 2 – documented on the Graduate Student Health & Physical Exam form.
- Injection 3 – documented either on the Graduate Student Health & Physical Exam form or by official documentation from the healthcare provider who administered the vaccine. This documentation must be uploaded into the document management system by the date specified on the letter. **FAILURE TO SUBMIT DOCUMENTATION OF THE THIRD INJECTION WILL RESULT IN THE INABILITY TO CONTINUE ATTENDANCE AND/OR PROGRESSION COURSES IN THE COLLEGE OF NURSING.**

Hepatitis B injections are available at the UA Student Health Center (corner of University Blvd. and 5th Avenue), most County Health Departments in most states, private healthcare provider offices, and clinics such as the University Medical Center. A plan for all injections should be discussed with the healthcare provider. The usual time period for the 3 injections is designated as 1 month between the first and second injections, and at least two months between the second and third injections.

IT IS THE STUDENT'S RESPONSIBILITY TO PLAN A TIME SCHEDULE WITH THE SELECTED HEALTHCARE PROVIDER TO ASSURE THE COMPLETION OF IMMUNIZATIONS TO COINCIDE WITH THE DATES SPECIFIED. Students are responsible for making all arrangements for receipt of and payment for vaccines.

Tetanus Vaccination

HEALTH, IMMUNIZATION, AND REQUIRED DOCUMENTS FOR GRADUATE STUDENTS: POLICY AND PROCEDURE

Once admitted to a clinical graduate program, new students will receive instructions in their admission packets outlining health requirements and other required documents and verifications. **In addition**, each incoming student must complete a drug and background screening by the Capstone College of Nursing (CCN) specified provider. Those documents will be uploaded by the CCN directly from the website.

Proof of compliance must be submitted prior to removal of initial registration hold and during progression through the program. Failure to comply with updating required documents will result in a registration hold or an administrative block to course access.

Incoming students enrolling in MSN and DNP programs must upload the following into the document management system:

1. Completion of BLS Provider (must be valid and updated prior to expiration as long as you are attending).
2. Completion of program on OSHA Standards.
3. Advanced Practice Certification (if applicable and must be valid or updated as long as attending).
4. Proof of Health Insurance.
5. Graduate Nursing Student Health & Physical Exam Form signed by Certified Registered Nurse Practitioner (CRNP), DO, or MD.
6. Initial Graduate Nursing Student TB Test and Immunization Form. New students with a history of TB or a history of a positive TB skin test must submit documentation of a clear chest x-ray completed within the month immediately prior to document submission.
7. Signed HIPAA statement (see Graduate Student Handbook).

All graduate students (e.g., MSN, DNP, EdD, and PhD) must upload the following into the document management system:

1. Current unencumbered RN licensure for state of legal residence.

Annually, students continuing in the MSN and DNP programs must:

1. Complete and upload the Continuing Graduate Nursing Student TB Status Form into the document management system verifying that the student has an up-to-date negative TB skin test.
 - a. Continuing students with a history of a positive TB skin test must submit an annual chest x-ray to document a negative standing or an annual Quantiferon laboratory test. No exceptions will be allowed.
 - b. Continuing students with a newly positive TB skin test must provide documentation of clearance to attend clinical learning

TD/Tdap booster or basic series within the past ten years is required, prior to entering graduate programs.

Influenza Vaccination

An influenza vaccine is required annually no later than October 31st, unless contraindicated by allergy or prior reaction. This must be demonstrated by official documentation by a healthcare provider.

Psychiatric Mental Health Nurse Practitioner Certificate

Currently, only Alabama, Arkansas, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Texas, and Virginia residents are eligible for the Nurse Practitioner certificate.

The nurse practitioner (NP) Post-graduate Certificate program builds on the graduate level nursing competencies and knowledge base. Nurses who are already prepared at either the master's or doctorate level for other roles may apply for the post-graduate certificate program with advanced specialization as a Psychiatric Mental Health Nurse Practitioner (PMHNP). The PMHNP concentration prepares students for certification as a PMHNP across the lifespan. Students in the Post-graduate Certificate program will enroll in existing PMHNP population-focused courses, but they will not be required to complete master's graduate nursing core courses.

Admissions

Applicants for the nurse practitioner postgraduate certificate will be considered on a competitive basis. Nurses who are interested in the nurse practitioner postgraduate certificate are encouraged to contact the Capstone College of Nursing (CCN) Coordinator of Graduate Student Services.

Currently, only residents of Alabama, Arkansas, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Texas, and Virginia are eligible for the Nurse Practitioner certificate.

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must:

- Have a Baccalaureate degree in nursing from a school of nursing that is both regionally, and CCNE or CNEA accredited.
- Reside and hold a current unencumbered RN licensure in an approved state.

Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate University officials.

See the Admission Criteria section of this catalog for more information.

HEALTH, IMMUNIZATION, AND REQUIRED DOCUMENTS FOR GRADUATE STUDENTS: POLICY AND PROCEDURE

Once admitted to a clinical graduate program, new students will receive instructions in their admission packets outlining health requirements and other required documents and verifications. **In addition**, each incoming student must complete a drug and background screening by the Capstone College of Nursing (CCN) specified provider. Those documents will be uploaded by the CCN directly from the website.

Proof of compliance must be submitted prior to removal of initial registration hold and during progression through the program. Failure to comply with updating required documents will result in a registration hold or an administrative block to course access.

Incoming students enrolling in MSN and DNP programs must upload the following into the document management system:

1. Completion of BLS Provider (must be valid and updated prior to expiration as long as you are attending).
2. Completion of program on OSHA Standards.
3. Advanced Practice Certification (if applicable and must be valid or updated as long as attending).
4. Proof of Health Insurance.
5. Graduate Nursing Student Health & Physical Exam Form signed by Certified Registered Nurse Practitioner (CRNP), DO, or MD.
6. Initial Graduate Nursing Student TB Test and Immunization Form. New students with a history of TB or a history of a positive TB skin test must submit documentation of a clear chest x-ray completed within the month immediately prior to document submission.
7. Signed HIPAA statement (see Graduate Student Handbook).

All graduate students (e.g., MSN, DNP, EdD, and PhD) must upload the following into the document management system:

1. Current unencumbered RN licensure for state of legal residence.

Annually, students continuing in the MSN and DNP programs must:

1. Complete and upload the Continuing Graduate Nursing Student TB Status Form into the document management system verifying that the student has an up-to-date negative TB skin test.
 - a. Continuing students with a history of a positive TB skin test must submit an annual chest x-ray to document a negative standing or an annual Quantiferon laboratory test. No exceptions will be allowed.
 - b. Continuing students with a newly positive TB skin test must provide documentation of clearance to attend clinical learning experiences by an appropriate practitioner prior to enrolling in any clinical course or attending any clinical site.

2. Upload into the document management system the Continuing Graduate Nursing Student Statement of Health Status Form indicating that no change in health status has occurred. If health status has changed, the student uploads an updated Graduate Student Health & Physical Exam Form signed by CRNP, DO, or MD.
3. No later than October 31st of each year, upload into the document management system the Continuing Graduate Nursing Student Annual Influenza Vaccine Form. Exceptions for allergies only. This vaccine cannot be declined.
4. Upload into the document management system a signed HIPAA statement (see Graduate Student Handbook)

Annually, all graduate students, EXCEPT EdD students, must complete a drug and background screening by the CCN specified provider. Those documents will be uploaded by the CCN directly from the provider website.

IMMUNIZATION REQUIREMENTS

Hepatitis B Vaccine

Upon admission, students must upload into the document management system proof of immunization for hepatitis B or a hepatitis B titer that shows adequate antibody protection as noted on the Initial Graduate Nursing Student TB Test and Immunization Form. In the event that a titer is performed, or after the first series of immunizations, antibodies are insufficient to offer immunity a repeat of the complete hepatitis B series is required. Students who have completed the hepatitis B series prior to enrolling in any graduate program must provide documentation to satisfy this requirement. If a student has not already completed the hepatitis B series, adherence to the following information is required. It is highly desirable that the series of 3 injections be completed prior to beginning courses. However, the minimum expectation, and proof of immunization injections for hepatitis B are as follows:

- Injections 1 and 2 – documented on the Graduate Student Health & Physical Exam form.
- Injection 3 – documented either on the Graduate Student Health & Physical Exam form or by official documentation from the healthcare provider who administered the vaccine. This documentation must be uploaded into the document management system by the date specified on the letter. FAILURE TO SUBMIT DOCUMENTATION OF THE THIRD INJECTION WILL RESULT IN THE INABILITY TO CONTINUE ATTENDANCE AND/OR PROGRESSION COURSES IN THE COLLEGE OF NURSING.

Hepatitis B injections are available at the UA Student Health Center (corner of University Blvd. and 5th Avenue), most County Health Departments in most states, private healthcare provider offices, and clinics such as the University Medical Center. A plan for all injections should be discussed with the healthcare provider. The usual time period for the 3 injections is designated as 1 month between the first and second injections, and at least two months between the second and third injections.

IT IS THE STUDENT'S RESPONSIBILITY TO PLAN A TIME SCHEDULE WITH THE SELECTED HEALTHCARE PROVIDER TO ASSURE THE COMPLETION OF IMMUNIZATIONS TO COINCIDE WITH THE DATES SPECIFIED. Students are responsible for making all arrangements for receipt of and payment for vaccines.

Tetanus Vaccination

TD/Tdap booster or basic series within the past ten years is required, prior to entering graduate programs.

Influenza Vaccination

An influenza vaccine is required annually no later than October 31st, unless contraindicated by allergy or prior reaction. This must be demonstrated by official documentation by a healthcare provider.

Academic Misconduct Information

Graduate School information on Academic Misconduct. (p. 7)

Withdrawals and Leave of Absence Information

Please contact the Coordinator of Graduate Student Services for assistance with the Leave of Absence process.

Additional Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 219).

Graduate School Scholastic Requirements

Graduate School information on Scholastic Requirements (p. 204).

Information on Graduate School Deadlines.

Application for Graduation (p. 18)

Information on the Application for Graduation (p. 18).

School of Social Work

Degree Programs

Social Work, MSW (p. 755)

The School of Social Work offers a Master of Social Work and two coordinated degree programs. The MSW/MPH is offered in coordination with UAB Public Health. The MSW/JD is offered in coordination with The University of Alabama Law School. More information can be found at the Social Work, MSW page (link above).

Social Work, PhD (p. 760)

The PhD program may be pursued concurrently with the MSW program.

Social Work, DSW (p. 750)

The School of Social Work offers a Doctor of Social Work program.

Students will have an opportunity to apply for field in the MSW Program. We place students using a holistic perspective. Not only do we consider input from students, but we also consult with faculty, advisors, and the Field Committee.

Most students have many questions about practicum. The Field Office is always available to answer questions you may have. If there is anything that is unclear or if you have specific questions regarding your situation, do not hesitate to contact the Field Office.

Additional Available Field Placement Opportunities:

- Washington, D.C Program
- International Field Placement Program

Courses are subject to modification without advance notice.

Admission to 500-level courses is limited to graduate social work students only, unless consent of the instructor and the assistant dean is obtained. See the School of Social Work Master's Degree Program Student Handbook for additional course eligibility requirements.

SW500 Social Welfare Policy

Hours 3

Overview of the evolution of social welfare policies and services, and of how social problems affect societal groups. Includes examination of the tools and approaches that social workers might use in analysis and policy formulation.

SW501 Social Welfare Advanced Policy Analysis

Hours 3

The focus of this course is on social welfare policy analysis with particular emphasis on the influence of economic and political issues. This course emphasizes comparative research at both state and national levels.

Prerequisite(s): SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -OR- Set 2 (Advanced) SW 570, SW 577, SW 578, SW 579

Mission Statement of the DSW Program

The DSW Program at The University of Alabama is designed to increase specialization, independence, and leadership of social workers across systems and agencies in underserved communities. The program prepares advanced practitioners to lead efforts in promoting social and economic justice through service, advocacy, teaching and research.

Curriculum

The DSW program can be completed in three years and consists of 45 credit hours of coursework. Students will choose a concentration in clinical or organizational leadership. The clinical concentration includes coursework in advanced practice theory and techniques, research methods and clinical supervision and practice. The organizational leadership concentration curriculum hones students' leadership and management skills for organizational and community settings. Both concentrations include courses on teaching social work.

DSW Program Concentration

The DSW Program has two concentrations that students may select from, based on their current and future social work interests. The **advanced clinical concentration** offers coursework on advance clinical theory and interventions, as well as advanced clinical supervision. The **organizational leadership concentration** offers coursework on advance administrative theory and interventions, as well as health and human service management. Students in both concentrations will have coursework on: social justice and advocacy for individuals, groups and larger populations; social work research and evaluation methodologies; policy related to health and human services; and social work education and pedagogy.

The DSW Program builds on a base of professional knowledge and practice in social work. Students are provided with in-depth study of practice, policy, and research methods; the design, development, and evaluation of interventions; data collection, management, and analysis; and writing for publication. In addition, students take substantive courses in theory and other topics and elective courses. As soon as students enter the program, they are assigned to a PhD/DSW faculty advisor for program planning and guidance.

Throughout the student's academic program, faculty members mentor students outside of the classroom setting, which may include research collaboration, co-authorship of manuscripts and conference presentations, networking at a variety of conferences. The UA DSW program is designed to fit the needs of social work practitioners from a variety of settings or field specialties.

Learning Outcomes for the DSW Program Upon completing the DSW Program, graduates will be able to:

- Demonstrate advanced social work practice skills in assessment, intervention and supervision at the micro, mezzo, and/or macro levels.
- Play an independent/leadership role in integrating advanced knowledge and theory on the social, economic, political, and philosophical conditions into health and human service delivery.
- Integrate knowledge about research methodology with social work practice knowledge to develop and lead strategies for continued

evidence-based practice, practice evaluation, and scientific knowledge-building.

- To disseminate complex information about social work evidence, practice skills, scholarship, and interventions clearly and creatively to professional and academic audiences in written and oral formats.
- Identify, evaluate, and implement innovative and cutting-edge strategies to address complex social and health conditions.
- Lead teams to develop and implement social work advocacy and policy practice strategies to advanced clinical practice or organizational leadership, especially within the context of services for vulnerable and underserved communities.
- Independently develop, implement, and evaluate innovative interventions into practice that are theoretically and evidence-based.

Advanced Clinical Concentration graduates will be able to:

- Demonstrate knowledge about new and advanced therapies and clinical assessment techniques with disadvantaged populations.
- Articulate the roles that institutional and societal discrimination have impacted clinical issues affecting disadvantaged populations.

Organizational Leadership Concentration graduates will be able to:

- Leverage evidence, human and organizational resources to design and implement new and innovative services for complex, disadvantaged client populations.
- Describe and implement ethical, effective, and innovative approaches to developing and managing community and organizational resources.

The Goals of the DSW Program

The DSW Program has several goals:

- To provide a rich, supportive environment that enables a diverse group of students to pursue and attain their academic, professional, clinical and/or leadership goals.
- To prepare students to integrate theory, evidence, and critical thought to develop innovative solutions for complex challenging issues experienced by agencies and populations at the local, regional, national, and/or global levels.
- To prepare graduates to be innovative and successful educators of future social workers.
- To prepare practitioners to use social work research methodologies to evaluate practice and translate evidence-based interventions into practice settings.
- To prepare advanced practitioner-scholars to incorporate theory, research, practice, and policy to contribute to existing knowledge on social work practice and advance social justice.
- To develop stewards of the social work profession within interprofessional settings who apply and enforce ethical standards and address ethical dilemmas in health and social service systems.
- To prepare advanced social workers to be effective and ethical managers within clinical, administrative, and/or community settings.
- To prepare students to communicate evidence-based social work knowledge through teaching, scholarship, and professional writing.

DSW Core Courses		Hours
SW 700	Adv Theories on Oppression	3
SW 701	Research for Practice I	3

SW 702	Research for Practice II	3
SW 705	Adv Advocacy Policy Practice	3
SW 706	Teaching Social Work Practice	3
SW 750	Intro to Capstone Project	1
SW 751	Capstone Prep Ind Study	2
SW 799	Capstone Project	9

Specializations:

Students must complete a concentration in either Advanced Clinical Practice or Organizational Leadership.

Comprehensive Exams:

Upon completion of the first semester of the specialization coursework (2nd year), students will take comprehensive exams. The exams will cover either of the specialization focus areas (Advanced Clinical Practice OR Social Work Administration and Organizational Leadership). Exams will be offered during the fall semester.

Capstone Project:

All students will be required to complete a Capstone Project in order to fulfill graduation requirements for the DSW Degree. The Capstone Project will consist of three parts: 1) a proposal, 2) proposal defense and a 3) final project defense.

The Capstone Project Proposal

Students will start the Capstone Project Proposal in the fall semester of the second year in the Introduction to the Capstone Project Course (1 credit hour). Students will complete the Capstone Proposal in the Course in the Capstone Proposal Course (2 hours) during the summer of the second year. Students must successfully defend the Capstone Proposal in order to register for Capstone Project hours.

The Capstone Project

All students will be required to complete a Capstone Project in order to fulfill graduation requirements for the DSW Degree. Students must register for at least 9 Capstone Project Credit hours. Students must successfully defend the Capstone Project in order to fulfill the D.S.W. Degree requirements.

Advanced Clinical Practice Concentration		Hours
SW 703	Neuroscience in Clinical Pract	3
SW 720	Clinical Supervision Ethics	3
SW 721	Cognitive Behavioral Therapy	3

Transfer Credit

Requirements for Transfer Credits

Students who have completed doctoral coursework at other universities may request that a portion of their previously-earned credits be transferred towards their completion of the DSW degree at UA. Evaluation of credit for transfer will not officially be determined until the student is enrolled in the UA Graduate School and the UA School of Social Work. Acceptance of credits requires the approval of the School of Social Work and the UA Graduate School. The Graduate School has policies for transfer credits. (p. 23)

Requests for transfer credits will be evaluated on a case-by-case basis and must conform to the guidelines established by the DSW Program Committee in addition to Graduate School requirements:

- Credits should be from another doctoral degree program (PhD, EdD, DSW).
- Coursework that does not overlap with or duplicate required courses if the DSW curriculum may generally be accepted as transfer credits for electives.
- Requests to transfer credits that would replace required DSW courses will receive more scrutiny to make sure they align appropriately with required courses.
- Since the DSW Program allows students to take up to one MSW-level course as an elective, up to 3 credits of master's level coursework will be considered as long as they are not credits earned for the MSW degree that students are required to have to be eligible for the DSW Program. It must be coursework that was taken in addition to the required master's degree.

Transfer Credit

The following process has been established for reviewing and approving transfer of credits:

- Students must initiate a request for transfer credits using the Graduate School form.
- The student must also submit the syllabus for each course transfer request directly to the DSW Program Director for review. Transfer requests without a course syllabus will not be approved.
- The Graduate School reviews the student's initial request and forwards the request to the DSW Program Director if it meets the Graduate School's requirements.
- The DSW Program Director will approve transfer credits that clearly follow the guidelines outlined above. Any request that is unclear whether it meets these guidelines will be reviewed by the DSW Program Committee.
- Transfer credits that meet the DSW Program guidelines for replacing elective courses will be approved by the DSW Program Director, with consultation of the DSW Program Committee, as needed. Requests for transfer credits that would replace required courses for the program will be reviewed and approved by the DSW Program Committee.
- The DSW Program Director or DSW program assistant will initiate the final approval form.

Students are cautioned that the DSW Program curriculum is designed so that the work completed in its courses contribute to their Comprehensive Paper and Capstone Project. Therefore, transferring credits to

replace DSW courses could possibly delay student progress on those requirements. Students are strongly recommended to discuss transferring credits with their advisor and/or the DSW Program Director.

Comprehensive Paper Requirement

To move forward to working on the Capstone Project, you are required to successfully complete a Comprehensive Paper assignment. There are a number of purposes that the Comprehensive Paper serves:

1. It allows you to demonstrate the advanced social work knowledge and research/evaluation methods learned in your coursework and residencies.
2. It allows you to demonstrate that you have acquired the skills and knowledge needed to complete your Capstone Project.
3. Its format serves as the design for the final Capstone Project.

There are three options for the Comprehensive Paper. You must select one. You should select the option that best fits in with your educational, capstone, and career goals. Full descriptions of the three Comprehensive Paper options can be found in the DSW Program Handbook, here: <https://socialwork.ua.edu/dsw/>

To prepare for their Comprehensive Paper, students must identify a Chair for their Capstone Project Committee before the end of spring semester during their second year. Ideally, students will identify a second member of their committee at the same time, though students may require more time to identify the second member during the summer of their second year. This is the committee that will review and approve students' Comprehensive Papers and Capstone Projects.

You should strive to have your Comprehensive Paper approved by the end of the summer semester of your second year so you can start their Capstone Project at the beginning of your third year. However, you can submit your paper for review and approval at any time before this point if you feel that your Comprehensive Paper is ready for review. If more time is needed, you can submit your paper after your second summer, though this may delay the start of your Capstone project.

You may have to submit several drafts of the Comprehensive Paper, have multiple meetings with committee members, receive feedback from the committee, and incorporate requested edits to the paper before it is deemed successfully approved. When the members are prepared to approve the Comprehensive Paper, the student should meet with the committee for additional feedback and support in moving forward. You should submit drafts first to your chair before submitting them to the second member of your committee for review.

Comprehensive paper approval requires the signature of both members of their committee. Once a student receives approval, the advisor will contact the DSW Program Director, who will have the Comprehensive Paper Approval Form circulated for signatures. Ideally, students will have their paper approved by the end of summer semester their second year, though the timeline for students to successfully pass their Comprehensive Papers will vary from student to student. Some students may successfully complete their papers before the summer of their second year and it is also common for students to require additional time to successfully pass their Comprehensive Paper.

Capstone Project

You are required to complete a final Capstone Project in order to fulfill all of the requirements for obtaining the DSW Program at the University of Alabama. This Capstone Project may be initiated during the third year of the program and will require you to demonstrate advanced knowledge

and skills (depending on the scope of the project) in evidence-based social work practice, theory, and research/evaluation.

The topics and scope of Capstone Projects will vary, due to the varying social work practice settings where DSW students currently practice within. In general, the Capstone Project is not designed to be a dissertation

You are encouraged early in your DSW studies to discuss your ideas for the Capstone Project with faculty and the DSW Program Director. Also, you should consider how your individual course assignments may focus on topics that can inform or contribute to your Capstone Project.

You have three options for the Capstone Project and must choose one. Full descriptions of the three Capstone Project options can be found in the DSW Program Handbook, found here: <https://socialwork.ua.edu/dsw/> Note that none of these options should be compared to a PhD dissertation, where the primary goals and assessment for these projects focus on advanced research methodologies. While DSW students must learn and demonstrate an understanding of research and evaluation methods, the Capstone Project reflects an intersection between advanced practice skills and research methodologies.

At the conclusion of their Capstone Project, you will have to submit a final written report and complete either an on-campus or virtual defense presentation of your project. You must use the DSW Capstone Project Report Template for final approval. All virtual presentations must comply with University Graduate School policy (p. 23).

Capstone Project approval requires the signature of both members of the Capstone Project committee. Approval may be obtained after you successfully complete the defense presentation. Once you receive approval, your advisor will contact the DSW Program Director, who will have the Capstone Approval Form circulated for signatures. Students who choose to publish a peer-reviewed article for their Capstone Project must also have the Capstone Project Authorship Contribution Form. Final versions of the Capstone Project Report must be submitted to the DSW Program Director before the Graduate School deadline for graduation in any given semester. These deadlines can be found here: <https://graduate.ua.edu/current-students/student-deadlines/>

Ideally, students will have their final Capstone Project Report approved by the end of summer semester their third year, though the timeline for students to successfully pass their Capstone Project will vary from student to student. Some students may successfully complete their papers before the summer of their third year and it is also common for students to require additional time to successfully pass their final Capstone Project.

Capstone Committee Formation

The purpose of the Capstone Project Committee is to guide the student through the Comprehensive Paper and Capstone Project requirements. Students may select members of their Capstone Committee based on the individuals' social work area of expertise, expertise in research and evaluation methodologies, or some other skill/expertise that will be helpful for the student in developing, implementing, and writing the report for their projects. School of Social Work faculty have a wide range of areas of expertise, including: children's services, health and human service management, aging, policy, rural populations, school social work, criminal/juvenile justice, social work and health care, and behavioral health. Second committee members may not necessarily be a social worker or have obtained a doctorate degree if their area of expertise is relevant to the student's work.

Upon entering the DSW Program, students are assigned an academic advisor to help them plan course work. In their first year, the student's initial advisor will be the DSW Program Director until another advisor is identified. If the student finds that another faculty member may be doing work more related to their area of practice, advisor assignments may change. Usually, though not always, this advisor will become the student's Capstone Project Advisor or second committee member. When the student begins work on the Capstone Project proposal, the advisor will take primary responsibility, along with the second committee member, for further technical and professional assistance and guidance. The same faculty member may serve as advisor and committee member throughout the DSW Program Committee doctoral program of study.

All members of Capstone Project Committees must be members of the Graduate Faculty. Those who serve as Committee Chairs must be full-time faculty within the School of Social Work who have full/associate member Graduate Faculty status and be appointed at the rank of Assistant Professor or higher. Instructors within the school of social work, as well as faculty and practitioners outside of the School of Social Work and University of Alabama are also eligible to serve on Capstone Committees. In such cases, the DSW Program Director must submit a request that they be accepted as members to the University Graduate Faculty. To do so, the student must send the Director a copy of the individual's CV and a statement on why their expertise will be supportive in the Capstone Project process. Students should consult with their Chair before selecting an external second member. Students should also evaluate whether an external committee member may pose a conflict of interest for them.

The DSW Program Director or DSW Program Assistant will circulate the Capstone Committee form via DocuSign.

Admission to Candidacy Requirements

Students who successfully pass their Comprehensive Paper and have completed and/or are registered for all of their required non-Capstone Project coursework may advance to candidacy. The DSW Program Director or DSW Program Assistant will initiate this form, which will be submitted to the UA Graduate School.

Continuous Enrollment Policy

Please refer to the Graduate School Policy.

Time Limits for Degree Completion Requirements

Please refer to the Graduate School Policy.

Student Progress Requirement

There may be cases where a student is dismissed from the program for reasons that include: (a) Failure to meet academic standards set by the Graduate School (Please see below); (b) Failure to meet professional preparedness standards, as determined by the School of Social Work; or (c) Academic misconduct.

Additional Academic Requirement

Summer Residencies

Due to the fact that the DSW program is primarily a distance program, there is not residency requirement for enrolled students to complete their coursework. However, during the summers in years 1 and 2, DSW students must attend on-campus residency programs. These residencies

will last 4 days in year 1 and 5 days in year 2. The residencies will take place during the first 2 weeks of June each summer.

During residencies, students will travel to campus and attend workshops and trainings each day. The workshops will supplement the content learned in courses and also include opportunities to meet with faculty in-person for feedback on coursework and/or support in advancing through the DSW program.

Attendance for On-campus and Synchronous Activities

DSW students enrolled in the program **must** make arrangements to participate in the on-campus activities that are planned as part of the program, such as the on-campus orientation and annual residency retreats. Students **must** also participate in all synchronous activities required from their classes. Failure to do so may result in termination from the program. Excused absences for on-campus requirements will only be granted in extreme circumstances. Such cases include:

- Significant medical condition experienced by the student and/or immediate family member.
- Death of an immediate family member.
- Required military service.

Note that documentation will be required for an excused absence. In some cases, students may be asked to make-up assignments that was missed during the on-campus content.

Requirement for Continuing Social Work Practice

Students are expected to be actively practicing social work throughout their time in the DSW Program, either through paid employment or volunteer work. The practice setting for students is not provided by the School of Social Work Field Office and students are expected to meet this requirement on their own.

Academic Misconduct Information

Please refer to the Graduate School policy.

Withdrawals and Leave of Absence Information

Please refer to the Graduate School policy.

Academic Grievance Information

Students who have concerns about issues that are having a negative impact on student learning or barrier to student achievement may report these concerns to the DSW Program Director. The DSW Program director will consult with the Associate Dean for Student Services for consensus in how to address the issue.

When reported concerns regard quality of instruction, the DSW Program Director will:

- consider the number of students being impacted and the context of the issue (e.g., Title IX complaint, quality of course content) when formulating a response;
- encourage students to discuss the issue with the instructor directly, if deemed appropriate for students to do so;
- follow-up with the instructor to discuss the course;
- discuss the matter with School of Social Work and university departments, as deemed appropriate; and
- follow-up with the student(s) afterwards to see if the issue has been resolved.

Students who do not believe that the issue has been resolved may file a subsequent grievance with School of Social Work Grievance Committees or university offices, as deemed appropriate.

Students should be aware that full-time university faculty typically instruct their courses under the shared assumption of academic freedom.

As a result, there are significant limits on instructional changes that the administration can require a faculty member to make at the request of administration. Therefore, it is strongly encouraged that students document issues they report in writing and also emphasize feedback in the Student Opinions of Instruction (SOIs). Student feedback and SOI reports will be reviewed by the DSW Program Director as well as the Associate Dean for Student Services and Dean of the School of Social Work (when appropriate) to determine if issues reported should be used in future decisions about DSW course instruction. Students should understand that a number of factors are considered in making course instruction decisions and students' complaints are only one of these factors. Students should also understand that complaints about individual course instructors will not be discussed or handled by the DSW Program Committee.

Please refer to the Graduate School information (p. 219).

Scholastic Requirements

Please refer to the Graduate School policy (p. 204).

Graduate School Deadlines Information

Please refer to the Graduate School information.

Application for Graduation Information

Please refer to the Graduate School policy (p. 23).

MSW Program

The mission of the Master of Social Work Program at The University of Alabama School of Social Work is to prepare advanced scholar practitioners to improve the lives of individuals and families, enhance community well-being, and advocate for policies that support systemic change.

Graduates of the MSW Program will be able to:

- Deliver evidence-based social work practice to diverse client systems including children, adolescents and their families or adults and their families.
- Advocate for vulnerable populations to include children, adolescents and their families or adults and their families.
- Engage in culturally competent advanced social work practice with children, adolescents and their families or adults and their families.
- Analyze, formulate, and influence organizational and government policies that influence children, adolescents and their families or adults and their families.
- Apply social work values and ethics to practice with children, adolescents and their families or adults and their families.

Curriculum

The MSW Program is fully accredited by the Council on Social Work Education. The curriculum follows the curriculum policy requirements of the Council on Social Work Education and provides a balanced, integrated approach that includes a professional foundation and a choice of concentrations. The professional foundation curriculum taken the first year consists of coursework in the following:

- Social work practice. This area of the curriculum is designed to provide practice knowledge and competencies in working with individuals, groups, families, communities, and organizations.
- Human behavior and the social environment. This area of the curriculum helps the student to understand the whole person and the process of growth, change, adaptation, social functioning, and dysfunction of the environmental context, including family, groups, formal organizations, and communities. Courses in this area cover prenatal stages through the process of aging.
- Social welfare policy and services. This area of the curriculum is designed to help the student identify, appraise, analyze, and understand social change in its dynamic perspectives; the role and responsibility of social work as a profession in influencing social policy; and the delivery of service to individuals and society.
- Research methods. This area of the curriculum is designed to help the student understand social work and related research and the use of research for the improvement of services to individuals, groups, organizations, and communities.
- Field education. This area of the curriculum provides opportunities for students to integrate and apply knowledge, skills, and values in social work practice context.

MSW Curriculum Themes

The MSW Program emphasizes the following five themes underpinning the foundation and the concentration year objectives:

- Life Course Perspective: Social workers understand that the growth and development of individuals, families, groups, organizations, and communities are influenced by a range of psychological, social, historical, political, and economic factors. The interaction of these factors with life events and life transitions contribute to the subsequent outcomes. This theme also serves as the conceptual framework for the entire MSW curriculum.
- Valuing Diversity: Social workers value and work respectfully with people who are different from themselves.
- Critical and Reflective Thinking: Critical and reflective thinking that challenges assumptions, and that is based on evidence to arrive at creative solutions, is the basis for competent social work practice.
- Evidence-Based Practice: Social workers favor interventions with demonstrated effectiveness. They are prepared to carefully evaluate practice and program outcomes.
- Services to the Poor and Underserved: Alabama's poor and underserved receive social services primarily from public and non-profit social service agencies. Social workers must be prepared to practice in these contexts and to challenge social injustice.

MSW Program Foundation Objectives

Foundation Year MSW students will demonstrate the ability to:

- Apply critical thinking skills within the context of professional social work practice.
- Understand the value base of the profession and its ethical standards and principles, and practice accordingly.
- Practice without discrimination and with respect, knowledge, and skills related to clients' age, class, color, culture, disability, ethnicity, family structure, gender, marital status, national origin, race, religion, sex, and sexual orientation.
- Understand the forms and mechanisms of oppression and discrimination and apply strategies of advocacy and social change that advance social and economic justice.
- Understand and interpret the history of the social work profession and its contemporary structures and issues.
- Apply the knowledge and skills of generalist social work perspective to practice with systems of all sizes.
- Use theoretical frameworks supported by empirical evidence to understand individual development and behavior across the life span and the interactions among individuals and between individuals and families, groups, organizations, and communities.
- Analyze, formulate, and influence social policies.
- Evaluate research studies, apply research findings to practice, and evaluate their own practice interventions.
- Use communications skills differentially across client populations, colleagues, and communities.
- Use supervision and consultation appropriate to social work practice.
- Function within the structure of organizations and service delivery systems and seek necessary organizational change.

Concentration Objectives

In professional social work intervention with children, youth, and their families, or adults and their families, students will demonstrate:

- The ability to effectively apply selected models and methods of advanced social work practice, consistent with social work values and ethics, with an emphasis in public and non-profit social services.
- The ability to use reflectively the theoretical approaches and knowledge bases underlying their practice with particular attention to the life course perspective.
- The ability to evaluate their own practice.
- The ability to analyze the impact of social welfare policies on clients and practice situations.
- The ability to practice in ways that are culturally and gender appropriate with low-income persons and with those who have experienced social and economic injustice.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- Three letters of recommendation
- A resume

Prospective students with a GPA less than 3.0 but greater than 2.5 will be considered for Admission with Permission to Continue for part-time enrollment.

Please note no academic credit, course waivers, or credit for field practicum shall be granted for life experience or previous work experience.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

MSW Program Tracks: Two formats, campus or primarily online

Advanced Standing (42 credit hour)

- Students holding a Bachelor of Social Work degree from a CSWE accredited institution.
- Admission requires a "B" average or better in all professional foundation Social Work courses including field education, with no more than one "C" in upper level Social Work courses.
- Offered Spring and Summer terms only

Two Year (60 credit hour)

- Students who hold a bachelors degree from a regionally accredited institution.
- Students who do not meet Advanced Standing criteria must apply to 60 hour program.
- Offered Summer and Fall terms only

MSW Program Requirements: Two formats, campus or primarily online

Advanced Standing (42 credit hour)

The Advanced-Standing Program is a 42-credit-hour program for only those who **hold** a CSWE-accredited BSW. It can be completed in one year when pursued full-time. Advanced-standing students fulfill professional foundation requirements by successfully completing 'bridge' courses typically offered in the spring or summer before beginning the concentration year.

Two Year (60 credit hour)

The 60-credit-hour program is for those who currently **do not hold** a CSWE-accredited BSW. It can be completed in two years when

pursued full-time. Coursework is offered in two formats, campus or primarily online.

Note: The primarily online (distant learners) format requires face-to-face skills labs (2 in-person and 2 virtual sessions) held on selected Saturdays at regionally convenient locations in AL, GA, and MS.

MSW Program Concentrations

The MSW Program offers two concentrations

- Children, Adolescence and their Families (CAF)
 - SW 532 & SW 533
- Adults and their Families (AF)
 - SW 564 & SW 565

REVIEW SPECIFIC COURSES Under Concentration Options (p. 757)

Student must select one concentration to fulfill degree requirements for this program.

Field Education Practicum Requirements

Advanced Standing (42 credit hour)

- One supervised field placement
- Field practicum is taken in the spring
- A minimum of 500 clock hours
- In a field placement Monday-Friday for 32-40 hours per week for 15 weeks
 - Optional: Two variable courses in the spring and summer for 16 hours per week (varies)
- Required: SW 595

Two Year (60 credit hour)

- Two supervised field placements
- Field practicum is taken in the fall and spring
- A minimum of 500 clock hours, respectively
- In field placements Monday-Friday for 20 hours per week for 25 weeks
- Required: SW 590, SW 591, SW 595, and SW 596

The MSW Program offers additional field placement opportunities (p. 748) unique to the Capstone experience.

Advanced-Standing Program Curriculum - Master of Social Work (MSW) (p. 757)

MSW/MPH Coordinated Degree (p. 757)

The University of Alabama School of Social Work in Tuscaloosa and The University of Alabama at Birmingham School of Public Health jointly offer an MSW/MPH coordinated degree program designed for people with career goals in community-oriented health services for families and children.

Students who are interested in this coordinated degree should separately apply to UA's MSW Program and to the Department of Health Care Organization and Policy at The University of Alabama-Birmingham School of Public Health for admission to the MPH Program.

For UAB curriculum guides and admission requirements, please visit the University of Alabama at Birmingham School of Public Health website.

MSW/JD Coordinated Degree Program

The Master of Social Work/Juris Doctorate Degree Program is coordinated between the School of Social Work and The University of Alabama School of Law.

Before being classified as a MSW/JD coordinated degree student, applicants must be accepted in the School of Law and then the MSW program. Separate admission to each program is required. Admission requirements for the coordinated degree program are exactly the same as those currently established for the MSW Program (p. 757) and the JD Program separately. All prerequisites for both programs must be met.

Students in the MSW/JD Coordinated Degree Program must complete all the required MSW courses necessary for the degree; students have the option to complete their elective requirements (currently nine credit hours) in the Law School.

Advanced Standing and 2-year MSW/JD (only offered on-campus)

Law electives approved to count towards the MSW	Hours
LAW 633 Gender And The Law	
LAW 635 Children's Rights	
LAW 655 Immigration Law	
LAW 665 Clinical Program	
LAW 674 Family Law I	
LAW 683 Administrative Law	
LAW 696 Health Care Law	
LAW 726 Civil Rights Actions	
LAW 731 Special Topics in Law	
LAW 769 Poverty Law	
LAW 791 Juvenile Justice Jurisprudence	
LAW 819 International Human Rights Law	
LAW 821 Public Interest Lawyering	
LAW 822 Spanish for Lawyers	
LAW 834 Mental Health Law	
LAW 843 Lawyers & Social Change Prctcm	

The JD program currently requires at least 90 hours of coursework, of which six hours may be fulfilled with approved courses offered outside of the Law School. The JD is a cohort-based program completed over 3-4 years. Students in the coordinated degree program are required to complete 9 hours of MSW courses as part of the 90 hours constituting study for the JD. The following MSW courses will count towards the JD, contingent upon the student having first completed a year of the JD program. MSW courses taken before that year will not count toward the JD degree. Courses taken in an online or primary online format will not count towards the JD degree.

MSW courses approved to count towards the JD	Hours
SW 500 Social Welfare Policy	
SW 501 Soc Welfare Adv Pol Analysis

Code and Title	Hours
SW 532 SW Pract w/Adults Mental Hlth	3
SW 533 Mod/Meth Gerontologl SW Pract	3
Total Hours	6

Transfer Credit

Applicants interested in transferring graduate credit to the MSW program from another institution or graduate program must make a formal request after admission to the program. The proposal is initiated in the Graduate School with the Request for Transfer Credit Form form. Review the master's degree transfer credit details (p. 18) provided by the Graduate School.

Please note the School of Social Work allows a maximum of 9 hours of transfer work for the **42 credit hour program** and a maximum of 12 hours of transfer work for the **60 credit hour program** upon approval by the program director.

Time Limits for Degree Completion Requirements

All requirements for a master's degree must follow the Graduate School's time limit guideline (p. 18).

Academic Misconduct Information

MSW students are subject to the academic performance criteria (p. 7) of the Graduate School.

Withdrawals & Leave of Absence Information

A graduate student may withdraw from the University. It is the student responsibility to initiate a withdrawal online.

Discontinuation of One of the degrees

If a student enrolled in the coordinated degree program were to discontinue enrollment in the program and continue seeking only one degree (MSW or JD), the student would have to meet the full requirements of that degree.

Academic Grievances Information

The School of Social Work follows the University-wide Academic Grievance Procedures (p. 219).

Scholastic Requirements

The School of Social Work follows the University-wide Scholastic Requirements. (p. 204)

Social Work, Ph.D.

PhD Program

The purpose of this program is to prepare social work scholars to advance social work knowledge. Coursework focuses on theory, research methods, and critical evaluation of social work policies and practice. In addition to coursework, students work with faculty members in research and/or teaching.

The PhD program builds on a base of professional knowledge and practice in social work. The program offers students the opportunity to develop a comprehensive understanding in a selected area of concentration and, through the dissertation, contribute to knowledge development in that area. Students take electives in an area of personal interest. Upon enrollment in the program, students are assigned to a PhD faculty advisor for program planning and guidance.

The program is notable among social work PhD programs for the range and depth of its research foundation courses and electives. Exceptional opportunities are available for students interested in research in health, mental health, aging, and child welfare. There are opportunities for international experiences as well as for collaboration with the Center for Mental Health and Aging, the Institute for Rural Health Research, the Institute for Social Science Research, and the Youth Services Institute,

other colleges and departments of the University; and with various units of The University of Alabama at Birmingham (UAB).

Time Limit

Although the UA Graduate School has established a nine-year time-to-degree deadline for PhD students, entering Social Work PhD students have a seven-year internal deadline to complete the degree. Students who reach Year 7 will be held accountable for reaching due dates and deadlines distributed each semester. If a student fails to meet a due date or deadline in Year 7, yet wants to pursue degree completion, the student must apply for an extension to the social work degree completion deadline.

Obtaining Information

Inquiries about the program and requests for application materials should be to: The University of Alabama School of Social Work, PhD Program Office, Box 870314, Tuscaloosa, AL 35487-0314; telephone 205-348-6528; bsmith2@sw.ua.edu.

Financial Aid

Financial aid is provided through graduate teaching and/or research assistantships, university fellowships, external dissertation grants and/or part-time employment.

Some additional scholarships are available from the School of Social Work including the Ben Avis Orcutt and Leslie J. Shellhase endowed scholarships, and the Social Work Board of Friends Summer Scholarships, which are administered by the PhD program. For more information on financial aid from other sources, visit the Financial Aid website.

Admissions

The School of Social Work determines eligibility for regular or "admission with permission to continue" admission primarily on the basis of previous academic records. Successful applicants must meet the minimum admission requirements of the Graduate School prior to consideration by the School of Social Work PhD Program.

School of Social Work PhD Program Admissions Requirements and Additional Information About Supporting Documentation:

- A master's degree in social work (MSW) or simultaneous separate applications to the UA MSW and PhD Programs to enter the Concurrent Program to work on the two degrees simultaneously.
- Letters from three references, one of whom must be a university professor or social work scholar who has personal knowledge of the applicant's intellectual and scholarly abilities. If the applicant has earned the MSW degree, at least one letter should be from a former instructor in the applicant's MSW program.
- A Statement of Purpose indicating the reasons the applicant wishes to pursue a PhD in social work and indicating the applicant's research interests. There is no standard length, generally, the statement ranges from 900 to 2,250 words in length.
- Evidence of scholarly writing ability, supported by evidence the applicant supplies (e.g., a sole-authored paper published in a journal or presented at a conference or workshop, a design of a service program or a research proposal, and/or a course syllabus written by the applicant).
- In addition to the above program requirements, it is recommended that the applicant also possess a minimum of two years of

employment experience in social work after earning the MSW degree.

Applicants seeking admission to the program who do not meet the above requirements may be considered on an individual basis for "admission with permission to continue". If an applicant desires such consideration, he or she should file all application materials as directed above. In addition to the materials required of all students, they should file a petition for exemption from one or more requirements with the social work PhD Program Director. The petition should state the specific requirement from which exemption is sought and should provide information supporting the petition. After the application file is complete and referred to the social work PhD program by the Graduate School, the applicant may be invited to schedule an interview with the program director or other member of the admissions committee, in order to assess individually the applicant's qualifications for doctoral studies in social work. A summary of this interview and the petition for an exception will be made available to the Admissions Committee for consideration prior to its decision regarding an admissions recommendation. Please contact the School of Social Work PhD Program Director directly for questions about this possibility.

If seeking exemption from the requirements, the applicant should be aware that they may be required to register for courses other than the standard curriculum, including courses at the MSW level. The amount and type of such work may be decided by the Admissions Committee before admission and/or by the applicant's academic advisor after admission.

Concurrent Enrollment in the MSW and PhD Degrees Programs

The University of Alabama School of Social Work offers an MSW/ PhD concurrent program for **exceptional** individuals who hold, or are candidates for, bachelor's degrees who have very strong academic credentials and aptitude for academic careers in social work. Such individuals may be admitted simultaneously to the MSW and PhD programs and work on both degrees concurrently, following a strict, rigorous curriculum. Those admitted to the concurrent program will complete all current requirements for the PhD degree. Specific required PhD coursework will be applied to specific MSW degree requirements, reducing the number of semester hours required for the MSW and PhD degrees by 12 hours typically. The MSW degree will be awarded when all requirements for the MSW are completed, and the student will continue to work on the PhD requirements.

Successful applicants **must exceed the minimum admission requirements** of the Graduate School and the School of Social Work MSW and PhD programs.

See the Admission Criteria section of this catalog for more information.

Doctoral Plan of Study Requirement

The Social Work PhD Program requires 49 hours of coursework. Specific requirements are as follows:

- Thirty-four semester hours of core social work courses, including a one-credit professional seminar, five courses in substantive areas and six courses in research methodology.
- Nine semester hours in an elective area taken in or outside of the School of Social Work.
- A statistical research competency demonstrated by successful completion of an approved statistics two-course sequence.
- A dissertation showing the student's ability to conduct independent research that adds to the knowledge of the profession (includes a minimum of 24 hours of SW 699 Dissertation Research credit).
- Completion of all courses with a grade point average of 3.0 ("B") or better.

These requirements are minimum standards. Additional work may be required, depending on the student's preparation and career interests.

Graduate School information on the Doctoral Plan of Study (p. 23).

Comprehensive Exams

Upon completion of required coursework, students will take comprehensive exams. Exams will be offered two times during the academic year, near the end of the fall and spring semesters. To take exams, students must submit a "Comprehensive Exams Registration Form" to the PhD program office by the designated mid-semester date.

All students taking the exams at any given time will receive the same question options. Questions will require application of essential social work concepts and knowledge. Exam takers will receive three question options in each of three content areas: research, policy, and practice/theory.

The exams will take place over three consecutive days, with question options from one content area distributed to all exam takers at the

same designated time each day. Exam takers will have four hours and 5 minutes to write and return a response electronically.

Exam takers may not consult with others (in other words, no digital or live communication with any other individuals, except the program chair or his or her designee) about the questions or the responses. Exam takers may rely on any other digital or written materials they desire to answer the questions (using appropriate APA citation style).

Questions will be written by members of the PhD committee or others invited by the program director. At each exam offering, the program director will solicit questions from committee members or others they designate and prepare the exam. Three faculty members will submit questions for each of the three areas.

The same three faculty members who submit questions for any content area or areas will grade the responses from the same area or areas. For each response they grade, graders will submit a grade of "pass," "fail," or "pass with distinction." Exam takers' identities will not be disclosed to graders nor will graders' identities be disclosed to exam takers. A student must receive a grade of at least "pass" from a majority of graders to pass each content area. If a student fails in any content area or areas, he or she will have one re-take opportunity.

Standards. In responding to examination questions, PhD students are expected to demonstrate a strong grasp of issues salient to the questions. Normally, this will involve demonstration of knowledge of theory, research findings, and relevant research methods. Answers should show that the student knows the literature well and should reflect the student's ability to critically summarize the important issues and conclusions in the literature. Further, the student should show evidence of the ability to integrate knowledge and to apply concepts.

Answers should be well written. Writing quality can obscure intended meaning. The clarity, specificity, relevance, integration, and application of knowledge demonstrated in the student's response are more important than the length of the response. The student must demonstrate the ability to apply relevant material to challenging questions with clearly-reasoned, well-informed responses that bear specifically on the point of the question. All sub-sections of each question should be specifically addressed. The student should exhibit mastery in each area: policy, practice, and research. "Mastery" means, among other things, that the student has command over essential information and can use it to resolve issues and solve professional problems. Because the Comprehensive Examination is an important part of the educational experience, a high standard of performance is expected. It is understood that Comprehensive Examination question answers are, in a sense, first drafts, but nonetheless, strong written communication skills should be demonstrated.

Re-Examination. If a student fails one or more sections of the examination, those sections may be re-taken once. Faculty members selected by the PhD Program Director will write a new set of questions for each section to be re-examined. Any re-takes should take place at the next exam offering (at the end of the next fall or spring semester).

Results of the second examination will be final. A second failure of any section of the Comprehensive Examination will result in dismissal from the PhD Program and the Graduate School will be notified of this decision.

Students who fail one or more parts of the Comprehensive Examination twice may submit a written petition to the PhD Program Director if they believe an exception should be made because of extenuating circumstances. PhD Program Committee members and the PhD Program

Director will review the request and decide whether an exception is in order, in consultation with the Associate Dean for Academic Programs.

Admission to Candidacy Requirements

Following the successful completion of the Comprehensive Examination, the student will be admitted to Doctoral Candidacy.

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

NOTE: It is **imperative** that all students take time to read and review the Graduate School Electronic Thesis or Dissertation (ETD) web page. This gives a step-by-step guide to the whole ETD submission process and answers nearly all of the questions that students have in regard to their ETD submission.

In particular, students *must* follow Graduate School guidelines regarding preparation of the dissertation. See *A Student Guide to Preparing Electronic Theses and Dissertations*, published by the Graduate School.

When dissertations are rejected, it is usually because there are errors in the preparation and inclusion of the preliminary pages. Please make time to review the sample preliminary pages on the Graduate School ETD website.

Dissertation Committee

After the student passes the Comprehensive Examination, he or she must focus on the dissertation proposal. The student should successfully defend the dissertation proposal within one calendar year of passing the comprehensive examination. The first step is to select a Dissertation Chair and the other members of the Dissertation Committee. The student consults with the Dissertation Chair regarding the composition of the committee. The Dissertation Committee must be composed of at least five members of the Graduate Faculty of the University. The Chair of the Dissertation Committee must be a Full Member of the School of Social Work's Graduate Faculty. At least two additional committee members must be members of the School of Social Work Graduate Faculty. At least one, and no more than two, members of the Dissertation Committee must be from another division of The University of Alabama and one can come from another institution. Students should be sure that prospective committee members will be available for the anticipated duration of the dissertation research. The Dissertation Committee should include members who can guide the student's dissertation research, including experts in the student's substantive area of research specialization and experts in the research methods that the student will use, including a statistician if the dissertation research will involve the analysis of quantitative data or a qualitative data analysis expert if the research will involve qualitative or mixed methods.

Faculty members from other universities may, at times, be appointed to dissertation committees. There should be clear and compelling rationale for such appointments and the faculty member must receive an *Affiliate Appointment* to the Graduate Faculty. The curriculum vitae of each such proposed Dissertation Committee member must be submitted to the PhD Program Director who will advise the Dean of the School of Social Work to recommend appointment to the Graduate Faculty to the Dean of the Graduate School.

The composition of the proposed Dissertation Committee must be approved by the PhD Program Director, the Dean of the School of Social Work, and the Dean of the Graduate School. To report the composition of

the Dissertation Committee, the student should prepare an Appointment/Change of Dissertation Committee form.

The dissertation is the major scholarly endeavor of the PhD experience. A broad range of subjects and methods can be used in the dissertation. All dissertations, however, should focus on issues of concern to social work so that the findings will have meaning and implications for social work. The dissertation is expected to contribute knowledge and to demonstrate the student's technical research skills and her or his mastery of the subject matter in the chosen area of specialization. The following list offers examples (but by no means constitutes an exhaustive list) of the range of dissertation options that would usually be considered appropriate. Exploration of the database *ProQuest Dissertations and Theses Global* using the search term "social work" offers insights to potential inquiry paths.

- **Social Policy or Program Evaluations.** Evaluations of on-going programs and existing policies using administrative records, field studies, interviews, survey data, or some combination of these and other types of data.
- **Case Studies.** Intensive analyses of persons, social groups, organizational components, or communities, with an emphasis on depth rather than breadth.
- **Theory Generation.** Use of qualitative methods, e.g., grounded theory, to generate theory.
- **In-depth Exploration.** Use of qualitative methods to explore conduct in-depth investigations of phenomena, concepts, ideas, and/or experiences.
- **Hypothesis-Formulation Studies.** Exploratory research of a quantitative or qualitative nature on problems or issues with little or no previous study. The goal is to formulate theories and hypotheses for future research. The state of development of relevant theory will determine the appropriate designs to be used.
- **Hypothesis-Testing Studies.** Research on problems that have received sufficient empirical and theoretical attention for clear hypotheses to be stated in advance. The main goal of the research would usually be to test these hypotheses with systematic quantitative data, as a step in the refinement of knowledge.
- **Methodological Studies.** Development, standardization, and validation of research tools such as scales for measuring phenomena of importance in social work. The constructs investigated in such studies should be grounded in theory.
- **Survey Research.** Use of purposive or random sampling techniques to investigate and/or to estimate the prevalence or intensity of various phenomena of interest to social work. These studies can include epidemiological studies, attitude surveys, and demographic analyses. All would attempt to make inferences about populations based on data collected from samples.

Dissertation Proposal

While the subject matter of proposals may vary greatly, there are certain elements common to all dissertation proposals. The proposal, whether for a monograph dissertation or a three-article dissertation, must have:

1. A clear statement of the research problem or area of investigation.
2. A comprehensive synthesis and summary of the relevant literature and prior research.
3. Unambiguous and comprehensive research procedures including, where applicable, a description of the data to be collected, how the

data will be obtained, and a detailed description of how the data will be analyzed. This should include a draft of proposed instruments, interview or question protocols, document audit procedures, and scales. If appropriate, evidence of data availability from archived sources or agency records should be provided.

4. A description of units of observation (subjects, records), how they will be selected and accessed. If data will come from human participants, measures taken to ensure availability and provide for protection of rights and welfare along with informed consent should be described.
5. In the case of multiple-article dissertations, methods should be clearly and thoroughly described for all studies or all parts of the study planned for each article in the dissertation.
6. In the case of multiple-article dissertations, the proposal must include an introduction which introduces the common theme or framework, describes the articles, explains how they are related, and explains their expected significance. There must be connecting language to bridge each planned article description to the next. There must be a summary section that addresses the expected importance of the articles and discusses the potential implications of the overall product. This section should provide a clear description of how the parts of the project fit together.
7. Explication of potential risks or harm to human participants, where applicable, and steps that will be taken to minimize such risks. This will be important when preparing forms for submission to the Institutional Review Board (IRB). All members of the UA community (students, faculty, staff) hold an obligation to adhere to Office of Research Compliance policies and procedures.
8. A timetable, including critical milestones and potential sources of delays.
9. A budget (if needed). This will be particularly important if a subsidy to defray dissertation costs will be requested from the UA Graduate School.
10. Potential results and the potential usefulness of the results for social work.
11. An outline and tentative table of contents for the dissertation.
12. The proposal should be concise and to the point. It should clearly demonstrate that the student has mastered subject matter, methodology, and the logistics of carrying out a major research investigation.

Institutional Review Board

The Office for Human Research Protections (OHRP) of the US Department of Health and Human Services requires that any research that involves the collection of data from human participants must have approval from the UA Institutional Review Board (IRB). Guidelines, forms, and other information can be obtained by calling the Office for Sponsored Programs at (205)348-5152 or visiting the website.

Where students receive approval from the IRB a copy of the certification must be included in the dissertation as the final appendix.

Proposal Defense

When the student and the Dissertation Committee Chair believe the proposal is ready for defense, a Proposal Defense, or formal oral examination, will be scheduled. This meeting should be scheduled through the PhD Program Assistant well in advance, but at a minimum three weeks, of the time set in order for the Program Assistant to reserve

space for the Proposal Defense. Copies of the defense-ready dissertation proposal must be provided to all committee members at least two weeks in advance of the oral defense. The student is responsible for presenting her or his dissertation proposal to the Dissertation Committee.

As a “working meeting” between the student and their committee members, the Dissertation Proposal Defense meeting can be conducted in various ways depending on the needs of the student and the preference of the Dissertation Committee Chair. The agenda may include a formal presentation by the student of their proposed project and then a discussion of the proposal by the committee with the student, but the formal presentation is not a requirement (e.g., committee members may be familiar enough with the project that no “reminding” may be necessary via a presentation).

A student, after discussion and agreement by their Dissertation Committee Chair, may invite guests for that portion of the meeting when the student presents details of their proposed project. If guests are invited, they will leave the meeting for the portion of the meeting where the student and the committee discuss the proposal and committee members offer feedback about the project to the student.

As a result of the defense process, the committee may find that the proposal is:

- *Acceptable* (without modification);
- *Acceptable* (with modification); or
- *Not Acceptable*

If the committee finds that the proposal is *Acceptable* (without modifications), the student may proceed with the dissertation research.

If the committee finds that modifications are necessary, the student will be given a list of recommended changes for improvement of the proposal. The Dissertation Chair is responsible for seeing that these changes are made to the satisfaction of the committee. If the committee finds that the proposal is *Not Acceptable*, the Dissertation Chair will provide the student with a list of reasons for its unacceptability and a record of the Dissertation Committee's vote. This document will be kept in the student file. If the proposal was *Not Acceptable*, the student must schedule another proposal defense.

A successful defense of the proposal is defined as an *Acceptable* vote (with or without modification) by a majority of the Dissertation Committee members. After the defense, a copy of the approved dissertation proposal must be submitted to the Director of the PhD Program. The student should successfully defend the dissertation proposal within one calendar year of passing the comprehensive examinations.

Time Limits for Degree Completion Requirements

Although the UA Graduate School has established a nine-year time-to-degree deadline for PhD students, entering Social Work PhD students have a seven-year internal deadline to complete the degree. Students who reach Year 7 will be held accountable for reaching due dates and deadlines distributed each year. If a student fails to meet a due date or deadline in Year 7, yet wants to pursue degree completion, the student must apply for an extension to the social work degree completion deadline.

To apply for an extension, a student should prepare a statement explaining why an extension is justified and why the student is confident he or she will be able to meet new deadlines if an extension is granted.

The statement must first be approved in writing (e.g., via e-mail) by

the student's advisor. Prior to approval, the advisor has the option of convening the full dissertation committee for consultation.

If the extension request is approved by the student's advisor, the statement and advisor's approval should be forwarded to the PhD program director. If the PhD program director approves the extension request, they will work with the School of Social Work registrar to propose new due dates and deadlines. The PhD program director will submit a memo explaining their reasons for supporting an extension, the proposed new due dates and deadlines, the advisor's approval, and the student statement to the Associate Dean for Academic Programs and the Dean for their approval.

If a request is approved by all parties, the student must agree in writing to meet the newly established due dates and deadlines. After approval and student agreement, if a student fails to meet any due dates or deadlines, the student's registration can be dropped and he or she can be dismissed from the School of Social Work.

No School of Social Work extensions will extend beyond the UA Graduate School's graduation deadline.

Student Progress Requirement

Every spring semester, each student in the PhD Program completes the *Doctoral Student Planning and Annual Review Form* with advisor assistance.

The form is to be submitted to the PhD Program Director, along with current *curriculum vitae*. Together with reports from the student's advisor, instructors of courses the student has taken, and supervisors of the student's graduate research and teaching assistantships, this information provides the basis for an Annual Review of each PhD student's progress in the program conducted by the PhD Program Committee. Attendance by the student at the end of year annual review is mandatory. Attendance by the advisor is highly recommended.

Additional Academic Requirements

Professional Preparedness Review Policy

Members of the School of Social Work community have an obligation to the social work profession to make reasonable efforts to ensure that graduates of its professional programs are emotionally and ethically prepared for the demands of ethical practice. This duty is consistent with the Code of Ethics of the National Association of Social Workers (2.09, 2.10 and 2.11) and with the objectives of our academic programs that require students to "understand the value base of the profession and its ethical standards and principles and practice accordingly."

Therefore, the appropriate program director will consult with any student in his/her respective program who (a) exhibits "impairment that is due to personal problems, psychosocial distress, substance abuse, or mental health difficulties" that is deemed by that program director likely to interfere with social work practice effectiveness, or (b) who engages in other behavior proscribed by the National Association of Social Workers. The program chair will (if appropriate) make reasonable efforts to assist the student in resolving behavioral concerns regarding the student's ability to practice effectively and responsibly in the social work profession.

The results of this student/program director consultation may include:

- a) a determination that the alleged behavior does not constitute an ethical violation or impairment serious enough to interfere with practice effectiveness;
- b) the development of a plan for remediation of the behavior while the student continues in the social work program;

- c) the student's temporary withdrawal from the social work program; or
- d) the student's indefinite withdrawal from the social work program.

Withdrawal and Leave of Absence Information

Graduate School information on Withdrawals and Leave of Absence (p. 206).

Academic Grievances Information

Graduate School information on Academic Grievances (p. 219).

Scholastic Requirements

Students in the UA School of Social Work PhD program must meet the UA Graduate School requirements for good academic standing of a 3.0 grade point average on a 4.0 scale. Failure to meet this standard will result in dismissal from the PhD program.

Note that a grade of "I" (incomplete) should be removed within four weeks during the next term of enrollment. If a student's overall grade point average drops below a "B" as a result of the incomplete, the result could be either an academic warning or dismissal.

Unlike other programs at The University of Alabama, the Interdisciplinary Studies Masters and Doctoral programs are administered directly by the Graduate School, not an academic department. Consequently, there is not a pool of research or teaching assistantships available to students in the program. Many full-time Interdisciplinary Ph.D. student do receive assistantship funding from their home department (usually through

their advisor). Interdisciplinary Studies students are eligible for Graduate School fellowships. Please see financial assistance (p. 217) page in this catalog for more details.

IDGR598 Capstone Project Practicum

Hours 3-6

A workplace-based internship or practicum during which the principles learned in Interdisciplinary Master's coursework will be integrated into a real-world setting, to solve a problem (the "capstone project"). Under the supervision of the advisory committee, students will develop and present the results of their Capstone Project in both written and oral form.

IDGR599 Thesis Research

Hours 1-6

This independent research course partially fulfills required research hours toward a Plan I interdisciplinary master's degree. A minimum of 6 thesis research hours are required, at 1-6 hours per semester. The course is conducted under the guidance of the primary advisor, with support from the advisory committee. Material covered will be of an advanced nature aimed at providing students with an understanding of the latest research and current developments within the field. Discussion and advisor guidance will be focused on readings of research articles and development of research methodology, with the aim of producing an original thesis evidencing research capacity, independent thought, integration of the disciplines represented in the plan of study, and the student's ability to interpret research materials in the student's field.

IDGR650 Preparing Future Faculty and Scholars

Hours 1

The Preparing Future Faculty & Scholars course is designed to provide Doctoral and MFA students with a series of topics, discussions, and activities that expose them more fully to the realities of post-graduate life inside and outside of academia. Through participation in coursework, workshops, online training, and/or mentoring, this course increases students' awareness of expectations for pre-tenure faculty performance, in addition to the foundational information needed to find, sustain, and enhance their future in academia and/or non-academic careers.

IDGR699 Dissertation Research

Hours 1-12

Dissertation Research.

Each Interdisciplinary Studies student is assigned a home department. It is the intention of the Graduate School that this student is given the same access to departmental resources as any other student in that department. In addition to the traditional departmental resources, it is intended that all Interdisciplinary Studies students take full advantage of professional development resources offered through the Graduate School and other units on campus.

Faculty

Coordinator

Dr. Andrew Goodliffe

Associate dean

Dr. Andrew Goodliffe

Interdisciplinary Studies, MA

The goal of the Interdisciplinary Studies MA program is to train bachelor's degree recipients in new and emerging areas that lie at the intersection of two or more disciplines. A student can tailor the program to their professional goals and interests. The Interdisciplinary Studies MA program is intended for those whose degree goals are focused in the arts and humanities. Upon completion of the program, graduates will be able to critically examine multiple sources of information, formulating responses to particular problems or questions. They will be able to demonstrate communication skills relevant to their disciplinary focuses and show competence in the processes of inquiry, at a level appropriate to a master's degree.

Participants in the program can choose to follow a thesis (Plan I) or non-thesis (Plan II) track. Those following the thesis track must demonstrate their ability to articulate and address a research question utilizing appropriate methodologies. Non-thesis students must complete a Capstone Project. Through this project, they must demonstrate leadership and problem-solving skills relevant to their professional field. The Capstone Project can involve a graded internship.

The Interdisciplinary Studies MA as a Vessel Degree

Students who have earned one or more graduate certificates as non-degree-seeking students may be able to apply their certificates toward the Interdisciplinary Studies master's degree. In this situation, related graduate certificates are connected to a coherent master's degree through a Capstone Project.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. 3 letters of recommendation
2. A CV/resume.
3. A Statement of Purpose: applicants who propose to combine two or more academic disciplines should outline their goals and rationales in a statement of purpose and submit with the application. Applicants should ensure that they demonstrate coherence among the different disciplines, in terms of the individual's overall personal and professional goals, as well as how those disciplines will be blended in the final thesis/project/dissertation. This is where applicants will discuss their professional/academic preparation, their reason for choosing The University of Alabama, their research goals (as appropriate) and their intended future career path. The Graduate School expects applicant goals to include classwork from two to three academic departments/programs.

Upon submission, the Graduate School will form an application review committee comprising graduate program directors from the two to three departments identified in your statement of purpose. If there are questions regarding the statement of purpose or program/career goals, the applicant will be contacted for clarification. The initial review committee will make the admission recommendation to the Graduate School.

Post-Admission

On admission, students will be assigned to a home department. Students will form an advisory committee representative of the the two to three disciplines involved in the Plan of Study. This committee, led by the primary advisor, who is from the home department, will work with the student to formulate the Plan of Study. The Plan of Study will include the decision of whether to follow Plan I (thesis option) or Plan II (Capstone Project option). The Plan of Study will also include the advisory committee's decision regarding the format of the comprehensive exam, Capstone Project, and/or the thesis defense. Students pursuing the thesis option will be encouraged to take a research methods or theory course in one of the participating departments during their first semesters. Advisors may wish to have students enroll in an independent study course during the first semester, during which they create an in-depth proposal to be approved by the advisory committee.

Curricular Requirement

The Interdisciplinary MA requires the completion of 30 semester hours

Thesis Option

Elective Courses	Hours
Elective Courses	24
IDGR 599 Thesis Research	6
Total Hours	30

Non-Thesis Option

Code and Title	Hours
Elective Courses	24-27
IDGR 598 Capstone Project Practicum	3 to 6
Total Hours	27-33

Transfer Credit

Graduate School information on Transfer Credit (p. 18).

Comprehensive Exam/Capstone

The content and administration of the comprehensive exam are the responsibility of the Advisor and the Advisory Committee and are determined post admission (preferably before the start of classes).

Typically the format of the comprehensive examination will follow that described in the Graduate Catalog for the home department. The comprehensive examination can be retaken once. The Advisory Committee Chair must inform the Graduate School of the results of the comprehensive exam.

The Capstone Project is the culminating experience of the non-thesis path. The Capstone Program will consist of a written report and a presentation, public performance, exhibition, or other product that can be assessed by the three-member faculty committee. This assessment will constitute the final examination.

Fieldwork/Practicum/Internship Requirements:

Students who choose to pursue the Capstone Project option may opt to enroll in credit-bearing or non-credit-bearing internships or practicums (IDGR 598 Capstone Project Practicum). These work-based learning activities may be, but are not required to be, related to their current field of employment. The internship or practicum would provide the real-world data and experience for the research and defense of the Capstone Project.

Plan I – Thesis Process Requirements

Students electing the Thesis option (Plan I) will follow Graduate School guidelines for all such programs, naming an advisory committee consisting of two co-directors and a third member drawn from one of the participating disciplines. All members must be approved as graduate faculty by the Dean of the Graduate School. The thesis must involve a written manuscript and a final oral defense. The results of the defense must be reported promptly to the Dean of the Graduate School on appropriate forms. A student may take the final oral examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Human Subjects: If human subjects are involved, the student and his/her Advisor/Chair are responsible for complying with the Institutional Review Board requirements before beginning research.

Plan II – Non-Thesis Process Requirements

Non-thesis students will enroll in 3-6 hours of IDGR 598 Capstone Project Practicum (or the 598 course of one of the participating departments) while carrying out the requirements of the Capstone Project. These courses will constitute part of the 30-hour coursework requirement of Plan II. The final assessment for the Capstone Project must take place at least two weeks before the date of graduation, and the results reported promptly to the Dean of the Graduate School on appropriate forms. A student may take the final examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Time Limits for Degree Completion

Graduate School information on Time Limits (p. 18).

Student Progress Requirement

In order to continue in the program students must have an approved plan of study by the end of their first semester in the program.

Interdisciplinary Studies, MS

The goal of the Interdisciplinary Studies MS program is to train bachelor's degree recipients in new and emerging areas that lie at the intersection of two or more disciplines. A student can tailor the program to their professional goals and interests. The Interdisciplinary Studies MS program is intended for those whose degree goals are focused in the STEM fields. Upon completion of the program, graduates will be able to critically examine multiple sources of information, formulating responses to particular problems or questions. They will be able to demonstrate communication skills relevant to their disciplinary focuses and show competence in the processes of inquiry, at a level appropriate to a master's degree.

Participants in the program can choose to follow a thesis (Plan I) or non-thesis (Plan II) track. Those following the thesis track must demonstrate their ability to articulate and address a research question utilizing appropriate methodologies. Non-thesis students must complete a Capstone Project. Through this project, they must demonstrate leadership and problem-solving skills relevant to their professional field. The Capstone Project can involve a graded internship.

The Interdisciplinary Studies MS as a Vessel Degree

Students who have earned one or more graduate certificates as non-degree-seeking students may be able to apply their certificates toward the Interdisciplinary Studies master's degree. In this situation, related graduate certificates are connected to a coherent master's degree through a Capstone Project.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

1. 3 letters of recommendation
2. A CV/resume.

3. A Statement of Purpose: applicants who propose to combine two or more academic disciplines should outline their goals and rationales in a statement of purpose and submit with the application. Applicants should ensure that they demonstrate coherence among the different disciplines, in terms of the individual's overall personal and professional goals, as well as how those disciplines will be blended in the final thesis/project/dissertation. This is where applicants will discuss their professional/academic preparation, their reason for choosing The University of Alabama, their research goals (as appropriate) and their intended future career path. The Graduate School expects applicant goals to include classwork from two to three academic departments/programs.

Upon submission, the Graduate School will form an application review committee comprising graduate program directors from the two to three departments identified in your statement of purpose. If there are questions regarding the statement of purpose or program/career goals, the applicant will be contacted for clarification. The initial review committee will make the admission recommendation to the Graduate School.

Post-Admission

On admission, students will be assigned to a home department. Students will form an advisory committee representative of the the two to three disciplines involved in the Plan of Study. This committee, led by the primary advisor, who is from the home department, will work with the student to formulate the Plan of Study. The Plan of Study will include the decision of whether to follow Plan I (thesis option) or Plan II (Capstone Project option). The Plan of Study will also include the advisory committee's decision regarding the format of the comprehensive exam, Capstone Project, and/or the thesis defense. Students pursuing the thesis option will be encouraged to take a research methods or theory course in one of the participating departments during their first semesters. Advisors may wish to have students enroll in an independent study course during the first semester, during which they create an in-depth proposal to be approved by the advisory committee.

Comprehensive Exam/Capstone

The content and administration of the comprehensive exam are the responsibility of the Advisor and the Advisory Committee and are determined post admission (preferably before the start of classes).

Typically the format of the comprehensive examination will follow that described in the Graduate Catalog for the home department. The comprehensive examination can be retaken once. The Advisory Committee Chair must inform the Graduate School of the results of the comprehensive exam.

The Capstone Project is the culminating experience of the non-thesis path. The Capstone Program will consist of a written report and a presentation, public performance, exhibition, or other product that can be assessed by the three-member faculty committee. This assessment will constitute the final examination.

Fieldwork/Practicum/Internship Requirements:

Students who choose to pursue the Capstone Project option may opt to enroll in credit-bearing or non-credit-bearing internships or practicums (IDGR 598 Capstone Project Practicum. These work-based learning activities may be, but are not required to be, related to their current field of employment. The internship or practicum would provide the real-world data and experience for the research and defense of the Capstone Project.

Plan I – Thesis Process Requirements

Students electing the Thesis option (Plan I) will follow Graduate School guidelines for all such programs, naming an advisory committee consisting of two co-directors and a third member drawn from one of the participating disciplines. All members must be approved as graduate faculty by the Dean of the Graduate School. The thesis must involve a written manuscript and a final oral defense. The results of the defense must be reported promptly to the Dean of the Graduate School on appropriate forms. The form should be submitted when all examinations are completed. A student may take the final oral examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Human Subjects: If human subjects are involved, the student and his/her Advisor/Chair are responsible for complying with the Institutional Review Board requirements before beginning research.

Plan II – Non-Thesis Process Requirements

Non-thesis students will enroll in 3-6 hours of IDGR 598 Capstone Project Practicum (or the 598 course of one of the participating departments) while carrying out the requirements of the Capstone Project. These courses will constitute part of the 30-hour coursework requirement of Plan II. The final assessment for the Capstone Project must take place at least two weeks before the date of graduation, and the results reported promptly to the Dean of the Graduate School on appropriate forms. A student may take the final examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Interdisciplinary Studies, Ph.D.

The Interdisciplinary Studies (IDS) Ph.D. program is designed for highly motivated students whose goals for research and classwork do not fit into one of The University of Alabama department-based Ph.D. programs. There is no such thing as a "typical" IDS Ph.D. student. Students have ranged in age from 22 to 85. Although many IDS Ph.D. students pursue their studies full time, others are working professionals who balance their studies with full time employment. As a pre-requisite to admission, IDS Ph.D. students work with the Graduate School to identify faculty members who can help guide the proposed research. The Graduate School also works with prospective students to make sure that we can support your research goals with classes that are offered at The University of Alabama.

Admissions

Prior to submitting an application to the Interdisciplinary Studies Program, each prospective student must meet with the Graduate School Associate Dean for Admissions, Recruitment and Fellowships.

Applicants to the Interdisciplinary Studies PhD program will submit an application to the Graduate School. Application materials will include:

1. Transcripts showing a completed master's degree (at the time of admission) or equivalent from an accredited university. GPA of 3.3 or higher (on a 4.0 scale) or equivalent. Admission with Permission to Continue is not permitted for the Interdisciplinary PhD program.
2. The email addresses of three recommenders.
3. A CV/resume.
4. Language scores (for non-native English speakers; conditional language admission is not permitted).
5. Statement of purpose. The statement of purpose is where the applicant will discuss professional/academic preparation, the reason for choosing The University of Alabama, research goals and intended future career path.
6. Statement of proposed research. A one to two-page document outlining the intended focus and significance of the proposed research to the integrated fields of study and the applicant's professional goals.

7. The names and emails addresses of five Advisory Committee members, including an Advisor/Chair. All committee members must be members of the Graduate Faculty at The University of Alabama. The applicant's Advisory Committee chair is expected to have competence in the proposed major area(s) of study and be willing to devote time to being an academic mentor for the student throughout the PhD program. The Advisory Committee chair and at least one additional committee member must have experience in directing and supervising doctoral-level research.
8. The name of the home department. The home department or program will include the Interdisciplinary Studies, PhD student in the intellectual-social life of the unit, e.g., department mailing lists, colloquia, social functions, etc. The home department may also consider an Interdisciplinary Studies, PhD student for Graduate Teaching Assistant and Graduate Research Assistant appointments, and for office space.
9. Proposed course list. In consultation with the Advisory Committee and Advisor/Chair, the prospective Interdisciplinary Studies PhD student will create a preliminary plan of study. This must include transfer classes, classes taken at The University of Alabama, and dissertation research hours
10. Written explanation (prepared by the proposed Advisor in consultation with the Advisory Committee and submitted by the student) explaining how the comprehensive examination requirement will be fulfilled. It is expected that the comprehensive examination for the Interdisciplinary Studies PhD will be as rigorous and use the same general procedures as the home department. The specifics of the examination (including where the exam will be taken, the number of questions, the number of evaluators, the grading process, the process for reporting results to the student, etc.) will be detailed.

The application materials, once submitted, will be reviewed by the proposed Advisory Committee members and the Chair of the proposed home department.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Code and Title	Hours
Elective Courses	33
Research Methods or Research Theory and Design	15
IDGR 699 Dissertation Research	18
Total Hours	66

The University of Alabama Graduate School requires that Interdisciplinary Studies PhD students complete a minimum of 48 hours of coursework reflecting two or more distinct academic areas. The coursework should include a minimum of 15 hours in research methods or research theory and design. The majority of this coursework should be at the 600 level. In addition, 18 hours of dissertation research must be completed. All students are encouraged to take AHE 591 Seminar Higher Education if the course is offered during the first 4 semesters of coursework.

Transfer Credit

Up to half of the required graduate, coursework hours may be transferred from other institutions with the approval of the Advisory Committee.

Doctoral Plan of Study Requirement

For Interdisciplinary Studies PhD students, an initial Plan of Study was established during the admission process in consultation with the Advisory Committee and Advisor/Chair. Any changes to the Plan of Study

require the approval of the Advisory Committee and Advisor/Chair and the submission of a new Plan of Study form.

Comprehensive Exam

The content and administration of the comprehensive exam are the responsibility of the Advisor and Advisory Committee and are determined at the time of admission. The comprehensive examination is taken just before the completion of all coursework. The comprehensive examination can be retaken once. The Advisory Committee Chair must inform the Graduate School Associate Dean for Admissions, Recruitment, and Fellowships of the results of the comprehensive exam and submit the completed IDS Comprehensive Examination Rubric.

Admission to Candidacy Requirements

When the Advisory Committee, using the Admission to Candidacy form, certifies to the Graduate School that the comprehensive exam has been passed and all other requirements set out in the Plan of Study (except the completion of dissertation research hours) have been satisfactorily completed, the Graduate School admits the student to candidacy.

Continuous Enrollment Policy

Graduate School information on Continuous Enrollment (p. 23).

Dissertation Requirements

Human Subjects: If human subjects are involved, the student and his/her Advisor/Chair are responsible for complying with the Institutional Review Board requirements before beginning research.

Committee: The Advisory Committee formed on admission to the program continues to serve for the duration of the program.

Dissertation Proposal: The purpose of the dissertation proposal defense is to evaluate the potential of the student to complete the dissertation research project. It comprises an oral presentation of a written dissertation proposal, focusing on areas relevant to the dissertation research. The dissertation proposal defense may be retaken once. All Advisory Committee members must be in attendance for the duration of the defense. The Advisory Committee Chair must inform the Graduate School Associate Dean for Admissions, Recruitment, and Fellowships of the results of the dissertation proposal.

Dissertation Research Hours: Interdisciplinary PhD students are not permitted to enroll in dissertation research hours (IDGR 699) prior to admission to candidacy. The required 18 credit hours must be taken as IDGR 699. Any IDGR 699 hours taken must be accompanied by a syllabus that includes: 1) specific learning outcomes for the semester; and 2) how the learning outcome must be satisfied to earn a passing grade. The instructor of record (normally the Advisor) must upload the syllabus to The University of Alabama Online Syllabus Management site.

Final Oral Examination: The final oral exam for the PhD is administered and evaluated by the Advisory Committee. The Graduate School must be notified of the date of the oral examination at least one month in advance. Final oral examinations are open to the University community. The examination must be scheduled such that a representative from the Graduate School can attend. The Committee Advisor/Chair should inform the Associate Dean of the Graduate School of the results of the final oral exam using the Doctoral Final Defense form and submit a completed IDS Final Oral Examination Rubric.

Submission of Dissertation: An outcome of the final oral examination is almost always additional edits to the dissertation. It is at this stage that Interdisciplinary Ph.D. students are encouraged to use a copy editor to ensure that the final dissertation meets the requirements of the Graduate

School. Approval of the final version of the dissertation by the committee is indicated by the completion of the Committee Acceptance Form by the advisor. The student must upload a PDF-formatted version of the final dissertation to ProQuest. Should additional edits be required, the Graduate School will contact the student.

Time Limits for Degree Completion Requirements

Graduate School information on Time Limits (p. 18).

Student Progress Requirement

Degree Progression: Interdisciplinary Studies Ph.D. students must ensure that coursework is completed in a timely manner and that satisfactory progress is made towards completing all degree requirements (coursework, comprehensive exam, admission to candidacy, dissertation proposal, dissertation research, and final oral examination). All requirements must be completed within the time limits specified in the Graduate Catalog at the time of admission.

Candidacy: It is expected that full-time students will have advanced to candidacy by the beginning of the third year in the program. Failure to advance to candidacy before the end of the fourth year in the program is grounds for dismissal.

Degree Proposal: The dissertation proposal requirement must be fulfilled no later than one year after advancement to candidacy. Failure to complete this requirement within one year of advancement to candidacy is grounds for dismissal.

Advisory Committee Meetings: During each year of the program, there must be at least one meeting between the student and the Advisory Committee to review progress. The student is responsible for scheduling this meeting such that all members can be in attendance either in person or virtually (e.g. via Zoom). Individual meetings or communications via email cannot be used as a substitute for this meeting.

Annual Report: Each Interdisciplinary Studies PhD student will, in collaboration with their Advisor, prepare an annual written summary of progress towards degree requirements. This report will be due to the Associate Dean for Admissions, Recruitment and Fellowships (amg@ua.edu) on the Monday following finals week each year.

Annual Meeting: Following submission of the progress report, the student will schedule a 60 minute meeting (to be attended by the student, Advisor, and Associate Dean for Admissions, Recruitment and Fellowships (amg@ua.edu)). This meeting must be completed by the end of May each year.

Materials Science (MTLS)

The University of Alabama (UA), The University of Alabama at Birmingham (UAB), and The University of Alabama in Huntsville (UAH) offer a joint interdisciplinary program leading to a doctor of philosophy degree in materials science. The PhD program in materials science is coordinated by the Tricampus Materials Science Coordinating Committee. On each campus, the program is administered by the Campus Materials Science Program Committee.

For practical purposes, students will matriculate at a single campus. Once the student chooses a campus, that campus becomes the home campus, and the student's records will be managed by the graduate school on that campus. However, once registered at one campus, a student is free to pursue, with minimum barriers, coursework or research opportunities at the other University of Alabama System campuses. Some courses may require travel to the other campuses, alternately some courses are offered online.

At all three universities, the interdisciplinary PhD program in materials science draws on various colleges and academic divisions. At UA, the program is supported by departments in both the College of Arts and Sciences and the College of Engineering. At UAB, the Schools of Medicine, Dentistry, and Optometry are involved, as are the School of Engineering and the School of Natural Science and Mathematics. At UAH, the College of Engineering and the College of Science participate in the program. The degree awarded to each successful candidate is the PhD Degree in Materials Science.

IDGR598 Capstone Project Practicum

Hours 3-6

A workplace-based internship or practicum during which the principles learned in Interdisciplinary Master's coursework will be integrated into a real-world setting, to solve a problem (the "capstone project"). Under the supervision of the advisory committee, students will develop and present the results of their Capstone Project in both written and oral form.

IDGR599 Thesis Research

Hours 1-6

This independent research course partially fulfills required research hours toward a Plan I interdisciplinary master's degree. A minimum of 6 thesis research hours are required, at 1-6 hours per semester. The course is conducted under the guidance of the primary advisor, with support from the advisory committee. Material covered will be of an advanced nature aimed at providing students with an understanding of the latest research and current developments within the field. Discussion and advisor guidance will be focused on readings of research articles and development of research methodology, with the aim of producing an original thesis evidencing research capacity, independent thought, integration of the disciplines represented in the plan of study, and the student's ability to interpret research materials in the student's field.

IDGR601 GTA Assistant Only

*No description available***IDGR605 Graduate Internship**

Hours 4.5

*No description available***IDGR650 Preparing Future Faculty and Scholars**

Hours 1

The Preparing Future Faculty & Scholars course is designed to provide Doctoral and MFA students with a series of topics, discussions, and activities that expose them more fully to the realities of post-graduate life inside and outside of academia. Through participation in coursework, workshops, online training, and/or mentoring, this course increases students' awareness of expectations for pre-tenure faculty performance, in addition to the foundational information needed to find, sustain, and enhance their future in academia and/or non-academic careers.

IDGR699 Dissertation Research

Hours 1-12

Dissertation Research.

Faculty**Program Director**

Gregory Thompson

Professor

Gregory Thompson

Materials Science, Ph.D.**Admission Requirements**

In order to qualify for regular admission to the doctoral program, a student must have satisfied the following minimum requirements common to all three universities:

- A bachelor's degree (or its equivalent) from an accredited college or university in engineering or one of the physical sciences
- "B"-level scholarship, either overall or for the last 60 semester hours of undergraduate and graduate credit
- A minimum score of 1000 on the Graduate Record Examination general test
- A TOEFL score greater than 550 (or the equivalent on other acceptable language examinations), for international students
- Letters of reference

An applicant whose scholastic record reveals a deficiency in one of the first three categories above may, upon recommendation of the Campus Materials Science Program Committee chairperson (on the campus to which the student has applied) and with approval of the respective graduate dean, be admitted on a provisional basis, as provided in graduate school regulations at each campus. However, that student must follow the appropriate graduate school's policies in achieving regularly admitted status prior to taking Program Examination I (the examination on core material).

Additional information is in the Admission Criteria section of this catalog.

See the Admission Criteria section of this catalog for more information.

Advisement

Prior to a student's admission to the program, the student will usually discuss (perhaps via email) possible research areas with one or more faculty members. If the student is admitted to the program, the letter of admission will designate a faculty member as the tentative dissertation advisor. The advisor and/or research area can be changed during the course of study if it appears beneficial to the student, with the approval of the Campus Materials Science Program Committee.

The advisor will assist the student in program planning and other academic matters. The letter of admission will also designate one of the participating departments as the tentative home department (normally the department of the tentative advisor), and state whether the student will be financially supported by a Materials Science Program assistantship (some students have support from outside the program instead.)

A graduate supervisory committee will be appointed for the PhD student as soon as he or she passes Program Examination I and a research project is selected. The student and the advisor are responsible for recommending supervisory committee members, which must then be approved by the Campus Coordinator. Members of the committee will normally be selected from participating faculty in the Materials Science Program from the three campuses involved. Exceptions must be approved by the Campus Coordinator. The graduate committee normally includes the research advisor (as chairperson) and at least four other members. The graduate committee members are selected based on the student's academic interests and area of research. At least one of

the committee members is from the student's research area at one of the other UA campuses, and another is from a department other than the home department on the home campus. The graduate committee is charged with supervision and approval of the student's research and course of study toward the completion of all requirements leading to the degree.

Campus Materials Science Program Committee

This committee administers the program on each campus. Coordination encompasses some functions that are usually handled by a single-discipline department. The Campus Materials Science Program Committee is chaired by the campus program coordinator, who acts as director or chairperson for the program.

Degree Requirements

Qualifying, Comprehensive, and Other Program Examinations

Program Examination I covers the program's core material. The core is divided into three topic areas:

1. structure and properties;
2. characterization and testing; and
3. thermodynamics and processing.

Program Examination I qualifies the student to enter the advanced program. It is administered simultaneously system-wide by the Tricampus Coordinating Committee, at pre-announced dates, at least once per year (sometimes once per semester). The individual campus program committees will solicit input from the faculty and assist in preparing and grading the system-wide examination. The student may choose to take two or all three parts of Program Examination I at a sitting (unless only one part remains to be taken). It is expected that a student must make at least one attempt to pass the exam during the first two years of study. All parts of the examination must be completed within a total of three years, or by the fourth administration of the exam if this occurs later than three years after admission. Failure to pass all parts of the examination after this time disqualifies a student from the PhD program.

Program Examination II includes a comprehensive examination covering material in the student's specialization, as well as a dissertation proposal defense. This examination is normally taken near the end of formal coursework and is prepared, administered, and graded by the student's graduate supervisory committee. The last exam is an oral exam, the dissertation defense, which also is administered by the graduate supervisory committee.

A Student Handbook describing the details of Program Examinations and other aspects of the Program is on the Program's UA Campus website.

Candidacy and Dissertation Requirements

Admission to candidacy for the doctoral degree is contingent upon the successful completion of Program Examinations I and II (which includes the successful presentation of a dissertation research proposal.) Normally, a student is considered eligible to take Program Examination II when all of the required coursework has been completed. A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the program exams. See the Degree Requirements section of this catalog for details on plan of study, admission to candidacy, and all other

degree requirements. After being admitted to candidacy, the student must complete the remaining requirements for the degree, the main requirement being the doctoral research and dissertation. A minimum of 48 credit hours of graduate coursework and 24 hours of dissertation research are required. These courses may be in any department, but the course program must be worked out in consultation with the advisor and approved by the dissertation committee. A maximum of 24 of the 48 coursework hours may be transferred from another institution, subject to approval. The Request for Transfer of Graduate Credit is on the Graduate School's website. Credits in materials-related courses earned toward a master's degree at The University of Alabama may be applied to the doctoral degree.

Residency Requirement

The minimum period in which the doctoral degree can be earned is three full academic years of graduate study. The student must spend the final or penultimate academic year in continuous residence as a full-time graduate student at one of the campuses.

Time Limits

All requirements for the doctoral degree must be completed within a period of seven years of the date of admission.

For additional residence, time limits and degree requirements information, see the Degree Requirements section of this catalog.

Doctoral Degrees

The University offers several types of doctorates, each of which is described below.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

Doctor of Philosophy Degree

The Doctor of Philosophy (PhD) degree is regarded as the researcher's degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The Doctor of Philosophy (PhD) degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

Field of Specialization - A defined field of specialization as outlined in the student's Plan of Study is required of all candidates for the Doctor of Philosophy degree. A minimum of 36 semester hours of non-dissertation course credit is required. Departments or programs may require more than this minimum. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 18 hours of dissertation research.

Research skill/language requirements - There is no university wide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments.

Interdisciplinary Studies

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 765) at the Graduate School's website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

Doctor of Education Degree

The Doctor of Education (EdD) requires a minimum of two years of graduate study beyond the master's degree for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate coursework research beyond the master's degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 488) section of the Graduate Catalog, there are specific regulations governing the EdD program.

Doctor of Musical Arts Degree

The Doctor of Musical Arts (DMA) degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 356) section of the Graduate Catalog.

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) (p. 730) is a practice-focused degree that is detailed in the Nursing section of this Catalog.

Doctor of Social Work

A Doctor of Social Work (DSW) degree is a practice doctorate degree in social work. It provides coursework on theory and skills in social work practice that are more advanced than what one would typically experience in an MSW program for social work.

Admission to Doctoral Degree Programs

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study.

Admission to the Graduate School and the earning of a master's degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student's doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

Residency Requirements

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student's doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog's Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is

not an option. Only courses in which a student earned a "B" grade or better may be transferred. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. PhD Programs Only: A student holding an earned, in-field master's degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. When exercising this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School. The requested transfer credit hours must be listed on the PhD Plan of Study as MSC501 under the transfer credit section. If the in-field master's degree was awarded *more than six years prior to admission to the current doctoral degree program*, the graduate program director or department head/chair must also submit to the Graduate School for evaluation, a Field-Related Employment Since Earning Master's Degree form with the student's CV must be submitted by the department through the UA DocuSign system in myBama. In addition, the department is asked to provide the following, attached to the approved Plan of Study :
 - a. An annotated work history from the student. This history should include job titles and major duties for all positions since earning a master's degree.
 - b. A brief paragraph from the corresponding faculty member, attesting that he/she has reviewed the work history and how that work applies to the current Ph.D. degree program.

The Graduate School will make the final determination about whether up to 24 prior master's hours can be applied to the Ph.D. requirements.

PhD awarding departments that want to participate in offering Option 2 to their doctoral students, need to "opt in" by informing the graduate dean in writing that they wish to be among the approved departments.

Consideration of transfer of credit or the acceptance of an earned master's degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy. Dissertation Research (699) may not be transferred in from an outside institution.

Time Limits

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master's, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those

students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree.

Revalidation of Expired Credits

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department's satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student's re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student's re-admission.

The Continuous Dissertation or Document Registration requirement for 699 and 799 enrollment will be waived for the intervening years between the student's cessation of doctoral work and re-admission.

Plan of Study

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School by the time the student has completed 30 coursework hours.

The PhD, DMA, and DSW Plans of Study are submitted by the department through the UA DocuSign system in myBama. The Plan of Study for other doctoral programs (Ed.D., DNP) are available from the student's department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

A copy of the approved Plan of Study must be submitted to the Graduate School when the department submits the Admission to Candidacy for Doctoral Degree form through the UA DocuSign system in myBama.

Preliminary or Comprehensive Examination

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student's supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student's research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy

The designation of candidacy reflects the student's demonstration of foundational knowledge and readiness to conduct independent research, in the discipline. The requirement for advancing to candidacy is determined by the faculty of the degree program and delineated in the program's section of the Graduate School Catalog and the program's Graduate Student Handbook.

Advancement to candidacy should involve either:

- passing the qualifying (major or preliminary) examination
- completing of all required coursework as listed on the approved program of study
- presenting or defending a dissertation prospectus or proposal
- or some combination of these milestones.

Students are not eligible to register for 699 or 799 credit hours until they have been advanced to candidacy. The Department Chair or Department Director of Graduate Studies, or their designee, shall submit the Admission to Candidacy for the Doctoral Degree form to the Graduate School during the semester that the student meets the program's candidacy requirements.

Continuous Doctoral Research Hours Registration

Once a student meets their program's requirement for admission to candidacy and the designated Department administrator submits the Application for Admission to Candidacy form to the Graduate School, the student may enroll in 699 (dissertation/document research) or 799 (document/project research).

Once initiated, the student must pursue completion of the dissertation/document/project without interruption by enrolling in 699/799 each fall and spring semester of the academic year.

The only time summer registration is required for dissertation/document/project research is when a doctoral student is graduating in August or defending the dissertation/document/project during the summer semester.

Ph.D. students must complete a minimum of 18 hours of dissertation research credits (699). Ph.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.

Ed.D. students must complete a minimum of 12 dissertation research credits (699). Ed.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program's minimum. Thereafter, they must register for a minimum of 1 dissertation

hour each semester, maintaining continuous enrollment in 699 until degree completion.

DMA students must complete a minimum of 4 hours of document research (MUS 699). DMA students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in MUS 699 until degree completion.

DNP Students must complete project research hours in NUR 795-798. DNP students must maintain continuous enrollment for a minimum of 1 hour in a department-specified course until degree completion.

DSW Students must complete a minimum of 9 hours of project research (SW 799). DSW students must register for a minimum of 1 document/project research hour each semester, maintaining continuous enrollment in SW 799 until degree completion.

The amount of dissertation/document/project research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

Dissertation Committee

The dissertation committee may be formed early in the dissertation research process, or shortly before the dissertation proposal is approved. It is expected that the committee will be formed and approved before significant progress is made on the dissertation. The committee must be formally established via a process initiated by the student and requiring the consent of each committee member, followed by Graduate School review for compliance with the regulations outlined below. Click here for instructions on the process of establishing the committee.

The committee must consist of at least five members. It may have additional (voting or nonvoting) members if deemed appropriate. At least one of the committee members must be from outside the student's major department. These external members may be from another academic department at UA, from other universities, or from industry or the professional field. In all cases, these members external to the department/program must be appointed to UA's Graduate Faculty by the dean of the Graduate School, and must have significant professional qualifications that directly contribute to the depth and rigor of the dissertation.

All members of the dissertation committee must hold Graduate Faculty status at The University of Alabama. The chair of the committee must hold Full Graduate Faculty status; others may be Full, Associate, or Affiliate members of the Graduate Faculty. A majority of the Dissertation Committee members must be full-time regular University of Alabama faculty (that is, full-time instructor, assistant professor, associate professor, or professor).

Dissertation Proposal

The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction that provides an overview and states the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal's format with respect to specifics such as the length of the introduction and level of detail of the literature review. Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The

student cannot propose a dissertation and have its final defense in the same semester.

Dissertation

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. The dissertation must be based upon research completed while the student is enrolled at The University of Alabama.

The subject of the dissertation must be approved by the student's dissertation committee and by the dean of the Graduate School. The final dissertation may take the form of a traditional, chapter-based document or a series of full-length publication-ready manuscripts which are part of a larger, cohesive body of work. The format (traditional vs. article-style) must be approved by the committee in accordance with the standards for the program and the discipline.

For article-style dissertations, the document must contain a minimum of three articles, in addition to introductory and concluding materials. A single abstract must accompany the document. In addition to an introduction presenting the unifying framework that supports the research, the document must include a concluding section that summarizes the importance of the work, integrates the major findings, and discusses the implications for the overall body of work.

Individual departments may have policies or guidelines related to whether sections of the dissertation may be included if they have been previously published elsewhere. Copyright issues also may arise if sections of the dissertation have been previously published. Therefore, students who are considering the submission of dissertation chapters/articles for publication prior to their dissertation defense should consult with their advisor, and also with potential publication outlets, before submitting any dissertation-related manuscript for publication.

All parts of the dissertation must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline's style manual require deviation. Students should email gradschool@ua.edu before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

The Dean of the Graduate School must approve the dissertation before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Virtual Participation in Committee-Based Exams/ Defenses

All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.

Technical Requirements

In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for **fully interactive** audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.
7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

Final-Semester Minimum Doctoral Research Hours Registration

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research until reaching their department's minimum requirement, and at least 1 hour for each semester thereafter until degree completion and graduation. If certain conditions are met for the student's final semester, the student may qualify to enroll for fewer hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester#. This exception applies only to students who registered for at least 1-3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

When was the *completed electronic dissertation submitted to ProQuest/the Graduate School?	Minimum hours of 699 registration required in the final semester
By 11:59pm on the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	0
After the Final Grade Entry Day for the student's penultimate semester (date published in the University Academic Calendar#)	1

*"Completed" means submitted to ProQuest after being successfully defended and carefully edited following the defense meeting. The dissertation chair or department designee must submit the Committee Acceptance Form (CAF) through the UA DocuSign system. The CAF must be signed by all committee members, department chairperson, and graduate dean. The CAF is submitted by the department through the UA DocuSign system in myBama. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

Footnotes

¹ International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see "USCIS" section under "Minimum Hours—Other Policies and Regulatory Bodies" on page 3 of this policy.

² The University Calendar is available at the Academics tab of the website of the University Registrar.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University's IRB approval form is available at the IRB website.

Dissertation Defense

The dissertation defense is the culminating experience in the doctoral program. The Dissertation Chair and the student will coordinate with all committee members to choose a time, date, and location for the dissertation defense. All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the defense date. The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

The dissertation defense is comprised of four parts.

1. Public Advance Notice. A minimum of two weeks prior to the scheduled defense date, the candidate must submit the *Public Notice of a Dissertation Defense* form. This form includes the name of the candidate, the department or program, the title of the dissertation, an abstract of 200 words or less, and the date, time, and location of the dissertation defense. The candidate should consult with the Dissertation Chair prior to

initiating this form. The form will be initiated by the candidate and signed by the Dissertation Chair, Graduate Program Director, and the Graduate School. Upon receipt of the completed form, the Graduate Program Director will ensure the scheduled defense is disseminated within the department. The Graduate School will post the scheduled defense on the Graduate School website.

2. Oral Presentation. An oral presentation of the dissertation is required and shall be public. The content and duration of the oral presentation are at the discretion of the Dissertation Chair, in consultation with the Committee, based on departmental norms, disciplinary standards, and traditions.

3. Oral Defense. This examination phase of the dissertation defense is required and may be public or private. Each department or program shall establish a policy for whether the oral defense is public, private, or both (i.e., has a public portion and a private portion).

4. Committee Deliberation. Committee deliberation is required and shall be private. Upon completion of the oral defense, everyone other than the committee members shall leave the defense location while the committee discusses, deliberates, and votes. For a defense to be successful, the majority of the committee must approve the dissertation and the defense.

The results of the dissertation defense must be reported to the Office of the Graduate School by submitting the Committee Acceptance Form at least six weeks before the Fall/Spring commencement, or five weeks before the Summer commencement, at which the degree is to be conferred. The Committee Acceptance Form, submitted by the department through the UA DocuSign system and found in myBama, confirms that a majority of the dissertation committee has approved the written dissertation and oral defense.

Any changes made to the manuscript after the defense must be approved by the Dissertation Chair. The student must submit the final dissertation to the Graduate School, and the Dean of the Graduate School must approve the dissertation, before the student can be cleared for graduation. See "Final Dissertation Submission and Approval" for details.

Final Dissertation Submission and Approval

Following a successful dissertation defense (see "Dissertation Defense" for details), any edits agreed upon during the defense must be incorporated into the manuscript, and the Dissertation Chair must approve the final manuscript. After a careful review to ensure that the manuscript adheres to the Graduate School's formatting guidelines, the candidate must submit the approved manuscript to the Graduate School for final approval, address any remaining edits, and initiate the upload process for archiving the manuscript in the national dissertation repository, ProQuest.

The dissertation, in its final form, must be received in the Graduate School within 60 days of the dissertation defense. If this deadline is not met, the Dissertation Chair may require the candidate to schedule a second dissertation defense. Note that this 60-day deadline is separate from the deadlines for degree conferral and participation in Commencement ceremonies.

Graduate School deadlines for each semester, including deadlines for submitting the final manuscript to the Graduate School to graduate at the end of the semester, are available on the Graduate School's homepage. Consult the Graduate School's dissertation site for additional details of the electronic submission process, including information on exactly what needs to be submitted to the Graduate School. At the stage of the Graduate School review of the manuscript, additional revisions may be required, to ensure that the final manuscript conforms to all formatting

and editing standards. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Application for Graduation

Each candidate for a doctoral degree must submit an Application for Degree via myBama no later than the last day to register or add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School's website under Current Students/Deadlines for Graduate Students.

Withholding or Withdrawing an Advanced Degree

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.
