

# BIOCHEMISTRY, MINOR

---

The minor in biochemistry introduces students to the principles of chemistry and biochemistry. Biochemistry is the study of the chemical processes of living systems and focuses on the structure, properties, and function of important biomolecules, such as proteins, DNA/RNA, and carbohydrates. Students pursuing the biochemistry minor will take courses in general chemistry, organic chemistry, quantitative analysis, and biochemistry.

<b>Code and Title</b>	<b>Hours</b>
CH 101 or General Chemistry	4
CH 117 Honors General Chemistry	
CH 102 or General Chemistry	4
CH 118 Honors General Chemistry	
CH 223 Quantitative Analysis	4
CH 231 Elem Organic Chemistry I	3
CH 232 Elem Organic Chem II	3
CH 237 Elem Organic Chem Lab	2
CH 461 Biochemistry I	3
<b>Total Hours</b>	<b>23</b>

Courses required for the Biochemistry minor may not also be used to satisfy the requirements of the Chemistry minor or Chemistry major.
